FOSTER WHEELER ENVIRONMENTAL

08-15-2002

INTRODUCTION

This document, prepared on the request of FOSTER WHEELER ENVIRONMENTAL, reports the findings of BBL's investigation of environmental concerns in the vicinity of Aprn 224-36-014. It is divided in the following segments:

- **Map** - showing the location of the identified sites relative to the subject site. A total of 92 separate sites were identified.
- **Summary** - listing the identified sites by street names.
- **Final Report** - describing the sources investigated and the resulting findings:

Federal sources			Page:1
National Priority List	no sites	within 1 mile radius.	1
CERCLIS	no sites	within half of a mile.	1
NFRAP	3 sites	within a quarter of a mile.	1
Federal Facilities	no sites	within half of a mile.	2
Emergency Response Notification System	5 sites	within a quarter of a mile.	2
Site Enforcement Tracking System	5 sites	within half of a mile.	4
Enforcement Docket (DOCKET/CDETS)	no sites	within a quarter of a mile.	8
C-Docket	no sites	within a quarter of a mile.	8
RCRA Violators List	7 sites	within 1 mile radius.	9
Federal Enforcement Dockets	no sites	within a quarter of a mile.	10
California State sources			
Annual Work Plan	no sites	within 1 mile radius.	10
CALSITES	8 sites	within half of a mile.	10
CALSITES - No Further Action	4 sites	within a quarter of a mile.	14
Cortese	no sites	within half of a mile.	14
Leaking Underground Storage Tanks	18 sites	within half of a mile.	15
Solid Waste Information System	2 sites	within 1 mile radius.	21
Well Investigation Program	no sites	within 1 mile radius.	22
Drinking Water Program	no sites	within half of a mile.	22
Regional sources			
Toxic Releases	14 sites	within half of a mile.	22
Toxic Pits	no sites	within 1 mile radius.	27
Solid Waste Assessment Test - Regional	no sites	within 1 mile radius.	27
Operating permits			
RCRA Generators	27 sites	within a quarter of a mile.	28
RCRA - TSD Facilities	4 sites	within 1 mile radius.	33
SARA Title III, section 313 (TRIS)	2 sites	within a quarter of a mile.	34
Nuclear Regulatory Commission Licensees	no sites	within a quarter of a mile.	34
PCB Waste Handlers Database	no sites	within a quarter of a mile.	34
Permit Compliance System (PCS)	no sites	within a quarter of a mile.	34
AIRS Facility System (AFS)	1 site	within a quarter of a mile.	35
Section Seven Tracking System	no sites	within a quarter of a mile.	35
FIFRA/TSCA tracking system	no sites	within a quarter of a mile.	35
Federal Facilities Information System (FFIS)	no sites	within a quarter of a mile.	35
Chemicals in Commerce Information System	no sites	within a quarter of a mile.	35
FINDS EPA Facility Index System	no sites	within a quarter of a mile.	36
Hazardous Waste Information System	44 sites	within a quarter of a mile.	36
Underground Storage Tanks	13 sites	within a quarter of a mile.	49

INTRODUCTION

BBL has used its best effort but makes no claims as to the completeness or accuracy of the referenced government sources or the completeness of the search. Our records are frequently updated but only as current as their publishing date and may not represent the entire field of known or potential hazardous waste or contaminated sites. To ensure complete coverage of the subject property and surrounding area, sites may be included in the list if there is any doubt as to the location because of discrepancies in map location, zip code, address, or other information in our sources. For additional information call 858 793-0641.

The following government sources have been searched for sites at the street address, unless otherwise stated, of the subject location.

FEDERAL SOURCES

NPL National Priority List

EPA has prioritized sites with significant risk to human health and the environment. These sites receive remedial funding under the Comprehensive Environmental Response Conservation and Liability Act (CERCLA).

No listings within 1 mile radius of the subject site.

CERCLIS Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS is a database used by the EPA to track activities conducted under the Comprehensive Environmental Response and Liability Act CERCLA (1980) and the amendment the Superfund Amendments and Reauthorization Act SARA (1986).

