C – Database Report

## Executive Summary

This Phase I Environmental Site Assessment (ESA) was prepared by ENSR under contract to Inland Energy in order to identify, to the extent feasible, recognized environmental conditions in connection with the proposed Victorville 2 Hybrid Power Project (VV2 Project) located in Victorville, San Bernardino County, California. This assessment is part of the due diligence process for the development by the City of Victorville of the VV2 Project on the subject property (described below) and is being performed both to assist in meeting the requirements for the innocent landowner defense under the Comprehensive Environmental Response, Compensation, and Liability Act and to evaluate business environmental risk associated with this property.

### Subject property location and description

The VV2 Project site consists of a total of three parcels and linear facilities (the “subject property”), as follows:

- The proposed “power plant” area, approximately 300 acres at 13612 Martin Hollow Road, located approximately 3.6 miles east of U.S. Highway 395, and adjacent to the east of Helendale Road. The proposed power plant area is bordered to the west by Helendale Road, on the north by Desert Flower Road, on the south by Colusa Road and on the east by undeveloped land that slopes down to the Mojave River, approximately one mile east of the site.
- A roughly 30-acre construction laydown area located west of the power plant area
- A roughly 20-acre construction laydown area located adjacent to the southeast corner of the “power plant” area.

Abandoned vehicles, abandoned structures, and one occupied residence were observed within the “power plant” area of the subject property.

The VV2 Project also includes the following linear facilities:

- An approximately ¼-mile long natural gas supply pipeline along the southern boundary of the power plant area that connects to an existing gas line west of the subject property
- Reclaimed water and sanitary wastewater pipelines, extending from the southeast corner of the power plant area to the Victor Valley Wastewater Reclamation Authority (VWVRA) treatment plant located less than one mile southeast of the power plant area
- Approximately four miles of new transmission lines (in a new right-of way between the power plant area of the subject property and the interconnection point with the existing regional transmission system south of the plant site, near the existing High Desert Power Project (HDPP) facility).

### Site history

Historical research indicates that the plant site and laydown areas were and currently are almost entirely vacant undeveloped land. A few dwellings appear and are depicted on site in the 1984 aerial photograph for the subject property; there currently is one occupied dwelling on the plant site.

### Incidents and notifications

Federal and state environmental-related databases were searched for the area surrounding the subject property. The radial search distances used equal or exceed those proposed by the American Society for Testing and Materials (ASTM) for assessing the environmental condition of commercial real estate. The subject property was not identified on the Federal and state environmental-related databases were searched.

Trichloroethylene (TCE) contamination in groundwater associated with the former George Air Force Base (GAFB - now the Southern California Logistics Airport [SCLA]) was identified as part of the GAFB Superfund site. TCE contamination associated with the GAFB Superfund site was found to extend through the locations associated with the proposed linear facilities near the VVWRA treatment plant. This TCE groundwater plume is present in the lower aquifer (approximately 210 to 250 below ground surface [bgs]) along the routes for the VV2 Project sanitary wastewater pipeline and transmission lines. No other issues of concern were identified.

### **Summary of findings and conclusions**

The presence of TCE-impacted groundwater near the VVWRA treatment plant is a Recognized Environmental Condition (REC) in association with the VV2 linear facilities. Also, the potential for de minimus hazardous materials or wastes (cleaning chemicals, petroleum product residues) to be present in abandoned vehicles and/or abandoned structures on the Project site was identified.

### **Recommendations**

Based on the above findings, ENSR recommends the following:

- Although the depths of excavation associated with installation of VV2Project linear facilities are not expected to approach the approximately 210 to 250-foot bgs depths where the TCE groundwater contamination exists (e.g., the excavations for Project pipelines are not expected to exceed 6 feet bgs and transmission line structures would require excavations not exceeding approximately 30 feet bgs), the most current data associated with the TCE plume should be obtained from the SCLA prior to construction activities associated with the linear facilities, and construction planning for these linear facilities should take the TCE plume into consideration.
- Construction planning should include consideration of the possible presence of hazardous materials or wastes (e.g., cleaning chemicals, petroleum product residues) associated with abandoned vehicles and/or abandoned structures on the site, and appropriate measures taken to ensure that this issue is properly assessed and hazardous materials/wastes (if present) are properly managed and disposed in accordance with applicable regulations.

## 1.0 Introduction

### 1.1 Purpose

This Phase I Environmental Site Assessment (ESA) was prepared under contract to Inland Energy to identify, to the extent feasible, recognized environmental conditions in connection with the subject property. Inland Energy is managing the development of the Victorville 2 Hybrid Power Project (VV2 Project) for the City of Victorville. This assessment is part of the due diligence process for the potential development of the VV2 Project on the subject property by the City of Victorville and is being performed both to assist in meeting the requirements for the innocent landowner defense under the Comprehensive Environmental Response, Compensation, and Liability Act and to evaluate business environmental risk associated with this property.

### 1.2 Detailed scope of services

ENSR performed a Phase I ESA including a site visit, historical research, and a database search for the above-referenced property. The work was performed in general accordance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard Practice E 1527-00 for ESAs. This ESA project did not include asbestos, lead-based paint, lead in water, radon sampling, or a wetland evaluation in accordance with the proposed scope of work. All conclusions made in this report are based upon the assessment performed and are subject to the Service Constraints presented in Section 1.4.

### 1.3 Study limitations and assumptions

Because of the size of the subject property, ENSR did not "walk through" or crisscross the site in its entirety; rather, the site was viewed from perimeter dirt roads, and other strategic on-site vantage points. No other physical limitations were encountered with regard to this assessment. Limited historical information was available for the subject property, due to the remote and generally uninhabited nature of the area.

### 1.4 Service constraints

#### 1.4.1 General

This report, including all supporting field data and notes (collectively referred to hereinafter as "information"), was prepared or collected by ENSR for the benefit of Inland Energy and the City of Victorville. Inland Energy and the City of Victorville may release the information to third parties, who may use and rely upon the information at their discretion. However, any use of or reliance upon the information by a party other than specifically named above shall be solely at the risk of such third party and without legal recourse against ENSR, its parent or its subsidiaries and affiliates, or their respective employees, officers or directors, regardless of whether the action in which recovery of damages is sought is based upon contract, tort (including the sole, concurrent or other negligence and strict liability of ENSR), statute or otherwise. This information shall not be used or relied upon by a party that does not agree to be bound by the above statements.

#### 1.4.2 Scope of services

This report describes the results of ENSR's due diligence assessment to identify the presence of environmental liabilities materially affecting the subject facility and/or property. In the conduct of this due diligence evaluation, ENSR assessed the presence of such problems within the limits of the agreed upon scope of work.

In the conduct of this due diligence investigation, ENSR has attempted to independently assess the presence of such problems within the limits of the agreed upon scope of work. As with any due diligence evaluation, there is a certain degree of dependence upon oral information provided by the client or other organizations which is not readily verifiable through visual observations or supported by any available written documentation.

ENSR shall not be held responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time this assessment was performed.

This report and all field data and notes were gathered and/or prepared by ENSR in accordance with the agreed upon scope of work and generally accepted engineering and scientific practice in effect at the time of ENSR's assessment of the subject site. The statements, conclusions, and opinions contained in this report are only intended to give approximations of the environmental conditions at the subject site.

### **1.4.3 Time**

The passage of time may result in changes in technology, economic conditions, site variations, or regulatory provisions which would render the report inaccurate. Reliance on the report after the date of issuance as an accurate representation of current site conditions shall be at the user's sole risk. Should ENSR be required to review the report after one year from its date of submission, ENSR shall be entitled to additional compensation at then existing rates, or such other terms as may be agreed upon between ENSR and the client.

## 2.0 Site reconnaissance

An ENSR representative visited the subject property on May 3, 2006, and was initially accompanied during the site visit by Mr. Tony Penna, Inland Energy's Project Manager for the VV2 Project. However, due to Mr. Penna's schedule, the ENSR representative was unescorted during the majority of the site visit.

### 2.1 Land areas

The VV2 Project site consists of a total of three parcels and linear facilities (the "subject property"), as follows:

- The proposed "power plant" area, approximately 300 acres at 13612 Martin Hollow Road, located approximately 3.6 miles east of U.S. Highway 395, and adjacent to the east of Helendale Road
- A roughly 30-acre construction laydown area located west of the power plant area
- A roughly 20-acre construction laydown area located adjacent to the southeast corner of the power plant area.
- An approximately ¼-mile long natural gas supply pipeline along the southern boundary of the power plant area that connects to an existing gas line west of the subject property
- Reclaimed water and sanitary wastewater pipelines, extending from the southeast corner of the power plant area to the Victor Valley Wastewater Reclamation Authority (VVWRA) treatment plant located less than one mile southeast of the power plant area
- Approximately four miles of new transmission lines (in a new right-of way between the power plant area of the subject property and the interconnection point with the existing regional transmission system south of the plant site, near the existing High Desert Power Project (HDPP) facility).

