**Subject:** GWF Tracy- Combined Cycle Power Plant

Dear Mr. Geronimo:

This letter confirms our conversation regarding the water supply for the proposed GWF Tracy Power Plant to be located at the existing Tracy Peaker Plant (TPP). Byron Bethany Irrigation District (BBID or District) currently provides a Municipal & Industrial (M&I) water supply to TPP. As I understand, the proposed plant will require up to 54.5 acre-feet of water annually, which equates to an additional site demand of approximately 25 acre-feet of water annually. The additional water supply required for the proposed project would be considered a M&I water supply, in addition to TPP's existing use of water.

If you have any questions, please contact me directly.

Sincerely,

A handwritten signature in black ink, appearing to read "Rick Gilmore", written in a cursive style.

Rick Gilmore  
General Manager
