Subject: Docket 15-BSTD-01

Honorable Members of the California Energy Commission,

As you are no doubt keenly aware, unintended consequences of the current Energy Code has created a dis-incentive to upgrade commercial lighting necessary to meet our state's energy saving goals. While the code is successfully driving efficiency in new buildings the overwhelming majority of savings opportunities lie in the inventory of existing buildings. Your decisive leadership to correct this oversight will be another demonstration of California's visionary heritage on energy and climate issues. Thank you very much.

Sincerely,

John Pink

John Pink
Vice President Energy Services