The power plant site is bordered to the west by Helendale Road, on the north by Desert Flower Road, on the south by Colusa Road and on the east by undeveloped land that slopes down to the Mojave River, approximately one mile east of the site. A site location map is provided as Figure 1 and a site plan is provided as Figure 2 (attached).

The parcels that make up the subject property are in the process of being acquired by the City of Victorville. According to San Bernardino County Assessor records, the subject property is owned by various individuals and organizations. Details associated with property owners for the parcels that make up the subject property can be found in Appendix A of this report.

### 2.2 Site activities

#### 2.2.1 Power Plant Area

The power plant area of the subject property is currently almost entirely undeveloped land consisting of native desert landscape and undeveloped roads. The area is presently accessed from Colusa Road, an unpaved dirt road that runs east to west and constitutes the southern boundary of the power plant area. Abandoned automobiles, abandoned dwellings, and one occupied residence (occupied by squatters) thought to be on the property were observed within the power plant area of the subject property. No evidence of past industrial activities were observed on the subject property

Markers for a subsurface petroleum pipeline, indicating the pipeline runs east to west along Colusa Road, were observed at the southeast corner of the power plant site at Colusa Road, approximately 1/4 mile east of the corner of Colusa and Helendale Road (Appendix B, Photo No. 1). All other observations at this location were of native desert landscape. What appeared to be a fenced-in pipeline maintenance structure was observed on the subject property near the corner of Colusa Road and Helendale Road (Appendix B, Photo No. 2). The structure was marked as "Kinder Morgan", assumed to be the pipeline owner/operator. There was no evidence of hazardous material releases around the perimeter of the structure. The structure was not entered because the area was secure and entrance was prohibited.

Shady Hills Road (unpaved) runs east-west across the power plant area (parallel and approximately 700 feet north of Colusa Road). A number of abandoned cars located near what appeared to be an abandoned trailer were observed on the south side of Shady Hills road on the subject property (Appendix B, Photo No. 3). No evidence of hazardous materials, and/or a hazardous materials release was observed in association with the abandoned cars or trailer. However, residual motor oil and/or hazardous materials that may be contained in the abandoned vehicles may be present. A number of what appeared to be abandoned dwellings were also observed along Shady Hills Road (Appendix B, Photo Nos. 4 through 6), which could also contain hazardous materials. However, due to security and safety concerns, a detailed inspection of these abandoned vehicles and structures could not be completed.

Another unpaved roadway, Martin Hollow Road, runs east-west across the site, parallel to and approximately 2,000 feet north of Colusa Road. Native desert landscape was observed on both the north and south sides of Martin Hollow Road. No evidence of hazardous materials, and/or of a hazardous materials release was observed on/near this road.

An undeveloped and unnamed roadway was observed extending east-west, parallel to and approximately 3,300 feet north of Colusa Road. Two separate abandoned dwellings surrounded by wooden pallets and other pieces of cut lumber were observed (Appendix B, Photo Nos. 7 and 8). No evidence of hazardous materials, and/or a hazardous materials release was observed in this location. However hazardous materials may be present in the abandoned dwellings.

Desert Flower Road (unpaved) runs east-west essentially along the northern boundary of the power plant area, approximately 5,000 feet north of and parallel to Colusa Road. Native desert landscape was observed on both the north and south sides of this road. No evidence of hazardous materials, and/or a hazardous materials release was observed on/near this road.

### **2.2.2 Western Laydown Area**

The laydown area to the west of the power plant site included markers for underground pipelines (Appendix B, Photo No. 9); all other observations were of native desert landscape. No evidence of hazardous materials and/or a hazardous materials release was observed in this area.

### **2.2.3 Southern Laydown Area**

The laydown area located southeast of the power plant site was observed as native desert landscape. No evidence of hazardous materials and/or a hazardous materials release was observed in this area.

Outlying areas surrounding the perimeter of the plant site/laydown areas consist of undeveloped land in native vegetation.

### **2.2.4 Linear Facilities**

The corridor currently established to locate the linear facilities associated with the proposed VV2 Project operations was also assessed. These facilities include a transmission line corridor that initiates at the

southeast corner of the subject property and extends in a generally south-southeast direction to a point near the intersection of Shay Road and Perimeter Road, where it then connects to infrastructure currently used to extend transmission lines. This transmission line corridor passes to the east of the Southern California Logistics Airport (SCLA) and through the Victor Valley Wastewater Reclamation Authority (VWVRA) treatment plant. Most of the corridor consists of undeveloped land in native vegetation, with the exception of activities conducted at the VWVRA treatment plant. Linear facilities, including the natural gas pipeline, reclaimed water and sanitary wastewater pipelines, and a portion of the transmission lines, pass to/through the VWVRA treatment plant (Appendix B, Photo No. 10). An inspection of the VWVRA treatment plant was not conducted as part of this Phase I ESA. However records discussed in Section 7.0 of this report do include those associated with VWVRA activities.

The transmission line corridor also runs adjacent to a closed landfill located approximately 3 miles south-southeast of the power plant area of the subject property (Appendix B, Photo No. 11). This landfill is identified as George AFB Disposal Site LF-14 (L-13), and is discussed in Section 7.0 of this report.

No Recognized Environmental Concerns (RECs) were identified during the site visit. However, residual petroleum products and/or hazardous materials that may be contained in the abandoned vehicles and/or abandoned structures do represent a potential environmental concern.

### **2.3 Utilities**

The subject property is undeveloped and utilities have not yet been established. A number of markers indicating the presence of an underground petroleum pipeline were observed on the power plant area of the subject property and the laydown area to the west of the site. The operator of the petroleum pipeline is Kinder Morgan.

### **2.4 Oil and hazardous materials storage and use**

The subject property is undeveloped and no oils and/or hazardous materials (stored or used) are currently known to be present on site. However, petroleum products and/or hazardous materials are presumed to be present in the abandoned vehicles observed on site. Additionally, similar materials may be present in the abandoned structures and/or the currently occupied residence in the proposed power plant area,

### **2.5 Waste management practices**

The subject property is undeveloped, and with the exception of the single occupied residence on the plant site (and possible trash associated with squatters thought to be on the property), solid waste is currently not generated/managed on-site.

### 3.0 Surrounding properties

The subject property is surrounded by undeveloped desert immediately to the north, south, east, and west. A horse ranch is located on Colusa Road approximately 1.5 miles west of the plant site; the northern boundary of the SCLA property is located approximately one-half mile south of the plant site; the VVWRA regional wastewater treatment plant is located approximately one mile southeast of the subject site, and the Mojave River is located approximately one mile east of the site.

## 4.0 Site and area history

To develop a history of the subject property and surrounding area use, ENSR contacted the City of Adelanto, City of Victorville, and the County of San Bernardino, and reviewed historical aerial photographs and topographic maps. No Sanborn Fire Insurance Maps are available for the subject property, and no listings for the subject property and surrounding properties were provided in the EDR City Directories report for the subject property according to EDR-Sanborn, Inc.

Aerial photographs dated 1953, 1984, 1990, 1994, and 2002 show the subject property and surrounding areas generally as undeveloped desert landscape. In the 1953 photograph, Helendale Road is shown as observed during the site visit. No structures are shown in this photograph. The 1984, 1990, 1994, and 2002 photographs show the subject property as it appeared during the site visit, with dwellings located on Shady Hills Road and on the road north of Martin Hollow Road. The 1990 aerial photograph also shows grading in the southwest corner of the power plant area of the subject property.

Historical topographic maps (1956, 1956 photo revised 1968, 1956 photo revised 1993) show the subject property and surrounding areas as undeveloped land. Both of these maps show the underground petroleum pipeline running in a direction east to west along Colusa Road.

The former George Air Force Base (GAFB - currently known as the Southern California Logistics Airport) is located one half mile south of the power plant area of the subject property, and west of the proposed transmission line corridor (in some areas the GAFB is adjacent to the proposed transmission line corridor.) The GAFB occupied approximately 5,347 acres south of the subject property, and supported tactical fighter operations and provided training for air crew and maintenance personnel. GAFB was closed in December 1992. Sixty-three potential areas of contamination have been identified at this facility, and GAFB is listed on the National Priorities List (NPL) as a Superfund site. The former GAFB Superfund site is discussed further in Section 7.0 of this report.

The City of Adelanto, City of Victorville, and the County of San Bernardino were contacted to determine if they had historical files on the parcels that make up the subject property. Each indicated they did not. Also, the Victorville Fire Department was contacted to determine if they had files associated with hazardous materials/hazardous materials releases associated with the subject property. The Victorville Fire Department indicated they did not have files associated with the subject property, and were not aware of any hazardous material related incidents associated with the subject property.

