I am writing to express my opposition to the proposed power plant at the corner of Mast Blvd and West Hills Parkway. This land is part of Mission Trails Regional Park and must remain as open park land. This land is also in very close proximity to West Hills High School and West Hills Little League fields. The pollution from this plant will be detrimental to the health of these kids as they will be breathing toxic fumes as they play. I also live in close proximity to this site and do not want my family subjected to the pollution this plant will emit.
