# Agenda Item Subject and Description:

Indian Energy LLC. Proposed resolution approving Agreement LDS-22-001 with Indian Energy, LLC for a grant up to \$31,259,680 to deploy a 60 megawatt-hour hybrid long-duration energy storage battery system, which is the first award under the Long-Duration Energy Storage Program, and adopting staff's determination that this action is exempt from CEQA. This project will use vanadium flow batteries and zinc hybrid cathode batteries in a hybrid-module arrangement combined with carport-mounted solar photovoltaics in a behind-the-meter microgrid to demonstrate sustained critical operations for the Viejas Tribe of Kumeyaay Indians. (General Fund Funding) Contact: Mike Gravely. (Staff Presentation: 5 minutes)

# G) California Environmental Quality Act (CEQA) Compliance

1. Is Agreement considered a "Project" under CEQA?

 $\boxtimes$  Yes (skip to question 2)

No (complete the following (PRC 21065 and 14 CCR 15378)):

- 2. If Agreement is considered a "Project" under CEQA:
  - a)  $\boxtimes$  Agreement **IS** exempt.
    - Statutory Exemption. List PRC and/or CCR section number: Cal. Code Regs., tit 14, § 21080.35
    - Categorical Exemption. List CCR section number: Cal. Code Regs., tit 14, § 15301
    - Common Sense Exemption.

Explain reason why Agreement is exempt under the above section:

This project will involve the installation of a solar PV carport system, within an existing parking lot. The PV system installation includes steel carport structures on new concrete pilings and electrical conduit to connect the system to the 12 kV microgrid loop. All solar PV panels will have an antiglare coating that maximizes light absorption and minimizes glare. Any potential glare from the operation of the solar PV system will be minimal. Equipment associated with each solar PV array will not occupy more than 500 square feet of ground surface and will be located on the same parcels as the solar panels (APNs 406-051-13-00 and 406-070-10-00). The project does not involve offsite federal Clean Water Act permit; waste discharge requirements pursuant to the Porter-Cologne Water Quality Control Act; incidental take permit for species protected under the federal Endangered Species Act or the California Endangered Species Act; streambed alteration permit pursuant to the California Fish and Game Code; or removal of protected or native plants and trees. For these reasons, the PV portion of the project is statutorily exempt from CEQA under Public Resources Code, section 21080.35, provided for installation of a solar energy system on the roof of an existing building or at an existing parking lot.

The project will install and operate a microgrid system combining a solar PV system and VRFB and ZHC LDES within previously disturbed areas at the Viejas Indian Reservation Business Enterprises facility. The microgrid system installation will be a minor alteration to an existing facility within the interior of the Viejas Indian Reservation with no expansion beyond the reservation operation. Vehicle trips associated with the construction of the project will be temporary and the operation of the microgrid system will result in a negligible number of regular operational trips for maintenance. BMPs will be used during installation and operation of the micro grid system. Therefore, no adverse effects to offsite air or water quality will occur as a result of the project. The installation and operation of the microgrid system would not substantially degrade the existing visual character or quality of off-reservation visual resources, as the system components are not visually obtrusive. The project will not have a significant adverse effect on the off-reservation environment due to unusual circumstances, result in a significant cumulative impact, damage resources within a designated state scenic highway, cause a substantial adverse change to the significance of a historical resource, or be located on a listed hazardous waste site. For these reasons, the project is categorically exempt from CEQA under California Code of Regulations, title 14, section 15301, as a minor alteration of existing facility, involving no expansion of the existing use.

Agreement **IS NOT** exempt. (consult with the legal office to determine next steps)

7 8 9

# 10 11

# A. Purpose of Agreement

**OBJECTIVES** 

II. PURPOSE OF AGREEMENT, PROBLEM/SOLUTION STATEMENT, AND GOALS AND

<sup>12</sup> 13

<sup>&</sup>lt;sup>1</sup> Please see subtask 1.3 in Part III of the Scope of Work (General Project Tasks) for a description of Critical Project Review (CPR) Meetings.

1 The purpose of this Agreement is to fund deployment of 6 MW/60 MWh of non-lithium-ion long

2 duration energy storage (LDES) using two different LDES technologies. The LDES systems will

3 be operated as part of microgrid that includes 15 MW of solar photovoltaics and serves the

4 Viejas Band of Kumeyaay Indians. The project will demonstrate the microgrid's ability to power

5 critical Tribal operations during Public Safety Power Shut Off (PSPS) events and during times of

#### 6 peak grid demand. 7

# B. Problem/ Solution Statement

# 10 **Problem**

8

9

21

22

23

24

25

26

LDES technologies capable of storing and discharging electricity for eight hours or longer can play an important role supporting electric reliability and resilience with high levels of renewable generation. However, the majority of storage systems deployed in California today are shortduration lithium-ion batteries and LDES technologies have only been demonstrated at relatively

16 small scales generally below 1 MW.

#### 17 18 **Solution**

Public Resources Code section 2541 provides that the CEC:

Shall establish and implement the Long-Duration Energy Storage Program to provide financial incentives for eligible projects,<sup>2</sup> located at eligible storage facilities,<sup>3</sup> that have power ratings of at least one megawatt and are capable of reaching a target of at least eight hours of continuous discharge of electricity at that power rating in order to deploy innovative energy storage systems to the electrical grid for purposes of providing critical capacity and grid services.<sup>4</sup>

27 28 This project will deploy two LDES technologies as part of a behind-the-meter microgrid that can 29 be deployed and configured rapidly and with no impact on operations. The LDES technologies 30 include 10MWh Invinity vanadium redox flow battery and 50 MWh Eos zinc hybrid cathode 31 battery for a combined LDES capacity of 60 MWh. The LDES and microgrid will be capable of 32 powering critical facilities during PSPS or other outage events for more than 10 hours with 33 equivalent or greater power quality than experienced at the facility today. The microgrid will also 34 be able to provide MW-scale load reduction during times of peak electric grid demand, helping 35 to support system reliability and achieve policy goals for 100 percent zero carbon renewable 36 electricity.