Based on the historical information reviewed, the groundwater contamination associated with the northeast portion of the former GAFB (OU 1) is a REC in association with routes of proposed VV2 Project linear facilities (sanitary wastewater pipeline and a portion of the transmission lines) near the VVWRA treatment plant.

## 5.0 Site characteristics

The subject property is located in San Bernardino County, approximately 3.6 miles east of U.S. Highway 395. According to a 7.5-minute quadrangle topographic map (Helendale quadrangle), the subject property is approximately 2,800 feet above mean sea level. The ground surface topography at the subject property is fairly level and the topography of the surrounding areas consists of desert. Native vegetation is present on the subject property and surrounding areas.

According to the database report provided by EDR, the soil type is Bryman. Bryman soils typically consist of loamy fine sand. They are well-drained with very slow infiltration rates and an intermediate water holding capacity. Soil does not meet the requirements for a hydric soil.

Based on local topography, and assuming that groundwater mimics the topography, groundwater beneath the site is anticipated to flow from west to east. The estimated depth to first groundwater is approximately 90 feet below ground surface (bgs).

According to the EDR flood zone data obtained from the Federal Emergency Management Agency (FEMA) Flood Zone Map, the eastern areas of the proposed plant site are outside the 500-year flood zone (Zone X), with the western portions of the site identified as "undetermined" (Zone D) with respect to flood zoning.

## 6.0 Previous reports

The following previously prepared environmental reports for sites located in the vicinity of the subject property were provided by Inland Energy for ENSR's review during the ESA process.

- **Phase I Environmental Site Assessment, High Desert Power Plant, Victorville, California, prepared by GeoTrans, Inc., June 4, 2001.**

High Desert Power Project, LLC, (HDPP) retained GeoTrans, Inc., to have a Phase I Environmental Site Assessment (ESA) completed along portions of a planned natural gas fueled electrical generation power plant. The HDPP facility (currently operational) is located on the former George AFB (now known as the Southern California Logistics Airport), approximately two and one half miles south of the subject property. The base was closed in 1992 as part of a nation-wide military downsizing.

Although the proposed VV2 plant site is north of the HDPP site, the proposed VV2 Project transmission lines run north to south approximately one mile from the SCLA at its closest point. The following RECs east of the HDPP plant site are located within one half mile of the transmission line corridor were identified (locations listed from North to South) by GeoTrans during their assessment.

- DP-46 – Disposal pit site DP-46 (formerly B-11), is the reported burial site of an F-111 aircraft. The site is located directly east (within 1,600 feet) of the proposed VV2 Project transmission line corridor. The site is marked by a small fenced area. Reportedly the aircraft crashed near the former base and was buried near its present location. Because of fears that erosion would unearth the aircraft, it was dug up and re-buried vertically in a pit. The aircraft was not considered hazardous waste at the time, however, the wings of the aircraft, if present, may contain asbestos. The site was assigned a “no further action” (NFA) status under the OU3 ROD (Montgomery Watson, 1998).
- LF-12 - According to CH<sup>2</sup>M Hill (1982), the fenced landfill area located on the northeast corner of the intersection of Phantom East Street and Perimeter Road (located approximately 1,600 feet west of the of the proposed VV2 Project transmission line corridor) formerly known as L-11 (now LF-12), was used for base refuse disposal from 1953 to 1957 and then for trash and rubble disposal during the 1960s and 1970s. The wastes may have been burned in the 1950s using waste oil.

The HDDP Phase I concludes that, based on the NFA associated with DP-46, this area does not present an environmental concern. The HDDP Phase I indicates that the LF-12 area presents an environmental concern to the HDPP site. However, since it is approximately 3,000 feet west of the proposed VV2 Project transmission line corridor, it does not present an environmental concern to the VV2 Project.

- **CEQA Initial Study/Negative Declaration (IS/ND) Victor Valley Wastewater Reclamation Authority 18 MGD Regional Wastewater Treatment Facility Expansion Project, prepared for the Victor Valley Wastewater Reclamation Authority by RFB Consulting**

This is an IS/ND for the Victor Valley Wastewater Reclamation Authority (VWVRA) treatment facility expansion located adjacent to the east of the transmission line corridor associated with the VV2 Project. The document includes a discussion of the George AFB (now SCLA) TCE groundwater plume that extends to the northeast section of the SCLA property, just west of the VV2 transmission line corridor. The IS/ND describes the TCE plume in the lower aquifer as extending to the VWVRA site at concentrations of approximately 10 parts per billion. The document also includes as a mitigation measure retaining the services of a qualified hazardous materials specialist in the event groundwater is encountered during the expansion activities.

Based on the information included in the subject report, TCE is present in the lower aquifer beneath the transmission line corridor near the VVWRA. Based on this information, this condition presents a REC with regard to the VV2 Project sanitary wastewater pipeline and a portion of the transmission line as it passes the VVWRA plant.

No other recognized environmental conditions for the subject property were identified in the previous reports.

## 7.0 Records review

As part of ENSR's investigation of the subject property, a review of various governmental databases was conducted using EDR of Milford, Connecticut. A copy of the EDR report is attached as Appendix C.

The subject property address was not identified on the databases searched by EDR, nor were adjacent sites listed.

An EDR Corridor Study Map was completed for the transmission lines extending from the southeast corner of the subject property south to Perimeter Road on the SCLA. A search area of two miles east and west of the proposed transmission line corridor was established for this study. The following summarizes the findings described in this report for sites located within one half mile of the transmission line corridor (from north to south) associated with the subject property:

### **George AFB Air Base RD near RT 395, Victorville, CA**

GAFB is listed on the National Priorities List as a Superfund site. The area known as operable unit 1 (OU1) includes ground water beneath the northeastern portion of GAFB and adjacent off-base areas. Groundwater in the northeast portion of the base and adjacent off-site land is contaminated with volatile organic compounds, primarily TCE.

In 1986, the California Lahontan Regional Water Quality Control Board (RWQCB) adopted a Cleanup and Abatement Order (CAO) that required the USAF to define the extent of TCE contamination in the groundwater beneath the impacted GAFB area, and begin cleanup of the groundwater. GAFB was placed on the NPL in 1990.

The Environmental Protection Agency Region 9 Superfund Website includes a status report for the former George Air Force Base superfund site. Based on this summary, sixty-three potential areas of contamination have been identified at this facility, and GAFB is listed on the National Priorities List (NPL) as a Superfund site. Contamination issues at GAFB are being addressed in several phases through three operable units (OUs). OU 1 includes initial actions and three long-term remedial phases focusing on cleanup of disposal sites and groundwater contamination associated with the northeast area of GAFB. OU 2 includes initial actions and long-term remedial activities associated with a former liquid fuel distribution system located on the GAFB. OU 3 addresses initial actions and remedial phases associated with a variety of landfills and disposal areas located on and adjacent to the GAFB.

OU 1 includes ground water beneath the northeastern portion of GAFB and adjacent off-base areas. Groundwater in the northeast portion of the base and adjacent off-site land is contaminated with volatile organic compounds, primarily trichloroethylene (TCE). Two supply wells at the VVWRA treatment plant, north-northeast of GAFB, are in the path of the OU 1 TCE plume. A groundwater extraction and treatment system, designed to prevent migration of the contaminant plume towards the Mojave River, was completed in 1997. The treatment system is projected to run for 30 years to reduce groundwater contamination below federal drinking water standards. A focused groundwater monitoring program was simultaneously implemented to increase the monitoring frequency for closer tracking of TCE plume movement.

OU 2 includes contamination associated with a liquid fuel distribution system that delivered jet fuel from several large above ground tanks near the main gate, to the runway several miles away, where it was dispensed from seven fuel hydrants to the aircraft. The site investigation completed in 1992 determined that fuel was present beneath the flight line as follows: in vadose zone; in capillary fringes; as floating free product; and dissolved in the groundwater. Volatile organic compounds (VOCs); benzene, toluene, ethylbenzene, and xylene are the contaminants of concern. OU 2's free product extraction system, consisting of mobile and

permanent units, continues to recover approximately 1,100 gallons of free product each month. Since 1992, the system had recovered 206,824 gallons of JP-4 as of September 2004.

OU 3 areas consisted mostly of disposal areas including several "landfills." Other areas included a fire fighting training area, the engine test cells, and a medical waste site. Information included in a Public Health Assessment for the GAFB prepared by the Agency of Toxic Substances & Disease Registry (ATSDR), the Air Force is currently requesting that OU 2 be withdrawn from the CERCLA process, and EPA will concur only if the State Water Resources Control Board agrees.

