### **DISCLAIMER**

Staff members of the California Energy Commission prepared this report. As such, it does not necessarily represent the views of the Energy Commission, its employees, or the State of California. The Energy Commission, the State of California, its employees, contractors and subcontractors make no warrant, express or implied, and assume no legal liability for the information in this report; nor does any party represent that the uses of this information will not infringe upon privately owned rights. This report has not been approved or disapproved by the Energy Commission nor has the Commission passed upon the accuracy or adequacy of the information in this report.

# ABSTRACT

The California Energy Commission prepared this report to the Citizens Oversight Board in accordance with Proposition 39 (2012), Senate Bill 73 (Committee on Budget and Fiscal Review, Chapter 29, Statutes of 2013), adopted by the Legislature and signed into law by Governor Edmund G. Brown Jr. on June 27, 2013. To alleviate the burden to local educational agencies, information required to be reported to the Citizens Oversight Board from local educational agencies is contained in this report and detailed in the appendices.

This report summarizes outcomes from the start of the Proposition 39 K-12 Program (December 19, 2013) through the end of the 2016-17 fiscal year (June 30, 2017). During that reporting period, the Energy Commission approved 1,452 energy expenditure plans submitted by 1,374 local educational agencies, representing \$1.06 billion in project funding and benefiting 5,238 project school sites. Much of the information contained in this report, such as energy savings and the amount of Proposition 39 funding spent, is self-reported data from the participating local educational agencies. One hundred seventy-four energy expenditure plans have been submitted with reported postinstallation energy consumption and savings; 250 energy expenditure plans are also complete but LEAs are still collecting the required 12 months postinstallation energy consumption data, and another 980 energy expenditure plans include projects that are still under construction.

In addition, this progress report summarizes outcomes for the Energy Conservation Assistance Act-Education Subaccount Financing Program and the Bright Schools Program. For fiscal year 2013-14 to fiscal year 2016-17, the Energy Commission approved 32 loans totaling \$49.1 million. During the same period, the Bright Schools Program provided technical assistance to 165 local educational agencies and community colleges.

# EXECUTIVE SUMMARY

## Background and Purpose

The California Clean Energy Jobs Act (Proposition 39) changed the corporate income tax code and allocated projected revenue to the general fund and the Clean Energy Job Creation Fund for five fiscal years, beginning with fiscal year 2013-14. The California Energy Commission administers three components of the California Clean Energy Jobs Act: a grant program (Proposition 39 K-12 Program), a revolving loan program (Energy Conservation Assistance Act – Education Subaccount Financing Program), and a technical assistance program (Bright Schools Program). All three programs receive funds from the Clean Energy Jobs Creation Fund created by Proposition 39.

The California Clean Energy Jobs Act and subsequent legislation provides for the establishment of a Citizens Oversight Board to review expenditures, audit the Clean Energy Job Creation Fund, and maintain transparency and accountability of this fund. Public Resources Code Section 26240 subd. (d) requires that the Energy Commission prepare an annual summary of expenditures, energy savings, the effective cost of saved energy or return on investment, and employment effects of each year's completed projects, and provide this report to the Citizens Oversight Board. This is the Energy Commission's third progress report to the Citizens Oversight Board. The report summarizes outcomes from the start of the Proposition 39 K-12 Program (December 19, 2013) through the end of the 2016-17 fiscal year (June 30, 2017).

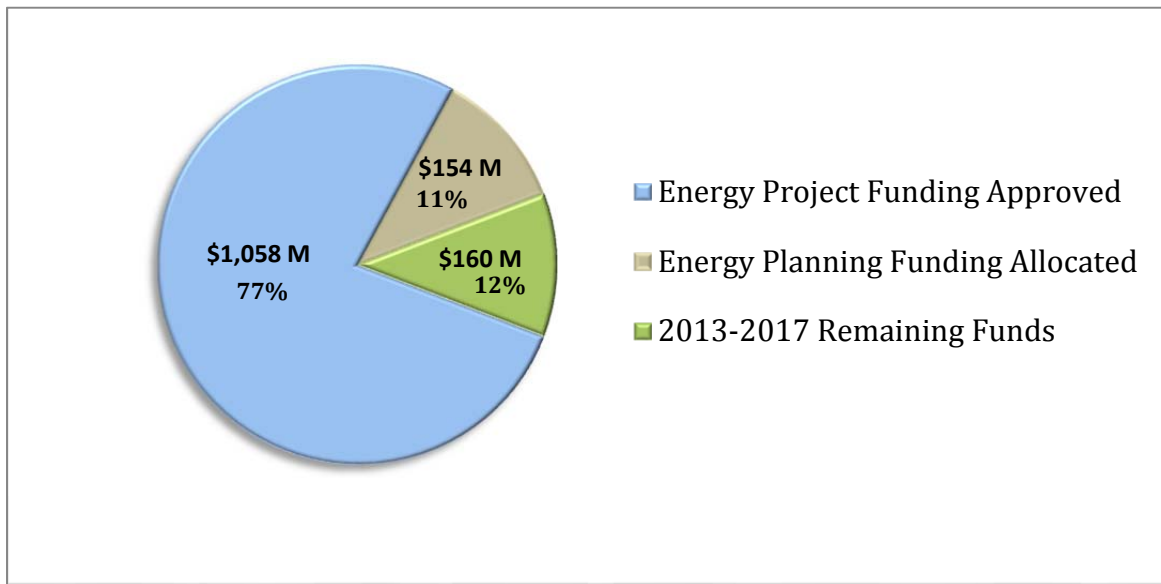

Other entities that receive funds from the California Clean Energy Jobs Act such as the California Community Colleges Chancellor's Office, the California Workforce Development Board, and the California Conservation Corps report independently to the Citizens Oversight Board.

## Cumulative Results

### December 19, 2013, Through June 30, 2017

The Energy Commission approved the first energy expenditure plans in April 2014, and the program has grown rapidly since. As of June 30, 2017, \$1.212 billion in Proposition 39 funding has been approved—\$154 million for energy planning and \$1.058 billion for energy projects. **Figure 1** illustrates the overall funding status of the program.

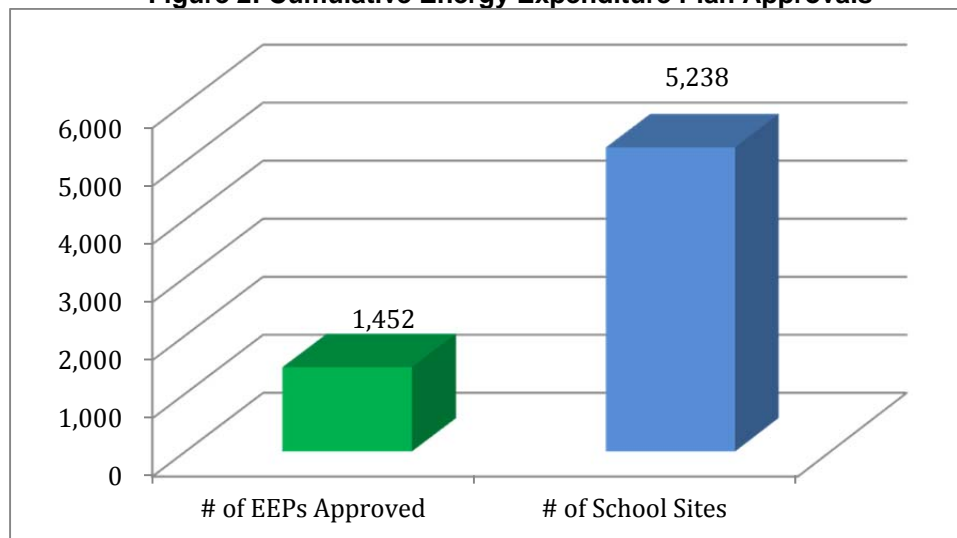

**Figure 1: Proposition 39 K-12 Program Overall Funding Status as of June 30, 2017**

Source: California Energy Commission

During this reporting period, 1,374 local educational agencies received approval for 1,452 energy expenditure plans, representing \$1.058 billion in program funding and benefiting 5,238 school sites in approved energy expenditure plans. **Figure 2** illustrates the cumulative energy expenditure plan approvals.

**Figure 2: Cumulative Energy Expenditure Plan Approvals**

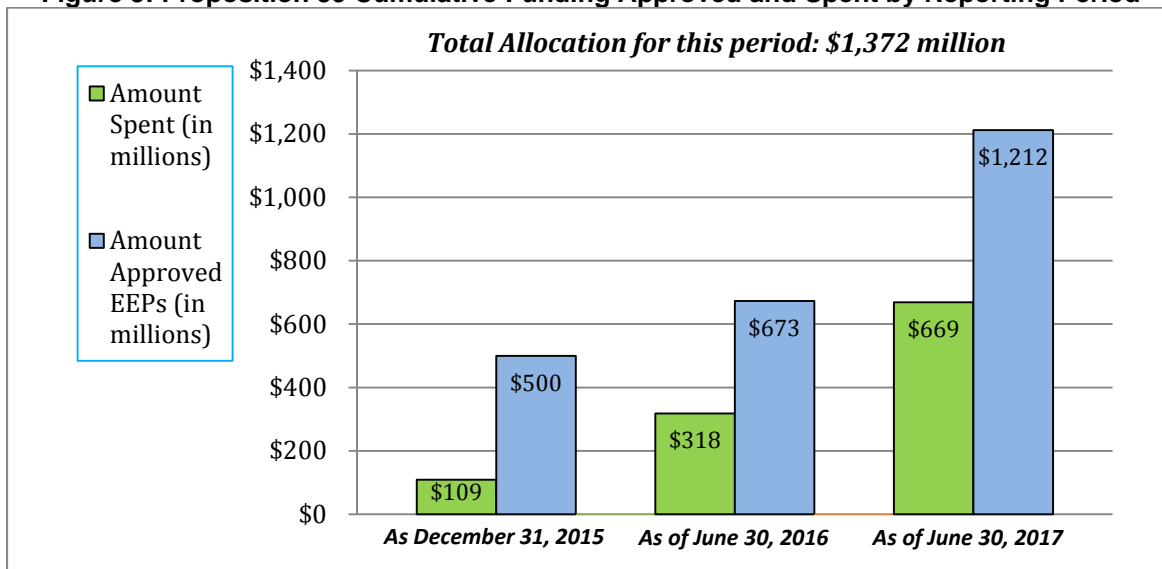

Source: California Energy Commission

Local educational agencies throughout California reported spending \$669 million of the \$1.212 billion in approved Proposition 39 funds. Projects are moving rapidly toward completion, as indicated by expenditure reporting, which has risen significantly from \$318 million reported in June 2016 to more than \$669 million as of June 30, 2017.

