### Agenda Item Subject and Description

T2M GLOBAL, LLC. Proposed resolution approving agreement PIR-17-001 with T2M Global, LLC for a $1,299,109 grant to develop and demonstrate a waste heat to power system. The system involves newly developed materials used in a high efficiency forward osmosis process to create pressurized water which runs a turbo-generator to produce power. The process is driven by low-temperature waste heat. The successful demonstration of the technology will open a new economic pathway for currently wasted heat from industrial and other operations.

1. **Is Agreement considered a “Project” under CEQA?**
   - [ ] Yes (skip to question 2)
   - [x] No (complete the following (PRC 21065 and 14 CCR 15378)):
     
     Explain why Agreement is not considered a “Project”:

2. **If Agreement is considered a “Project” under CEQA:**
   - [x] a) Agreement **IS** exempt. (Attach draft NOE)
     
     - [ ] Statutory Exemption. List PRC and/or CCR section number:
     - [ ] Common Sense Exemption. 14 CCR 15061 (b) (3)
     
     Explain reason why Agreement is exempt under the above section:
     15301: The project consists of installation of a waste heat to power system in an existing manufacturing facility. The skid mounted system will utilize existing waste heat at the facility to generate electricity. This installation is a minor alteration to the existing facility which involves negligible expansion of use.
     15306: The project involves collection of data for research and evaluation purposes. Data will be collected to evaluate various performance parameters of the newly developed system. It will not result in a serious disturbance to an environmental resource.
   - [ ] b) Agreement **IS NOT** exempt. (Consult with the legal office to determine next steps.)
     
     Check all that apply:
     - [ ] Initial Study
     - [ ] Negative Declaration
     - [ ] Mitigated Negative Declaration
     - [ ] Environmental Impact Report
     - [ ] Statement of Overriding Considerations
List all subcontractors (major and minor) and equipment vendors: (attach additional sheets as necessary)

II. PURPOSE OF AGREEMENT, PROBLEM/SOLUTION STATEMENT, AND GOALS AND OBJECTIVES

A. Purpose of Agreement
The purpose of this Agreement is to fund the development and demonstration of a system for converting low-temperature industrial waste heat to power using a forward osmosis process.

B. Problem/ Solution Statement

Problem
Waste heat can be captured and used as an emission-free substitute for costly fuels or electricity. However, an estimated 5 quadrillion Btu/yr of waste heat energy remains unutilized in California. A large portion of this waste heat is in the low-temperature range, defined as waste heat below 400°F. Low-temperature waste heat is difficult to recover and reuse economically. The various technologies currently being investigated have relatively low efficiency and high capital costs when used to generate power from low-temperature waste heat sources. Thus,

---

1 Please see subtask 1.3 in Part III of the Scope of Work (General Project Tasks) for a description of Critical Project Review (CPR) Meetings.
there is a significant need for a more economical power generation system for conversion of low-temperature waste heat to electrical energy.

**Solution**
The Recipient will develop and demonstrate an innovative waste heat to osmotic power (WHOP) system. New polymeric draw solutions with high osmotic pressures, along with newly available forward osmosis (FO) membrane systems will pull large amounts of water across semi-permeable membranes in a process called pressure retarded forward osmosis (PRFO). The resulting pressurized water will run a turbo-generator to produce power. The spent polymeric solution is regenerated by use of carbon dioxide (CO₂) and waste heat, and restored as an osmotic draw solution for the next cycle of the PRFO process. All the individual unit processes for the integrated WHOP system have been developed and proven independently. The WHOP system is calculated to have an efficiency greater than 15 percent, at an installed cost target of less than $1,500/kW (in full production) and $0.02-0.04/kWh operating cost, inclusive of annual amortization, labor, materials, and maintenance costs. The project will address cost reductions and efficiency improvements in collecting and managing low-temperature waste heat, thus improving its quality for power generation, and improving the power generation systems that take in the waste heat. The successful demonstration of the WHOP technology will open a new economic pathway for currently wasted heat from industrial and other operations.

**C. Goals and Objectives of the Agreement**

**Agreement Goals**
The goal of this Agreement is to make the conversion of low-temperature waste heat to power more economical.

**Ratepayer Benefits**: This Agreement will result in ratepayer benefits of greater electricity reliability and lower costs. Development and demonstration of a low-cost waste heat to power system will lead to a greater number of distributed generation systems on the grid and will produce electricity at a lower cost.

**Technological Advancement and Breakthroughs**: This Agreement will lead to technological advancement and breakthroughs to overcome barriers to the achievement of the State of California’s statutory energy goals by development and demonstration of a 25 kW WHOP system for power generation from low-temperature waste heat (≤ 400°F). The performance of this project will lead to innovative applications and practices for power generation in the PRFO process, and the creation of a more efficient techno-economic package at lower costs than current heat-engine based systems or solid-state devices.