Sites to be included are identified primarily by the reporting requirements of hazardous substances Treatment, Storage and Disposal (TSD) facilities and releases larger than specific Reportable Quantities (RQ), established by EPA.

Using the National Oil and hazardous Substance Pollution Contingency Plan(National Contingency Plan) the EPA set priorities for cleanup.

The EPA rates National Contingency Plan sites according to a quantitative Hazard Ranking System (HRS) based on the potential health risk via any one or more pathways: groundwater, surface water, air, direct contact, and fire/explosion.

The EPA and state agencies seek to identify potentially responsible parties(PRP) and ultimately Responsible Parties (RP) who can be required to finance cleanup activities, either directly or through reimbursement of federal Superfund expenditures.

No listings within half of a mile radius of the subject site.

NFRAP No Further Remedial Action Planned sites (CERCLIS)

As of February 1995, CERCLIS sites designated 'No Further Remedial Action Planned' NFRAP have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the site being placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.

EPA has removed these NFRAP sites from CERCLIS to lift unintended barriers to the redevelopment of these properties. This policy change is part of EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens promote economic redevelopment of unproductive urban sites.

This list has been researched within a quarter of a mile radius of the subject site.

Site: OWENS CORNING FIBERGLAS CORP
Address: 960 CENTRAL EXWY
City: SANTA CLARA
Map Loc: 27 - within 1/4 mile SW of the subject
Status: EPA ID#: CAD009149485

Discovery of this Hazardous Waste site was brought to EPA's attention on 08/01/80. An additional Preliminary Assessment was completed on 01/01/87. The Preliminary Assessment, consisting of collecting and documenting existing information about the source and nature of the site hazard was completed on 02/01/88.

Site: GIMELLI BROTHERS INC
Address: 715 COMSTOCK ST
City: SANTA CLARA
Map Loc: 3 - within 1/4 mile S of the subject
Status: EPA ID#: CAD069135762

Discovery of this Hazardous Waste site was brought to EPA's attention on 08/01/80. The Preliminary Assessment, consisting of collecting and documenting existing information about the source and nature of the site hazard was completed on 01/01/87.

Site: CERTAINTEED CORP
Address: 2885 LAFAYETTE ST
City: SANTA CLARA
Map Loc: 23 - within 1/4 mile W of the subject
Status: EPA ID#: CAD009156282

Discovery of this Hazardous Waste site was brought to EPA's attention on 05/01/91. The Preliminary Assessment, consisting of collecting and documenting existing information about the source and nature of the site hazard was completed on 09/24/91.

FEDFAC Federal Facilities

As part of the CERCLA program, federal facilities with known or suspected environmental problems, the Federal Facilities Hazardous Waste Compliance Docket is tracked separately to comply with a Federal Court order.

No listings within half of a mile radius of the subject site.

ERNS Emergency Response Notification System

The ERNS is a national computer database used to store information on unauthorized releases of oil and hazardous substances. The program is a cooperative effort of the Environmental Protection Agency, the Department of Transportation Research and Special Program Administration's John Volpe National Transportation System Center and the National Response Center.

There are primarily five Federal statutes that require release reporting the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) section 103; the Superfund Amendments and Reauthorization Act (SARA) Title III Section 304; the Clean Water Act of 1972(CWA) section 311(b)(3); and the Hazardous Material Transportation Act of 1974(HMTA section 1808(b).

This list has been researched within a quarter of a mile radius of the subject site.

SETS Site Enforcement Tracking System (SETS)

When expanding Superfund monies at a CERCLA (Comprehensive Environmental Response, Compensation and Liability Act) Site, EPA must conduct a search to identify parties with potential financial responsibility for remediation of uncontrolled hazardous waste sites. EPA regional Superfund Waste Management Staff issue a notice letter to the potentially responsible party (PRP). The status field contains the EPA ID number and name of the site where the actual pollution occurred.

This list has been researched within half of a mile radius of the subject site.

DO Enforcement Docket System (DOCKET)/Consent Decree Tracking System (CDETS)

DOCKET tracks civil judicial cases against environmental polluters, while CDETS processes court settlements, called consent decrees.