36 37

38

# C. Goals and Objectives of the Agreement

# 3940 Agreement Goals

<sup>&</sup>lt;sup>2</sup> Under Public Resources Code section 25642, an "eligible project" shall include, but not be limited to, an eligible storage facility that includes any of the following: (i) Compressed air or liquid air technologies; (ii) Flow batteries, advanced chemistry batteries, or mechanical energy storage; (iii) Thermal storage or aqueous battery systems; or (iv) A hydrogen demonstration project. "Eligible project" shall not include a pumped storage project or lithium-ion-based storage technology. Cal. Pub. Res. Code § 25642 (b)(2)(A). <sup>3</sup> "Eligible storage facility" shall include, but not be limited to, an energy storage system that is interconnected to the electrical grid in California or to a California balancing authority. Cal. Pub. Res. Code § 25642.

<sup>&</sup>lt;sup>4</sup> Cal. Pub. Res. Code § 25641.

1	The goals of this Agreement are to:
2	<ul> <li>Deploy two proven non-lithium-ion LDES technologies at a combined scale of 6MW</li> </ul>
2	discharged for 10 hours during DSDS events or times of peak electric grid demand
5	discharged for to hours during for 5 events of times of peak electric grid demaind.
4	<ul> <li>Demonstrate LDES technologies as part of a microgrid using 100 percent on-site</li> </ul>
5	renewable generation capable of sustaining critical operations for 72 hours or more.
6	<ul> <li>Demonstrate how LDES as part of a microgrid can provide reliability and resilience</li> </ul>
7	benefits to the electricity grid by reducing load at times of peak demand
, o	Increase the coole of LDES technology deployments to help reduce costs and inform
0	Increase the scale of LDES technology deployments to help reduce costs and inform
9	future deployments in California.
10	<ul> <li>Develop strategies to increase deployment of LDES technologies in low-income,</li> </ul>
11	disadvantaged, and tribal communities to support a more equitable distribution of
12	benefits
12	<ul> <li>Achieve LDES system readiness by summer 2023 and full microgrid operational</li> </ul>
13	Achieve LDES system readiness by summer 2025 and full microgrid operational
14	readiness by early 2024.
15	
16	<u>Deployment of Innovative Energy Storage System</u> : This Agreement will result in the
17	deployment of an innovative energy storage systems to the electrical grid for purposes of
18	providing critical capacity and grid services by deploying and demonstrating how large-scale
19	I DES can enable 100 percent renewable penetration in a rapid and seamless manner. The
20	project will provide a clear and replicable path toward implementing 100 percent renewables in
20	project will provide a clear and replicable path toward implementing too percent renewables in
21	a resilient manner and includes a new non-litnium-ion technology that can demonstrate future
22	savings that are repeatable. This will enable a cleaner environment that is less harmful to
23	humans, a grid that is more resilient and able to adapt to climate change, and significantly
24	reduced long term ownership costs which will eventually lead to the dramatic reduction in the
25	costs of electrical energy throughout California.
26	
27	This Agreement will demonstrate a way in which LDES can be utilized in a 100 percent
27	renewable environment to accure critical/casential leads while simultaneously relieving the grid
20	renewable environment to secure childal/essential loads while simulateously relieving the grid
29	of congestion and volatility and therefore enabling further electrification for uses like
30	transportation. Additionally, this agreement will allow the non-lithium-ion technology provider to
31	demonstrate the ability to perform all the services necessary to accomplish this goals that is
32	currently only being done by lithium-ion technology providers.
33	
34	This overall advancement will specifically include advancements and breakthroughs in the LDES
35	and microarid modeling I DES use case development I DES private financing I DES
35	and microgrid modeling, LDES use case development, LDES private infancing, LDES
30	performance insurance and warranty backstops, interconnection strategies and techniques,
37	LDES implementation phasing, LDES and microgrid infrastructure design, startup, and enhanced
38	commissioning. The hybrid LDES technology approach will serve ISO reliability services in the
39	area by providing resilience and value through multiple battery technologies working in unison.
40	The unique value proposition of a hybrid approach to LDES implementation will be assessed to
41	find the maximum value by the technologies. This will aid in both technologies value proposition
12	and market offerings and will provide an installation guide to test this scaling technique out with
+∠ 12	and market one may and will provide an installation guide to test this scaling technique out with
43	
44	
45	Agreement Objectives
46	The objectives of this Agreement are to:
47	<ul> <li>Demonstrate how large-scale non-lithium-ion LDES can be the key to unlocking 100</li> </ul>
48	percent renewables in California while strengthening the resilience posture of
49	ratenavers
コノ	ratopayoro.

50 • Identify all final barriers to scaling and implementation of large-scale LDES.

- Provide a clear path for rapid proliferation of large-scale LDES solutions through California.
- 3 III. TASK 1 GENERAL PROJECT TASKS