**Agreement Objectives**
The objectives of this Agreement are to:

- Develop, integrate, and demonstrate a 25 kW system for power generation from low-temperature waste heat, using hydro-osmotic technology for a scalable and deployable, low-cost waste heat to power (WHP) technology.
- Obtain real-time information on the WHOP system operation for a minimum of 500 hours.
- Obtain system efficiency greater than 15 percent on a higher heating value basis.
- Identify process metrics and improvements for designing and deploying larger scale systems, up to 1 megawatt or higher, at industrial scales.
- Develop a new class of osmotic polymers for the WHOP system with CO₂-philicity, as well as ≥ 90 percent efficient hydraulic turbo-generators.
III. TASK 1 GENERAL PROJECT TASKS

PRODUCTS

Subtask 1.1 Products
The goal of this subtask is to establish the requirements for submitting project products (e.g., reports, summaries, plans, and presentation materials). Unless otherwise specified by the Commission Agreement Manager (CAM), the Recipient must deliver products as required below by the dates listed in the Project Schedule (Part V). Products that require a draft version are indicated by marking “(draft and final)” after the product name in the “Products” section of the task/subtask. If “(draft and final)” does not appear after the product name, only a final version of the product is required. With respect to due dates within this Scope of Work, “days” means working days.

The Recipient shall:

For products that require a draft version, including the Final Report Outline and Final Report

- Submit all draft products to the CAM for review and comment in accordance with the Project Schedule (Part V). The CAM will provide written comments to the Recipient on the draft product within 15 days of receipt, unless otherwise specified in the task/subtask for which the product is required.
- Consider incorporating all CAM comments into the final product. If the Recipient disagrees with any comment, provide a written response explaining why the comment was not incorporated into the final product.
- Submit the revised product and responses to comments within 10 days of notice by the CAM, unless the CAM specifies a longer time period, or approves a request for additional time.

For products that require a final version only

- Submit the product to the CAM for acceptance. The CAM may request minor revisions or explanations prior to acceptance.

For all products

- Submit all data and documents required as products in accordance with the following:

Instructions for Submitting Electronic Files and Developing Software:

- Electronic File Format
  - Submit all data and documents required as products under this Agreement in an electronic file format that is fully editable and compatible with the Energy Commission’s software and Microsoft (MS)-operating computing platforms, or with any other format approved by the CAM. Deliver an electronic copy of the full text of any Agreement data and documents in a format specified by the CAM, such as memory stick or CD-ROM.

The following describes the accepted formats for electronic data and documents provided to the Energy Commission as products under this Agreement, and establishes the software versions that will be required to review and approve all software products:

- Data sets will be in MS Access or MS Excel file format (version 2007 or later), or any other format approved by the CAM.
Scope of Work
T2M Global, LLC

- Text documents will be in MS Word file format, version 2007 or later.
- Documents intended for public distribution will be in PDF file format.
- The Recipient must also provide the native Microsoft file format.
- Project management documents will be in Microsoft Project file format, version 2007 or later.

- **Software Application Development**
  Use the following standard Application Architecture components in compatible versions for any software application development required by this Agreement (e.g., databases, models, modeling tools), unless the CAM approves other software applications such as open source programs:
  - Microsoft ASP.NET framework (version 3.5 and up). Recommend 4.0.
  - Microsoft Internet Information Services (IIS), (version 6 and up) Recommend 7.5.
  - C# Programming Language with Presentation (UI), Business Object and Data Layers.
  - SQL (Structured Query Language).
  - XML (external interfaces).

Any exceptions to the Electronic File Format requirements above must be approved in writing by the CAM. The CAM will consult with the Energy Commission's Information Technology Services Branch to determine whether the exceptions are allowable.

**MEETINGS**

Subtask 1.2 Kick-off Meeting
The goal of this subtask is to establish the lines of communication and procedures for implementing this Agreement.

The Recipient shall:
- Attend a “Kick-off” meeting with the CAM, the Commission Agreement Officer (CAO), and any other Energy Commission staff relevant to the Agreement. The Recipient will bring its Project Manager and any other individuals designated by the CAM to this meeting. The administrative and technical aspects of the Agreement will be discussed at the meeting. Prior to the meeting, the CAM will provide an agenda to all potential meeting participants. The meeting may take place in person or by electronic conferencing (e.g., WebEx), with approval of the CAM.

The administrative portion of the meeting will include discussion of the following:
  - Terms and conditions of the Agreement;
  - Administrative products (subtask 1.1);
  - CPR meetings (subtask 1.3);
  - Match fund documentation (subtask 1.7);
  - Permit documentation (subtask 1.8);
  - Subcontracts (subtask 1.9); and
  - Any other relevant topics.
Scope of Work
T2M Global, LLC

The technical portion of the meeting will include discussion of the following:
- The CAM’s expectations for accomplishing tasks described in the Scope of Work;
- An updated Project Schedule;
- Technical products (subtask 1.1);
- Progress reports and invoices (subtask 1.5);
- Final Report (subtask 1.6);
- Technical Advisory Committee meetings (subtasks 1.10 and 1.11); and
- Any other relevant topics.

