Public Comment regarding the proposed Quail Brush Generation Project

I would like to make the following written comment. I understand that my comments will be docketed and may be posted on the Energy Commission’s website and be available to the public.

Considering the obvious impacts to the health of the ecosystem, including its human and animal inhabitants, of this QB Generation Project, I must voice my opposition to the proposal. The citizens of this area have already voiced their steadfast opposition to this project, and I believe it is the responsibility of CA Energy Commission to be accountable to that opposition. The public can decide when and how to intervene on their behalf, and given the opposition to this project, it should be completely reconsidered.