# 45 PRODUCTS

1

2

#### 6 Subtask 1.1 Products

7 The goal of this subtask is to establish the requirements for submitting project products (e.g., 8 reports, summaries, plans, and presentation materials). Unless otherwise specified by the 9 Commission Agreement Manager (CAM), the Recipient must deliver products as required below 10 by the dates listed in the Project Schedule (Part V). All products submitted which will be viewed by the public, must comply with the accessibility requirements of Section 508 of the 11 12 federal Rehabilitation Act of 1973, as amended (29 U.S.C. Sec. 794d), and regulations 13 implementing that act as set forth in Part 1194 of Title 36 of the Federal Code of Regulations. All 14 technical tasks should include product(s). Products that require a draft version are indicated by 15 marking "(draft and final)" after the product name in the "Products" section of the task/subtask. 16 If "(draft and final)" does not appear after the product name, only a final version of the product is 17 required. With respect to due dates within this Scope of Work, "days" means working days. 18 19 The Recipient shall: 20 21 For products that require a draft version, including the Final Report Outline and Final Report 22 Submit all draft products to the CAM for review and comment in accordance with the • 23 Project Schedule (Part V). The CAM will provide written comments to the Recipient on 24 the draft product within 15 days of receipt, unless otherwise specified in the task/subtask 25 for which the product is required. 26 Consider incorporating all CAM comments into the final product. If the Recipient 27 disagrees with any comment, provide a written response explaining why the comment 28 was not incorporated into the final product. 29 • Submit the revised product and responses to comments within 10 days of notice by the 30 CAM, unless the CAM specifies a longer time period, or approves a request for 31 additional time. 32 33 For products that require a final version only 34 Submit the product to the CAM for acceptance. The CAM may request minor revisions or • 35 explanations prior to acceptance. 36 37 For all products 38 Submit all data and documents required as products in accordance with the following: • 39 40 Instructions for Submitting Electronic Files and Developing Software: 41 42 • Electronic File Format 43 Submit all data and documents required as products under this Agreement in 44 an electronic file format that is fully editable and compatible with the 45 California Energy Commission's (CEC) software and Microsoft (MS)-46 operating computing platforms, or with any other format approved by the 47 CAM. Deliver an electronic copy of the full text of any Agreement data and 48 documents in a format specified by the CAM, such as memory stick.

1 2 3 4	The following describes the accepted formats for electronic data and documents provided to the CEC as products under this Agreement, and establishes the software versions that will be required to review and approve all software products: Data sets will be in MS Access or MS Excel file format (version 2007 or later),
5	or any other format approved by the CAM.
6	<ul> <li>Text documents will be in MS Word file format, version 2007 or later.</li> </ul>
7	<ul> <li>Project management documents will be in Microsoft Project file format,</li> </ul>
8	version 2007 or later.
9	
10	<ul> <li>Software Application Development</li> </ul>
11	Use the following standard Application Architecture components in compatible
12	versions for any software application development required by this Agreement (e.g.,
13	databases, models, modeling tools), unless the CAM approves other software
14	applications such as open-source programs:
15	<ul> <li>Microsoft ASP.NET framework (version 3.5 and up). Recommend 4.0.</li> </ul>
16	<ul> <li>Microsoft Internet Information Services (IIS), (version 6 and up)</li> </ul>
[/ 10	
18	<ul> <li>Visual Studio.NET (version 2008 and up). Recommend 2010.</li> </ul>
19	<ul> <li>C# Programming Language with Presentation (UI), Business Object and Data</li> </ul>
20	
21	<ul> <li>SQL (Structured Query Language).</li> <li>Microsoft COL Conversion 2000, Changed Proceedures, Decommend 2000, DO</li> </ul>
22	<ul> <li>Microsoft SQL Server 2008, Stored Procedures. Recommend 2008 R2.</li> <li>Microsoft SQL Departing Complete Department 2000 D2.</li> </ul>
23	<ul> <li>Microsoft SQL Reporting Services. Recommend 2008 R2.</li> <li>XML (automotion for eac)</li> </ul>
24	XIML (external interfaces).
23	Any executions to the Electronic File Format requirements above must be entroved
20	Any exceptions to the Electronic File Format requirements above must be approved in writing by the CAM. The CAM will expect the CEC's Information Technology
21 78	Services Branch to determine whether the exceptions are allowable
20	Services branch to determine whether the exceptions are allowable.
30	MEETINGS
31	Subtask 1.2 Kick-off Meeting
32 33	The goal of this subtask is to establish the lines of communication and procedures for implementing this Agreement.
34 25	The Recipient challs
33 26	The Recipient Shan:
30	• Attend a Kick-on meeting with the CAW, the Commission Agreement Onicer (CAO),
3/ 20	And any other CEC star relevant to the Agreement. The Recipient will bring its Project
38 20	Manager and any other individuals designated by the CAW to this meeting. The
39 40	administrative and technical aspects of the Agreement will be discussed at the meeting.
40 41	Prior to the meeting, the CAM will provide an agenda to all potential meeting
41	participants. The meeting may take place in person or by electronic conferencing (e.g.,
42	wedex), with approval of the CAM.
43	The administrative partian of the practing will include discussion of the following:
44 15	The <u>auministrative portion</u> of the Mercoment:
43 16	<ul> <li>rems and conditions of the Agreement;</li> <li>Invoicing and auditing precedures;</li> </ul>
40 47	<ul> <li>Invoicing and auditing procedures;</li> <li>Administrative products (subtack 1.1);</li> </ul>
4/ 10	• Administrative products (subtask 1.1);
4ð 40	• UPK meetings (subtask 1.3); Match fund de sumentation (subtack 1.7);
49 50	<ul> <li>Match lund documentation (Subtask 1.7);</li> <li>Dermit decumentation (subtask 1.9);</li> </ul>
50	$\circ$ Permit documentation (subtask 1.8);

- 1 Subcontracts (subtask 1.9); and 2 • Any other relevant topics. 3 4 The technical portion of the meeting will include discussion of the following: 5 o The CAM's expectations for accomplishing tasks described in the Scope of Work; 6 An updated Project Schedule; 7 Technical products (subtask 1.1); 8 Progress reports (subtask 1.5); 9 • Final Report (subtask 1.6); • Technical Advisory Committee meetings (subtasks 1.10 and 1.11); and 10 11 Any other relevant topics. 12 13 Provide *Kick-off Meeting Presentation* to include but not limited to: • 14 Project overview (i.e. project description, goals and objectives, technical tasks, 0 15 expected benefits, etc.) 16 • Project schedule that identifies milestones 17 List of potential risk factors and hurdles, and mitigation strategy 18 19 Provide an Updated Project Schedule. Match Funds Status Letter, and Permit Status 20 Letter, as needed to reflect any changes in the documents. 21 22 The CAM shall: 23 • Designate the date and location of the meeting. 24 Send the Recipient a Kick-off Meeting Agenda. • 25 26 **Recipient Products:** 27 **Kick-off Meeting Presentation** • 28 Updated Project Schedule (*if applicable*) • 29 Match Funds Status Letter (subtask 1.7) (if applicable) • 30 • Permit Status Letter (subtask 1.8) (*if applicable*) 31 32 CAM Product: 33 Kick-off Meeting Agenda 34 35 Subtask 1.3 Critical Project Review (CPR) Meetings The goal of this subtask is to determine if the project should continue to receive CEC funding. 36 37 and if so whether any modifications must be made to the tasks, products, schedule, or budget. 38 CPR meetings provide the opportunity for frank discussions between the CEC and the 39 Recipient. As determined by the CAM, discussions may include project status, challenges, 40 successes, advisory group findings and recommendations, final report preparation, and 41 progress on technical transfer and production readiness activities (if applicable). Participants 42 will include the CAM and the Recipient and may include the CAO and any other individuals 43 selected by the CAM to provide support to the CEC. 44 45 CPR meetings generally take place at key, predetermined points in the Agreement, as 46 determined by the CAM and as shown in the Task List on page 1 of this Exhibit.
- However, the CAM may schedule additional CPR meetings as necessary. The budget will be
   reallocated to cover the additional costs borne by the Recipient, but the overall Agreement
- 49 amount will not increase. CPR meetings generally take place at the CEC, but they may take