The ATSDR Public Health Assessment for the GAFB includes additional information associated with OU1. The ATSDR describes the groundwater in the northeast portion of the base and adjacent off-site land as contaminated with volatile organic compounds, primarily TCE. A groundwater extraction and treatment system, designed to prevent migration of the contaminant plume towards the Mojave River, was completed in 1997. The treatment system is projected to run for 30 years to reduce groundwater contamination below federal drinking water standards. This TCE plume covers approximately 600 acres in the northeast portion of the former GAFB and extends off-site to the north and east as far as the VVWRA treatment plant located east of the VV2 Project's proposed transmission line corridor. TCE is present in both the upper and lower aquifers, and is migrating towards the Mohave River. The upper aquifer is approximately 90 to 150 feet below ground surface (bgs), and the lower aquifer is approximately 210 to 250 bgs. Groundwater flow in both the upper and lower aquifer is northeastward under most of the former GAFB property; flow in the lower aquifer turns eastward near the Mojave River. The TCE concentration present in the upper aquifer as of February 1997 was 330 ppb, while the highest concentration in the lower aquifer was 22 ppb. The only water supply wells in the path of the TCE plume are two wells located at the VVWRA treatment plant.

Based on the information included in the EDR report and the EPA Superfund website, it appears the TCE plume described at OU1 potentially extends into the path of the VV2 Project linear facilities (sanitary wastewater pipeline and a portion of the transmission lines) near the VVWRA treatment plant. Based on this information, this condition represents a potential REC with reference to the proposed natural gas pipeline, reclaimed water and sanitary wastewater pipelines and a portion of the transmission lines that pass to/through the VVWRA treatment plant.

#### **George AFB Construction Debris (DP-03), NE Corner of Base in FAA Restricted Area, George Air Force Base, CA**

This site is located roughly one half mile west of the proposed transmission line location and approximately 1.5 miles south southeast of the subject property. This site is listed in the SWF/LF database for identified solid waste facilities and landfill sites. The site is listed as a solid waste disposal site receiving construction/demolition debris. The owner is listed as the U.S. Air Force. The site is listed as closed and no violations are listed. This site does not represent an environmental concern.

#### **Victor Valley Regional Composting Facility, 20055 Shay Rd., Victorville, CA**

This site is located roughly one-quarter mile east of the proposed VV2 Project transmission corridor approximately 1.5 miles south southeast of the proposed plant site. This site is listed in SWF/LF database for identified solid waste facilities and landfill sites. The site is listed as a Composting Facility (Mixed) receiving agricultural, construction/demolition, food wastes, green materials, liquid waste, manure, mixed municipal waste. The site is listed as active. No violations are listed for this site. This site does not represent an environmental concern.

#### **Victor Valley Waste Water Reclamation Authority (VVWRA), 20111 Shay Rd., Victorville, Ca**

This site is located roughly one-quarter mile east of the proposed transmission lines approximately 1.5 miles south southeast of the subject property. This site is listed in the following databases:

EMI – This database lists information associated with in VVWWRA’s air emissions. No violations or emergency air releases were reported.

HAZNET – this database lists VVWWRA’s hazardous waste disposal activities. No violations were reported in this database entry.

WDS – WDS lists Sites which have been issued waste discharge requirements. The facility is listed as both a Category A (major permitted NPDES or Class I facility) and Category C (facilities with no or passive treatment systems). The Category A facility is listed as active facility treating 9.5 million gallons per day of domestic sewage facility, and the Category C facility is listed as a solid waste site (most likely the compost facility). Violations at the Category A facility should result in a major threat to water quality, and violations at the Category C facility should result in a minor threat to water quality. No violations were listed for either Category A or C facility.

HIST UST – HIST UST is a historical listing of UST sites. Based on this database record, two 1,000 gallon underground storage tanks were formerly located at the VVWWRA site, one tank that lists the contents as not known, and one where the contents is listed as waste oil. There are no violations listed in the database record.

LUST – LUST is a leaking underground storage tank case listing. This database entry lists a leak that was discovered during the closure of UST’s formerly located at the VVWWRA facility. The leak was identified as impacting soils only, and the case is listed as closed.

The information in the database records discussed for VVWRA do not contain contamination related information, and do not present environmental concerns.

**George AFB Construction Landfill (DP-04), NE Corner of Base in FAA Restricted Area, George Air Force Base, CA**

SWF/LF - This site is located roughly one-third mile west of the proposed VV2 transmission lines approximately 1.5 miles south southeast of the proposed plant site. The site is listed as a closed solid waste disposal facility. Material received is not reported. No violations are listed for this site. This site does not represent an environmental concern.

**George AFB Disposal Site LF-14 (L-13), Eastern Portion of Base, George Air Force Base, CA**

SWF/LF - This site is located adjacent to the west side of the proposed VV2 transmission line corridor approximately two miles south southeast of the proposed VV2 plant site. The site is listed as a closed solid waste disposal facility. Material received is not reported. No violations are listed for this site. This site does not represent an environmental concern.

**George AFB Disposal Site LF-14 (L-12), West Side of Base off Extension of Phantom, George Air Force Base, CA**

SWF/LF - This site is located one-half mile to the west of the proposed VV2 transmission lines approximately 2.3 miles south southeast of the proposed plant site. The site is listed as a closed solid waste disposal facility. Material received is not reported. No violations are listed for this site. This site does not represent an environmental concern.

**Self Serve Auto Dismantlers DBA Final Flights, 18751 Perimeter Rd, Victorville, CA**

HAZNET – This site is located one-half mile west of the proposed VV2 Project transmission lines and approximately 2.3 miles south southeast of the proposed plant site. This database lists Self Serve Auto Dismantler's hazardous waste disposal activities. No violations were reported in this database entry.

**Victor Valley Economic Development Authority, 1 Massachusetts, Victorville, CA**

HAZNET – This site is located one-quarter mile west of the proposed VV2 transmission lines and approximately 2.5 miles south southeast of the proposed plant site. This database lists Victor Valley Economic Development Authority's hazardous waste disposal activities. No violations were reported in this database entry.

## 8.0 Summary of findings and opinions

The TCE groundwater plume identified near the VVWRA treatment plant is a REC in association with the VV2 Project linear facilities, as they are located within the plume area. This TCE groundwater plume is present in the lower aquifer (approximately 210 to 250 feet bgs) along portions of the route for the VV2 Project sanitary wastewater pipeline and electrical transmission lines. However, excavations for the VV2 Project pipeline and transmission line structures are not expected to approach the depths of the groundwater TCE plume (e.g., the wastewater pipeline excavation will be approximately 6 feet bgs while excavations for the footings of transmission line structures are expected not to exceed approximately 30 feet bgs). Thus, it is unlikely that VV2 Project construction activities will encounter the TCE plume; however, construction planning should take into account the presence of the groundwater plume beneath portions of the linear facilities.

Also, there is the potential for hazardous materials or wastes (e.g., cleaning chemicals, gasoline, oils, grease) to be present in abandoned vehicles and/or abandoned structures that are found on the subject property. Construction planning should include consideration of the possible presence of hazardous materials or wastes and appropriate measures taken to ensure that this issue is properly assessed and hazardous materials/wastes (if present) are properly managed and disposed in accordance with applicable regulations.

## 9.0 Conclusions and recommendations

The presence of TCE-impacted groundwater near the VVWRA treatment plant is a Recognized Environmental Condition (REC) in association with the VV2 linear facilities. Also, the potential for de minimus hazardous materials or wastes (cleaning chemicals, petroleum product residues) to be present in abandoned vehicles and/or abandoned structures on the Project site was identified.

