Attn: Mr. Lauren Minor

RE: Electric Interconnect Request for Lancaster Energy Facility #1

Dear Mr. Minor:

I am formally requesting an application to interconnect new peaking generation to the ISO controlled grid. This new generation will be owned and operated by Electricity Provider, Inc. (EPI). The Lancaster Energy Facility #1 will initially consist of four natural gas turbine generators with an anticipated three additional gas turbine generators and will interconnect into the Lancaster 69kV sub transmission line.

The Interconnection Application is attached. Also, enclosed are the equipment data sheets for the generator and exciter, and a single line diagram depicting the proposed plant electrical system. In addition, we will copy the ISO on this request.

As required a deposit in the amount of \$60,000.00 is included.

Please review this application for completeness, and advise if you require any additional information. Due to the urgent need to site this new generation, we are requesting an expedited review and approval of this application. Based on Governor Davis' executive order D-26-01, it is our understanding that we can expect a completed interconnection study within seven days. If you have any questions or need any further information, please call me at (714) 505-0874.

Sincerely,

Steve Wilburn