**Figure 3** compares the total funding approved and spent from the three reporting periods.

**Figure 3: Proposition 39 Cumulative Funding Approved and Spent by Reporting Period**

Source: California Energy Commission

### Spending Summary

One thousand four hundred and four energy expenditure plans where the required annual reports have been submitted (out of a total of 1,452 approved energy expenditure plans) represent 980 projects in the construction phase, 250 projects completed but are awaiting 12 months of postinstallation energy use data, and 174 projects with final project completion reports. The 174 final project completion reports include the required 12 months of postinstallation energy-use data as required by statute. These 174 final project completion reports represent \$116 million spent in total gross project cost. Of this amount, the Proposition 39 K-12 Program provided \$97 million, and local educational agencies contributed the remaining \$19 million with leveraged funding.

There are 238 local educational agencies (representing 250 energy expenditure plans) with completed energy project installations that are in the process of collecting 12-month postinstallation energy usage data. These agencies have reported gross project costs of \$185 million. The Proposition 39 K-12 Program provided \$154 million of this amount.

Finally, 980 energy expenditure plans include projects that are still in the construction phase. The 919 local educational agencies with projects in this phase reported \$324 million in gross project costs. The Proposition 39 K-12 Program provided \$264 million of this amount.

**Table 1** presents a cumulative summary of Proposition 39 K-12 Program funding.

**Table 1: Proposition 39 K-12 Cumulative Spending as of June 30, 2017**

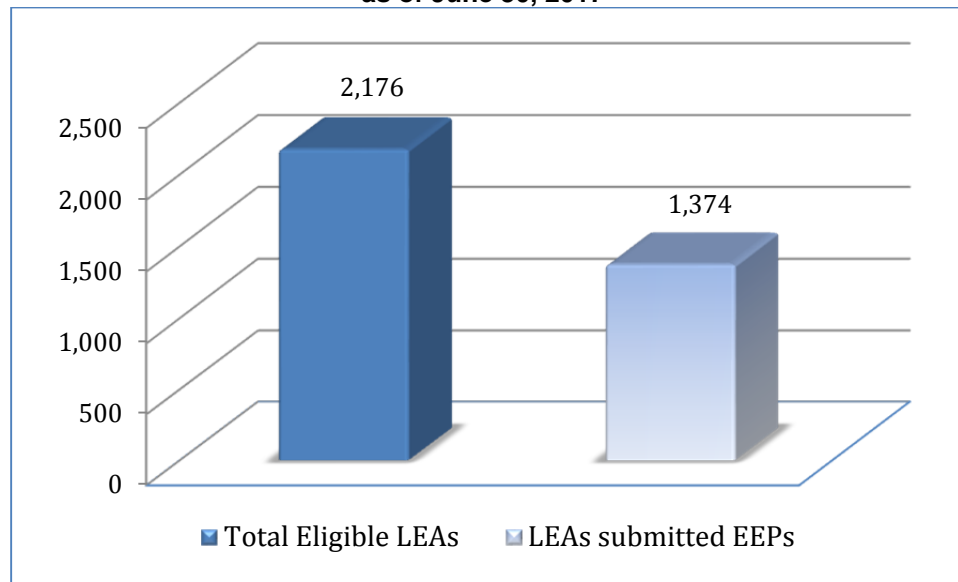

Energy Expenditure Plan (EEP) Status	# of EEPs With Reports	Prop 39 Funds Spent (in millions)	Total Amount Spent (in millions)
<b>EEPs With Final Project Completion Reports:</b>	174	\$97	\$116
<b>EEPs With Completed Projects:</b> <i>(Final Reports Due after 6/30/17, next year's reporting period)</i>	250	\$154	\$185
<b>EEPs Still in Construction</b>	980	\$264	\$324
<b>Subtotals</b>	<b>1,404</b>	<b>\$515</b>	<b>\$625</b>

### Participation Summary

As of June 30, 2017, the California Department of Education reported 2,176 eligible local educational agencies, which fall into four categories: public school districts, charter schools, state special schools, and county offices of education. As of that date, 1,374 local educational agencies had submitted at least one energy expenditure plan. The highest program participation rate is from public school districts, with 88 percent of all public school districts submitting an energy expenditure plan. **Figure 4** presents local educational agencies with submitted energy expenditure plans.

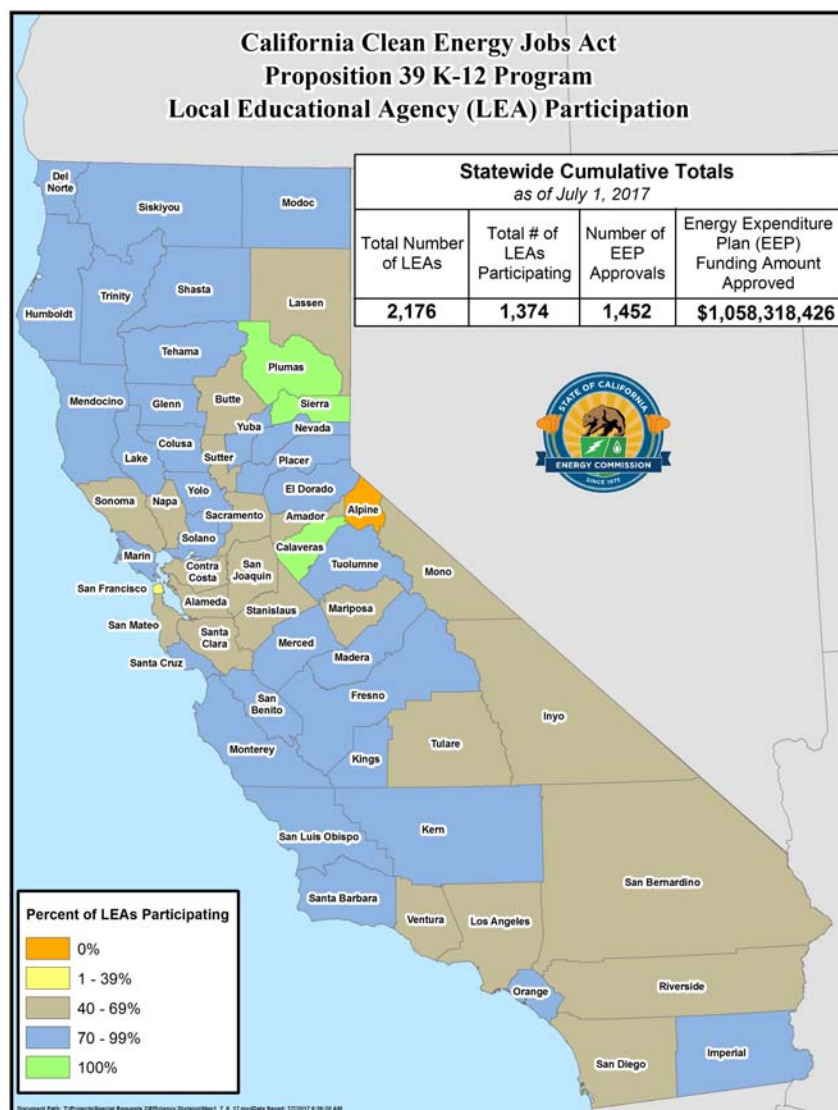

**Figure 4: Local Educational Agencies With Submitted Energy Expenditure Plans as of June 30, 2017**

Source: California Energy Commission

Geographically, the highest participation rate occurred in the counties of Plumas, Sierra, and Calaveras, where the participation rate was 100 percent for the local education agencies in these counties. Participation by each county can be seen in **Figure 5**.

**Figure 5: Local Educational Agencies Participation by County as of June 30, 2017**

Source: California Energy Commission

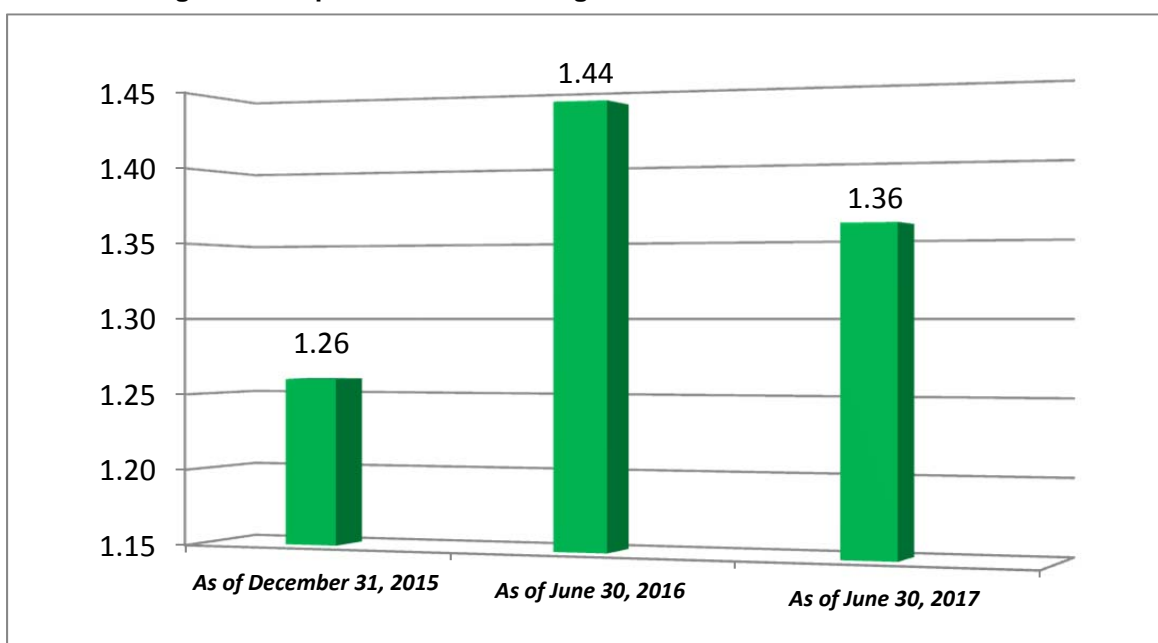

## Identifying Energy Savings

Local educational agencies are required to report postinstallation energy project savings 12 months after project completion. The Energy Commission allows the use of several methods (see *Proposition 39: California Clean Energy Jobs Act Guidelines*) to determine and report energy savings after completion of an energy project, providing the flexibility to evaluate program benefits without measurement and verification procedures whose use would comprise the majority of project costs. One hundred seventy-four completed energy expenditure plans indicate total annual energy savings of 42,821 megawatt hours and 146,126 therms, resulting in reduced greenhouse gas emissions by roughly 15,624 tons of CO<sub>2</sub>.

equivalent annually. Reported energy savings are equivalent to the annual energy consumption of 4,042 homes, with total annual energy cost savings of \$7,810,955.

