Public Comment regarding the proposed Quail Brush Generation Project

I would like to make the following written comment. I understand that my comments will be docketed and may be posted on the Energy Commission’s website and be available to the public.

1. As the Audubon society expert pointed out, weeds will be brought in by crew, roads + trucks, thus destroying native plants.

2. San Diegoans need to conserve and explore solar, wind + wave generation - not more polluting petroleum-based power.

3. The plant will ruin the quality of life for the animals in the past + for the people who use it as a refuge.

4. This power is too expensive and backwards and not needed.