### Recommendations

Based on the above findings, ENSR recommends the following:

- Although the depths of excavation associated with installation of VV2Project linear facilities are not expected to approach the approximately 210 to 250-foot bgs depths where the TCE groundwater contamination exists (e.g., the excavations for Project pipelines are not expected to exceed 6 feet bgs and transmission line structures would require excavations not exceeding approximately 30 feet bgs), the most current data associated with the TCE plume should be obtained from the SCLA prior to construction activities associated with the linear facilities, and construction planning for these linear facilities should take the TCE plume into consideration.
- Construction planning should include consideration of the possible presence of hazardous materials or wastes (e.g., cleaning chemicals, petroleum product residues) associated with abandoned vehicles and/or abandoned structures on the site, and appropriate measures taken to ensure that this issue is properly assessed and hazardous materials/wastes (if present) are properly managed and disposed in accordance with applicable regulations.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **FEDERAL RECORDS**

### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/14/05	Source: EPA
Date Data Arrived at EDR: 11/02/05	Telephone: N/A
Date Made Active in Reports: 12/07/05	Last EDR Contact: 11/02/05
Number of Days to Update: 35	Next Scheduled EDR Contact: 01/30/06
	Data Release Frequency: Quarterly

### **NPL Site Boundaries**

Telephone 404-562-8033

### **Proposed NPL: Proposed National Priority List Sites**

Date of Government Version: 10/14/05	Source: EPA
Date Data Arrived at EDR: 11/02/05	Telephone: N/A
Date Made Active in Reports: 12/07/05	Last EDR Contact: 11/02/05
Number of Days to Update: 35	Next Scheduled EDR Contact: 01/30/06
	Data Release Frequency: Quarterly

### **DELISTED NPL: National Priority List Deletions**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/14/05	Source: EPA
Date Data Arrived at EDR: 11/02/05	Telephone: N/A
Date Made Active in Reports: 12/07/05	Last EDR Contact: 11/02/05
Number of Days to Update: 35	Next Scheduled EDR Contact: 01/30/06
	Data Release Frequency: Quarterly

### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Last EDR Contact: 11/21/05  
Next Scheduled EDR Contact: 02/20/06  
Data Release Frequency: No Update Planned

**CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/24/05  
Date Data Arrived at EDR: 12/21/05  
Date Made Active in Reports: 01/30/06  
Number of Days to Update: 40

Last EDR Contact: 12/21/05  
Next Scheduled EDR Contact: 03/20/06  
Data Release Frequency: Quarterly

**CERCLIS-NFRAP:** CERCLIS No Further Remedial Action Planned

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

Next Scheduled EDR Contact: 03/06/06  
Data Release Frequency: Quarterly

**RCRA:** Resource Conservation and Recovery Act Information

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/15/05	Source: EPA
Date Data Arrived at EDR: 12/28/05	Telephone: 800-424-9346
Date Made Active in Reports: 01/30/06	Last EDR Contact: 12/28/05
Number of Days to Update: 33	Next Scheduled EDR Contact: 02/27/06
	Data Release Frequency: Quarterly

### **ERNS:** Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/04	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/27/05	Telephone: 202-260-2342
Date Made Active in Reports: 03/24/05	Last EDR Contact: 01/12/06
Number of Days to Update: 56	Next Scheduled EDR Contact: 04/24/06
	Data Release Frequency: Annually

### **HMIRS:** Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 08/17/05	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 10/18/05	Telephone: 202-366-4555
Date Made Active in Reports: 12/07/05	Last EDR Contact: 01/16/06
Number of Days to Update: 50	Next Scheduled EDR Contact: 04/17/06
	Data Release Frequency: Annually

### **US ENG CONTROLS:** Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/02/05	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/12/05	Telephone: 703-603-8867
Date Made Active in Reports: 10/06/05	Last EDR Contact: 01/24/06
Number of Days to Update: 55	Next Scheduled EDR Contact: 04/03/06
	Data Release Frequency: Varies

### **US INST CONTROL:** Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/10/05	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/11/05	Telephone: 703-603-8867
Date Made Active in Reports: 04/06/05	Last EDR Contact: 01/20/06
Number of Days to Update: 54	Next Scheduled EDR Contact: 04/03/06
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **DOD:** Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/04	Source: USGS
Date Data Arrived at EDR: 02/08/05	Telephone: 703-692-8801
Date Made Active in Reports: 08/04/05	Last EDR Contact: 11/11/05
Number of Days to Update: 177	Next Scheduled EDR Contact: 02/06/06
	Data Release Frequency: Semi-Annually

## **FUDS:** Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/04	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 06/29/05	Telephone: 202-528-4285
Date Made Active in Reports: 08/08/05	Last EDR Contact: 01/19/06
Number of Days to Update: 40	Next Scheduled EDR Contact: 04/03/06
	Data Release Frequency: Varies

## **US BROWNFIELDS:** A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 11/29/05	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/05/05	Telephone: 202-566-2777
Date Made Active in Reports: 01/30/06	Last EDR Contact: 11/30/05
Number of Days to Update: 56	Next Scheduled EDR Contact: 03/13/06
	Data Release Frequency: Semi-Annually

## **CONSENT:** Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 12/14/04	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 02/15/05	Telephone: Varies
Date Made Active in Reports: 04/25/05	Last EDR Contact: 01/26/06
Number of Days to Update: 69	Next Scheduled EDR Contact: 04/24/06
	Data Release Frequency: Varies

## **ROD:** Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 10/07/05	Source: EPA
Date Data Arrived at EDR: 10/20/05	Telephone: 703-416-0223
Date Made Active in Reports: 12/07/05	Last EDR Contact: 01/04/06
Number of Days to Update: 48	Next Scheduled EDR Contact: 04/03/06
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **UMTRA:** Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 11/04/05	Source: Department of Energy
Date Data Arrived at EDR: 11/28/05	Telephone: 505-845-0011
Date Made Active in Reports: 01/30/06	Last EDR Contact: 10/28/05
Number of Days to Update: 63	Next Scheduled EDR Contact: 12/19/05
	Data Release Frequency: Varies

## **ODI:** Open Dump Inventory

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/85	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/09/04	Telephone: 800-424-9346
Date Made Active in Reports: 09/17/04	Last EDR Contact: 06/09/04
Number of Days to Update: 39	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **TRIS:** Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/03	Source: EPA
Date Data Arrived at EDR: 07/13/05	Telephone: 202-566-0250
Date Made Active in Reports: 08/17/05	Last EDR Contact: 12/21/05
Number of Days to Update: 35	Next Scheduled EDR Contact: 03/20/06
	Data Release Frequency: Annually

## **TSCA:** Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/02	Source: EPA
Date Data Arrived at EDR: 04/27/04	Telephone: 202-260-5521
Date Made Active in Reports: 05/21/04	Last EDR Contact: 01/30/06
Number of Days to Update: 24	Next Scheduled EDR Contact: 04/17/06
	Data Release Frequency: Every 4 Years

## **FTTS:** FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/12/05	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 10/31/05	Telephone: 202-566-1667
Date Made Active in Reports: 12/20/05	Last EDR Contact: 12/20/05
Number of Days to Update: 50	Next Scheduled EDR Contact: 03/20/06
	Data Release Frequency: Quarterly

## **FTTS INSP:** FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

Date of Government Version: 10/12/05	Source: EPA
Date Data Arrived at EDR: 10/31/05	Telephone: 202-566-1667
Date Made Active in Reports: 12/20/05	Last EDR Contact: 12/20/05
Number of Days to Update: 50	Next Scheduled EDR Contact: 03/20/06

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **SSTS:** Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/03	Source: EPA
Date Data Arrived at EDR: 01/03/05	Telephone: 202-564-4203
Date Made Active in Reports: 01/25/05	Last EDR Contact: 01/16/06
Number of Days to Update: 22	Next Scheduled EDR Contact: 04/17/06
	Data Release Frequency: Annually

## **PADS:** PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 08/30/05	Source: EPA
Date Data Arrived at EDR: 09/13/05	Telephone: 202-564-3887
Date Made Active in Reports: 10/27/05	Last EDR Contact: 12/29/05
Number of Days to Update: 44	Next Scheduled EDR Contact: 02/06/06
	Data Release Frequency: Annually

## **MLTS:** Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/18/05	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 10/31/05	Telephone: 301-415-7169
Date Made Active in Reports: 12/20/05	Last EDR Contact: 01/03/06
Number of Days to Update: 50	Next Scheduled EDR Contact: 04/03/06
	Data Release Frequency: Quarterly

## **MINES:** Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 11/08/05	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 12/27/05	Telephone: 303-231-5959
Date Made Active in Reports: 01/30/06	Last EDR Contact: 12/27/05
Number of Days to Update: 34	Next Scheduled EDR Contact: 03/27/06
	Data Release Frequency: Semi-Annually

## **FINDS:** Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 09/29/05	Source: EPA
Date Data Arrived at EDR: 10/04/05	Telephone: N/A
Date Made Active in Reports: 11/14/05	Last EDR Contact: 01/03/06
Number of Days to Update: 41	Next Scheduled EDR Contact: 04/03/06
	Data Release Frequency: Quarterly

## **RAATS:** RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## **BRS:** Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/03  
Date Data Arrived at EDR: 06/17/05

Data Release Frequency: Biennially

## **STATE AND LOCAL RECORDS**

### **AWP:** Annual Workplan Sites

Known Hazardous Waste Sites. California DTSC's Annual Workplan (AWP), formerly BEP, identifies known hazardous substance sites targeted for cleanup.

