Christopher

Can't help you out here, this program is the most asinine ill-conceived program that has come across in a long time, and just put's another huge burden on us legitimate contractors while the ones who are unqualified keep doing what they do best, making money which we hardly can do anymore with all the rules that tie our hands. It's just like any of these other bureaucratic wet dreams that are never enforced and fail, this program is totally unenforceable as with all these programs the state will just rob the funds and no enforcement money will be allocated.

Just my opinion! And I hope this program just goes away, the sooner the better.

Sincerely

Bob Jeppesen

Hello Mr. Jeppesen,

I was wondering if you could help NECA and the Statewide LMCC with minor favor. The attached file is a letter (1 of 50 written letters) that were written and need to be sent to the CEC to support CALCTP, Acceptance Testing, and the current energy standards. The CEC is trying to rollback the standards which will return market share to our retro-fitters and unskilled competitors. Now that all the letters are written, it's my job to get 50 different contractors to send them out.

I've attached one of these letters to this email. All I need for you to do is take this document, put your company's logo or letterhead on it, fill in the blanks (may include name, company name, number of years in business) and finally throw in a signature and send it to the three emails that are listed at the top of the document. Don't forget to take the email's out of the document once you are ready to send it. BCC me if you decide to send it.

Would it be possible to have Taft Electric do this for us?

Thanks,

Christopher D. Smith