No listings within a quarter of a mile radius of the subject site.

CD Criminal Docket System (C-DOCKET)

The Criminal Docket System is a comprehensive automated system for tracking criminal enforcement actions. C-Docket handles data for all environmental statues and tracks enforcement actions from the initial stages of investigations through conclusion.

No listings within a quarter of a mile radius of the subject site.

RCRA RCRA Violators List (CORRACTS)

The Resource Conservation and Recovery Act of 1976 provides for "cradle to grave" regulation of hazardous wastes. RCRA requires regulation of hazardous waste generators, transporters, and storage/treatment/disposal sites. Evaluation to potential violations, ranging from manifest requirements to hazardous waste discharges, is typically conducted by the US EPA. This database is also known as Corrective Action Report (CORRACTS)

If enforcement is required, it is typically delegated to a state agency.

This list has been researched within 1 mile radius of the subject site.

No listings within a quarter of a mile radius of the subject site.

CALIFORNIA STATE SOURCES

AW Annual Work Plan (previously known as Bond Expenditure Plan)

The California Health and Safety code, as amended by AB 129, requires the California Environmental Protection Agency to develop a site-specific expenditure plan as the basis for an appropriation of California Hazardous Substance Cleanup Bond Act of 1984 funds.

The Agency is also required to update the report annually and report any significant adjustments to the Legislature on an ongoing basis. The plan identifies California hazardous waste sites targeted for cleanup by responsible parties, the California and the Federal Environmental Protection Agency over the next five years.

Status Codes:	BKLG	Backlog, Potential Annual Work Plan Site
	AWP	Active Annual Work Plan site
	COM	Certified, but still in Operation & Maintenance mode
	CERT	Certified after remediation
	DLST	Delisted from the AWP
	REFRC	Former AWP site referred to RCRA
	REFRW	Former AWP site referred to the Regional Water Quality Board

No listings within 1 mile radius of the subject site.

CALS CALSITES

The Historical Abandoned Site Survey Program identified certain potential hazardous waste sites. The identification of these sites were generally not made via sampling and site characterization, they were made as a result of file searches and windshield surveys. Some of the sites may have had a site inspection with sampling.

The information has been compiled into this database by the California Environmental Protection Agency, Department of Toxic Substance Control (DTSC) in accordance with Section 25359.6 of the California Health and Safety Code.

This database was previously known as The Abandoned Sites Program Information System ASPIS.

Status Codes:	PEARL	Preliminary Endangerment Assessment Required,Low priority
	PEARM	Preliminary Endangerment Assessment Required,Medium priority
	PEARH	Preliminary Endangerment Assessment Required,High priority
	SSR	Site Screening Required
	HRR	Hazard Ranking Required
	PRPR	Potential Responsible Party Search Required
	EPA	EPA is the lead agency
	RCRA	Mitigated under the RCRA permitting program
	RWQCB	Mitigated under the lead of the Regional Water Quality Boar
	CNTY	County lead
	OAL	Other Agency lead

This list has been researched within half of a mile radius of the subject site.

DISCOVERY - completed on 09/24/81

MONSANTO: Discovery. Facility identified from Superfund active site. On 11/25/81, facility drive-by. No evidence of waste visible. On 1/7/82 phone follow-up with plant manager. On 01/20/82, Inspection (state): ASP site inspection. On 03/31/82, Final strategy; identified abandoned site. On 11/01/82, Sample results: Mostly volatile organics in groundwater. On 01/20/87, Site screening done pending status due to RWQCB lead. Dump-site excavated 11/82. Source of Contamination currently being investigated by RWQCB. On 01/14/91, DHS received FIT SSI -EPA recommends NFA. (09/24/81)