place at another location, or may be conducted via electronic conferencing (e.g., WebEx) as
 determined by the CAM.

- Prepare and submit a *CPR Report* for each CPR meeting that: (1) discusses the progress of the Agreement toward achieving its goals and objectives; and (2) includes recommendations and conclusions regarding continued work on the project.
- Attend the CPR meeting.
- Present the CPR Report and any other required information at each CPR meeting.

#### The CAM shall:

- Determine the location, date, and time of each CPR meeting with the Recipient's input.
- Send the Recipient a *CPR Agenda* with a list of expected CPR participants in advance of the CPR meeting. If applicable, the agenda will include a discussion of match funding and permits.
- Conduct and make a record of each CPR meeting. Provide the Recipient with a schedule for providing a Progress Determination on continuation of the project.
- Determine whether to continue the project, and if so whether modifications are needed to the tasks, schedule, products, or budget for the remainder of the Agreement. If the CAM concludes that satisfactory progress is not being made, this conclusion will be referred to the Deputy Director of the Energy Research and Development Division.
  - Provide the Recipient with a *Progress Determination* on continuation of the project, in accordance with the schedule. The Progress Determination may include a requirement that the Recipient revise one or more products.

# 33 Subtask 1.4 Final Meeting 34 The goal of this subtask is to

The goal of this subtask is to complete the closeout of this Agreement.

#### 36 **The Recipient shall:**

- Meet with CEC staff to present project findings, conclusions, and recommendations. The final meeting must be completed during the closeout of this Agreement. This meeting will be attended by the Recipient and CAM, at a minimum. The meeting may occur in person or by electronic conferencing (e.g., WebEx), with approval of the CAM.
  - The technical and administrative aspects of Agreement closeout will be discussed at the meeting, which may be divided into two separate meetings at the CAM's discretion.
- The technical portion of the meeting will involve the presentation of findings,
  conclusions, and recommended next steps (if any) for the Agreement. The CAM will
  determine the appropriate meeting participants.
  The administrative portion of the meeting will involve a discussion with the CAM and
  - The administrative portion of the meeting will involve a discussion with the CAM and the CAO of the following Agreement closeout items:
    - Disposition of any procured equipment.

1	<ul> <li>The CEC's request for specific "generated" data (not already provided in</li> </ul>
2	Agreement products).
3	Need to document the Recipient's disclosure of "subject inventions"
4	developed under the Agreement.
5	<ul> <li>Surviving Agreement provisions such as repayment provisions and confidential products</li> </ul>
07	Eventual products.
0	Prind involcing and release of relefition.     Dreners a Final Machine Agreement Summers that desuments any agreement made
0	Prepare a Final Meeting Agreement Summary that documents any agreement made     between the Registert and Commission staff during the meeting
9	Derween the Recipient and Commission standuling the meeting.
10	<ul> <li>Prepare a Schedule for Completing Agreement Closeout Activities.</li> <li>Drovide conice of All Final Products on a USP moment stick, ergonized by the tooks in</li> </ul>
11	• Frovide copies of All Final Froducts of a USB memory stick, organized by the tasks in the Agreement
12	the Agreement.
13 14	Products:
15	<ul> <li>Final Meeting Agreement Summary (if applicable)</li> </ul>
16	<ul> <li>Schodule for Completing Agreement Closeout Activities</li> </ul>
17	All Final Draduate
18	
10	REPORTS AND INVOICES
20	Subtask 1 5 Progress Reports and Invoices
21	The goals of this subtask are to: (1) periodically verify that satisfactory and continued progress
22	is made towards achieving the project objectives of this Agreement and (2) ensure that invoices
23	contain all required information and are submitted in the appropriate format.
24	
25	The Recipient shall:
26	<ul> <li>Submit a monthly Progress Report to the CAM. Each progress report must:</li> </ul>
27	• Summarize progress made on all Agreement activities as specified in the scope of
28	work for the preceding month, including accomplishments, problems, milestones,
29	products, schedule, fiscal status, and an assessment of the ability to complete the
30	Agreement within the current budget and any anticipated cost overruns. See the
31	Progress Report Format Attachment for the recommended specifications.
32	• Submit a monthly or guarterly <i>Invoice</i> that follows the instructions in the "Payment of
33	Funds" section of the terms and conditions, including a financial report on Match Funds
34	and in-state expenditures.
35	<ul> <li>Provide a Six-Month Employee Labor Projection that details the hour projections every</li> </ul>
36	six months covering the subsequent six months for each individual working on this
37	Agreement. The Recipient shall submit a monthly review of the previous labor spent by
38	each employee for the previous month in a <i>Monthly Time Tracking Report</i> for written
39	approval by the CAM.
40	In no event shall any individual providing direct labor under this Agreement, and
41	combined with any other active or future Agreement with the CEC, invoice more than
42	1800 hours of direct labor per year without prior CAM written approval, regardless of the
43	maximum number of hours permitted within any Budget.
44

# 2 Subtask 1.6 Final Report

3 The goal of this subtask is to prepare a comprehensive Final Report that describes the original 4 purpose, approach, results, and conclusions of the work performed under this Agreement.