Each energy expenditure plan must have a savings-to-investment ratio of 1.01, meaning for every \$1.00 invested, a minimum of \$1.01 must be saved over time. Staff analysis shows that the combined savings-to-investment ratio for these 174 projects (with estimated savings determined by a variety of methods as described above) is 1.36; therefore, every \$1.00 invested saves \$1.36 over the life of the installed equipment. A reduction in the savings-to-investment ratio reflected in the current reporting period compared to the previous reporting period can be explained by several changes that have taken place since the last report. A reduction in the minimum required savings-to-investment ratio (from 1.05 to 1.01) and higher project costs are likely two of the main factors contributing to the lower savings-to-investment ratio. **Figure 6** shows the cumulative savings-to-investment ratio from all reporting periods.

**Figure 6: Proposition 39 K-12 Program Combined Cost-Effectiveness**

Source: California Energy Commission

Energy-use intensity—the metric used to measure the energy performance at a school site—generally decreased among the school sites that completed energy projects. Analysis showed that, on average, 102,100 British thermal units (a standard unit of energy, also referred to as *Btu*) per square foot before energy project installation dropped to 87,700 Btu per square foot after energy project installation.

## Program Challenges

The design and administration of the Proposition 39 K-12 Program have not been without challenges. Although the Energy Commission remains committed to delivering an all-encompassing, effective program, some challenges remain that make it likely that some local educational agencies will have remaining Proposition 39 K-12 funding balances at the end of the program.

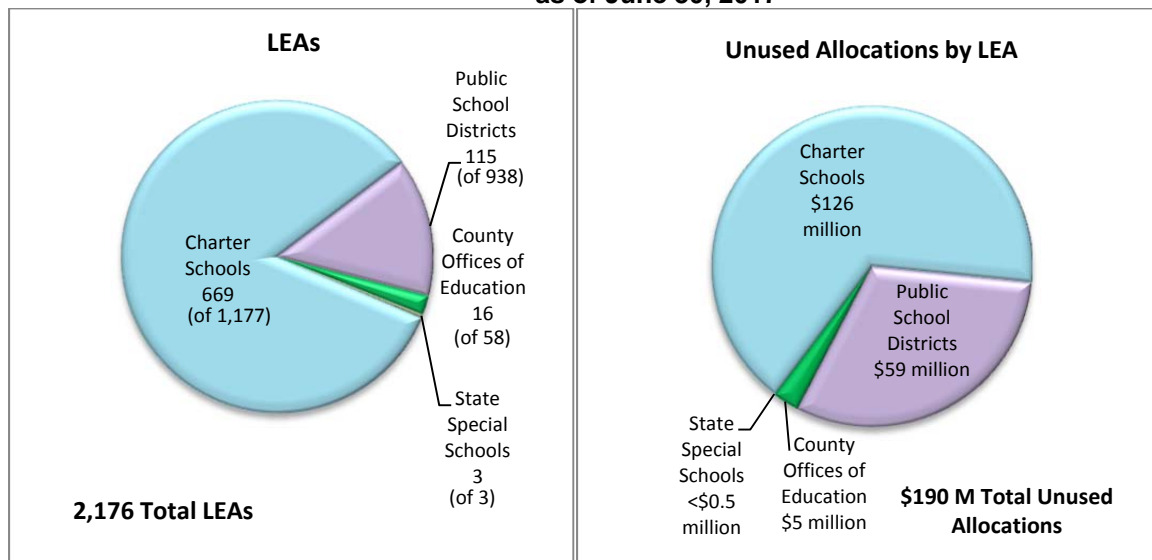

- 1) Charter schools have unique characteristics that prevent their full participation (for example, privately leased “storefront” facilities, virtual charters with no buildings, small facilities with few

potential energy projects, few resources to pursue facilities improvements, and charter school closures).

- 2) Low electricity rates in certain areas of California make it difficult for some local educational agencies to identify projects that meet the required cost-effectiveness metric, savings-to-investment ratio. Although the Commission has taken steps to address this issue, with Proposition 39 Guideline revisions allowing *first preference* federal power rates (special electric rates provided by the federal government to local government entities in three rural California counties in exchange for land and resources taken over by the federal government), challenges remain.
- 3) Some smaller local educational agencies are not able to identify enough eligible energy efficiency measures or clean energy generation to use their entire program allocation.

Consequently, there may be local educational agencies with unencumbered funding at the end of the program. As of June 30, 2017, 37 percent (803) of eligible local educational agencies had not submitted an energy expenditure plan. **Figure 7** shows local educational agencies that have not submitted plans and the associated unused funding allocation (\$190 million) for the first four fiscal years.

**Figure 7: Local Educational Agencies Without Approved Energy Expenditure Plans as of June 30, 2017**

Source: California Energy Commission

To maximize the amount of funds spent to assist local educational agencies, Senate Bill 110 (Committee on Budget and Fiscal Review, Chapter 55) was passed in 2017. This bill will “sweep” unrequested funds from this program for future grant and loan programs for LEAs.

## Energy Conservation Assistance Act—Education Financing Program

In fiscal years 2013-14 and 2014-15, \$56 million in job creation funds were allocated to the Energy Conservation Assistance Act—Education (ECAA-Ed) subaccount to fund loans and technical assistance projects. Of the \$56 million, \$50.5 million was allocated to finance zero percent loans to K-12 local educational agencies and community college districts for energy efficiency, demand reduction, and generation projects.

As of June 30, 2017, 32 loans were approved totaling \$49.1 million. The remaining \$5.5 million was allocated to the Bright Schools Program for technical assistance to the same eligible entities. Loan funds spent total \$46.1 million, as seven loans are still in the construction phase. **Table 2** gives an overview of program loans and associated status.

**Table 2: ECAA-Ed Financing Loan Status Overview as of June 30, 2017**

Loan Status	# of Loans	Loan Funds Spent (in millions)
Loans with Final Project Completion Reports:	10	\$21.4
Completed Loan Projects (Final Reports Due after 6/30/17)	15	\$14.4
Loans Still in Construction	7	\$10.3
Totals	32	\$46.1

Source: California Energy Commission

Loan recipients are required to report postinstallation energy consumption and project savings 12 months after project completion. Ten loan recipients were eligible to submit postinstallation reports, and the reported total annual energy savings were 10 million kWh and 6,000 therms, which is equivalent to 3,485 tons of reduced greenhouse gas emissions. Reported energy savings are equivalent to the annual energy consumption of 920 homes, with an annual energy cost savings of \$1.5 million.

### Bright Schools Program Cumulative Results

The Bright Schools Program provides local educational agencies and community college districts with technical assistance to identify energy efficiency measures in existing facilities and apply for Proposition 39 K-12 Program funding. Of the \$56 million allocated to ECAA, \$5.5 million was allocated to the Bright Schools Program. As of June 30, 2017, these funds have been encumbered.

As of June 30, 2017, 165 technical assistance requests were approved, totaling \$2.9 million. The average cost for a technical assistance request is \$16,000, with a limit of \$20,000 per request. Seventy Bright Schools Program energy audit reports have been successfully used to support Proposition 39 (K-12) energy expenditure plans.

**Table 3** shows the status and amount of related funding of those that received technical assistance.

**Table 3: Bright Schools Program Technical Assistance Overview as of June 30, 2017**

Technical Assistance (TA) Status	# of TA Requests	Amount Spent
Completed	165	\$2,432,985
In Progress	4	N/A
Withdrawn	3	\$28,225
Contractor Administration	N/A	\$514,081
<b>TOTALS</b>	<b>172</b>	<b>\$2,975,291</b>

Source: California Energy Commission

### **Estimating Energy Cost Savings**

Resulting energy studies from the Bright Schools Program identify potential school site energy projects and calculate estimated energy savings. Of the 165 technical assistance requests completed, 148 were energy studies, 11 were energy expenditure plan preparations, and 6 were project bid specifications. The completed energy studies identified total annual energy savings of 27,483 megawatt-hours and 304,359 therms, which is equivalent to 11,255 tons of reduced greenhouse gas emissions. The identified energy savings is equivalent to the annual energy consumption of 2,774 homes, and the estimated annual energy cost savings is \$4.4 million.

