Howdy Wes,

Unfortunately, I am not in the position to answer the questions you have. If you would like to use information like that in your report then you will have to have further discussions with the CEQA Lead. Sorry.

Tonya,

I'm not trying ruffle any feather but I read the report of the SCLA Rail project and I have a couple of questions:

- Where were the Desert Tortoise and MGS's observed?
- When were the sightings?
- Who observed the MGS?

The attached report doesn't have any maps of species sighted. I looked at all of the resumes attached to the report and no one appears to have a MGS permit. If you have additional data, we would like to incorporate it in our report. Thanks

Wes

Arrie,

The MGS citing discussion is on Page 7 & 8. No trappings; just a citing.

Regards,

Tony