- Provide an Updated Project Schedule, List of Match Funds, and List of Permits, as needed to reflect any changes in the documents.

The CAM shall:
- Designate the date and location of the meeting.
- Send the Recipient a Kick-off Meeting Agenda.

Recipient Products:
- Updated Project Schedule (if applicable)
- Updated List of Match Funds (if applicable)
- Updated List of Permits (if applicable)

CAM Product:
- Kick-off Meeting Agenda

Subtask 1.3 Critical Project Review (CPR) Meetings
The goal of this subtask is to determine if the project should continue to receive Energy Commission funding, and if so whether any modifications must be made to the tasks, products, schedule, or budget. CPR meetings provide the opportunity for frank discussions between the Energy Commission and the Recipient. As determined by the CAM, discussions may include project status, challenges, successes, advisory group findings and recommendations, final report preparation, and progress on technical transfer and production readiness activities (if applicable). Participants will include the CAM and the Recipient, and may include the CAO and any other individuals selected by the CAM to provide support to the Energy Commission.

CPR meetings generally take place at key, predetermined points in the Agreement, as determined by the CAM and as shown in the Task List on page 1 of this Exhibit. However, the CAM may schedule additional CPR meetings as necessary. The budget will be reallocated to cover the additional costs borne by the Recipient, but the overall Agreement amount will not increase. CPR meetings generally take place at the Energy Commission, but they may take place at another location, or may be conducted via electronic conferencing (e.g., WebEx) as determined by the CAM.

The Recipient shall:
- Prepare a CPR Report for each CPR meeting that: (1) discusses the progress of the Agreement toward achieving its goals and objectives; and (2) includes recommendations and conclusions regarding continued work on the project.
- Submit the CPR Report along with any other Task Products that correspond to the technical task for which the CPR meeting is required (i.e., if a CPR meeting is required for Task 2, submit the Task 2 products along with the CPR Report).
Scope of Work
T2M Global, LLC

- Attend the CPR meeting.
- Present the CPR Report and any other required information at each CPR meeting.

The CAM shall:
- Determine the location, date, and time of each CPR meeting with the Recipient's input.
- Send the Recipient a CPR Agenda and a List of Expected CPR Participants in advance of the CPR meeting. If applicable, the agenda will include a discussion of match funding and permits.
- Conduct and make a record of each CPR meeting. Provide the Recipient with a Schedule for Providing a Progress Determination on continuation of the project.
- Determine whether to continue the project, and if so whether modifications are needed to the tasks, schedule, products, or budget for the remainder of the Agreement. If the CAM concludes that satisfactory progress is not being made, this conclusion will be referred to the Deputy Director of the Energy Research and Development Division.
- Provide the Recipient with a Progress Determination on continuation of the project, in accordance with the schedule. The Progress Determination may include a requirement that the Recipient revise one or more products.

Recipient Products:
- CPR Report(s)
- Task Products (draft and/or final as specified in the task)

CAM Products:
- CPR Agenda
- List of Expected CPR Participants
- Schedule for Providing a Progress Determination
- Progress Determination

Subtask 1.4 Final Meeting
The goal of this subtask is to complete the closeout of this Agreement.

The Recipient shall:
- Meet with Energy Commission staff to present project findings, conclusions, and recommendations. The final meeting must be completed during the closeout of this Agreement. This meeting will be attended by the Recipient and CAM, at a minimum. The meeting may occur in person or by electronic conferencing (e.g., WebEx), with approval of the CAM.

The technical and administrative aspects of Agreement closeout will be discussed at the meeting, which may be divided into two separate meetings at the CAM’s discretion.
  o The technical portion of the meeting will involve the presentation of findings, conclusions, and recommended next steps (if any) for the Agreement. The CAM will determine the appropriate meeting participants.
  o The administrative portion of the meeting will involve a discussion with the CAM and the CAO of the following Agreement closeout items:
    ▪ Disposition of any state-owned equipment.
    ▪ Need to file a Uniform Commercial Code Financing Statement (Form UCC-1) regarding the Energy Commission’s interest in patented technology.
The Energy Commission’s request for specific “generated” data (not already provided in Agreement products).
- Need to document the Recipient’s disclosure of “subject inventions” developed under the Agreement.
- “Surviving” Agreement provisions such as repayment provisions and confidential products.
- Final invoicing and release of retention.

- Prepare a **Final Meeting Agreement Summary** that documents any agreement made between the Recipient and Commission staff during the meeting.
- Prepare a **Schedule for Completing Agreement Closeout Activities**.
- Provide **All Draft and Final Written Products** on a CD-ROM or USB memory stick, organized by the tasks in the Agreement.