The present level of contamination at the site poses a significant threat to public and environmental health. Therefore, PEA of high priority is recommended. The site consists of 25 acres of land. Both soil and groundwater were contaminated. Soil was contaminated by metals and solvents. Some of the metals were present in the on-site soil areas follows: copper, lead, and nickel. The maximum level of 30 ppm of TCE was present in the groundwater and 100,000 ppm (see Note below) of Cu was in the on-site soil. Groundwater was contaminated by solvents including TCE. TCE levels in the groundwater was 30 ppm. Based on available information, there is a documented release at the site. The site poses a significant threat to public and environmental health. Therefore, PEA investigation is required. NOTE: Proposal for Final Cleanup Objectives, 1992 and Month Technical Report on status compliance, CAMPSI Property, 1992 (10/26/92)

CORTESE State of California Office of Planning and Research

This database is a consolidation of information from various sources. It is maintained by the State Office of Planning and Research and lists potential and confirmed hazardous waste or substances sites.

Facilities that have been reported elsewhere in this report will not be included in the listing below.

Status Codes:	WRCBT	Tank leaks. Compiled by Water Resource Control Board
	DHS1	Abandoned hazardous waste site. Compiled by Toxic Substance Control Div. of DHS
	DHS2	Contaminated public water drinking wells serving less than 200 connections. Compiled by Env. Health Div. of DHS
	DHS3	Contaminated public water drinking wells serving more than 200 connections
	DHS5	Sites pursuant to section 25356 of the Health and Safety Code (see BEP)
	CWMB	Solid waste disposal sites with known migration of hazardous waste

No listings within half of a mile radius of the subject site.

LUST Leaking Underground Storage Tanks - California State

The Leaking Underground Storage Tanks Information System is maintained by the State Water Resource Board pursuant to Section 25295 of the Health and Safety Code.

Status Codes:	0	No action
	1	Leak being confirmed
	3A	Prel site assessment workplan submitted
	3B	Prel site assessment underway
	5C	Pollution characterization
	5R	Remediation plan
	7	Remedial action underway
	8	Post remedial action monitoring
	9	Case closed
	P	Case purged from agency list

This list has been researched within half of a mile radius of the subject site.

Throughput: 375 Tons/day permitted (320Tons/day actual)

Acreage: 2.81 permitted (2.81 remaining)

WIP Well Investigation Program

The Well Investigation Program (AB1803) identifies groundwater that is already contaminated and empowers the California Department of Health Services and local health officers to order ongoing monitoring programs. The focus of this program is to monitor and protect drinking water.

No listings within 1 mile radius of the subject site.

WQ Drinking Water Program

The California Health and Safety Code section 116275-116300 stipulates that it is the intent of the Legislature to improve laws governing drinking water quality to improve upon the minimum requirements of the federal Safe Drinking Water Act Amendments of 1986, to establish primary drinking water standards that are at least as stringent as those established under the federal Safe Drinking Water Act, and to establish a program under this chapter that is more protective of public health than the minimum federal requirements.

In order to provide for the orderly and efficient delivery of safe drinking water the State Department of Health Services collect information on the quality of public drinking water wells under the California Drinking Program.

Below, the latest and maximum analysis of contaminants are reported (only positive reading are included). MCL is the Maximum Contaminant Level or enforceable drinking water standard. RPHL is the Recommended Public Health Level. Additional information is available from BBL upon request.

No listings within half of a mile radius of the subject site.

REGIONAL SOURCES

NT Toxic Releases

The California Regional Water Quality Control Boards or local Department of Health Services keeps track of toxic releases to the environment. These lists are known as Unauthorized Releases, Spill, Leaks, Investigations and Cleanups (SLIC), Non-Tank Releases, Toxics List or similar, depending on the local agency.

This list has been researched within half of a mile radius of the subject site.

TPC Toxic Pits

The Toxic Pits Clean-Up Act (Katz Bill) places strict limitations on the discharge of liquid hazardous wastes into surface impoundment, toxic ponds, pits and lagoons. Regional Water Quality Control Boards are required to inspect all surface impoundment annually, in addition, every facility was required to file a Hydrogeological Assessment Report. Recent legislation allows the Department of Health Services to exempt facilities that closed on or before December 31, 1985, if a showing is made that no significant environmental risk remains (AB1046).

Special exemption provisions have been created for surface impoundment that receive mining wastes.

No listings within 1 mile radius of the subject site.

