## Technical Assistance

The authors are grateful to many people and organizations that contributed to the development and production of this manual. The manual reflects, to a large extent, the comments made by the many people who took time to carefully review earlier versions. This assistance has been most helpful to us during the revision of the 1998 Residential Manual.

Lastly, so many others contributed helpful suggestions, comments and criticism that are impossible to show a complete list. However, their assistance is acknowledge and greatly appreciated.

In spite of all our efforts, omissions and errors are certain to occur; these, of course, are attributed to the authors alone. If a Manual user discovers an error or has a suggestion, we ask that it be brought to our attention of the Energy Efficiency Hotline and they can be reached at 1-800-772-3300 (California Only) or 916-654-5106.