5 When creating the Final Report Outline and the Final Report, the Recipient must use the CEC 6 Style Manual provided by the CAM.

#### 8 Subtask 1.6.1 Final Report Outline

#### 9 10 The Recipient shall:

• Prepare a *Final Report Outline* in accordance with the *Energy Commission Style Manual* provided by the CAM.

#### 14 **Recipient Products:**

• Final Report Outline (draft and final)

#### CAM Product:

- Energy Commission Style Manual
- Comments on Draft Final Report Outline
- Acceptance of Final Report Outline

# Subtask 1.6.2 Final Report

#### The Recipient shall:

- Prepare a *Final Report* for this Agreement in accordance with the approved Final Report Outline, Energy Commission Style Manual, and Final Report Template provided by the CAM with the following considerations:
   Ensure that the report includes the following items, in the following order:
  - Cover page (required)
  - Credits page on the reverse side of cover with legal disclaimer (required)
    - Acknowledgements page (optional)
    - Preface (required)
    - Abstract, keywords, and citation page (required)
    - Table of Contents (required, followed by List of Figures and List of Tables, if needed)
    - Executive summary (**required**)
    - Body of the report (required)
  - References (if applicable)
    - Glossary/Acronyms (If more than 10 acronyms or abbreviations are used, it is required.)
      - Bibliography (if applicable)
        - Appendices (if applicable) (Create a separate volume if very large.)
      - Attachments (if applicable)
- Submit a draft of the Executive Summary to the TAC for review and comment.
- Develop and submit a Summary of TAC Comments on Draft Final Report received on the Executive Summary. For each comment received, the recipient will identify in the summary the following:
  - Comments the recipient proposes to incorporate.
  - Comments the recipient does not propose to incorporate and an explanation for why.

- Submit a draft of the report to the CAM for review and comment. The CAM will provide written comments to the Recipient on the draft product within 15 days of receipt.
- Incorporate all CAM comments into the *Final Report*. If the Recipient disagrees with any
  comment, provide a *Written Responses to Comments* explaining why the comments
  were not incorporated into the final product.
- Submit the revised *Final Report* electronically with any Written Responses to Comments within 10 days of receipt of CAM's Written Comments on the Draft Final Report, unless the CAM specifies a longer time period or approves a request for additional time.

#### 10 **Products**:

- Summary of TAC Comments on Draft Final Report
- Draft Final Report
- Written Responses to Comments (*if applicable*)
- Final Report
- 14 15

#### 19 MATCH FUNDS, PERMITS, AND SUBCONTRACTS

#### 20 Subtask 1.7 Match Funds

- The goal of this subtask is to ensure that the Recipient obtains any match funds planned for this Agreement and applies them to the Agreement during the Agreement term.
- 23

31

32

33

34

35 36

37

38

39

40

41

42

43

44

45

46

47

48

24 While the costs to obtain and document match funds are not reimbursable under this

- 25 Agreement, the Recipient may spend match funds for this task. The Recipient may only spend
- 26 match funds during the Agreement term, either concurrently or prior to the use of CEC funds.
- 27 Match funds must be identified in writing, and the Recipient must obtain any associated
- 28 commitments before incurring any costs for which the Recipient will request reimbursement.

#### 30 The Recipient shall:

- Prepare a *Match Funds Status Letter* that documents the match funds committed to this Agreement. If <u>no match funds</u> were part of the proposal that led to the CEC awarding this Agreement and none have been identified at the time this Agreement starts, then state this in the letter.
  - If match funds were a part of the proposal that led to the CEC awarding this Agreement, then provide in the letter:
- A list of the match funds that identifies:
  - The amount of cash match funds, their source(s) (including a contact name, address, and telephone number), and the task(s) to which the match funds will be applied.
  - The amount of each in-kind contribution, a description of the contribution type (e.g., property, services), the documented market or book value, the source (including a contact name, address, and telephone number), and the task(s) to which the match funds will be applied. If the in-kind contribution is equipment or other tangible or real property, the Recipient must identify its owner and provide a contact name, address, telephone number, and the address where the property is located.
- If different from the solicitation application, provide a letter of commitment
   from an authorized representative of each source of match funding that the

- 1 funds or contributions have been secured. 2 At the Kick-off meeting, discuss match funds and the impact on the project if they are • 3 significantly reduced or not obtained as committed. If applicable, match funds will be 4 included as a line item in the progress reports and will be a topic at CPR meetings. 5 Provide a Supplemental Match Funds Notification Letter to the CAM of receipt of 6 additional match funds. 7 Provide a Match Funds Reduction Notification Letter to the CAM if existing match funds • 8 are reduced during the course of the Agreement. Reduction of match funds may trigger 9 a CPR meeting. 10 11 **Products:** 12 • Match Funds Status Letter 13 Supplemental Match Funds Notification Letter (*if applicable*) • 14 • Match Funds Reduction Notification Letter (*if applicable*) 15
- 16 Subtask 1.8 Permits
- 17 The goal of this subtask is to obtain all permits required for work completed under this
- 18 Agreement in advance of the date they are needed to keep the Agreement schedule on track.
- 19 Permit costs and the expenses associated with obtaining permits are not reimbursable under
- 20 this Agreement, with the exception of costs incurred by University of California recipients.
- Permits must be identified and obtained before the Recipient may incur any costs related to the use of the permit(s) for which the Recipient will request reimbursement.
- 24 **The Recipient shall:**

23

29

30

31 32

33

34

35

36

37

38

39

40

41

42

43

45

46

47

- Prepare a *Permit Status Letter* that documents the permits required to conduct this
   Agreement. If <u>no permits</u> are required at the start of this Agreement, then state this in the
   letter. If permits will be required during the course of the Agreement, provide in the letter:
   A list of the permits that identifies: (1) the type of permit; and (2) the name,
  - A list of the permits that identifies: (1) the type of permit; and (2) the name, address, and telephone number of the permitting jurisdictions or lead agencies.
  - $_{\odot}$  The schedule the Recipient will follow in applying for and obtaining the permits.

