Mr. Chris Gekas and Mr. Mazi Shirakh  
California Energy Commission

Re: Title 24 Comments by Chris Mathis

Dear Mr. Gekas and Mr. Shirakh:

I believe I can speak with some authority on the subject of ANSI/ASHRAE/IESNA Standard 90.1, as the past Chairman of the full committee, having served on the committee for more than half of the last 33 years, and as a registered professional engineer in California.

The comments by Mr. Chris Mathis dated September 18, 2007, copy attached, are neither correct nor complete. His attachment says that addenda as and at "have been incorporated into ANSI/ASHRAE/IESNA Standard 90.1-2007." These addenda are not yet incorporated into ANSI/ASHRAE/IESNA Standard 90.1. Both addenda have been appealed and have not yet been "embraced by" or "incorporated into ANSI/ASHRAE/IESNA Standard 90.1-2007." Contrary to his statement, these addenda have not been completely through the public review process. The fuel prices used are not consistent with all other requirements in ANSI/ASHRAE/IESNA Standard 90.1, and even those in the proposed 2007 edition. Further, ANSI/ASHRAE/IESNA Standard 90.1-2007 has not yet been published. Try to buy a copy.

Therefore, his comments should be discarded and ignored.

Very truly yours,

LAWRENCE G. SPIELVOGEL, INC.
