

## **Section 6      LOCAL IMPACT ASSESSMENT**

---

The following sections provide a description of the modifications proposed to the BSPP as they may affect the assumptions, rationale, and Conditions of Certification in the Commission Final Decision. As discussed in Section 2 of this Petition, PVSI has not yet selected the exact combination of fixed tilt and single access tracking PV modules for the site. Such selection will be made as part of the final design of the BSPP. However, where there are differences between the two systems, PVSI has included a comparison of each for the Commission to consider a “worse-case” for each technical area. Ultimately the selection of either fixed-tilt or tracking PV systems or a combination of both systems will not affect: the maximum or peak amount of construction and operation workers and associated traffic; the overall socioeconomic impacts; the amount of noise generated during construction or operation; or the overall visual impact of the site.