# CHAPTER 1:

## Proposition 39 K-12 Program

---

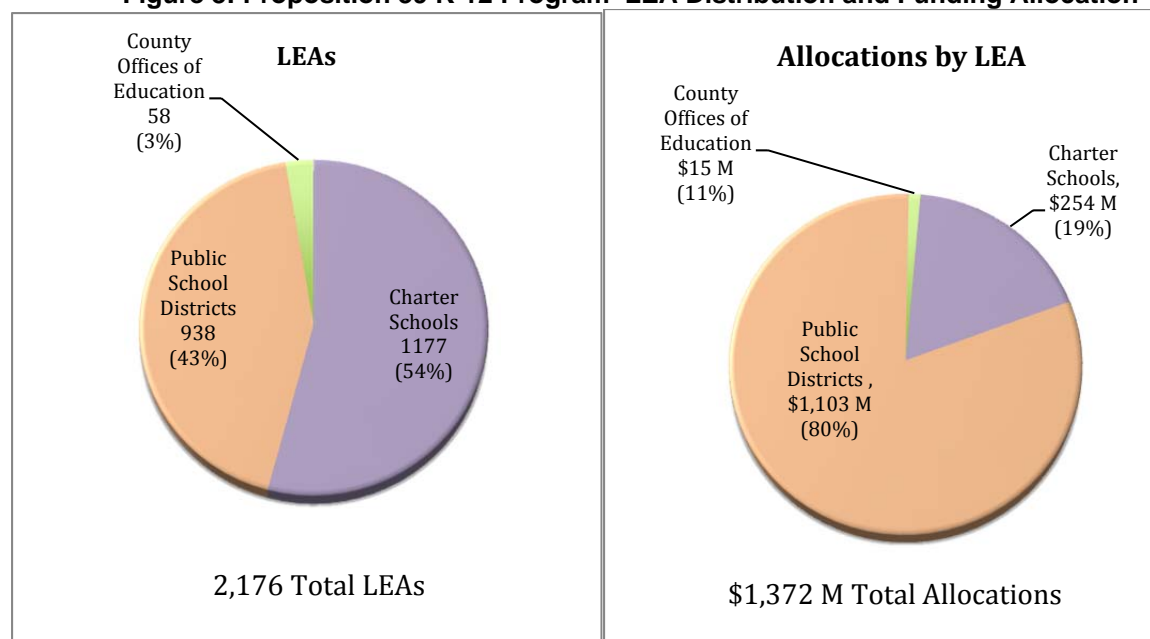

### Background

The Proposition 39 K-12 Program provides grant funds for energy projects—energy efficiency measures and clean energy generation—at schools within a local educational agency (LEA), which include public school districts, charter schools, county offices of education, and state special schools. LEAs submit energy expenditure plans (EEPs) to the California Energy Commission, which reviews and approves the EEPs, and then notifies the California Department of Education (CDE), which distributes funding from the Clean Energy Jobs Creation Fund to the LEAs. For this report period, there are 2,176 eligible LEAs in the state.

During the first four fiscal years of the Proposition 39 K-12 Program, (2013-14, 2014-15, 2015-16, and 2016-17), the California Legislature appropriated \$1.372 billion to the Proposition 39 K-12 Program.

**Figure 8** summarizes the distribution of LEA types and the associated funding allocation for the first four fiscal years of the program. LEAs are allocated funds based on the size of their student population. Because public school districts typically have multiple school sites that house more students, they receive a much larger funding allocation than other LEAs such as charter schools. For example, while charter schools represent 54 percent of eligible LEAs, their allocation is only 19 percent of total funding because they are typically smaller and have fewer students.

**Figure 8: Proposition 39 K-12 Program—LEA Distribution and Funding Allocation\***

Source: California Energy Commission

\* 3 state special schools not shown

## Appropriations

**Table 4** summarizes 2013-14, 2014-15, 2015-16, and 2016-17 Clean Energy Job Creation Fund appropriations for the Energy Commission's programs.

**Table 4: Clean Energy Job Creation Fund Overview of Energy Commission Appropriations (2013-14, 2014-15, 2015-16, and 2016-17)**

	FY 2013-14 (in millions)	FY 2014-15 (in millions)	FY 2015-16 (in millions)	FY 2016-17 (in millions)	TOTALS (in millions)
K-12 Program	\$381	\$279	\$313.4	\$398.8	\$1,372
ECAA-Ed: (Energy loans and technical assistance)	\$28	\$28	\$0	\$0	\$56
<b>TOTALS</b>	<b>\$409</b>	<b>\$307</b>	<b>\$313.4</b>	<b>\$398.8</b>	<b>\$1,428</b>

Source: California Energy Commission

## Summary of Submitted and Approved Energy Expenditure Plans

LEAs are required to request funding for energy projects by submitting an EEP to the Energy Commission. As of June 30, 2017, more than 1,452 plans totaling \$1.058 billion in funding have been approved. **Table 5** summarizes the number of EEPs approved, the number of school sites, and the amount of funding approved by fiscal year.

**Table 5: EEPs Approved by Fiscal Year as of June 30, 2017**

Fiscal Year	EEPs Approved	School Sites	Funding Approved (in millions)
2013-14	33	78	\$16
2014-15	409	1,328	\$257
2015-16	539	2,113	\$400
2016-17	471	1,719	\$385
<b>TOTALS</b>	<b>1,452</b>	<b>5,238</b>	<b>1,058</b>

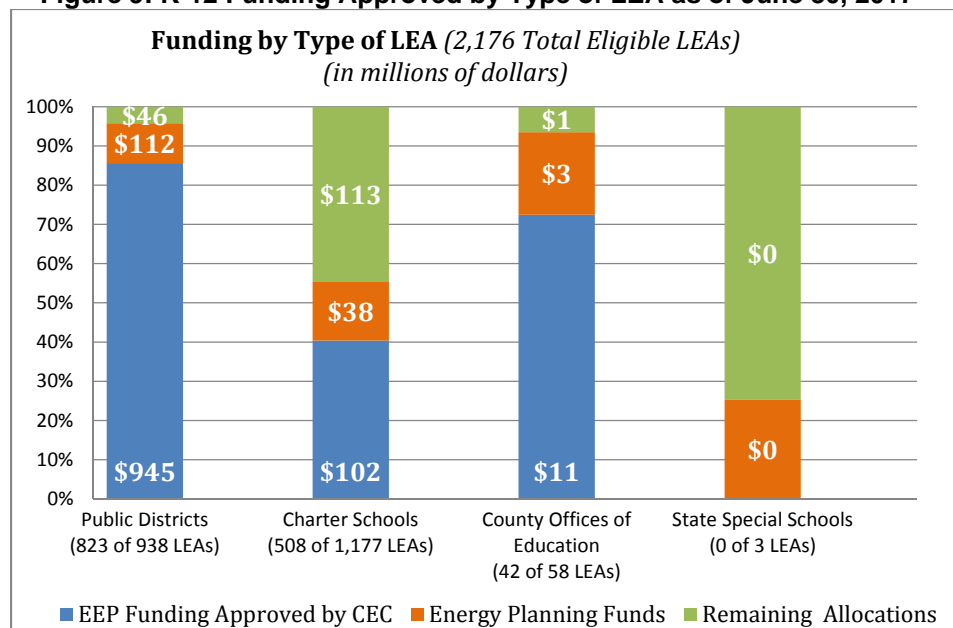

Source: California Energy Commission

As with any project, changes are sometimes necessary. LEAs with significant changes to previously approved EEPs must submit an amendment request to the Energy Commission. Significant changes include deletion of eligible energy efficiency and clean energy generation measures, the addition of measures not included in the approved EEP, cost increases or decreases of more than 15 percent, and a change of more than 15 percent in the approved quantity of equipment installed.

## Funding Approved by Type of LEA

There are four types of LEAs: (1) public school districts, (2) charter schools, (3) county offices of education, and (4) state special schools. **Figure 9** shows the distribution of approved EEP funding.

**Figure 9: K-12 Funding Approved by Type of LEA as of June 30, 2017**

Source: California Energy Commission

Public school districts represent the majority of the approved EEPs with \$945 million awarded for energy project funding and \$112 million for energy planning funding. Charter schools have the second most energy projects approved, with \$102 million in EEP funding and \$38 million for energy planning funding, or about 10 percent of approved EEPs. The third type of LEA, county offices of education, represents about 1 percent of the total energy projects funded, with \$11 million in approved EEPs and \$3 million in energy planning funding. The three state special schools provide comprehensive educational programs for blind, visually impaired, or deaf students and have a combined allocation of \$489,000 as of June 30, 2017. All three schools are in the final stages of energy planning.

## Allocations by Tier Level

Allocations to LEAs are primarily based on the prior-year's average daily attendance, with four tier levels defining the minimum amount that an eligible LEA will receive each year. These allocations are shown in **Table 6** below.

**Table 7** indicates participation by tier level.

## Proposition 39 K-12 Program Snapshot: Central Coast of California – Gonzales USD

On December 23, 2014, the Energy Commission approved an energy expenditure plan submitted by the Gonzales Unified School District, located in the town of Gonzales (Monterey County). This plan included various efficiency measures, including lighting and HVAC upgrades, at four sites within the school district, with a Prop. 39 funding request of \$551,026.

The school sites include:

- District office
- Gonzales High School
- Fairview Middle School
- La Gloria Elementary School

Prior to the implementation of the Prop. 39-funded projects, the four sites had a combined annual electrical energy use of 1,318,546 kWh and consumed 36,819 therms of natural gas. After all the energy measures were completed, the annual energy consumption for these four sites dropped to 1,040,707 kWh and 25,838 therms, a reduction of 277,839 kWh and 10,981 therms annually. The total utility cost decreased by \$37,551 for the first year after the upgrades were completed.

**Table 6: Minimum Funding Award Levels**

Tier Levels	Average Daily Attendance Prior Year	Minimum Funding Awards
Tier 1	100 or fewer	\$15,000 plus FRPM*
Tier 2	101-1,000	Based on prior year ADA or \$50,000 ( <i>whichever amount is larger</i> ) plus FRPM*
Tier 3	1,001 to 1,999	Based on prior year ADA or \$100,000 ( <i>whichever amount is larger</i> ) plus FRPM*
Tier 4	2,000 or more	Based on prior year ADA plus FRPM*

Source: California Energy Commission

\* FRPM = Free and reduced price meals

**Table 7: Participation by Tier Level**

Tier Levels	LEA Participation Since Prop. 39 Inception (By Number of LEAs)
Tier 1	137 (54%) [out of 255]
Tier 2	694 (55%) [out of 1274]
Tier 3	123 (72%) [out of 172]
Tier 4	420 (88%) [out of 476]

Source: California Energy Commission

## Disadvantaged Local Educational Agencies

Per Senate Bill 73, the Proposition 39 K-12 Program allocates awards based on a formula: 85 percent of the award is based on the LEA's average daily attendance reported as of the second data period LEAs reported to CDE in April and May in the prior fiscal year, and 15 percent is based on free and reduced-priced meals (FRPM) in the prior year. A *disadvantaged LEA* is defined as one that has a ratio of

FRPM/ADA of 0.5 or greater. Data indicate that disadvantaged LEAs are participating in the Proposition 39 K-12 Program at the same level as nondisadvantaged LEAs.