The list of permits and the schedule for obtaining them will be discussed at the Kick-off meeting (subtask 1.2), and a timetable for submitting the updated list, schedule, and copies of the permits will be developed. The impact on the project if the permits are not obtained in a timely fashion or are denied will also be discussed. If applicable, permits will be included as a line item in progress reports and will be a topic at CPR meetings.

- If during the course of the Agreement additional permits become necessary, then provide the CAM with an *Updated List of Permits* (including the appropriate information on each permit) and an *Updated Schedule for Acquiring Permits*.
- Send the CAM a Copy of Each Approved Permit.
  - If during the course of the Agreement permits are not obtained on time or are denied, notify the CAM within 5 days. Either of these events may trigger a CPR meeting.
- 44 **Products**:
  - Permit Status Letter
  - Updated List of Permits (*if applicable*)
  - Updated Schedule for Acquiring Permits (*if applicable*)
- 48 Copy of Each Approved Permit (*if applicable*)
  49

#### 1 Subtask 1.9 Subcontracts

2 The goals of this subtask are to: (1) procure subcontracts required to carry out the tasks under

3 this Agreement; and (2) ensure that the subcontracts are consistent with the terms and

4 conditions of this Agreement. 5

#### The Recipient shall:

6

7

8

9

10

11 12

13

14

15

16

17

18

19

21

22

- Manage and coordinate subcontractor activities in accordance with the requirements of this Agreement.
  - Incorporate this Agreement by reference into each subcontract.
  - Include any required Energy Commission flow-down provisions in each subcontract, in addition to a statement that the terms of this Agreement will prevail if they conflict with the subcontract terms.
  - If required by the CAM, submit a draft of each *Subcontract* required to conduct the work under this Agreement.
  - Submit a final copy of each executed subcontract.
  - Notify and receive written approval from the CAM prior to adding any new subcontractors (see the discussion of subcontractor additions in the terms and conditions).

#### 20 **Products:**

• Subcontracts (draft if required by the CAM)

#### 23 TECHNICAL ADVISORY COMMITTEE

#### 24 Subtask 1.10 Technical Advisory Committee (TAC)

- The goal of this subtask is to create an advisory committee for this Agreement. The TAC should be composed of diverse professionals. The composition will vary depending on interest,
- availability, and need. TAC members will serve at the CAM's discretion. The purpose of the
- 28 TAC is to:
  - Provide guidance in project direction. The guidance may include scope and methodologies, timing, and coordination with other projects. The guidance may be based on:
- 31 32

29

30

33

34

35

36

37

38

39

- Technical area expertise;
- Knowledge of market applications; or
- Linkages between the agreement work and other past, present, or future projects (both public and private sectors) that TAC members are aware of in a particular area.
- Review products and provide recommendations for needed product adjustments, refinements, or enhancements.
- Evaluate the tangible benefits of the project to the state of California, and provide recommendations as needed to enhance the benefits.
- Provide recommendations regarding information dissemination, market pathways, or
   commercialization strategies relevant to the project products.
- Help set the project team's goals and contribute to the development and evaluation of its statement of proposed objectives as the project evolves.
- Provide a credible and objective sounding board on the wide range of technical and
   financial barriers and opportunities.
- Help identify key areas where the project has a competitive advantage, value
   proposition, or strength upon which to build.

Advocate, to the extent the TAC members feel is appropriate, on behalf of the project in

its effort to build partnerships, governmental support, and relationships with a national

- 4 Ask probing questions that insure a long-term perspective on decision-making and • 5 progress toward the project's strategic goals. 6 7 The TAC may be composed of qualified professionals spanning the following types of 8 disciplines: 9 Researchers knowledgeable about the project subject matter; • 10 Members of trades that will apply the results of the project (e.g., designers, engineers, 11 architects, contractors, and trade representatives); 12 Public interest market transformation implementers; • 13 Product developers relevant to the project; • 14 U.S. Department of Energy research managers, or experts from other federal or state 15 agencies relevant to the project; 16 Public interest environmental groups: 17 Utility representatives; 18 Air district staff; and • 19 • Members of relevant technical society committees. 20 21 The Recipient shall: 22 Prepare a List of Potential TAC Members that includes the names, companies, physical 23 and electronic addresses, and phone numbers of potential members. The list will be 24 discussed at the Kick-off meeting, and a schedule for recruiting members and holding 25 the first TAC meeting will be developed. 26 • Recruit TAC members. Ensure that each individual understands member obligations and 27 the TAC meeting schedule developed in subtask 1.11. 28 Prepare a List of TAC Members once all TAC members have committed to serving on 29 the TAC. 30 Submit Documentation of TAC Member Commitment (such as Letters of Acceptance) • 31 from each TAC member. 32 33 **Products:** 34 List of Potential TAC Members • 35 List of TAC Members 36 **Documentation of TAC Member Commitment** • 37 38 Subtask 1.11 TAC Meetings 39 The goal of this subtask is for the TAC to provide strategic guidance for the project by
- 40 participating in regular meetings, which may be held via teleconference.
- 41

27

28

30

31

32

- Discuss the TAC meeting schedule with the CAM at the Kick-off meeting. Determine the number and location of meetings (in-person and via teleconference) in consultation with the CAM.
- Prepare a *TAC Meeting Schedule* that will be presented to the TAC members during recruiting. Revise the schedule after the first TAC meeting to incorporate meeting comments.
- Prepare a TAC Meeting Agenda and TAC Meeting Back-up Materials for each TAC meeting.
- Organize and lead TAC meetings in accordance with the TAC Meeting Schedule. Changes to the schedule must be pre-approved in writing by the CAM.
- Prepare *TAC Meeting Summaries* that include any recommended resolutions of major TAC issues.

