

APPENDIX 5.1G

Mitigation and Offsets

APPENDIX 5.1G

Offset Listing-Mitigation Strategy

The Bay Area AQMD maintains a listing of its current ERC bank for public review and inspection. The ERC bank listing can be obtained from the AQMD's website, and is not included herein. The CCGS project, pursuant to the AQMD NSR rule is required to purchase or acquire sufficient emission reduction credits to offset the proposed project emissions due to its proposed status as a major modification to a major source. The NSR rule required amounts of ERCs are delineated in Table 5.1G-1

TABLE 5.1G-1 BAAQMD EMISSIONS MITIGATION REQUIRED BY CCGS
Emission Reduction Credits (tons/yr)

	PM ₁₀ /PM _{2.5}	VOC	NO _x	SO _x	CO
	ERC ¹	ERC	ERC	ERC ¹	ERC ²
Total Emissions Required to be Mitigated by the CCGS Per District NSR Rule	41.8	30.0	98.8	12.5	96.1

(NSR ratios not applied to these values)

* Values derived from Section 5.1.

¹ These pollutants do not trigger the ERC requirements of the BAAQMD Rules

² CO mitigation is not required due to attainment status of District.

CCGS Proposed Mitigation Program

The proposed mitigation strategy for CCGS is being submitted as a confidential filing under separate cover. This strategy will be finalized and approved by the BAAQMD prior to the issuance of the authority to construct for the proposed project.
