Subject: **ROSEVILLE ENERGY PARK DATA ADEQUACY RECOMMENDATION  
(03-AFC-1)**

We have reviewed the Roseville Energy Park Application for Certification (AFC) filed by Roseville Electric on October 30, 2003. The applicant proposes to construct and operate a 160 megawatt (MW) natural gas-fired, combined-cycle electric generating facility.

Staff has completed its data adequacy review of the AFC and does not believe it meets the requirements of Title 20, § 1704, Appendix B for the 12-month process. Therefore, we recommend that the Energy Commission find the AFC inadequate and adopt the enclosed list of deficiencies. Of the 23 technical disciplines reviewed, we believe the information contained in the AFC is deficient in 11 areas. The sections of the AFC that require additional information to meet data adequacy for the 12-month process are: Air Quality, Biological Resources, Cultural Resources, Paleontological Resources, Project Overview, Socioeconomics, Soils, Traffic and Transportation, Transmission System Engineering, Visual Resources, and Water Resources.

Attached is a summary table and data adequacy worksheets for all technical disciplines. The worksheets for the aforementioned sections identify the additional information that we believe is necessary to fulfill the AFC data adequacy requirements.

At the Energy Commission's business meeting on December 3, 2003, I will be recommending that the Energy Commission adopt the list of deficiencies and not accept the AFC until the additional information specified in the data adequacy worksheets is supplied.

If you have any questions, please call Bob Eller, the Energy Commission's Project Manager, at (916) 651-8835.
