

7.0 REPORTING REQUIREMENTS

Implementation of the WMP will include the following data collection and reporting. Reports will be subject to the Revegetation and Project Adaptive Management process described in the Site Rehabilitation and Revegetation Plan. Each party will retain reports in their files according to respective internal policies.

7.1 Construction Reports

During the construction phase, ongoing reporting on noxious weed management will be included in monitoring reports. Construction weed monitoring reports will include the following information:

- Survey findings on location, type, extent, and density of noxious weeds. This data will include mapping and photographs, as appropriate, as well as textual and tabular data content to fully describe conditions on the Project.
- Management efforts, including date, location, type of treatment implemented, and results. Ongoing evaluation of success of treatment will be included.
- Information on implementation and success of preventative measures, including status of equipment wash facilities and summary data of use; data on the worker environmental training program, including participants.
- Summary description of restoration efforts undertaken, adaptive measures employed based on on-the-ground conditions, and the current status of the effort.

7.2 Long-term Monitoring Reports

After implementation of site revegetation, long-term monitoring reports will be focused on success of revegetation sites. These reports will include:

- Survey findings on location, type, extent, and density of noxious weeds. These data will include mapping and photographs, newly identified species, submissions to herbaria, as appropriate, as well as textual and tabular data content to fully describe conditions on the project site.
- Management efforts, including date of efforts, location, types of treatment implemented, and results. Ongoing evaluation of success of treatment will be included.
- The reports will also include a complete description of restoration efforts and status with regard to performance criteria.

7.3 Reporting Periods

7.2.1 Construction Period

The ECM and monitoring team will maintain all monitoring records. These records will be summarized into monthly summary reports, where relevant, describing information relevant to noxious weed management. All data will be included in annual reports.

A single post-construction report will be produced after each phase of construction is completed at PSEGS, with a section summarizing the overall results of noxious weed management and weed status at the site. Construction reports will be made available to agency personnel. Agency personnel and contact information will be identified and would include the BLM and the CEC.

7.2.2 Long-term Monitoring Reports

Annual monitoring reports will be produced for the duration of the monitoring period. These reports will discuss the results of monitoring and weed control activities. Once success criteria are met, a final monitoring report will be produced to describe the outcome to date of proposed restoration, including status of noxious weed management on the project site. All annual monitoring reports will be made available to agency personnel. Agency personnel and contact information will be identified and would include the BLM and the CEC.