### Products:
- Final Meeting Agreement Summary *(if applicable)*
- Schedule for Completing Agreement Closeout Activities
- All Draft and Final Written Products

### REPORTS AND INVOICES

#### Subtask 1.5 Progress Reports and Invoices
The goals of this subtask are to: (1) periodically verify that satisfactory and continued progress is made towards achieving the project objectives of this Agreement; and (2) ensure that invoices contain all required information and are submitted in the appropriate format.

**The Recipient shall:**
- Submit a monthly *Progress Report* to the CAM. Each progress report must:
  - Summarize progress made on all Agreement activities as specified in the scope of work for the preceding month, including accomplishments, problems, milestones, products, schedule, fiscal status, and an assessment of the ability to complete the Agreement within the current budget and any anticipated cost overruns. See the Progress Report Format Attachment for the recommended specifications.
- Submit a monthly or quarterly *Invoice* that follows the instructions in the “Payment of Funds” section of the terms and conditions, including a financial report on Match Fund and in-state expenditures.

**Products:**
- Progress Reports
- Invoices

#### Subtask 1.6 Final Report
The goal of this subtask is to prepare a comprehensive Final Report that describes the original purpose, approach, results, and conclusions of the work performed under this Agreement. The CAM will review the Final Report, which will be due at least **two months** before the Agreement end date. When creating the Final Report Outline and the Final Report, the Recipient must use the Style Manual provided by the CAM.
Scope of Work
T2M Global, LLC

Subtask 1.6.1 Final Report Outline
The Recipient shall:
- Prepare a Final Report Outline in accordance with the Style Manual provided by the CAM. (See Task 1.1 for requirements for draft and final products.)

Recipient Products:
- Final Report Outline (draft and final)

CAM Product:
- Style Manual
- Comments on Draft Final Report Outline
- Approval of Final Report Outline

Subtask 1.6.2 Final Report
The Recipient shall:
- Prepare a Final Report for this Agreement in accordance with the approved Final Report Outline, Style Manual, and Final Report Template provided by the CAM with the following considerations:
  - Ensure that the report includes the following items, in the following order:
    - Cover page (required)
    - Credits page on the reverse side of cover with legal disclaimer (required)
    - Acknowledgements page (optional)
    - Preface (required)
    - Abstract, keywords, and citation page (required)
    - Table of Contents (required, followed by List of Figures and List of Tables, if needed)
    - Executive summary (required)
    - Body of the report (required)
    - References (if applicable)
    - Glossary/Acronyms (If more than 10 acronyms or abbreviations are used, it is required.)
    - Bibliography (if applicable)
    - Appendices (if applicable) (Create a separate volume if very large.)
    - Attachments (if applicable)
  - Ensure that the document is written in the third person.
  - Ensure that the Executive Summary is understandable to the lay public.
    - Briefly summarize the completed work. Succinctly describe the project results and whether or not the project goals were accomplished.
    - Identify which specific ratepayers can benefit from the project results and how they can achieve the benefits.
    - If it’s necessary to use a technical term in the Executive Summary, provide a brief definition or explanation when the technical term is first used.
  - Follow the Style Guide format requirements for headings, figures/tables, citations, and acronyms/abbreviations.
  - Ensure that the document omits subjective comments and opinions. However, recommendations in the conclusion of the report are allowed.
  - Include a brief description of the project results in the Abstract.
Scope of Work
T2M Global, LLC

- Submit a draft of the report to the CAM for review and comment. The CAM will provide written comments to the Recipient on the draft product within 15 days of receipt.
- Consider incorporating all CAM comments into the Final Report. If the Recipient disagrees with any comment, provide a written response explaining why the comment was not incorporated into the final product.
- Submit the revised Final Report and responses to comments within 10 days of notice by the CAM, unless the CAM specifies a longer time period or approves a request for additional time.
- Submit one bound copy of the Final Report to the CAM along with Written Responses to Comments on the Draft Final Report.

Products:
- Final Report (draft and final)
- Written Responses to Comments on the Draft Final Report

CAM Product:
- Written Comments on the Draft Final Report

MATCH FUNDS, PERMITS, AND SUBCONTRACTS

Subtask 1.7 Match Funds
The goal of this subtask is to ensure that the Recipient obtains any match funds planned for this Agreement and applies them to the Agreement during the Agreement term.

While the costs to obtain and document match funds are not reimbursable under this Agreement, the Recipient may spend match funds for this task. The Recipient may only spend match funds during the Agreement term, either concurrently or prior to the use of Energy Commission funds. Match funds must be identified in writing, and the Recipient must obtain any associated commitments before incurring any costs for which the Recipient will request reimbursement.

The Recipient shall:
- Prepare a Match Funds Status Letter that documents the match funds committed to this Agreement. If no match funds were part of the proposal that led to the Energy Commission awarding this Agreement and none have been identified at the time this Agreement starts, then state this in the letter.
  - A list of the match funds that identifies:
    - The amount of cash match funds, their source(s) (including a contact name, address, and telephone number), and the task(s) to which the match funds will be applied.
    - The amount of each in-kind contribution, a description of the contribution type (e.g., property, services), the documented market or book value, the source (including a contact name, address, and telephone number), and the task(s) to which the match funds will be applied. If the in-kind contribution is equipment or other tangible or real property, the Recipient must identify its owner and provide a contact name, address, telephone number, and the
address where the property is located.