Date of Government Version: 08/08/05  
Date Data Arrived at EDR: 08/29/05  
Date Made Active in Reports: 09/21/05  
Number of Days to Update: 23

Source: California Environmental Protection Agency  
Telephone: 916-323-3400  
Last EDR Contact: 11/30/05  
Next Scheduled EDR Contact: 02/27/06  
Data Release Frequency: Annually

### **CAL-SITES:** Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database.

Date of Government Version: 08/08/05  
Date Data Arrived at EDR: 08/29/05  
Date Made Active in Reports: 09/21/05  
Number of Days to Update: 23

Telephone: 916-255-2118  
Last EDR Contact: 05/31/94  
Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

### **NFA:** No Further Action Determination

This category contains properties at which DTSC has made a clear determination that the property does not pose a problem to the environment or to public health.

Date of Government Version: 08/08/05  
Date Data Arrived at EDR: 08/29/05  
Date Made Active in Reports: 10/06/05  
Number of Days to Update: 38

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 11/30/05  
Next Scheduled EDR Contact: 02/27/06  
Data Release Frequency: Quarterly

### **NFE:** Properties Needing Further Evaluation

This category contains properties that are suspected of being contaminated. These are unconfirmed contaminated properties that need to be assessed using the PEA process. PEA in Progress indicates properties where DTSC is currently conducting a PEA. PEA Required indicates properties where DTSC has determined a PEA is required, but not currently underway.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **SCH:** School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 08/08/05

Data Release Frequency: Quarterly

## **WMUDS/SWAT:** Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

## **DEED:** Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## **HAZNET:** Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

## EDR PROPRIETARY RECORDS

**Manufactured Gas Plants:** EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

### Electric Power Transmission Line Data

Source: PennWell Corporation  
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

**AHA Hospitals:**

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

**Medical Centers: Provider of Services Listing**

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

**Nursing Homes**

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

**Public Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

**Private Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

**Daycare Centers: Licensed Facilities**

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

## GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

VICTORVILLE II  
COLUSA ROAD/HELENDALE ROAD  
VICTORVILLE, CA 92301

### TARGET PROPERTY COORDINATES

Latitude (North):	34.637600 - 34° 38' 15.4"
Longitude (West):	117.373398 - 117° 22' 24.2"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	465776.2
UTM Y (Meters):	3832722.5
Elevation:	2801 ft. above sea level

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

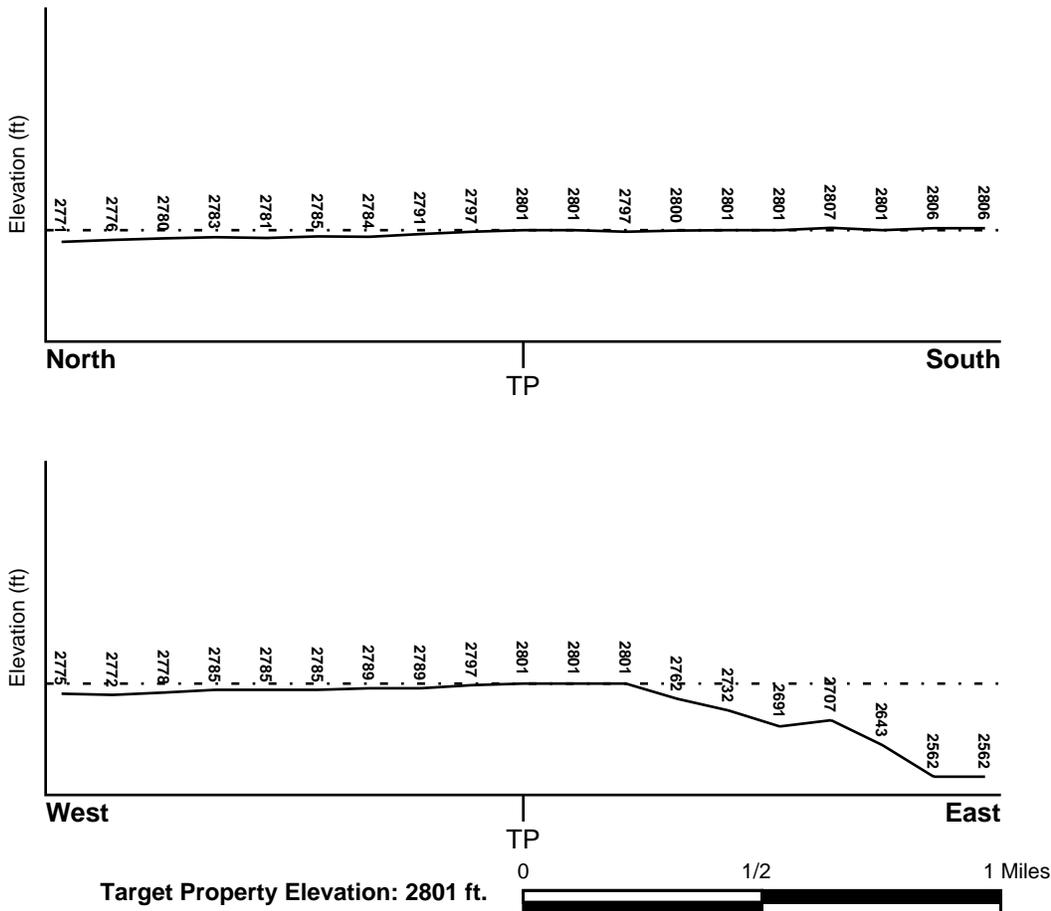

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

USGS Topographic Map: 34117-F3 HELENDALE, CA  
 General Topographic Gradient: General NW  
 Source: USGS 7.5 min quad index

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

Target Property County  
SAN BERNARDINO, CA

FEMA Flood  
Electronic Data  
YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06071C5150F

Additional Panels in search area: 06071C5125F  
06071C5805F  
06071C5785F

## **NATIONAL WETLAND INVENTORY**

NWI Quad at Target Property  
NOT AVAILABLE

NWI Electronic  
Data Coverage  
Not Available

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius: 1.25 miles  
Status: Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era: Cenozoic  
System: Quaternary  
Series: Quaternary  
Code: Q (*decoded above as Era, System & Series*)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BRYMAN

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 8.40 Min: 7.40
2	9 inches	12 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 8.40 Min: 7.40
3	12 inches	32 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 8.40 Min: 7.40
4	32 inches	46 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 8.40 Min: 7.40
5	46 inches	99 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 8.40 Min: 7.40

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loamy sand  
sandy loam  
sand  
clay  
loam  
unweathered bedrock

Surficial Soil Types: loamy sand  
sandy loam  
sand

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

clay  
loam  
unweathered bedrock

Shallow Soil Types: sandy clay loam  
sand  
loamy sand  
loamy fine sand  
gravelly - sandy clay loam

Deeper Soil Types: stratified  
clay  
indurated  
unweathered bedrock

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### **USGS 7.5' Digital Elevation Model (DEM)**

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002. 7.5-Minute DEMs correspond to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### **AQUIFLOW<sup>R</sup> Information System**

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### **Geologic Age and Rock Stratigraphic Unit**

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### **STATSGO: State Soil Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### **FEDERAL WATER WELLS**

#### **PWS: Public Water Systems**

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### **PWS ENF: Public Water Systems Violation and Enforcement Data**

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### **USGS Water Wells: USGS National Water Inventory System (NWIS)**

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## STATE RECORDS

### California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

### California Oil and Gas Well Locations for District 2, 3, 5 and 6

Source: Department of Conservation

Telephone: 916-323-1779

## RADON

### State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

**Airport Landing Facilities:** Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

**Epicenters:** World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

**California Earthquake Fault Lines:** The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### FEDERAL RECORDS

**NPL:** Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/19/2006 has revealed that there is 1 NPL site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
<b><i>USAF GEORGE AFB</i></b>	<b><i>AIR BASE RD NEAR ST RT</i></b>	<b><i>0</i></b>	<b><i>3</i></b>

**CERCLIS:** The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/01/2006 has revealed that there are 2 CERCLIS sites within the searched area.

## EXECUTIVE SUMMARY

**CORRACTS:** CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/15/2006 has revealed that there is 1 CORRACTS site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>

**RCRAInfo:** RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act ( RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 02/21/2006 has revealed that there is 1 RCRA-TSDF site within the searched area.

**HAZNET:** The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2003 has revealed that there are 38 HAZNET sites within the searched area.

Site Description: OU1 includes ground water beneath the northeastern portion of GAFB (Northeast Disposal Area [NEDA] and adjacent off-base areas, the Industrial/Storm Drain (site SD-25[S-20]), and the Sewage Treatment Plant (STP) Percolation Ponds (site WP-26[S-21]). The contaminant of concern in the groundwater is TCE. The source of the TCE is currently unknown. Several waste disposal sites within NEDA were identified as a potential sources. The Industrial/Storm Drainsite has had contaminated sediments re moved from the site. The soils beneath this area are not considered hazardous. In 1986, the California Lahontan Regional Water Qualtiy Control Board (RWQCB) adopted the Cleanup and Abatement Order (CAO). The CAO required the USAF to define the e xtent of TCE contamination in the groundwater beneath the NEDA, submit a plan for remediation, and begin cleanup of the groundwater. GAFB was placed on the NPL in 1990.