SWAT(R) Solid Waste Assessment Test - Regional

This program, provided for under the Calderon legislation (Section 13273 of the Water Code), requires that disposal sites with more than 50,000 cubic yards of waste provide sufficient information to the regional water quality control board to determine whether or not the site has discharged hazardous substances which will impact the environment.

Site operators are required to file Solid Waste Assessment Test reports on a staggered basis. Operators of the 150 highest ranking (Rank 1) sites were required to submit Solid Waste Assessment Tests by July 1, 1987, Rank 2 in 1988 and so on.

Operators submit water quality tests to the Regional Water Quality Control Board, describing surface and groundwater quality and supply; and the geology within 1 mile of the site. Air quality tests are submitted to the local Air Quality Management District or Air Pollution Control District.

This program is currently not funded and thus not updated.

Status Codes: Facilities or sites are ranked within each region on a scale 1-15 according to priority.

No listings within 1 mile radius of the subject site.

OPERATING PERMITS

Various agencies issue operating permits or regulate the handling, movements, storage and disposal of hazardous materials and require mandatory reporting. The inclusion in this section does not imply that an environmental problem exists presently or has in the past.

The sources referenced below have been searched at the street address, unless otherwise stated, of the subject site.

RCRA-G Resource Conservation and Recovery Information System - Generators

The Environmental Protection Agency regulates generators of hazardous material through the Resource Conservation and Recovery Act (RCRA). All hazardous waste generators are required to notify EPA of their existence by submitting the Federal Notification of Regulated Waste Activity Form (EPA Form 8700-12) or a state equivalent form. The notification form provides basic identification information and specific waste activities.

Status Codes: L - Generators who generate at least 1000 kg/mo of non-acutely hazardous waste (or 1 kg/mo of acutely hazardous waste).
S - Generators who generate 100 kg/mo but less than 1000 kg/mo of non-acutely hazardous waste.
T - Transporter.

RCRA-D Resource Conservation and Recovery Information System - Treatment, Storage & Disposal

The Environmental Protection Agency regulates the treatment, storage and disposal of hazardous material through the Resource Conservation and Recovery Act (RCRA). All hazardous waste TSD facilities are required to notify EPA of their existence by submitting the Federal Notification of Regulated Waste Activity Form (EPA Form 8700-12) or a state equivalent form as well as part A (EPA form 8700-23) and Part B of their Hazardous Waste Permit Application.

SARA SARA Title III, section 313 (TRIS)

Title III of the Superfund Amendments and Reauthorization Act, Section 313, also known as Emergency Planning and Community Right-to-Know Act of 1986 requires owners or operators of facilities with more than 10 employees and are listed under Standard Industrial Classification (SIC) Codes 20 through 39 to report the manufacturing, processing or use of more than a threshold of certain chemical or chemical categories listed under section 313. This data base is also known as Toxic Release Information System (TRIS).

Below summary information for the last five year period is reported grouping the releases into air, water, underground injection, land, public offsite treatment (potw) and transportation offsite.

This list has been researched within a quarter of a mile radius of the subject site.

NC Nuclear Regulatory Commission Licensees

The Nuclear Regulatory Commission, Office of Nuclear Material Safety and Safeguards has been mandated (10 CFR Ch 1.42) to protect the public health and safety, the common defense and security, and the environment by licensing, inspection, and environmental impact assessment for all nuclear facilities and activities, and for the import and export of special nuclear material.

No listings within a quarter of a mile radius of the subject site.

PCB PCB Waste Handlers Database

The U.S. Environmental Protection Agency tracks generators, transporters, commercial stores and/or brokers and disposers of PCB's in accordance with the Toxic Substance Control Act.

No listings within a quarter of a mile radius of the subject site.

PCS Permit Compliance System

PCS is a database which contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS was developed by The U.S. Environmental Protection Agency to meet the information needs of the NPDES program under the Clean Water Act. PCS tracks permit, compliance, and enforcement states of NPDES facilities.

No listings within a quarter of a mile radius of the subject site.