- If different from the solicitation application, provide a letter of commitment from an authorized representative of each source of match funding that the funds or contributions have been secured.

- At the Kick-off meeting, discuss match funds and the impact on the project if they are significantly reduced or not obtained as committed. If applicable, match funds will be included as a line item in the progress reports and will be a topic at CPR meetings.

- Provide a *Supplemental Match Funds Notification Letter* to the CAM of receipt of additional match funds.

- Provide a *Match Funds Reduction Notification Letter* to the CAM if existing match funds are reduced during the course of the Agreement. Reduction of match funds may trigger a CPR meeting.

**Products:**
- Match Funds Status Letter
- Supplemental Match Funds Notification Letter *(if applicable)*
- Match Funds Reduction Notification Letter *(if applicable)*

### Subtask 1.8 Permits

The goal of this subtask is to obtain all permits required for work completed under this Agreement in advance of the date they are needed to keep the Agreement schedule on track. Permit costs and the expenses associated with obtaining permits are not reimbursable under this Agreement, with the exception of costs incurred by University of California recipients.

Permits must be identified and obtained before the Recipient may incur any costs related to the use of the permit(s) for which the Recipient will request reimbursement.

**The Recipient shall:**

- Prepare a *Permit Status Letter* that documents the permits required to conduct this Agreement. If no permits are required at the start of this Agreement, then state this in the letter. If permits will be required during the course of the Agreement, provide in the letter:
  - A list of the permits that identifies: (1) the type of permit; and (2) the name, address, and telephone number of the permitting jurisdictions or lead agencies.
  - The schedule the Recipient will follow in applying for and obtaining the permits.

The list of permits and the schedule for obtaining them will be discussed at the Kick-off meeting (subtask 1.2); and a timetable for submitting the updated list, schedule, and copies of the permits will be developed. The impact on the project if the permits are not obtained in a timely fashion or are denied will also be discussed. If applicable, permits will be included as a line item in progress reports and will be a topic at CPR meetings.

- If during the course of the Agreement additional permits become necessary, then provide the CAM with an *Updated List of Permits* (including the appropriate information on each permit) and an *Updated Schedule for Acquiring Permits*.

- Send the CAM a *Copy of Each Approved Permit*.

- If during the course of the Agreement permits are not obtained on time or are denied, notify the CAM within 5 days. Either of these events may trigger a CPR meeting.

**Products:**
- Permit Status Letter
- Updated List of Permits *(if applicable)*
Scope of Work
T2M Global, LLC

- Updated Schedule for Acquiring Permits *(if applicable)*
- Copy of Each Approved Permit *(if applicable)*

### Subtask 1.9 Subcontracts
The goals of this subtask are to: (1) procure subcontracts required to carry out the tasks under this Agreement; and (2) ensure that the subcontracts are consistent with the terms and conditions of this Agreement.

The Recipient shall:
- Manage and coordinate subcontractor activities in accordance with the requirements of this Agreement.
- Incorporate this Agreement by reference into each subcontract.
- Include any required Energy Commission flow-down provisions in each subcontract, in addition to a statement that the terms of this Agreement will prevail if they conflict with the subcontract terms.
- If required by the CAM, submit a draft of each *Subcontract* required to conduct the work under this Agreement.
- Submit a final copy of the executed subcontract.
- Notify and receive written approval from the CAM prior to adding any new subcontractors (see the discussion of subcontractor additions in the terms and conditions).

**Products:**
- Subcontracts *(draft if required by the CAM)*

### TECHNICAL ADVISORY COMMITTEE
**Subtask 1.10 Technical Advisory Committee (TAC)**
The goal of this subtask is to create an advisory committee for this Agreement. The TAC should be composed of diverse professionals. The composition will vary depending on interest, availability, and need. TAC members will serve at the CAM’s discretion. The purpose of the TAC is to:
- Provide guidance in project direction. The guidance may include scope and methodologies, timing, and coordination with other projects. The guidance may be based on:
  - Technical area expertise;
  - Knowledge of market applications; or
  - Linkages between the agreement work and other past, present, or future projects (both public and private sectors) that TAC members are aware of in a particular area.
- Review products and provide recommendations for needed product adjustments, refinements, or enhancements.
- Evaluate the tangible benefits of the project to the state of California, and provide recommendations as needed to enhance the benefits.
- Provide recommendations regarding information dissemination, market pathways, or commercialization strategies relevant to the project products.
The TAC may be composed of qualified professionals spanning the following types of disciplines:

- Researchers knowledgeable about the project subject matter;
- Members of trades that will apply the results of the project (e.g., designers, engineers, architects, contractors, and trade representatives);
- Public interest market transformation implementers;
- Product developers relevant to the project;
- U.S. Department of Energy research managers, or experts from other federal or state agencies relevant to the project;
- Public interest environmental groups;
- Utility representatives;
- Air district staff; and
- Members of relevant technical society committees.

