In the Matter of:)	
Application for)	APPLICANT'S PREHEARING
Small Power Plant Exemption)	CONFERENCE STATEMENT
For the Santa Clara, SC-1 Data Center)	

In a Notice dated February 6, 2012, the California Energy Commission's ("Energy Commission") committee overseeing the proceedings related to the Application for Small Power Plant Exemption for the Santa Clara, SC-1 Data Center directed parties to file a prehearing conference statement for the February 22, 2012, evidentiary hearing. The Notice indicated that the prehearing conference statements should address the subjects discussed below.

a) TOPIC AREAS THAT REMAIN DISPUTED AND REQUIRE ADJUDICATION

The Applicant has reviewed the Energy Commission Staff analysis presented in the *Initial Study and Negative Declaration Recommendation* filed February 1, 2012. As a result, the Applicant believes that with respect to the Energy Commission Staff, there are no disputed issues and there will be no need for adjudication of disputed issues. The Applicant notes, however, that the time for filing motions to intervene ends on the same day this filing is due and agency comments can be filed as late as the day of the evidentiary hearing, so it is not yet possible to know for sure whether intervenors or agencies will raise issues that are disputed and require adjudication.

b) THE IDENTITY OF EACH WITNESS SPONSORED BY THE APPLICANT

The Applicant will rely on the Application for a Small Power Plant Exemption ("Application") as evidence in this proceeding. For the propose of admitting the Application into the record, the witness will be Nora H. Monette, the Project Manager for the Santa Clara, SC-1 Data Center. A declaration and resume for Ms. Monette are included as Attachment A.

c) TOPIC AREAS UPON WHICH THE APPLICANT DESIRES TO CROSS-EXAMINE WITNESSES

At this time the Applicant sees no need to cross-examine witnesses.

d) A LIST OF IDENTIFYING EXHIBITS AND DECLARATIONS THAT THE APPLICANT INTENDS TO OFFER INTO EVIDENCE

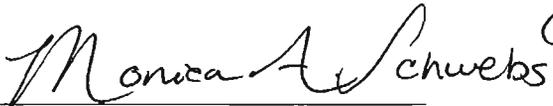

The Applicant is providing a list of exhibits in Attachment B. The exhibits consist of the Application and its appendices which are available on the Energy Commission's website at http://www.energy.ca.gov/sitingcases/santaclara/documents/applicant/SPPE_Application/.

**e) PROPOSED MODIFICATIONS TO THE PROPOSED CONDITIONS OF
CERTIFICATION BASED UPON ENFORCEABILITY, EASE OF
COMPREHENSION AND CONSISTENCY WITH THE EVIDENCE**

At this time the Applicant sees no need for modifications.

Date: February 13, 2012

Respectfully submitted,

Nora Monette is a Principal Project Manager/Planner for the company. She has over 23 years of experience preparing and managing environmental documents for a broad spectrum of projects including residential, commercial and industrial development, General Plan updates, and transportation and energy projects.

As a Principal Project Manager, Ms. Monette:

- Provides management and oversight in preparation of environmental documents by others, ensuring consistency and credibility. Ms. Monette ensures that all documents reflect the best available technical expertise.
- Researches and prepares environmental documents required under Federal and California laws including Environmental Impact Reports and Environmental Impact Statements, Environmental Assessments, Natural Environment Studies, and Initial Studies. Ms. Monette is responsible for the entire project life cycle, from proposal development through report delivery and client support.

Relevant Project Experience

- Santa Clara SC-1 Data Center – Ms. Monette was the Principal Project Manager for the IS/MND for the Santa Clara SC-1 Data Center in the City of Santa Clara. The primary environmental issues addressed included air quality, cultural resources, hazardous materials, and global climate change.
- Silicon Valley Power Palm Substation Addendum – Ms. Monette was the Principal Project Manager for the Addendum for construction of the Palm Substation. Significant issues discussed in the Addendum included aesthetics, biological resources (burrowing owls), hazardous materials contamination, land use, noise, and growth-inducement impacts.
- 230kV Transmission Line EIR – Ms. Monette was the Project Manager for the CEQA analysis that evaluated construction of a four-mile overhead and underground 230 kV transmission line in the South Bay. Key issues included EMF, landfill hazards, geology and soils, biological resources, and energy.
