## 3.2. Payment Description. Provide a specific description of the payment and its agency purpose and use.

University of Michigan Energy Institute's Transportation, Economics, Energy and the Environment (TE3) Conference brings together federal policymakers, state policymakers, automakers, charging providers and researchers to explore the changing economics of mobility given electrification, evolving business models and federal actions to undermine California's vehicle standards. The conference themes are cutting edge and capture tensions between current low fuel prices and tightening fuel economy and GHG emissions standards, as well as longer-term issues around aligning infrastructure, fuel, vehicle design, and consumer education for a sustainable future.

As the Trump administration takes steps to rollback California's vehicle standards, it is particularly important to demonstrate the state's unwavering commitment to clean transportation. This conference provides a valuable opportunity for Commissioner Monahan, lead commissioner on transportation for the Commission, to demonstrate California's commitment to clean transportation to automakers, federal and state policymakers, and academics. This includes aggressive zero-emission vehicle mandates, as well as innovations in electric and smart mobility. Commissioner Monahan's participation is especially beneficial; it will provide her an opportunity to share California's perspective and promote its leadership on clean transportation.