The Recipient shall:

- Prepare a List of Potential TAC Members that includes the names, companies, physical and electronic addresses, and phone numbers of potential members. The list will be discussed at the Kick-off meeting, and a schedule for recruiting members and holding the first TAC meeting will be developed.
- Recruit TAC members. Ensure that each individual understands member obligations and the TAC meeting schedule developed in subtask 1.11.
- Prepare a List of TAC Members once all TAC members have committed to serving on the TAC.
- Submit Documentation of TAC Member Commitment (such as Letters of Acceptance) from each TAC member.

Products:

- List of Potential TAC Members
- List of TAC Members
- Documentation of TAC Member Commitment

Subtask 1.11 TAC Meetings
The goal of this subtask is for the TAC to provide strategic guidance for the project by participating in regular meetings, which may be held via teleconference.

The Recipient shall:

- Discuss the TAC meeting schedule with the CAM at the Kick-off meeting. Determine the number and location of meetings (in-person and via teleconference) in consultation with the CAM.
- Prepare a TAC Meeting Schedule that will be presented to the TAC members during recruiting. Revise the schedule after the first TAC meeting to incorporate meeting comments.
- Prepare a TAC Meeting Agenda and TAC Meeting Back-up Materials for each TAC meeting.
- Organize and lead TAC meetings in accordance with the TAC Meeting Schedule. Changes to the schedule must be pre-approved in writing by the CAM.
- Prepare TAC Meeting Summaries that include any recommended resolutions of major TAC issues.
Scope of Work
T2M Global, LLC

Products:
• TAC Meeting Schedule (draft and final)
• TAC Meeting Agendas (draft and final)
• TAC Meeting Back-up Materials
• TAC Meeting Summaries
IV. TECHNICAL TASKS

TASK 2: WASTE HEAT TO OSMOTIC POWERSYSTEM DEVELOPMENT

The goals of this task are to: (1) develop and evaluate the different components of the WHOP system; (2) fabricate and assemble the complete system; and (3) test the complete system for demonstration readiness.

The Recipient shall:

- Prepare a **Lab Test Plan** that discusses the potential polymers and FO membranes to be tested, and the tests to be performed on these system components.
- Develop the detailed composition of the osmotic polymers to be used in the system. Test the procured chemicals for osmotic potentials and CO₂ absorption and desorption characteristics. Engineer better polymers if needed, for use in the WHOP system.
- Investigate properties of selected FO membrane modules for flux rate, fouling tendency, and minimization of concentration polarization. Modify modules as needed to ensure generation of required osmotic pressure and flux rate for the WHOP system.
- Prepare a **Lab Test Report** that contains the tests performed, the results, and the materials selected for use in the WHOP system.
- Investigate the performance envelopes of available hydro-turbines or turbo-generators for the expected osmotic/hydraulic pressure and flux rate from the FO modules, and pressure exchangers if needed, to optimize power production. Select and procure the required hydro-turbine with associated generator.
- Design and fabricate the CO₂ injection and absorption system (preferably a pressurized nano-bubbler for optimized mixing and absorption of CO₂ into the liquid mixture) and a liquid-liquid separator for efficient phase separation of the diluted polymer from its water solution.
- Evaluate the required characteristics of the heat exchanger for efficient desorption of CO₂ from the CO₂-philic polymer using detailed heat and mass transfer calculations.
- Select and procure the optimized heat exchanger.
- Engineer and fabricate the gas-liquid separator for optimum CO₂ recovery. Select and procure a CO₂ compressor for injection of CO₂ into the polymer-water (CO₂ injector) separator.
- Design/evaluate and procure other equipment such as a 25 kW load bank, pumps, valves and other appurtenances, cooling towers, process automation and control hardware/software systems and Measurement and Verification hardware/software.
- Prepare an **Acceptance Test Plan** that includes the types of tests to be performed on the assembled system and the methods to be used.
- Assemble all of the above WHOP components and perform factory acceptance test to establish demonstration readiness.
- Prepare a **Demonstration Readiness Report** that includes the following:
  - Design options considered for the WHOP system
  - Key Information learned during Task 2
  - Final system design
  - Test results from factory acceptance testing
- Prepare a **CPR Report** in accordance with subtask 1.3 (CPR Meetings).
- Participate in a CPR meeting.
TASK 3: DEMONSTRATION SITE PREPARATION
The goal of this task is to complete all engineering requirements for site preparation with respect to civil engineering, waste heat supply pipelines, electrical engineering, and requisite facility support for installation of the integrated WHOP system.