**Table 8** shows the participation rates of disadvantaged LEAs and the remaining LEAs.

**Table 8: Disadvantaged LEA Participation as of June 30, 2017**

Socioeconomic Subgroup	Number of LEAs	LEAs Participating	Participation Rate
Disadvantaged LEAs	1,374	872	63%
Remaining LEAs	802	502	63%
<b>TOTALS</b>	<b>2,176</b>	<b>1,374</b>	<b>63%</b>

Source: California Energy Commission

**Figure 10: Dunsmuir Elementary School Gymnasium Lighting**  
Dunsmuir Elementary School  
Gym Lighting

Source: Dunsmuir Elementary School District

## Approved Eligible Energy Measures

Each approved EEP can represent multiple eligible energy measures—energy efficiency or clean energy generation measure—at multiple school sites within an LEA. This has resulted in the installation of thousands of energy efficiency and clean energy generation measures throughout the state. More than 50 percent of the approved energy measures are lighting-related; more than 20

## Proposition 39 K-12 Program Snapshot: Northern California – Dunsmuir ESD

On March 5, 2015, the Energy Commission approved an energy expenditure plan submitted by the Dunsmuir Elementary School District in Dunsmuir (Siskiyou County). This plan included HVAC and lighting efficiency measures at one site, Dunsmuir Elementary School, with Prop. 39 funding requested of \$224,495.

Prior to the implementation of the Prop. 39-funded projects, the school had an annual electrical energy use of 133,407 kWh and propane use of 11,104 gallons. After all the projects were completed, the annual energy consumption for this site dropped to 109,936 kWh and 8,826 gallons of propane, a reduction of 23,471 kWh and 2,278 gallons of propane annually. The total utility cost decreased by \$39,844 for the first year after the upgrades were completed.

percent fall into the category of control measures; 15 percent are HVAC measures; 10 percent are other efficiency measures that include plug loads, pumps, motors, building envelope, domestic hot water, kitchen equipment, high-efficiency transformers, energy storage, pool equipment, irrigation sprinklers, and pump controls; and 2 percent are attributed to photovoltaic (PV) generation.

**Table 9** summarizes the breakdown and the costs associated with each category.

**Table 9: Summary of Eligible Energy Measure Categories as of June 30, 2017**

Energy Measure Category	Total # of Measures Approved	Total % of Measures Approved	Total Project Cost of Measures Approved	Total % of Project Cost of Measures Approved
Lighting	9,592	51%	\$491,983,047	38%
HVAC & Lighting Controls	3,942	21%	\$131,527,879	10%
HVAC	2,692	15%	\$460,075,240	36%
Other Energy Efficiency Measures	1,928	10%	\$80,039,009	6%
Self-Generation (PV)	407	2%	\$115,696,864	9%
Commissioning (BMCx) and Retrocommissioning (RCx)	122	1%	\$2,637,708	>0.1%
<b>TOTALS</b>	<b>18,683</b>	<b>100%</b>	<b>\$1,281,959,747</b>	<b>100%</b>

Source: California Energy Commission

## LEA Reporting Results

### Reporting Schedule

LEAs are required to provide annual progress reports on approved EEPs until all energy measures within an approved EEP are completed. Annual progress reports are submitted at the end of each fiscal year. When all energy measures in an EEP are completed, LEAs must submit a final project completion report 12 to 15 months after the project completion date. This statutory requirement (Public Resources Code Section 26240[b]) is designed to show a full year of energy usage data after all approved energy measures are installed. The three LEAs that failed to meet the statutory submittal requirement for final project completion reporting during the most recent reporting period are indicated in **Appendix D**. The Energy Commission will continue to reach out to the LEAs that have not responded. Final project completion reporting is a condition of funding, and nonresponsive LEAs will result in a CDE audit finding.

### Cost-Effectiveness Criteria: Savings-to-Investment Ratio

Public Resources Code Section 26206(c) requires that all projects be cost-effective, and Public Resources Code Section 26235(a)(2)(D) requires the Energy Commission to establish guidelines for methods for cost-effectiveness determination. In the *Proposition 39: California Clean Energy Jobs Act 2016 Program Implementation Guidelines* (2016 Guidelines),<sup>1</sup> the Commission established the savings-to-investment

<sup>1</sup> Antonio, Marites, Haile Bucaneg, Joji Castillo, Cheng Moua, Ryan Nelson, Elizabeth Shirakh, and Joseph Wang. 2016. *Proposition 39: California Clean Energy Jobs Act – 2016 Program Implementation Guidelines*. California Energy Commission, Energy

ratio (SIR) as the cost-effectiveness determination, which is calculated based on the net present value of savings divided by project installation costs, subtracting project rebates and other nonrepayable funds.

For this reporting period, an EEP must have an SIR of 1.01 or higher to be eligible for funding. This ratio compares the investment the LEA will make now with the savings it will achieve over time. For every \$1.00 invested, a minimum of \$1.01 must be saved. Savings include energy cost savings and a fixed maintenance savings of 3 percent of the total project installation cost. Finally, non-energy benefits such as health, safety, enhanced comfort, better indoor air quality, and improved learning environment may also be considered in the SIR calculation. The Energy Commission values non-energy benefits at a fixed 5 percent of the total project installation cost.

In addition, the guidelines allow some leveraged funding to be subtracted from the total project cost in the SIR calculation. Examples include nonrepayable funds such as bond funding, deferred maintenance, and general operation budgets.

**Figure 11: Terra Bella USD Bus Garage Lighting**

Source: Terra Bella Union Elementary School District

## Identifying Energy Savings

There are many nuanced and unique outside factors that affect energy usage, such as building operations, student population changes, building expansion, and weather patterns. School sites with multiple buildings often have one or more energy (electric and

## Proposition 39 K-12 Program Snapshot: Central Valley – Terra Bella Union Elementary School District

On August 5, 2014, the Energy Commission approved an energy expenditure plan submitted by the Terra Bell Union Elementary School District in Terra Bella (Tulare County). This plan included lighting and HVAC upgrades at three sites within the school district, with Prop. 39 funding requested of \$256,000.

The sites for which Proposition 39 funds were requested include:

- District office/bus barn.
- Terra Bella Elementary School.
- Carl Smith Middle School.

Prior to the implementation of the Prop. 39-funded projects, the above three sites had a combined annual electrical energy use of 753,484 kWh and consumed 11,684 therms of natural gas. After all the projects were completed, the annual energy consumption for these three sites dropped to 618,583 kWh and 9,608 therms, a reduction of 134,901 kWh and 2,076 therms annually, representing an 18 percent decrease in energy usage.

natural gas) meters that measure aggregate or total energy consumption, making it difficult to measure and attribute energy savings to specific energy efficiency measures.

Despite decades of experience and a large body of related literature, discrepancies still plague project savings estimations. Disagreements arise over methods, appropriate levels of rigor, and the effects of faulty data. The variables that affect the total energy consumed by a building pose a challenge to the identification of specific energy measures that will produce the desired energy savings.

The Energy Commission allows LEAs to use several methods (see guidelines for details) to report energy savings after completion of an energy project, giving LEAs the flexibility to determine program benefits without measurement and verification requirements whose use would comprise the majority of project costs. These methods include:

1. The Utility Incentive Completion Report.
2. The Energy Commission Energy Savings Calculator Report.
3. LEA's own postinstallation energy savings report.
4. Third-party postinstallation energy savings report.

## **Summary**

### **Final Project Completion Reports (January 31, 2014, to June 30, 2017)**

From the program launch until June 30, 2017, 158 LEAs have completed all measures contained in their EEPs and have submitted 174 final project completion reports. These completed EEPs represent \$116 million in gross project costs. Of this amount, the Proposition 39 K-12 Program provided roughly \$97 million in grant funds, and LEAs contributed the remaining \$19 million in leveraged funding. The reported annual saved energy usage for these completed projects is 42,821 MWh and 146,126 therms, which are equivalent to roughly 15,624 tons of greenhouse gas emissions<sup>2</sup> reduction. Reported energy savings are equivalent to the annual energy consumption of 4,042 homes,<sup>3</sup> with total annual energy cost savings of \$7,810,955.

Analyses of these reports show that the combined SIR for these 174 projects is \$1.36 in returns for every \$1.00 invested.

---

<sup>2</sup> Based on 690 lbs of CO<sub>2</sub>e/MWh and 11.65 lbs of CO<sub>2</sub>e/therm.

<sup>3</sup> Based on California Energy Commission's Demand Analysis Office record of total residential consumption along with the California Dept. of Finance estimates of occupied households averaged over the past five years. One home's consumption = 7,200 kWh and 400 therms (or 117,155 kBtu total) per year.

**Table 10** summarizes the comparison of the two reporting periods.

**Table 10: Cumulative Summary of Final Project Completion Reports**

	Previous Report (as of June 2016)	Current Report (as of June 2017)
<b>Number of Completed EEPs</b>	<b>52</b>	<b>174</b>
<b>Spending</b>		
Total Gross Project Cost	\$34 million	\$116 million
Prop. 39 Share	\$27 million	\$97 million
Leveraged Funding	\$7 million	\$19 million
<b>Annual Energy Savings</b>		
kWh Savings	13,804,252	42,820,936
Therm Savings	54,641	146,126
GHG emissions reduction	5,080 tons	15,624 tons
SIR	1.44	1.36
<b>Total Cost Savings</b>	<b>\$2.4 million</b>	<b>\$7.8 million</b>

Source: California Energy Commission

Several trends emerged in reviewing the final completed project reports.