#### The TAC shall:

- Help set the project team's goals and contribute to the development and evaluation of its statement of proposed objectives as the project evolves.
- Provide a credible and objective sounding board on the wide range of technical and financial barriers and opportunities.
   Help identify key areas where the project has a competitive advantage, value
  - Help identify key areas where the project has a competitive advantage, value proposition, or strength upon which to build.
  - Advocate on behalf of the project in its effort to build partnerships, governmental support and relationships with a national spectrum of influential leaders.
    - Ask probing questions that insure a long-term perspective on decision-making and progress toward the project's strategic goals.
    - Review and provide comments to proposed project performance metrics.
    - Review and provide comments to proposed project Draft Technology Transfer Plan.

#### 29 **Products**:

- TAC Meeting Schedule (draft and final)
- TAC Meeting Agendas (draft and final)
- TAC Meeting Back-up Materials
  - TAC Meeting Summaries

#### 33 34

### 35 Subtask 1.12 Project Performance Metrics

36 The goal of this subtask is to finalize key performance targets for the project based on feedback

37 from the TAC and report on final results in achieving those targets. The performance targets

38 should be a combination of scientific, engineering, techno-economic, and/or programmatic 39 metrics that provide the most significant indicator of the research or technology's potential

- metrics that provide the most significant indicator of the research or technology's potentialsuccess.
- 41

44

45

46

47

# 42 The Recipient shall:43 • Complete and

- Complete and submit the project performance metrics section of the *Initial Project Benefits Questionnaire*, developed in the Evaluation of Project Benefits task, to the CAM.
- Present the draft project performance metrics at the first TAC meeting to solicit input and comments from the TAC members.

- Develop and submit a *TAC Performance Metrics Summary* that summarizes comments received from the TAC members on the proposed project performance metrics. The *TAC Performance Metrics Summary* will identify:
  - TAC comments the Recipient proposes to incorporate into the *Initial Project Benefits Questionnaire*, developed in the Evaluation of Project Benefits task.
  - TAC comments the Recipient does not propose to incorporate with and explanation why.
- Develop and submit a *Project Performance Metrics Results* document describing the extent to which the Recipient met each of the performance metrics in the *Final Project Benefits Questionnaire*, developed in the Evaluation of Project Benefits task.
  - Discuss the Project Performance Metrics Results at the Final Meeting.
- 13 **Products**:
  - TAC Performance Metrics Summary
  - Project Performance Metrics Results

### 18 IV. TECHNICAL TASKS

Products that require a draft version are indicated by marking "(draft and final)" after the product name in the "Products" section of the task/subtask. If "(draft and final)" does not appear after the product name, only a final version of the product is required. Subtask 1.1 (Products) describes the procedure for submitting products to the CAM.

# 24 TASK 2: DEVELOP SITE AND MICROGRID DESIGN INTEGRATING LDES TECHNOLOGIES

The goal of this task is to complete the engineering design for installation and integration of the LDES technologies and microgrid components including all electrical, civil, structural,

architectural, and miscellaneous items required to develop a complete Issued for Constructionset of design drawings.

# 30 The Recipient shall:

- Develop and submit *Issued for Construction* Drawings for review that include but are not limited to the following:
  - Hardware design and specifications for the LDES technologies and microgrid components
  - Anticipated construction and interconnection timelines
  - All necessary permits filed for building, interconnection, and back up generation
- Conduct TAC Meeting #1 per subtask 1.10
  - Document, submit, and discuss these tasks and lessons learned during the TAC meeting with the TAC and the CAM
- Prepare a *Design Report* that includes but is not limited to the following.
  - Summary of all planned operational use cases for the LDES and microgrid over the course of the project
    - Schematics and integration details
  - Electrical design
  - Definition of schematic symbols and data entry types
  - Documentation of the capabilities of the battery management system(s)
  - System documentation
- Obtain approval and provide a *Copy of Notice to Proceed* from the authorities having jurisdiction (AHJ)

• Prepare a *Design Report Presentation (PowerPoint)* which will include the design plans and summarize and highlight the *Design Report* and present at a Design Report meeting.

### 12 TASK 3: PROCURE EQUIPMENT AND MATERIALS FOR LDES SYSTEM

13 The goal of this task is to procure, track and manage logistics for delivery of the 6MW/60MWh 14 combined LDES technologies to the demonstration site. 15

#### 16 **The Recipient shall:**

- Develop a detailed Master List of Equipment and Materials for the 6MW/60MWh LDES technologies
  - Receive Written Approval of Master List of Equipment and Materials from CAM before placing purchase order for LDES technologies
  - Create purchase orders based on approved Master List of Equipment and Materials
  - Coordinate logistics and track delivery of LDES technologies to the project demonstration site
    - Confirm and document receipt of the LDES technologies to California distribution yard and facility
- Develop and submit Supplier-Specific Payment Schedules for written approval by CAM reflecting a milestone process for purchasing LDES technologies and associated equipment, for example:
   Milestone 1: Invoice 25 percent of purchase order costs upon battery supplier
  - Milestone 1: Invoice 25 percent of purchase order costs upon battery supplier purchase agreement execution.
  - Milestone 2: Invoice 25 percent of purchase order costs 60 days before shipment, with confirmation that all supply orders are on schedule, proof of supplier receipt of previous milestone payment, and after completion of a manufacturer site visit(s).
- Milestone 3: Invoice 25 percent of purchase order costs when at least 75 percent of equipment has passed factory acceptance testing, with confirmation that all supply orders are on schedule, proof of supplier receipt of previous milestone payment, and after completion of a manufacturer site visit(s).
- Milestone 4: Invoice 15 percent of purchase order costs following delivery of all equipment to the demonstration site, proof of supplier receipt of previous milestone payment, and completion of a demonstration site visit.
   Milestone 5: Invoice 5 percent of equipment following Mechanical Completion of
  - Milestone 5: Invoice 5 percent of equipment following Mechanical Completion of the supplier specific LDES systems and with proof of supplier receipt of previous milestone payment.
    - Milestone 6: Invoice 5 percent of purchase order costs at final commissioning and acceptance of supplier specific LDES systems and with proof of supplier receipt of previous milestone payment.
- All equipment reimbursed under this grant will be owned by the CEC and shall not be
   encumbered as set forth in Exhibit C, Terms and Conditions, until Mechanical
   Completion of the LDES systems. "Mechanical Completion" means (a) structural