The 5,347 acre George Air Force Base (GAFB) site is located in the western Mojave Desert in the areas of Victorville, California adjacent to the City of Adelanto, California. Victorville is located on Interstate 15, approximately 35 miles north of San Bernardino and 31 miles south of Barstow. The Mojave River flows along the east side of GAFB. Communities within the Victor Valley area include the town of Adelanto, the City of Victorville, and Silver Lakes, Apple Valley, and Hewsperia. The a quifers at the site are a shallow Upper Aquifer and a deeper Regional Aquifer separated by a Middle Clay/Silt Aquitard. The land use for the adjacent properties consist of residential, industrial, and commercial. The site includes the Northeast Disposal Area (NEDA) and areas north of the base, the STP Percolation Ponds, and the Industrial/Storm Drain. These sites consist of burial sites, landfill disposal sites, and spill liquid disposal sites. The STP Percolation Ponds, Site WP-26 (S-21 ), consists of five wastewater treatment plant percolation ponds that were used from the early 1950s to 1980. The site consisted of the three large main ponds and two smaller ponds that may not have been used. The percolation ponds were used primar ily for discharge of treated sanitary wastes, but also may have received waste oils and solvents from industrial shops that discharged to the sanitary system. The Industrial/Storm Drain, Site SD-25 (S-20), is located within the central and northeast ern portions of GAFB. The Industrial/Storm Drain has been in operation since the early 1940s. The industrial/Storm Drain consists of the storm drain southeast of the operation apron (East Storm Drain) and the storm drain between the operation apron and the Crosswind (Secondary)runway

(West Storm Drain), as well as the outfall ditch downgradient from the storm drains. The Federal Facility Agreement (FFA) was signed in Oct. 1990, with the Environmental Protection Agency, the State, the Lahontan Regional Water Quality Control Board. The three OUs were created with the signing of the FFA. OU 1 consists of site SD-25, Site WP-26, and the dissolved trichloroethylene plume detected in the groundwater beneath the northeast portion of the base and adjacent off-base areas. A Record of Decision (ROD) was completed for OU1 in March 1994. OU 3 consists of 60 remaining Installation Restoration Program sites located throughout GAFB. These sites are distributed throughout the base and range in size from a few hundred square feet to over 90 acres. These sites have been designated as disposal pit (DP), fire training area (FT), landfill (LF), radiological waste (RW), spill site (SS), waste pit (WP), or "other" (OT). A ROD that addressed OU3 was completed in October, 1998.

Summary Details:

Conditions at proposal July 14, 1989): George Air Force Base (GAFB) occupies 5,347 acres in the Mojave Desert region near Victorville, San Bernardino County, California. It was established in 1941 to conduct tactical fighter operations and provide training for aircraft and maintenance personnel. Industrial operations, including maintenance of aircraft and ground support equipment, involved use and disposal of solvents. GAFB is participating in the Installation Restoration Program (IRP), established in 1978. Under this program, the Department of Defense seeks to identify, investigate, and clean up contamination from hazardous materials. During IRP tests conducted between March and May 1986, the Air Force discovered trichloroethylene (TCE) in ground water on and off the base. The northeast section of GAFB, used for disposal of solvents, appears to be one source of the contamination, although several other areas on the base are also suspected of contributing to the contamination. In addition to TCE, benzene and 1,2-dichloroethane were detected in on-base monitoring wells at levels that exceed State and Federal drinking water standards. An estimated 11,000 people obtain drinking water from wells within 3 miles of hazardous substances on the base. The wells are upgradient of known contamination. GAFB has installed additional wells to determine the extent of TCE contamination. Remedial action is planned to recover, treat, and dispose of contaminated ground water. The California Regional Water Quality Control Board is reviewing GAFB's workplan for these activities. GAFB is in the process of contracting for the remedial action. Status February 21, 1990): GAFB has contracted for the remedial action, which is scheduled to begin early in 1990.

Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Agency Address: 20111 SHAY RD  
 VICTORVILLE 92394

Agency Contact: DANIEL P GALLAGHER, GEN MGR Agency Phone: (760) 246-8638  
 Design Flow: 9.5 Million Gal/Day Baseline Flow: 5.5 Million Gal/Day  
 Facility Type: Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day).

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

Agency Type: Special District (Includes districts established under general acts, sanitary districts, water districts irrigation districts, etc.)

Waste Type: Domestic Sewage - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

Threat to Water: Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.

Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

Reclamation: No reclamation requirements associated with this facility.  
 POTW: Not reported  
 NPDES Number: CA0102822 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Threat to Water Quality:

Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Facility Type:

Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Complexity:

Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Site Description: The site has been a mine and cement manufacturing facility since 1895. Groundwater beneath the site is contaminated with chromium and volatile organic compounds from site activities. Twenty wells within 4 miles of the site supply drinking water to 44,000 people. The site has been regulated by the Lahontan Regional Water Quality Control Board since 1974 and by the Mojave Desert Air Quality Management District since 1959. Corrective measures to address the release of site contaminants to the groundwater were taken in 1998 and 1999, a remedial investigation of the site has been completed, and the facility is currently conducting a Feasibility Study of remedial alternatives under the direction of the Regional Water Quality Control Board. Further federal monitoring of site cleanup activities is warranted.

Facility ID: South Lahontan 36I002059  
 Facility Contact WILLIAM BROWN Facility Telephone (760) 245-5321  
 SIC Code: 3241 SIC Code 2: Not reported  
 Agency Name: RIVERSIDE CEMENT CO  
 Agency Address: PO BOX 146  
 ORO GRANDE 92368  
 Agency Contact: WILLIAM BROWN Agency Phone: (760) 245-5321  
 Design Flow: Not reported Baseline Flow: Not reported  
 Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
 Agency Type: Private  
 Waste Type: Not reported  
 Threat to Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.  
 Reclamation: Not reported  
 POTW: Not reported  
 NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
 Subregion: 6B

**Cal-Sites S100833330  
 CA BOND EXP. PLAN N/A**

BEP:  
 Site Description : The site is a U.S. Air Force Base.  
 Hazardous Waste Desc : Fifty-four potentially hazardous areas were identified in the initial assessment study. Phase II of the installation restoration program (IRP) has documented ground water contamination from trichloroethylene (TCE) on and offsite. Hazardous wastes disposed of onsite include asbestos, pesticides paints and paint sludges, fuels, oils, leaded tank bottoms, explosives, polychlorinated biphenyls (PCBs), cleaning solvents, acids, metals and low-level radioactive wastes.  
 Threat To Public Health & Env : Hazardous wastes released on the site have contaminated the ground water. Contaminants are migrating offsite and are a threat to the water quality and the drinking water supplies. There is no known exposure at this time.  
 Site Activity Status : The IRP has been initiated at this Base. Currently the program is in Phase IV-A (feasibility) of the mitigation process. George AFB is undertaking ground water mitigation pursuant to a RWQCB abatement order. Air stripping has been chosen to remediate the ground water contamination.  
 Project Revenue Source Co. : Not Reported  
 PRS Company Address : Not reported  
 Not reported  
 Project Revenue Source Desc : The Department will either enter into an interagency agreement with the Department of Defense or will issue an order. DHS has budgeted \$100,000 for oversight/monitoring of the project. DHS will seek cost recovery of 100 percent of direct costs plus staff costs and overhead related to the project. The Department of Defense is expected to fund site investigation and cleanup activities.