AFS AIRS Facility System

AFS contains emissions and compliance data on air pollution point sources tracked by the U.S. EPA and state and local environmental regulatory agencies. There are seven "criteria pollutants" for which data must be reported to EPA and stored in AIRS: PM10 (particulate matters less than 10 microns in size), carbon monoxide, sulfur dioxide, nitrogen dioxide, lead, reactive volatile organic compounds (VOC), and ozone.

AFS replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aeromatic Data (SAROAD).

PE Section Seven Tracking System (SSTS)

SSTS evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and devices that are produced, sold or distributed each year.

No listings within a quarter of a mile radius of the subject site.

FIFRA FIFRA/TSCA Tracking System/ National Compliance Database (FTTS/NCDB)

NCDB supports implementation of the Federal Insecticide, Fungicide and Rodenticide Control Act (FIFRA) and the Toxic Substance Control Act (TSCA).

No listings within a quarter of a mile radius of the subject site.

FFIS Federal Facilities Information System (FFIS)

Federal Facilities Information System (FFIS) contains a list of all Treatment Storage and Disposal Facilities (TSDs) owned and operated by federal agencies.

No listings within a quarter of a mile radius of the subject site.

CICIS Chemicals in Commerce Information System (CICIS)

Chemicals in Commerce Information System contains an inventory of chemicals manufactured in commerce or imported for Toxic Substances Control Act regulated commercial purposes. CICIS allows EPA to maintain a

comprehensive listing of over 70,000 chemical substances that are manufactured or imported and are regulated under TSCA.

No listings within a quarter of a mile radius of the subject site.

FINDS FINDS EPA Facility Index System

The U.S. Environmental Protection Agency maintains an index system of all facilities which are regulated or have been assigned an identification number for other purposes.

Facilities that have been reported elsewhere in this report will not be included in the listing below.

No listings within a quarter of a mile radius of the subject site.

HWIS Hazardous Waste Information System

The Department of Toxic Substance Control, California Environmental Protection Agency, maintains a data base keeping track of the movement and disposal of hazardous waste. The data is used to support the Tanner legislation, AB 2948.

UST Permitted Underground Storage Tanks - State Water Quality Control Board

The Corteses Bill (AB2013), enacted in 1983, required registration of all underground storage tanks (UST) with the State Water Quality Control Board by July 1, 1984. About 176,000 tanks and surface impounds were registered between 1984 and 1987. An amendment (AB 1413) was passed in 1987, effectively removing the State Board from the registration process starting January 1, 1988. The data reflects the information collected by the state between 1984 and 1987 as well as recent time and includes all tanks and surface impounds in use or closed after 1974.

Home and farm heating fuel tanks with capacities of 1,100 gallons or less and "structures such as sumps, separators, storm drains, catch basins, oil field gathering lines, refinery pipelines, lagoons, evaporation ponds, well cellars, separation sumps, lined and unlined pits, sumps and lagoons" except those defined as UST under HSWA or may be regulated to protect water quality under the Porter-Cologne Water Quality Control Act are excluded.

This list has been researched within a quarter of a mile radius of the subject site.

APPENDIX C
SITE RECONNAISSANCE FIELD NOTES

APPENDIX C

Site Visit Checklist and Notes:

Date of Visit: August 21, 2002

Visual Observations by: G. Neuman and J. Stiltz

General Site Setting:

Heavy industrial area. Adjacent to City Maintenance facilities. Across the street (Comstock) from J. L. Precision Sheet Metal (840 and 890 Comstock Street).

Current Use of Property:

Houses structures of out-of-service Kifer substation. The southern portion of the Site is vacant. Areas of the parcel, not included in the Site are used by City of Santa Clara Maintenance. There is a main office building, a dry filter paint booth to the east of the substation area, and a few small buildings, all at 2975 Lafayette Street. The former pistol range at 815 Comstock Street is also used by City maintenance. Three extra long metal storage containers are present at the southeastern portion of the parcel (outside of the Site).

