Mr. Bryan Bertacchi
Radback Energy
P. O. Box 1690
Danville, CA 94526

Subject: Will Serve Letter – Contra Costa Generating Station LLC,
Oakley, California

Dear Mr. Bertacchi:

Thank you for keeping us informed of Radback Energy's planned power plant development on the DuPont property in Oakley, CA. In confirming our discussions, Diablo Water District does have potable water available for the project; which based on our discussions, will require approximately 250 af/yr with peakflow rates of approximately 370 gpm. Water will be provided once all of the District's requirements for water service have been met, subject to the District's Rules and Regulations in effect from time-to-time, and the interconnection has been approved by our Board.

Sincerely,

Mike Yeraka, P.E.
General Manager
