RANK LIST OF ELECTRIC SCHOOL BUS APPLICANTS

Grant Solicitation GFO-17-607

School Bus Replacement for California Public School Districts, County Offices of Education, and Joint Power Authorities November 19, 2018

On May 31, 2017, the California Energy Commission (Energy Commission) released a grant solicitation and application package entitled "School Bus Replacement for California Public School Districts, County Offices of Education, and Joint Power Authorities" under the Clean Energy Job Creation Program. This grant solicitation was an offer to fund projects that replace the oldest school buses in California. The grant solicitation announced that there is a total of \$75 million distributed among four regions: Northern, Central, Southern, and Los Angeles County. The Energy Commission, at its sole discretion, reserves the right to increase or reduce the amount of funds available.

The attached table, "Rank List of Electric School Bus Applicants", identifies the applicant and electric school bus replacement type in ranked order by region. This notice is posted on the Energy Commission's website at: <http://www.energy.ca.gov/contracts/index.html>. This is not the final Notice of Proposed Awards (NOPA) and does not guarantee funding for applicants listed. The purpose of this rank list is to inform potential bidders in a separate competitive school bus bulk purchase price solicitation planned for release in late 2018. The intent of the bulk purchase price solicitation is to select a bus dealer(s)/manufacturer(s) and establish the grant price for electric school buses awarded under GFO-17-607. Once school bus prices are established, a final NOPA will be published in early 2019, indicating the final awardees and total number of school bus replacements awarded for funding under GFO-17-607.

Evaluation of applications for GFO-17-607 was conducted in two phases of scoring; an administrative screening evaluation and technical scoring. Applications passing the screening criteria were then reviewed and scored. Each individual school bus requested for replacement was evaluated on three criteria: the age of the school bus (70%), benefits to disadvantaged communities served by the application based on CalEnviroScreen 3.0 (10%), and applicant's percentage of students on free and reduced priced meals as reported in the 2017-18 First Principal Apportionment (20%).

Additionally, awardees will receive charging infrastructure funding up to \$60,000 for each electric school bus awarded. Infrastructure installation is a critical part of a successful electric school bus rollout. To help better understand the process and resources available, applicants are encouraged to attend or listen to the Energy Commission's Infrastructure Workshop on November 29, 2018 to discuss the necessary steps to install electric vehicle infrastructure. Many California utilities now have special programs and

services for electric school bus customers. Connecting with utility service providers now is highly strategic when planning charging infrastructure. Learn about these many infrastructure funding opportunities, resources and more at this educational workshop.

Detailed workshop information can be found here:

Disqualified Buses

The buses listed below have been disqualified and eliminated from further evaluation due to one of the following reasons:

- Failure to meet one of the following project eligibility requirements:
 - 1) Attachment 1 Application Form was not submitted (see Section IV.A.2, Administrative Screening Criteria).
 - 2) Replaced, old school bus was not an eligible bus type; propane and gasoline buses are ineligible for replacement (see Section II.B, Eligible Bus Replacement Types).
 - 3) New school bus was not an eligible bus type; only electric or compressed natural gas buses are eligible (see Section II.B, Eligible Bus Replacement Types).
- Bus was part of full bus fleet data submission and was not intended to be used to apply for a new, replacement bus. Buses provided for informational purposes only were not scored or ranked.