General Data:

Cleared area along southern side of Site was partially fenced. Fencing appeared to be fairly new and ran along southern property border. Traffic barriers were used to close the southeastern portion of this fenced area, as it was not fenced. Noted that there was a "No Dumping" sign within this partially fenced area. (See contamination concerns section for potential evidence of past waste dumping in this area, concrete pieces, stained soil by the upraised soil areas)

This fenced area (cleared area to the south) was generally sloped towards the south. The area is underlain by hard pack soil and pea gravel.

A switch was located on the southwest corner of the property. A sticker on the outer casing noted that there were no PCBs within. A manhole located adjacent to and directly south of the switch was labeled high voltage. The switch was number 2290.

The substation portion of the Site had two access gates. One gate was located along the western border facing Lafayette Street. This gate was locked. The second gate is located on the north side near the northeast corner of the substation. This gate is accessed by entering the city's maintenance yard. This gate appeared to be locked, however it is possible to push the gate forward to easily access the yard.

Buildings:

Y/N

Type and Use:

City Maintenance bldgs. located on parcel, adjacent to the site. To the E. of the substation area, a building contains a dry filter paint booth. 6 flam lockers at the west side of the paint booth bldg. A long building, currently used by City maintenance was previously used as a pistol shooting range.

Industrial Activities:

Y N

Type and Use:

Substation, city paint booth.

Storage Areas:

Y N

Not within the Site.

Type and Use:

Debris Areas or dumps:

Y N

An electrical ballast was found on the ground within the substation area. It was intact, and did not have a date of manufacture listed. Transformers and potentially capacitors were present at one time on the site due to its use as an electrical substation, which potentially contained PCBs. It is believed that the capacitors and transformers are still present in the equipment cabinets on-site.

A small oil leak was present beneath a small electric motor within the GE bushing current transformer box.

There were at least two areas on the northern portion of the substation area where it appeared that the base of the vegetation and the surrounding soil was stained dark. Should note that it was difficult to locate, pinpoint, and determine stained areas due to extremely dense vegetation.

On the southern side of the Site (in the side lot), several raised areas of soil were present within the fenced area, but outside of the actual substation. They were low and berm-like in appearance. The soil on the raised area appeared to be stained and was darker in appearance than the soil on the rest of the lot.

Multiple piles of broken up concrete were present in the substation area.

Four dried, partially full cans of paint were present underneath a shelving area near the east side of the substation area.

A large number of benches were piled up within the substation area. A city maintenance worker stated that the benches were stored there after a contract for the benches ran out. The benches are in poor condition

A rack containing metal (thin aluminum or tin) piping was present on a wooden shelving unit at the east side of the substation area.

Waste Disposal from Operations:

N

Type and Use:

Aboveground Tanks:

N

Type and Use:

Fuel Dispensing:

N

Type and Use:

Indications of USTs:

N

Not for storage of hazmat. 3 underground vaults. One located at the S. side of the substation area, N. of the 3 tool cabinets. Not locked. Contained wires. One located in the SW corner w/ locked hatch. One located on the N. side, S. the circuit breaker; was empty.

Foundations (former building sites):

N

Type:

Concrete pad at S side of substation area. Probably used for substation equipment. Metal sheathed wires are extruding from pad with black oily residue.

Chemical Storage:

N

Possible PCBs within equipment.

Type, Storage Method, and Quantity:

Drums:

N

Type, Condition, and Use:

Surface Water:

N

Type and Description:

Water Wells:

N

Type and Use:

Septic Systems:

N

Type and Use:

Stressed Vegetation:

None. Substation area was densely vegetated.

Odors:

None

Surface Stains:

Two dark areas in surface found at base of vegetation near N side of substation area. No structures or containers nearby to indicate source.

Soil stains (darker soil) observed at raised areas (berms) at S side of Site.

Pooled Liquids:

Active oil leak from base of closer motor in Bushing Current Transformer equipment cabinet.

Roads:

No roads through the Site

Type and Use:

Electrical Systems and Transformers:

Y N

Type, ownership, age and Use:

GE Power Circuit Breaker, GE Bushing Current Transformer, age unknown. Capacitors and transformer most likely remain.

Heat Transfer Systems:

Y N

Type and Use:

Resource Extraction:
