

SECTION 6

Training

Personnel at the site will receive training appropriate for individual roles and responsibilities on the Project. Appropriate personnel will receive training on DESC/P/SWPPP implementation, BMP inspection and maintenance, and record keeping. Stormwater management and BMPs are included in the Worker Environmental Awareness Program (WEAP) materials. Completion of the WEAP training, which also includes a video presentation, is required for each construction worker on the Project. WEAP training records will be kept on-site during construction.

All training activities (formal and informal) will be documented, and records will be included in Attachment M or in an accompanying file/binder that is referenced in the DESC/P/SWPPP and readily accessible on-site.

All elements of the DESC/P/SWPPP will be developed by a QSD and implemented by a QSP. The QSP may delegate tasks to trained employees provided adequate supervision and oversight is provided.

Documentation of all training for persons responsible for implementing the requirements of the General Permit will be provided in the Annual Report.
