

**PALOMAR ENERGY PROJECT (01-AFC-24)
CEC STAFF DATA REQUEST NUMBER 79**

Technical Area: Visual Resources

Response Date: April 8, 2002

REQUEST:

Please identify the number of residences that would have views of the pipeline route during construction and the proximity of those residences to the route.

RESPONSE:

There are a total of 10 single family residences fronting on Harmony Grove Road along the portion of the water line route between Enterprise Street and the lines' connection point with existing City reclaimed water lines north of Escondido Creek. There also are several scattered single family residences south of Harmony Grove Road near Escondido Creek; these are located from about 50 to 150 yards from the route. Perhaps 25 or 30 residences of the Kona Kai neighborhood west of the ERTC have a view of the portion of the pipeline route that traverses the ERTC site. These residences to the west are 1,500 feet or more from the pipeline route.
