Public Comment regarding the proposed Quail Brush Generation Project

I would like to make the following written comment. I understand that my comments will be docketed and may be posted on the Energy Commission’s website and be available to the public.

Quail Brush is not needed. SDG&E has a new power line to bring in power from Four Corners and Mexico (Sunrise Power Link) and prevailing winds are to the East. Plumes will first hit the neighboring high school and all residential areas of the Santee Valley. Water affluent from the project will sargage ground water and plant in river (San Diego river) water.

The project is far removed from City of San Diego Fire Protection and the City of Santee. I understand, and no mutual fire aid plan for the subject area.