The Recipient shall:
- Develop engineering requirements for installation and integration at the host site.
- Develop process control and safety protocols for interfacing with the host site.
- Hold a review meeting at the host site for site-specific requirements, followed by a second meeting to review site readiness for installation.
- Prepare a Site Requirements and Layout Report that includes the following:
  - Installed system layout
  - Engineering requirements
  - Process controls and safety protocols
  - Anticipated site benefits

Products:
- Site Requirements and Layout Report

TASK 4: INSTALLATION AT DEMONSTRATION SITE
The goals of this task are to: (1) install the integrated WHOP system at the demonstration site; and (2) perform initial start-up and identify any system glitches or modifications needed prior to full-scale operation of the 25 kW WHOP system.

The Recipient shall:
- Integrate and install the complete WHOP system including auxiliary and safety systems, such as the required containment systems for chemical spills etc.
- Perform initial system start-up and evaluate process automation/control functionality, as well as the integration of the Measurement & Verification system. Identify any modifications needed prior to full-scale operation.
- Provide Written Notification of Installation Completion. Notification may be included in a progress report and shall include a summary of issues encountered and modifications needed.

Products:
- Written Notification of Installation Completion
TASK 5: OPERATION AND PERFORMANCE EVALUATION
The goals of this task are to: (1) operate the WHOP system for at least 500 hours and assess various performance parameters; and (2) perform a complete techno-economic analysis of the WHOP technology.

The Recipient shall:
- Develop a detailed Measurement and Verification Plan for analysis of the WHOP system performance. The plan shall include instrumentation requirements, performance metrics, and associated calculations.
- Develop diagnostic software that optimizes WHOP system functionality.
- Prepare a Diagnostic Software Report that includes a description of the software interface and output, an evaluation of system performance and efficiency, and detected system malfunctioning.
- Operate the WHOP system for at least 500 hours and evaluate performance characteristics.
- Perform a complete techno-economic analysis of the WHOP technology with respect to scalability, deployment, and cost factors for comparison to current state of the art technologies like the organic Rankine cycle and the Kalina cycle, as well as projected values of using supercritical CO₂ for WHP systems.
- Prepare an Operation and Performance Evaluation Report that includes the following:
  - Results from the performance evaluation
  - Conclusions from the techno-economic analysis
  - System improvements needed
  - Recommendations for further research

Products:
- Measurement and Verification Plan
- Diagnostic Software Report
- Operation and Performance Evaluation Report

TASK 6: EVALUATION OF PROJECT BENEFITS
The goal of this task is to report the benefits resulting from this project.

The Recipient shall:
- Complete three Project Benefits Questionnaires that correspond to three main intervals in the Agreement: (1) Kick-off Meeting Benefits Questionnaire; (2) Mid-term Benefits Questionnaire; and (3) Final Meeting Benefits Questionnaire.
- Provide all key assumptions used to estimate projected benefits, including: targeted market sector (e.g., population and geographic location), projected market penetration, baseline and projected energy use and cost, operating conditions, and emission reduction calculations. Examples of information that may be requested in the questionnaires include:
  - For Product Development Projects and Project Demonstrations:
    - Published documents, including date, title, and periodical name.
    - Estimated or actual energy and cost savings, and estimated statewide energy savings once market potential has been realized. Identify all assumptions used in the estimates.
Scope of Work
T2M Global, LLC

- Greenhouse gas and criteria emissions reductions.
- Other non-energy benefits such as reliability, public safety, lower operational cost, environmental improvement, indoor environmental quality, and societal benefits.
- Data on potential job creation, market potential, economic development, and increased state revenue as a result of the project.
- A discussion of project product downloads from websites, and publications in technical journals.
- A comparison of project expectations and performance. Discuss whether the goals and objectives of the Agreement have been met and what improvements are needed, if any.

  o Additional Information for Product Development Projects:
    - Outcome of product development efforts, such copyrights and license agreements.
    - Units sold or projected to be sold in California and outside of California.
    - Total annual sales or projected annual sales (in dollars) of products developed under the Agreement.
    - Investment dollars/follow-on private funding as a result of Energy Commission funding.
    - Patent numbers and applications, along with dates and brief descriptions.

  o Additional Information for Product Demonstrations:
    - Outcome of demonstrations and status of technology.
    - Number of similar installations.
    - Jobs created/retained as a result of the Agreement.

  o For Information/Tools and Other Research Studies:
    - Outcome of project.
    - Published documents, including date, title, and periodical name.
    - A discussion of policy development. State if the project has been cited in government policy publications or technical journals, or has been used to inform regulatory bodies.
    - The number of website downloads.
    - An estimate of how the project information has affected energy use and cost, or have resulted in other non-energy benefits.
    - An estimate of energy and non-energy benefits.
    - Data on potential job creation, market potential, economic development, and increased state revenue as a result of project.
    - A discussion of project product downloads from websites, and publications in technical journals.
    - A comparison of project expectations and performance. Discuss whether the goals and objectives of the Agreement have been met and what improvements are needed, if any.

