Public Comment regarding the proposed Quail Brush Generation Project

I would like to make the following written comment. I understand that my comments will be docketed and may be posted on the Energy Commission's website and be available to the public.

The applicant for the unneeded power plant is demonstrating complete disregard to the wishes of the area's citizens and elected officials. The project is not needed. The region's electricity needs can be met with conservation, renewable energy sources and existing fossil fuel plants. The proposal to locate a polluting power plant adjacent to a park where people go for fresh air must be rejected. We need more rooftop solar, along with energy storage and efficiency measures. Please reject this project as the wrong solution to a non-existent problem.
