Attorneys for the CALIFORNIA
UNIONS FOR RELIABLE ENERGY

California Unions for Reliable Energy (“CURE”) submits this status report, pursuant to the Committee’s May 7, 2009 Scheduling Order.

CURE submitted a second and third set of data requests on July 14, 2009 and July 27, 2009, respectively, seeking information concerning the Project’s biomass handling, storage and supply, mobile source emissions, fly ash production and disposal, biomass combustor emissions, evaporation pond residues, and heat transfer fluid (“HTF”) spills, and HTF contaminated soil, among other issues. The Applicant objected to some of CURE’s requests on August 3, 2009 and August 17, 2009. CURE is currently evaluating the need to petition the Committee for an order directing the Applicant to respond to CURE’s requests.

The Applicant provided responses to some of CURE’s data requests on August 13, 2009 and August 26, 2009. CURE is currently evaluating the Applicant’s responses and may need to submit follow-up data requests if additional information is needed.

On August 24, 2009, CURE submitted a fourth set of data requests seeking information regarding the Project’s impacts on agriculture and biological resources, among other issues.

Finally, CURE is reviewing the Applicant’s responses to Staff’s issues raised at the August 6, 2009 workshop. CURE notes that the Applicant did not include several of the issues raised by CURE during the workshop that CURE may need to follow-up on with formal data requests. CURE will identify any data requests as

soon as possible after reviewing these and any forthcoming documents submitted by the Applicant.

Dated: August 28, 2009

Respectfully submitted,
