Attn: Rob Wood

Dear Mr. Wood:

Delta Power Company, LLC (Delta) is planning to develop a natural gas fired power generating facility in Chino, San Bernardino County, California. The Chino Power Plant will include four simple cycle combustion turbines rated at a total nominal capacity of 180 MW. The first unit is planned to be online by September 30, 2001, as required under the California Energy Commission's (CEC) emergency permitting rules. The remaining units will be brought online during the following months. The facility will be subsequently converted to a combined cycle configuration.

Black & Veatch is providing permitting assistance to Delta and has begun the process of preparing applications for submittal to the CEC. One requirement of the application process is to notify any interested Native American communities in proximity to the proposed facility. As such, we would appreciate your providing us with the appropriate notification list as soon as possible.

Thank you for your cooperation and immediate attention to this matter. Please contact me at 503-675-3169 if you have any questions regarding this request.

Very truly yours,

BLACK & VEATCH CORPORATION

Ladies/Gentlemen:

Delta Power Company, LLC (Delta) is planning to develop a natural gas fired power generating facility in Chino, San Bernardino County, California. The Chino Power Plant will include four simple cycle combustion turbines rated at a total nominal capacity of 180 MW. The first unit is planned to be online by September 30, 2001, as required under the California Energy Commission's (CEC) emergency permitting rules. The remaining units will be brought online during the following months. The facility will be subsequently converted to a combined cycle configuration.

Black & Veatch is providing permitting assistance to Delta and has begun the process of preparing applications for submittal to the CEC. One requirement of the application process is to demonstrate compliance with the National Historic Preservation Act and related California and federal legislation in proximity to the proposed facility. As such, we would appreciate your providing us with any information your agency has on cultural and paleontological resources on the project site or in the immediate vicinity. Any addition comments or concerns are also welcomed at this time. I have enclosed a locator map for the proposed facility.

As the project is utilizing the 21-day Emergency Permitting Process for the facility your cooperation and immediate attention to this matter will be much appreciated. Thank you in advance of your attention to this matter. Please contact me at 503-675-3169 if you have any questions regarding this request.

Very truly yours,

RE: Native American Contacts List, Delta Power Company, LLC Natural Gas Fired Power Generating Facility Project, Chino, San Bernardino County

Dear Dr. Brooks:

Enclosed is a list of Native Americans individuals/organizations who may have knowledge of cultural resources in your project area. The Commission makes no recommendation or preference of a single individual, or group over another. This list should provide a starting place for contacting Native Americans who may have interest in your project. I suggest you contact all of those indicated, if they cannot supply information, they might recommend others with specific knowledge. A minimum of two weeks must be allowed for responses after notification.

If you receive notification of change of addresses and phone numbers from any these individuals or groups, please notify me. With your assistance we are able to assure that our lists contain current information. If you have any questions or need additional information, please contact me at (916) 653-4040.

Sincerely,

A handwritten signature in black ink that reads "Rob Wood".

RE: Delta Power - Chino Power Plant

Dear Ms. Andreas:

Delta Power Company, LLC (Delta) is planning to develop a natural gas fired power generating facility in Chino, San Bernardino County, California, approximately 0.5 mile west of Euclide Avenue on Eucalyptus Avenue within the boundary the California Men's Correctional Facility (map enclosed). The Chino Power Plant will include four simple cycle combustion turbines rated at a total nominal capacity of 180 MW. The first unit is planned to be online by September 30, 2001, as required under the California Energy Commission's (CEC) emergency permitting rules. The remaining units will be brought online during the following months. The facility will be subsequently converted to a combined cycle configuration.

Black & Veatch is providing permitting assistance to Delta and has begun the process of preparing applications for submittal to the CEC. A short time ago we contacted Rob Wood of the Native American Heritage Commission to determine whether or not our proposed development would affect any Native American cultural resources that may be present. We are sending this letter to you since you were one of the individuals/organizations on the list provided by the Native American Heritage Commission to contact for notification of their determination/findings and also obtain any additional knowledge that you may have concerning cultural resources at our project site.

Thank you for your cooperation and immediate attention to this matter. Please contact me at 503-675-3169 if you have any questions regarding this request.

Black & Veatch is providing permitting assistance to Delta and has begun the process of preparing applications for submittal to the CEC. A short time ago we contacted Rob Wood of the Native American Heritage Commission to determine whether or not our proposed development would affect any Native American cultural resources that may be present. We are sending this letter to you since you were one of the individuals/organizations on the list provided by the Native American Heritage Commission to contact for notification of their determination/findings and also obtain any additional knowledge that you may have concerning cultural resources at our project site.

Thank you for your cooperation and immediate attention to this matter. Please contact me at 503-675-3169 if you have any questions regarding this request.

Very truly yours,

BLACK & VEATCH CORPORATION

RE: Delta Power - Chino Power Plant

Dear Mr. Morales:

Delta Power Company, LLC (Delta) is planning to develop a natural gas fired power generating facility in Chino, San Bernardino County, California, approximately 0.5 mile west of Euclide Avenue on Eucalyptus Avenue within the boundary the California Men's Correctional Facility (map enclosed). The Chino Power Plant will include four simple cycle combustion turbines rated at a total nominal capacity of 180 MW. The first unit is planned to be online by September 30, 2001, as required under the California Energy Commission's (CEC) emergency permitting rules. The remaining units will be brought online during the following months. The facility will be subsequently converted to a combined cycle configuration.

Black & Veatch is providing permitting assistance to Delta and has begun the process of preparing applications for submittal to the CEC. A short time ago we contacted Rob Wood of the Native American Heritage Commission to determine whether or not our proposed development would affect any Native American cultural resources that may be present. We are sending this letter to you since you were one of the individuals/organizations on the list provided by the Native American Heritage Commission to contact for notification of their determination/findings and also obtain any additional knowledge that you may have concerning cultural resources at our project site.