- 1) Most of the 158 LEAs with 174 completed energy projects experienced a decrease in *energy use intensity* (EUI), a metric that measures the energy performance at a school site. Similar to the miles-per-gallon metric for vehicle fuel economy, the EUI indicates the amount of energy used per square foot of building space per year. Those LEAs that did not experience a decrease in EUI identified changes to operating hours and schedules, which may have accounted for the increase.

**Table 11** summarizes the reported EUI data.

**Table 11: Energy Use Intensity Summary**

<b>Reported Source Energy Savings</b>
Total Square Footage: <b>32,303,840</b>
Total kBtu/sq ft Saved Per Year: <b>14.4</b>
Total Combined Annual Weighted Average EUI
Before: <b>102.1 kBtu/sq ft</b>
After: <b>87.7 kBtu/sq ft</b>

Source: California Energy Commission

- 2) The reported "after" project energy savings in the final project completion reports typically matched or exceeded the estimated energy savings identified in the approved EEPs. If the

reported energy savings deviated significantly from the estimated energy savings, most LEAs identified potential reasons for the difference.

**Appendix A** lists LEAs that have completed construction and have submitted a final project completion report.

### **Annual Progress Reports**

The Energy Commission required LEAs with EEPs approved before July 1, 2017, to submit an annual progress report by September 30, 2017. These reports summarized the completion status of energy projects up to June 30, 2017.

Commission staff worked closely with LEAs to ensure a high rate of submission. Of the annual progress reports due by September 30, 2017, the Commission received 1,188, which account for 98 percent of reports due.

Within the received reports, 250 showed completed EEPs. Related information is summarized below.

- Two hundred fifty annual progress reports submitted by 238 LEAs reported completed energy projects and LEAs are required to submit final project completion reports with postinstallation energy savings and energy usage 12 to 15 months after the project completion date (See **Appendix B**). Based on the reports, these projects account for \$185 million in gross project costs, which included \$154 million of Proposition 39 K-12 Program funding and \$31 million (17 percent of gross project costs) in leveraged funding from sources such as utility incentives, bonds, deferred maintenance, and general operation budgets.
- Nine hundred nineteen LEAs submitted 980 annual progress reports indicating project installations not yet completed. Therefore, the majority of EEPs approved before July 1, 2017, are for projects still in construction. These LEAs must provide annual progress reports until all energy measures are complete. Based on the reports, LEAs with projects under construction spent \$324 million in gross project costs, which included \$264 million of Proposition 39 K-12 Program funding and \$60 million (19 percent of gross project costs) in leveraged funding. **Appendix C** lists all LEAs in construction.

## **Implementation Overview**

### **Program Implementation Summary**

The Proposition 39 K-12 Program began six months after Governor Edmund G. Brown Jr. signed Senate Bill 73 in June 2013, which provided the framework and appropriations necessary to carry out the requirements of Proposition 39. The Energy Commission quickly began a comprehensive public process to design and develop the program and the implementation guidelines. Statewide outreach included conducting five public meetings and three webinars, which reached more than 500 participants and drew 180 docket submittals (13-CCEJA-01). On December 19, 2013, the Commission adopted the *Proposition 39: California Clean Energy Jobs Act – 2013 Program Implementation Guidelines (2013 Guidelines)*.<sup>4</sup>

---

<sup>4</sup> Bucaneg, Haile, Pierre duVair, Cheng Moua, Justin Regnier, Keith Roberts, Elizabeth Shirakh, and Joseph Wang. 2013. **Proposition 39: California Clean Energy Jobs Act – 2013 Program Implementation Guidelines**. California Energy Commission, Energy Efficiency Division. Publication Number CEC-400-2014-022-CMF. [www.energy.ca.gov/2014publications/CEC-400-2014-022/CEC-400-2014-022-CMF.pdf](http://www.energy.ca.gov/2014publications/CEC-400-2014-022/CEC-400-2014-022-CMF.pdf).

Once the guidelines were adopted, program implementation was expedited. In January 2014, just one month later, the Commission released the EEP application forms, program handbook, and energy savings calculators; established an electronic submission process; hired and trained Commission staff members; provided 10 training seminars and two webinars that reached more than 800 LEAs statewide; and established a program call center.

In 2015, the application system that LEAs use to submit EEPs, Energy Expenditure Plan Online, was created and launched. This system expedited the submission and review process. Two modules were added to the online system (also in 2015), one for amending approved EEPs and one for submitting required reports. The first annual progress reports were submitted by LEAs in November 2015 and are required to be submitted each year through the end of the program. All projects must be completed by June 30, 2020, and all final project completion reports are due by June 30, 2021.

### **Program Implementation Updates and Resources**

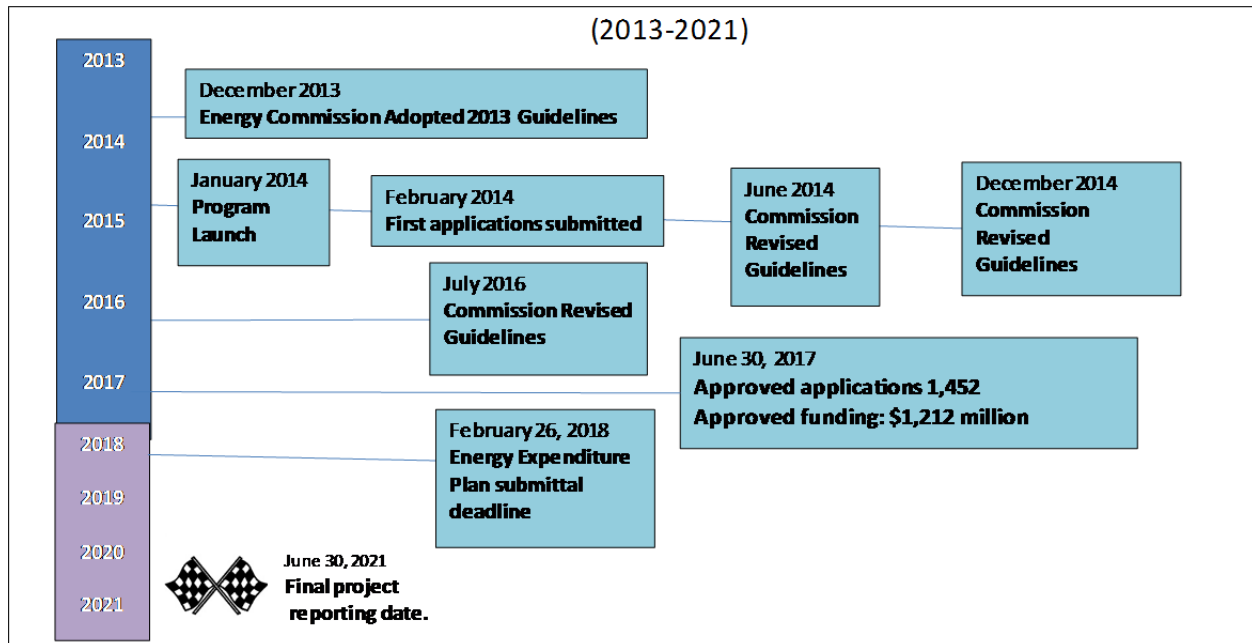

The Energy Commission has continuously provided extensive program communication, outreach, and education through webinars, workshops, conference presentations, press releases, blog posts, listserv announcements, direct phone calls, direct mail, and public meetings.

Through these efforts, the Energy Commission has identified and addressed barriers to program participation. Since the 2013 Guidelines were adopted, there have been three revisions to the Guidelines to address these barriers. In June 2014, the first revision changed charter school eligibility making it easier for charter schools to participate in the program. Further modifications to the SIR for all LEAs were made in December 2014 and in July 2016.

The year 2017 brought new legislative changes to the Proposition 39 K-12 Program. The 2017-18 California Budget Act changed the LEA encumbrance date, extending it by 12 months from June 30, 2018, to June 30, 2019. On July 12, 2017, Governor Brown signed Senate Bill 110 (Committee on Budget and Fiscal Review, Chapter 55, Statutes of 2017) budget trailer bill language to extend the Proposition 39 program indefinitely.

**Figure 12** illustrates the Proposition 39 K-12 Program implementation timeline.

Figure 12: K-12 Program Timeline

Source: California Energy Commission

On June 30, 2016, the Energy Commission launched the Proposition 39 Publicly Searchable Database to provide a new level of data transparency for publicly funded programs. With several ways for the public to view detailed program information, the database is simple to use and interactive and provides quick searches for Proposition 39 K-12 and community college district program metrics. The searchable database is at <http://prop39publicsearch.energy.ca.gov/>.

More complex Proposition 39 K-12 Program research data are available at <http://www.energy.ca.gov/efficiency/proposition39/data/>. This database provides clean energy project site information that is reported by LEAs and includes utility-reported school energy consumption and billing data by school site.

Source: Mid Valley Alternative Charter

## Challenges

The design and administration of the Proposition 39 K-12 Program have not been without challenges. The Energy Commission remains committed to delivering an all-encompassing, effective program in spite of the challenges that remain. The biggest challenge will likely be getting all eligible LEAs to submit an EEP to receive a funding allocation. Factors hindering this goal include the following:

- 1) Characteristics unique to charter schools prevent them from applying. The Commission has conducted extensive targeted outreach to charter schools, including phone calls, emails, letters, workshops, and exhibits at charter school conferences. Yet, lack of

## Proposition 39 K-12 Program Snapshot: Central Valley Charter School – Mid Valley Alternative Charter

On July 30, 2015, the Energy Commission approved an energy expenditure plan submitted by the Mid Valley Alternative Charter in Hanford (Kings County). This plan included lighting and HVAC upgrades at one site, Mid Valley Alternative Charter School, with Prop. 39 funding requested of \$37,328.

Prior to the implementation of the Prop. 39-funded projects, the above site had an annual electrical energy use of 15,574 kWh. After all the projects were completed, the annual energy consumption for the site dropped to 10,640 kWh, a reduction of 4,934 kWh annually, representing a 32 percent decrease in energy usage.

charter school participation remains an issue.