- Respond to CAM questions regarding responses to the questionnaires.

The Energy Commission may send the Recipient similar questionnaires after the Agreement term ends. Responses to these questionnaires will be voluntary.
Scope of Work
T2M Global, LLC

Products:
- Kick-off Meeting Benefits Questionnaire
- Mid-term Benefits Questionnaire
- Final Meeting Benefits Questionnaire

TASK 7: TECHNOLOGY/KNOWLEDGE TRANSFER ACTIVITIES
The goal of this task is to develop a plan to make the knowledge gained, experimental results, and lessons learned available to the public and key decision makers.

The Recipient shall:
- Prepare an Initial Fact Sheet at start of the project that describes the project. Use the format provided by the CAM.
- Prepare a Final Project Fact Sheet at the project’s conclusion that discusses results. Use the format provided by the CAM.
- Prepare a Technology/Knowledge Transfer Plan that includes:
  - An explanation of how the knowledge gained from the project will be made available to the public, including the targeted market sector and potential outreach to end users, utilities, regulatory agencies, and others.
  - A description of the intended use(s) for and users of the project results.
  - Published documents, including date, title, and periodical name.
  - Copies of documents, fact sheets, journal articles, press releases, and other documents prepared for public dissemination. These documents must include the Legal Notice required in the terms and conditions. Indicate where and when the documents were disseminated.
  - A discussion of policy development. State if project has been or will be cited in government policy publications, or used to inform regulatory bodies.
  - The number of website downloads or public requests for project results.
  - Additional areas as determined by the CAM.
- Conduct technology transfer activities in accordance with the Technology/Knowledge Transfer Plan. These activities will be reported in the Progress Reports.
- When directed by the CAM, develop Presentation Materials for an Energy Commission-sponsored conference/workshop(s) on the project.
- Provide at least (6) six High Quality Digital Photographs (minimum resolution of 1300x500 pixels in landscape ratio) of pre and post technology installation at the project sites or related project photographs.
- Prepare a Technology/Knowledge Transfer Report on technology transfer activities conducted during the project.

Products:
- Initial Fact Sheet (draft and final)
- Final Project Fact Sheet (draft and final)
- Presentation Materials (draft and final)
- High Quality Digital Photographs
- Technology/Knowledge Transfer Plan (draft and final)
- Technology/Knowledge Transfer Report (draft and final)
TASK 8: PRODUCTION READINESS PLAN
The goal of this task is to determine the steps that will lead to the manufacturing of technologies developed in this project or to the commercialization of the project’s results.

The Recipient shall:
- Prepare a Production Readiness Plan. The degree of detail in the plan should be proportional to the complexity of producing or commercializing the proposed product, and to its state of development. As appropriate, the plan will discuss the following:
  - Critical production processes, equipment, facilities, personnel resources, and support systems needed to produce a commercially viable product.
  - Internal manufacturing facilities, supplier technologies, capacity constraints imposed by the design under consideration, design-critical elements, and the use of hazardous or non-recyclable materials. The product manufacturing effort may include “proof of production processes.”
  - The estimated cost of production.
  - The expected investment threshold needed to launch the commercial product.
  - An implementation plan to ramp up to full production.
  - The outcome of product development efforts, such as copyrights and license agreements.
  - Patent numbers and applications, along with dates and brief descriptions.
  - Other areas as determined by the CAM.

Products:
- Production Readiness Plan (draft and final)

V. PROJECT SCHEDULE

Please see the attached Excel spreadsheet.
RESOLUTION NO: 18-0321-6d

STATE OF CALIFORNIA

STATE ENERGY RESOURCES CONSERVATION AND DEVELOPMENT COMMISSION

RESOLUTION - RE: T2M GLOBAL LLC.

RESOLVED, that the State Energy Resources Conservation and Development Commission (Energy Commission) adopts the staff CEQA findings contained in the Agreement or Amendment Request Form (as applicable); and

RESOLVED, that the Energy Commission approves Agreement PIR-17-001 from GFO-17-501 with T2M Global LLC. for a $1,299,109 grant to develop and demonstrate a waste heat to power system. The system involves newly developed materials used in a high efficiency forward osmosis process to create pressurized water which runs a turbo-generator to produce power. The process is driven by low-temperature waste heat. The successful demonstration of the technology will open a new economic pathway for currently wasted heat from industrial and other operations; and

FURTHER BE IT RESOLVED, that the Executive Director or his/her designee shall execute the same on behalf of the Energy Commission.

CERTIFICATION

The undersigned Secretariat to the Commission does hereby certify that the foregoing is a full, true, and correct copy of a Resolution duly and regularly adopted at a meeting of the California Energy Commission held on March 21, 2018.

AYE: [List of Commissioners]
NAY: [List of Commissioners]
ABSENT: [List of Commissioners]
ABSTAIN: [List of Commissioners]
