FPPC Form 801 (Jan/14)
Attachment to Form 801 – CCEEB Summer Issues Seminar – July 2017

Section 2: Describe the entity’s business activity or its nature and interests.

The California Council for Environmental and Economic Balance is a non-profit, non-partisan coalition of industry, labor, and public leaders. Their mission is to make environmental and economic balance a reality. Since 1973, CCEEB has worked to solve the most pressing environmental policy problems facing California.

Section 3.2: Specific description of the payment and its agency purpose and use.

Janea A. Scott, a Commissioner at the California Energy Commission (CEC), participated on the panel Climate, Energy and Technology: Going to 2030 at the California Council for Environmental and Economic Balance’s Summer Issues Seminar in Squaw Creek, Lake Tahoe, California. Panelists provided a range perspective on pathways to meeting California’s 2030 and 2050 green-house gas reduction targets. Commissioner Scott, lead Commissioner on Transportation, discussed the importance of addressing the transportation sector in meeting California’s climate goals and the Energy Commission’s efforts to increase the availability of low-carbon transportation fuels and supporting infrastructure through the Alternative and Renewable Fuel and Vehicle Technology Program. She also discussed some of the Energy Commission’s broader efforts to reduce green-house gas emissions under Senate Bill 350 including the Energy Commission’s Barriers Study, outlining actions that can help ensure all California’s, including those in low-income and disadvantaged communities are able to participate in California’s clean energy revolution.