- 2) Low electricity rates in certain areas of California make it difficult for some local educational agencies to identify projects that meet the required cost-effectiveness metric, savings-to-investment ratio. Although the Commission has taken steps to address this issue, with guideline revisions allowing *first preference* federal power rates to use an alternative electric rate, challenges remain.
- 3) A lack of sufficient eligible energy efficiency or clean energy generation measures for small districts to be able to use their entire program allocation.

The program is nearing the end of the funding period, and 1,374 (63 percent) of the 2,176 eligible LEAs have requested energy project funding, with charter schools having the lowest rate of participation. As a result, it is likely that some funds will remain by the deadline of February 26, 2018.

**Figure 14: Hacienda La Puente H.S. Gym Lighting**

Source: Hacienda La Puente Unified School District

## **Proposition 39 K-12 Program Snapshot: Southern California – Hacienda La Puente USD**

On June 27, 2014, the Energy Commission approved an energy expenditure plan submitted by the Hacienda La Puente Unified School District, located in City of Industry (Los Angeles County). This plan included various efficiency measures, including lighting, lighting controls, and HVAC controls at four sites within the school district, with Prop. 39 funding requested of \$5,309,541.

The sites for which Proposition 39 funds were requested include:

- La Puente High School.
- Los Altos High School.
- Wilson High School.
- Workman High School.

Prior to the implementation of the Prop. 39-funded projects, the above four sites had a combined annual electrical energy use of 8,826,184 kWh and consumed 225,487 therms of natural gas. After all the projects were completed, the annual energy consumption for these four sites dropped to 6,393,902 kWh and 182,922 therms, a reduction of 2,432,282 kWh (28 percent) and 42,565 therms (19 percent) annually.

## **Senate Bill 110**

To give LEAs an opportunity to use any unrequested Proposition 39 K-12 Program grant funds, Senate Bill 110 was passed in June 2017. This bill creates two additional grant programs and allocates funds for loans and technical assistance. Of the unrequested funds, the first \$75 million will be used to fund a clean school bus grant program, the next \$100 million will be used to fund a competitive ECAA-Ed loan program, and any remaining funds will be used to fund a new and competitive Proposition 39 K-12 grant program. Any additional program funding is subject to appropriation in the annual Budget Act. These programs are under development.

# CHAPTER 2:

## Energy Conservation Assistance Act— Education Subaccount

---

### Financing Program

#### Background

The Energy Conservation Assistance Act–Education Subaccount (ECAA–Ed) Financing Program is a revolving loan program funded by the Job Creation Fund that provides zero percent financing to eligible entities for energy efficiency, demand reduction, and energy generation projects. All LEAs and community college districts (CCDs) that are eligible to receive Proposition 39 grant awards are also eligible to apply for an ECAA–Ed loan for energy-related projects. Loan repayments are based on energy cost savings, are made twice a year once the project is complete, and can be made up to a maximum of 20 years.

#### ECAA–Ed Funding

Funding from the Job Creation Fund was allocated to the Energy Commission in fiscal years 2013-14 and 2014-15 for no-interest revolving loans and technical assistance. No funding was allocated in fiscal years 2015-16 and 2016-17. **Table 12** shows the funding received.

**Table 12: ECAA–Ed and Bright Schools Program Allocations**

Fiscal Year	ECAA–Ed Financing (Loans)	Bright Schools (Technical Assistance)	TOTAL
2013-14	\$25,291,524	\$2,708,476	\$28,000,000
2014-15	\$25,200,000	\$2,800,000	\$28,000,000
2015-16	0	0	0
2016-17	0	0	0
<b>TOTALS</b>	<b>\$50,491,524</b>	<b>\$5,508,476</b>	<b>\$56,000,000</b>

Source: California Energy Commission

#### Approved Loans

As of June 30, 2017, 32 ECAA–Ed loans were approved by the Energy Commission. This amount represents \$49.1 million of the total \$50.5 million allocated to the loan program.

ECAA–Ed loan recipients request loan funds on a reimbursement basis based on invoices submitted to the Commission. A recipient may choose to request less than the approved loan amount. This may be due to a scope change or a total project cost that was less than estimated. Any funds remaining in the loan account are liquidated and used to fund additional ECAA–Ed loans. Thus far, recipients have requested and received \$39.4 million in funds.

## **Final Project Completion Report**

Public Resources Code Section 26240, subd. (b) requires each loan recipient to submit a final report 12 to 15 months after the project completion date. A project is considered complete when all loan-funded measures are installed. This statutory condition is designed to provide, among other informational items, a full year of energy usage data after all approved energy measures have been installed.

Of the 32 approved loans, 25 recipients have completed projects that represent \$38.7 million of approved funding. Of this \$38.7 million, \$35.8 million were disbursed, and the remaining \$2.9 million have been liquidated to fund new ECAA-Ed loans.

A summary of the approved and completed loans and the cumulative expenditures of each loan as of June 30, 2017, is provided in **Appendix E**.

As of June 30, 2017, final project completion reports were submitted by 10 loan recipients. These projects saved 10 million kWh and 6,000 therms, which are equivalent to 3,485 tons of reduced greenhouse gas emissions. Reported energy savings are equivalent to the annual energy consumption of 920 homes, with an annual energy cost savings of \$1.5 million. **Appendix F** summarizes the energy data obtained from these loan recipients.

## **Remaining Funds**

As of June 30, 2017, \$3 million remained in the ECAA-Ed account. This amount includes earnings generated by the account and funds returned to the loan account when previously allocated loan funds are liquidated.

## **Repayments and Defaults**

Loan repayments are based on energy cost savings and are made twice a year once the loan project is complete. To date, all loan borrowers have been able to meet their loan obligations, and the ECAA-Ed Financing Program has not experienced any defaults.

## ECAA-Ed Financing Example—Oroville Union High School District

Source: *Oroville Mercury-Register*, September 5, 2017, and Oroville Union HSD

The Energy Commission approved a zero-percent interest ECAA-Ed loan to Oroville Union High School District (Oroville Union) for \$2.8 million on December 9, 2015. The ECAA-Ed Program provided supplemental funding to help Oroville Union install a 363 kW<sub>dc</sub> PV system at Las Plumas High School and a 476 kW<sub>dc</sub> PV system at Oroville High School. A final project completion report is expected in the fall of 2018.

In the September 3, 2017 online issue of the *Oroville Mercury-Register*, Corey Willenberg, Oroville Union's superintendent, said that the switch will allow Oroville Union to be more sustainable and save a significant amount of money after it pays off the initial loan.

He said, "We will have that available money that we would be spending on PG&E to focus on students. It will help us have available funds to dedicate to students, and since we can't generate revenue, except in attendance, we are always looking for ways to increase revenue."

He added, "I'm excited that we're doing it. We are the only school in Oroville to have solar panels and it is exciting. It brings us into the 21<sup>st</sup> century."

Visit this link for the full story: <http://www.oroillemr.com/social-affairs/20170903/oroville-high-schools-to-go-off-the-grid>

In addition to the ECAA-Ed loan, in May 2015, Oroville Union received Proposition 39 K-12 Program grant funds for \$484,015. This grant funded lighting projects at six sites: Las Plumas High School, Oroville Adult Education Career and Technical Center, Oroville High Community Day School, Prospect High (Continuation) School, the district office, and Oroville High School. The grant also funded an HVAC replacement project at Oroville High School.

**Figure 15: Oroville High School Photovoltaic**

Source: Oroville Union High School District

## **ECAA-Ed Financing Example—Sanger Unified School District**

Source: California Energy Commission and Sanger USD

On May 14, 2014, the Energy Commission approved a zero percent interest ECAA-Ed loan to Sanger Unified School District for \$1,242,492. The loan helped Sanger Unified finance the upgrade of interior and exterior lighting fixtures and controls, exit signs, energy management system, HVAC and refrigeration, and pump motors and install computer shutdown software at these three campuses:

- Sanger High School
- Madison Elementary School
- Centerville Elementary School

Due to a reduction in the scope of the projects, Sanger Unified spent only \$1,064,779.58 of the loan funds approved.

Annually, the project is estimated to save 557,247 kWh and 11,637 therms, resulting in energy cost savings of \$92,689 and a reduction of greenhouse gas emissions by 260 tons of CO<sub>2</sub> equivalent. A final project completion report is expected in the spring of 2018.

Brad Pawlowski, chief operations officer of Sanger USD, was asked how the ECAA-Ed Financing Program helped Sanger Unified achieve its energy and comfort goals. He said that over the past year, the students and faculty have enjoyed the benefits of having new LED lighting and have noticed an improvement in air quality from the HVAC system upgrades. The loan-funded improvements have also resulted in lower utility bills and reduced maintenance requirements.

In addition to the ECAA-Ed loan, Sanger Unified was also approved an energy expenditure plan under the Proposition 39 K-12 Program on March 4, 2015, for \$1.7 million. This amount funded energy efficiency measures at 16 sites.

**Figure 16: Sanger High School Walkway Lighting**

Source: Sanger Unified School district

## Bright Schools Program

### Background

The Bright Schools Program helps public K-12 schools and community colleges identify energy saving projects in existing buildings. The program provides a range of technical assistance services, including energy audit, third-party proposal review, and professional engineering support services.

### Funding

Public Resources Code Section 25416, subd. (d) authorizes the Energy Commission to set aside 10 percent of the Job Creation Funds for technical assistance to help eligible entities identify Proposition 39 energy efficiency, demand reduction, and generation projects. In fiscal years 2013-14 and 2014-15, the Bright Schools Program received \$5.5 million. It did not receive funding in fiscal years 2015-16 or 2016-17.

Through a competitive contract solicitation, the Energy Commission selected a prime contractor and a team of professional energy engineers to assist with and support the objectives of the Bright Schools Program. **Table 13** shows program expenditures as of June 30, 2017.

**Table 13: Bright Schools Program Encumbrance and Expenditures**

Total Allocation	\$5,600,000
Contract Amount Encumbered	\$5,508,476
Expenditures as of 6/30/17	\$2,975,291
Contract Balance	\$2,533,185

Source: California Energy Commission

Of the \$5.6 million allocated to the program, \$5.5 million had been encumbered as of June 30, 2017. The remaining \$91,524 was reallocated to the ECAA-Ed Loan Program. Expenditures of \$2,975,291 have provided technical assistance to 165 LEAs and community colleges to identify cost-effective energy projects. Seventy Bright Schools Program energy audit reports have been successfully used to support Proposition 39 K-12 energy expenditure plans.