Agency Type: Private  
 Waste Type: Not reported  
 Threat to Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.  
 Reclamation: Not reported  
 POTW: Not reported

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **FEDERAL RECORDS**

### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 05/05/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 07/31/2006
	Data Release Frequency: Quarterly

### **DELISTED NPL: National Priority List Deletions**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 05/05/2006

	Data Release Frequency: Quarterly

### **NPL RECOVERY: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 05/23/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 08/21/2006
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/01/2006	Source: EPA
Date Data Arrived at EDR: 03/21/2006	Telephone: 703-413-0223
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 03/21/2006
Number of Days to Update: 23	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Quarterly

## **CERCLIS-NFRAP:** CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/01/2006	Source: EPA
Date Data Arrived at EDR: 03/21/2006	Telephone: 703-413-0223
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 03/21/2006
Number of Days to Update: 23	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Quarterly

## **CORRACTS:** Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/15/2006	Source: EPA
Date Data Arrived at EDR: 03/17/2006	Telephone: 800-424-9346
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 03/06/2006
Number of Days to Update: 27	Next Scheduled EDR Contact: 06/05/2006
	Data Release Frequency: Quarterly

## **RCRA:** Resource Conservation and Recovery Act Information

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/21/2006	Source: EPA
Date Data Arrived at EDR: 03/01/2006	Telephone: 800-424-9346
Date Made Active in Reports: 03/31/2006	Last EDR Contact: 04/27/2006
Number of Days to Update: 30	Next Scheduled EDR Contact: 06/26/2006
	Data Release Frequency: Quarterly

## **ERNS:** Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2005	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/12/2006	Telephone: 202-260-2342
Date Made Active in Reports: 02/21/2006	Last EDR Contact: 04/26/2006
Number of Days to Update: 40	Next Scheduled EDR Contact: 07/24/2006
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **HMIRS:** Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/2005	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 01/16/2006	Telephone: 202-366-4555
Date Made Active in Reports: 02/21/2006	Last EDR Contact: 04/14/2006
Number of Days to Update: 36	Next Scheduled EDR Contact: 07/17/2006
	Data Release Frequency: Annually

## **US ENG CONTROLS:** Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/21/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2006	Telephone: 703-603-8905
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 03/03/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Varies

## **US INST CONTROL:** Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/21/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2006	Telephone: 703-603-8905
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 03/03/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Varies

## **DOD:** Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2004	Source: USGS
Date Data Arrived at EDR: 02/08/2005	Telephone: 703-692-8801
Date Made Active in Reports: 08/04/2005	Last EDR Contact: 05/12/2006
Number of Days to Update: 177	Next Scheduled EDR Contact: 08/07/2006
	Data Release Frequency: Semi-Annually

## **FUDS:** Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/05/2005	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 01/19/2006	Telephone: 202-528-4285
Date Made Active in Reports: 02/21/2006	Last EDR Contact: 04/03/2006
Number of Days to Update: 33	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Varies

## **US BROWNFIELDS:** A Listing of Brownfields Sites

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 11/29/2005	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/05/2005	Telephone: 202-566-2777
Date Made Active in Reports: 01/30/2006	Last EDR Contact: 03/13/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 06/12/2006
	Data Release Frequency: Semi-Annually

### **CONSENT:** Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 12/14/2004	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 02/15/2005	Telephone: Varies
Date Made Active in Reports: 04/25/2005	Last EDR Contact: 03/13/2006
Number of Days to Update: 69	Next Scheduled EDR Contact: 07/24/2006
	Data Release Frequency: Varies

### **ROD:** Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 12/07/2005	Source: EPA
Date Data Arrived at EDR: 01/06/2006	Telephone: 703-416-0223
Date Made Active in Reports: 02/21/2006	Last EDR Contact: 04/05/2006
Number of Days to Update: 46	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Annually

### **UMTRA:** Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 11/04/2005	Source: Department of Energy
Date Data Arrived at EDR: 11/28/2005	Telephone: 505-845-0011
Date Made Active in Reports: 01/30/2006	Last EDR Contact: 03/20/2006
Number of Days to Update: 63	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Varies

### **ODI:** Open Dump Inventory

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/1985	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/09/2004	Telephone: 800-424-9346
Date Made Active in Reports: 09/17/2004	Last EDR Contact: 06/09/2004
Number of Days to Update: 39	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**TRIS: Toxic Chemical Release Inventory System**

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2003	Source: EPA
Date Data Arrived at EDR: 07/13/2005	Telephone: 202-566-0250
Date Made Active in Reports: 08/17/2005	Last EDR Contact: 03/21/2006
Number of Days to Update: 35	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Annually

**TSCA: Toxic Substances Control Act**

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002	Source: EPA
Date Data Arrived at EDR: 04/27/2004	Telephone: 202-260-5521
Date Made Active in Reports: 05/21/2004	Last EDR Contact: 04/12/2006
Number of Days to Update: 24	Next Scheduled EDR Contact: 07/17/2006
	Data Release Frequency: Every 4 Years

**FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)**

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/17/2006	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 01/24/2006	Telephone: 202-566-1667
Date Made Active in Reports: 02/27/2006	Last EDR Contact: 03/20/2006
Number of Days to Update: 34	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Quarterly

**FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)**

Date of Government Version: 01/17/2006	Source: EPA
Date Data Arrived at EDR: 01/24/2006	Telephone: 202-566-1667
Date Made Active in Reports: 02/27/2006	Last EDR Contact: 03/20/2006
Number of Days to Update: 34	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Quarterly

**SSTS: Section 7 Tracking Systems**

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2004	Source: EPA
Date Data Arrived at EDR: 05/11/2006	Telephone: 202-564-4203
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 03/06/2006

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **PADS:** PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 12/27/2005	Source: EPA
Date Data Arrived at EDR: 02/08/2006	Telephone: 202-566-0500
Date Made Active in Reports: 02/27/2006	Last EDR Contact: 05/08/2006
Number of Days to Update: 19	Next Scheduled EDR Contact: 08/07/2006
	Data Release Frequency: Annually

## **MLTS:** Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 02/10/2006	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 02/16/2006	Telephone: 301-415-7169
Date Made Active in Reports: 03/31/2006	Last EDR Contact: 04/03/2006
Number of Days to Update: 43	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Quarterly

## **MINES:** Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 11/08/2005	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 12/27/2005	Telephone: 303-231-5959
Date Made Active in Reports: 01/30/2006	Last EDR Contact: 03/29/2006
Number of Days to Update: 34	Next Scheduled EDR Contact: 06/26/2006
	Data Release Frequency: Semi-Annually

## **FINDS:** Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 01/09/2006	Source: EPA
Date Data Arrived at EDR: 01/16/2006	Telephone: N/A
Date Made Active in Reports: 02/21/2006	Last EDR Contact: 04/03/2006
Number of Days to Update: 36	Next Scheduled EDR Contact: 07/03/2006
	Data Release Frequency: Quarterly

## **RAATS:** RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 03/06/2006
Number of Days to Update: 35	Next Scheduled EDR Contact: 06/05/2006
	Data Release Frequency: No Update Planned

## **BRS:** Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

## STATE AND LOCAL RECORDS

### **AWP:** Annual Workplan Sites

Known Hazardous Waste Sites. California DTSC's Annual Workplan (AWP), formerly BEP, identifies known hazardous substance sites targeted for cleanup.

Date of Government Version: 08/08/2005  
Date Data Arrived at EDR: 08/29/2005  
Date Made Active in Reports: 09/21/2005  
Number of Days to Update: 23

Source: California Environmental Protection Agency  
Telephone: 916-323-3400  
Last EDR Contact: 04/05/2006  
Next Scheduled EDR Contact: 05/29/2006  
Data Release Frequency: Annually

### **CAL-SITES:** Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database.

Date of Government Version: 08/08/2005  
Date Data Arrived at EDR: 08/29/2005  
Date Made Active in Reports: 09/21/2005

Number of Days to Update: 38	Next Scheduled EDR Contact: 05/29/2006
	Data Release Frequency: Quarterly

## **SCH:** School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 08/29/2005	Telephone: 916-323-3400
Date Made Active in Reports: 10/06/2005	Last EDR Contact: 04/05/2006
Number of Days to Update: 38	Next Scheduled EDR Contact: 05/29/2006
	Data Release Frequency: Quarterly

## **TOXIC PITS:** Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/30/1995	Telephone: 916-227-4364
Date Made Active in Reports: 09/26/1995	Last EDR Contact: 05/01/2006
Number of Days to Update: 27	Next Scheduled EDR Contact: 07/31/2006
	Data Release Frequency: No Update Planned

## **SWF/LF (SWIS):** Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 03/13/2006	Source: Integrated Waste Management Board
Date Data Arrived at EDR: 03/15/2006	Telephone: 916-341-6320

Number of Days to Update: 23	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Quarterly

## **WMUDS/SWAT:** Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

Data Release Frequency: No Update Planned

**DEED:** Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 04/04/2006	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 04/05/2006	Telephone: 916-323-3400

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **HAZNET: Facility and Manifest Data**

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

## EDR PROPRIETARY RECORDS

### **Manufactured Gas Plants:** EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Number of Days to Update: 25	Next Scheduled EDR Contact: 07/10/2006
	Data Release Frequency: Quarterly

## YOLO COUNTY:

### Underground Storage Tank Comprehensive Facility Report

Date of Government Version: 01/18/2006	Source: Yolo County Department of Health
Date Data Arrived at EDR: 02/09/2006	Telephone: 530-666-8646
Date Made Active in Reports: 03/09/2006	Last EDR Contact: 04/11/2006
Number of Days to Update: 28	Next Scheduled EDR Contact: 07/17/2006
	Data Release Frequency: Annually

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### **CT MANIFEST:** Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### **AHA Hospitals:**

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### **Medical Centers: Provider of Services Listing**

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### **Nursing Homes**

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### **Public Schools**

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.
