**Subject:** Docket 10-BSTD-01, "Proposals For Certification of AcceptanceTesting Field Technicians For Mechanical Systems and Lighting Controls"

Dear Commissioner Douglas:

I am writing to echo Mark Wills' opposition to this Docket. The pursuit of those in favor of this Docket is to streamline the acceptance of mechanical systems and lighting controls. Engineers and commissioning agents are here to police the acceptance tests. The result of allowing only contractors to certify these systems will be systems not operating as they should.

Thanks,  
Guil