### **Final Energy Audit Reports**

Proposition 39-funded Bright Schools Program energy audits have identified energy measure opportunities at 311 school sites. These energy measure recommendations represent an estimated annual savings of nearly 27,483 MWh of electricity and 304,359 therms of natural gas, which are equivalent to 11,255 tons of reduced greenhouse gas emissions. The identified energy savings are equivalent to the annual energy consumption of 2,774 homes, and the estimated annual energy cost savings are \$4.4 million. The identified energy measures would require an investment of more than \$67 million and would be eligible for utility incentives of nearly \$2.4 million.

**Appendix G** lists the details of the information above and includes the energy savings metrics and Proposition 39 Program funding spent for program participants.

## **APPENDIX A**

---

### **K-12 Program – 2016-17 Final Project Completion Reports**

## Appendix A: Final Project Completion Report Data

Notes:

1. Reporting on 174 total Energy Expenditure Plans

### **Energy Conservation Assistance Act Education Subaccount Approved Zero Interest Energy Loans**

**Appendix E**  
**Energy Conservation Assistance Act - Education Subaccount (ECAA-Ed)**  
**Approved and Completed Zero Interest Energy Loans**  
**Cumulative as of June 30, 2017**

Loan Number	Local Education Agency or Community College District Name	Business Meeting Approval Date	Project Completion Date (Completed Projects only)	Final Project Completion Report (FPCR) Due Date* (Completed Projects only)	Approved Loan Amount	Funds Expended**	Project Summary	Status/Comments
001-13-ECG	Sanger Unified School District	5/14/2014	12/31/2016	3/31/2018	\$1,242,492	<b>\$1,064,779.58</b>	Install energy efficiency measures at three of the school district's facilities.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
001-14-ECG	Pittsburg Unified School District	7/22/2014	-	-	\$1,766,665	\$826,035.15	Install a 150 kW PV system, lighting retrofits for 9 schools and occupancy controls for HVAC systems at 3 schools.	Project is complete and the borrower is in the process of submitting final documents to draw down the funds.
003-14-ECG	Hartnell Community College District	8/27/2014	4/1/2016	<b>FPCR Complete</b>	\$3,000,000	<b>\$3,000,000.00</b>	Upgrade boiler and install solar PV.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
002-14-ECG	Tulare City School District	10/7/2014	12/31/2015	<b>FPCR Complete</b>	\$3,000,000	<b>\$3,000,000.00</b>	Install a solar PV at 8 schools.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
004-14-ECG	Kern Community College District	10/7/2014	12/31/2015	<b>FPCR Complete</b>	\$3,000,000	<b>\$3,000,000.00</b>	Install a solar PV at Porterville College	<b>Project Complete. Funds expended is the final disbursed amount.</b>
005-14-ECG	Yuba Community College District	10/7/2014	12/15/2014	<b>FPCR Complete</b>	\$710,000	<b>\$710,000.00</b>	Install a new EMS system and VFD control for a well pump.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
006-14-ECG	Campbell Unified School District - Rosemary Elementary	11/17/2014	12/16/2016	3/16/2018	\$794,812	<b>\$740,302.72</b>	Install energy efficiency measures and a PV system.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
007-14-ECG	Campbell Unified School District - Rolling Hills Middle School	11/17/2014	12/16/2016	3/16/2018	\$692,584	<b>\$540,530.62</b>	Install energy efficiency measures and a PV system.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
008-14-ECG	Campbell Unified School District - Marshall Lane Elementary	11/17/2014	12/16/2016	3/16/2018	\$478,754	<b>\$399,802.42</b>	Install energy efficiency measures and a PV system.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
009-14-ECG	Campbell Unified School District - Lynhaven Elementary	11/17/2014	12/31/2015	<b>FPCR Complete</b>	\$65,887	<b>\$65,887.00</b>	Install energy efficiency measures.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
010-14-ECG	Campbell Unified School District - Forest Hill Elementary	11/17/2014	12/16/2016	3/16/2018	\$534,346	<b>\$477,586.42</b>	Install energy efficiency measures and a PV system.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
013-14-ECG	Campbell Unified School District - Castlemont Elementary	11/17/2014	12/31/2015	<b>FPCR Complete</b>	\$81,218	<b>\$78,652.00</b>	Install energy efficiency measures.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
014-14-ECG	Campbell Unified School District - Blackford Elementary	11/17/2014	12/16/2016	3/16/2018	\$513,000	<b>\$337,551.73</b>	Install a PV system.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
015-14-ECG	Campbell Unified School District - Sherman Oaks Elementary	11/17/2014	12/16/2016	3/16/2018	\$1,084,933	<b>\$1,019,759.46</b>	Install energy efficiency measures and a PV system.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
016-14-ECG	Campbell Unified School District - Monroe Middle School	11/17/2014	12/16/2016	3/16/2018	\$1,078,750	<b>\$739,657.08</b>	Install energy efficiency measures and a PV system.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
017-14-ECG	Campbell Unified School District - Capri Elementary and Village School	11/17/2014	12/16/2016	3/16/2018	\$796,007	<b>\$619,447.62</b>	Install energy efficiency measures and a PV system.	<b>Project Complete. Funds expended is the final disbursed amount.</b>
018-14-ECG	Campbell Unified School District - Campbell Middle School and Corporate Yard	11/17/2014	12/16/2016	3/16/2018	\$1,378,638	<b>\$1,378,638.00</b>	Install energy efficiency measures and a PV system.	<b>Project Complete. Funds expended is the final disbursed amount.</b>

Loan Number	Local Education Agency or Community College District Name	Business Meeting Approval Date	Project Completion Date (Completed Projects only)	Final Project Completion Report (FPCR) Due Date* (Completed Projects only)	Approved Loan Amount	Funds Expended**	Project Summary	Status/Comments
011-14-ECG	Newport Mesa Unified School District	11/17/2014	2/29/2016	FPCR Complete	\$3,000,000	<b>\$3,000,000.00</b>	Install renewable energy measures.	Project Complete. Funds expended is the final disbursed amount.
019-14-ECG	Monterey Peninsula Unified School District	12/10/2014	9/25/2015	FPCR Complete	\$3,000,000	<b>\$3,000,000.00</b>	Install 820.6 kW PV system.	Project Complete. Funds expended is the final disbursed amount.
021-14-ECG	Sequoias Community College School District	2/25/2015	12/17/2015	FPCR Complete	\$3,000,000	<b>\$2,981,074.36</b>	Install a 0.798 MW PV system.	Project Complete. Funds expended is the final disbursed amount.
020-14-ECG	Chico Unified School District	4/8/2015	12/15/2015	FPCR Complete	\$3,000,000	<b>\$2,588,712.21</b>	Install PV systems at 5 schools.	Project Complete. Funds expended is the final disbursed amount.
023-14-ECG	Sylvan Union School District	4/8/2015	11/30/2016	2/28/2018	\$1,799,839	<b>\$1,461,700.70</b>	Install energy efficiency measures at 8 schools, District Office, Central Kitchen, and Maintenance Facility.	Project Complete. Funds expended is the final disbursed amount.
001-15-ECG	Salida Union School District	7/8/2015	10/21/2016	1/21/2018	\$2,054,469	<b>\$2,054,469.00</b>	Install energy efficiency measures and photovoltaic installations at multiple District facilities	Project Complete. Funds expended is the final disbursed amount.
002-15-ECG	Montague Elementary School District	8/12/2015	8/25/2016	11/25/2017	\$419,520	<b>\$419,520.00</b>	Install energy efficiency measures and renewal energy measures at District facilities.	Project Complete. Funds expended is the final disbursed amount.
003-15-ECG	Durham Unified School District	9/9/2015	6/30/2017	9/30/2018	\$2,000,000	<b>\$1,282,606.67</b>	Install a total of 575.1 kW PV.	Project Complete. Funds expended is the final disbursed amount.
004-15-ECG	Vista del Mar Union School District	10/14/2015	-	-	\$146,240	\$0.00	Install a 55 kWac PV.	Project is complete and the borrower is in the process of submitting final documents to draw down the funds.
005-15-ECG	Oroville Union High School District	12/9/2015	-	-	\$2,800,000	\$2,633,635.63	Install 839 kW roof and parking structure mounted PV system.	Project is complete and the borrower is in the process of submitting final documents to draw down the funds.
006-15-ECG	Soledad Unified School District	3/9/2016	3/27/2017	6/27/2018	\$2,000,000	<b>\$1,851,350.96</b>	Install a total of 463 kW PV.	Project Complete. Funds expended is the final disbursed amount.
007-15-ECG	Benicia Unified School District	5/17/2016	-	-	\$3,000,000	\$0.00	Install a 721.35 kWdc PV	Implementation
001-16-ECG	Woodlake Unified School District	7/13/2016	-	-	\$1,000,000	\$90,000.00	Install a 324.4 kWdc PV	Implementation
002-16-ECG	Waterford Unified School District	11/9/2016	-	-	\$708,227	\$0.00	Install energy efficiency projects at two district schools involving exterior and interior lighting including controls.	Implementation
003-16-ECG	Berryessa Union School District	4/12/2017	-	-	\$911,000	\$0.00	Install more efficient interior lights, exterior lights and lighting controls.	Implementation
<b>TOTAL</b>	<b>32</b>				<b>\$49,057,381</b>	<b>\$39,361,699.33</b>		

\*Final Project Completion Report (FPCR) Due Date is 15 months after the Project Completion Date. Details of FPCRs that have been completed are in a separate appendix in this COB report.

\*\*Amounts in bold are the final loan funds disbursed for completed projects.

#### Summary:

Number of Loans Approved	32	Number of Completed Loans	25
Total Funds Approved	\$49,057,381.00	Total Funds Approved for Completed Loans	\$38,725,249
Total Funds Expended	\$39,361,699.33	Total Funds Disbursed by Completed Loans	\$35,812,028.55

## **APPENDIX F**