1 2 3	installation of the applicable project system(s) has occurred and (b) the project(s) is mechanically, electrically, and functionally complete to the extent necessary to be ready for initial commissioning, adjustment, and testing.
4	<ul> <li>Secure project insurance and furnish a Proof of Insurance Policy that names the CEC as</li> </ul>
5	an insured that satisfies the requirements set forth in Exhibit C. Terms and Conditions
6	<ul> <li>Prenare a CPR Report #1 and participate in CPR Meeting, per subtask 1.3 Report shall</li> </ul>
7	also include:
8	<ul> <li>Equipment and materials purchase orders</li> </ul>
0	
10	Products:
11	Master List of Equipment and Materials

12	Droof of Indurance Deliev
13	
14	• CPR Report #1
15	
16	TASK 4: INSTALLATION AND PRE-ENERGIZATION TESTING OF LDES TECHNOLOGIES
17	AND MICROGRID COMPONENTS
18	The goal of this task is to install 6MW/60MWh combined LDES technologies, 15MW on-site
19	photovoltaic generation, back-up generators, and all microgrid and interconnection systems.
20	
21	The Recipient shall:
22	<ul> <li>Install all equipment at the demonstration site, including but not limited to the LDES</li> </ul>
23	technologies, solar photovoltaic generation, back-up generators, and 12kV microgrid
24	infrastructure
25	<ul> <li>Make appropriate electrical connections to utility distribution system</li> </ul>
26	<ul> <li>Receive final approval for interconnection from the utility providing service</li> </ul>
27	• Prepare an Equipment Testing and Readiness Report that includes but is not limited to
28	the following:
29	• Specific pre-energization testing and evaluation performed on all components to
30	confirm proper functionality
31	• Testing data sheets that verify all equipment was evaluated and tested according
32	to established procedures to ensure all equipment and individual system
33	components are safe to energize and will function as designed
34	• Participate in final inspection and obtain <i>Final Installation Inspection Letter</i> from the AHJ
35	or its representative, confirming Mechanical Completion and System Readiness
36	Prepare a CPR Report #2 and participate in CPR Meeting per subtask 1.3 Report shall
37	also include:
38	<ul> <li>Equipment and materials tracking tickets</li> </ul>
39	$\circ$ Equipment and materials delivery receipts

- Develop a *LDES Functional Acceptance Testing and Commissioning Plan,* prior to completion of installation, that includes but is not limited to the following.
  - LDES subsystems and systems to be functionally tested and details of testing plans
  - Sequence of LDES system functional testing and startup period
  - Goals and expected outcomes of each functional test and overall process
  - Definition of successful results, for example cell, module, and unit balancing, full control and monitoring capability, verification of inverter inputs and outputs
    - Roles and responsibilities of the parties
- Prepare a *LDES Performance and Acceptance Test Result(s) Report(s)* that includes but is not limited to the following.
  - Results of subsystem and system verification tests identified in the Functional Testing and Commissioning Plan
  - Acceptance Test results for each LDES subsystem individually at the single container level
    - Acceptance Test results for the LDES system at the level of multiple containers connected to a common electrical node
      - Test results of full system performance verification
      - Test results of a full systems readiness evaluation verifying that the full system will operate as designed in a microgrid application
- Provide a Systems Readiness Certification
  - Achieve *Authority to Operate* by the AHJ or its representative and provide a copy of approval documentation.
  - Conduct TAC Meeting #2 per subtask 1.10
    - Document, submit, and discuss this tasks lessons learned during the TAC meeting with the TAC and the CAM.
  - Prepare a CPR Report #3 and participate in CPR Meeting, per subtask 1.3

#### 33 **Products**:

- LDES Functional Acceptance Testing and Commissioning Plan (Draft and Final)
- LDES Performance and Acceptance Test Result(s) Report(s)
- Systems Readiness Certificate

# 41 TASK 6: OPERATE LDES AS PART OF MICROGRID TO SUPPORT SITE DURING PSPS, 42 OTHER OUTAGE EVENTS, OR TO REDUCE LOAD DURING PEAK DEMAND

The goal of this task is to operate the microgrid and LDES to demonstrate multiple use cases
culminating in the ability for the LDES based microgrid to seamlessly transition between island
and non-island operation during a PSPS or other outage utilizing 100 percent renewable
generation for multiple days in a row.

# 4748 The Recipient shall:

Develop a *Microgrid System Testing and Commissioning Plan,* prior to completion of installation, that includes the following at a minimum:

2 o Sequence of microgrid system testing and s	
	startup period
3 o Goals and expected functionality of the micr	rogrid system
4 o Definition of successful results to demonstr	rate support of site load during PSPS,
5 other outage events, or to reduce load durin	ng peak demand
6 o Roles and responsibilities of the parties	
7 • Test the LDES and microgrid under the following us	se cases both while grid connected and
8 while islanded:	-
9 o 6MW discharge for 10 hrs.	
10 o 24-hour 100 percent renewable operation w	vith on-site renewable generation
11 o Emergency load support during PSPS or o	other outage events or during times of
12 peak electric grid demand	
<ul> <li>Track data and report on participation</li> </ul>	ion in the Emergency Load Reduction
14 Program.	
15 • Prepare a Microgrid Operations and Analysis Rep	ort with the results of testing for each
16 Use Cases	
17 • Prepare a Microgrid System Performance Presenta	ation with the results of the Use Cases
18 test	
<ul> <li>Prepare a CPR Report #4 and participate in CPR M</li> </ul>	vleeting, per subtask 1.3

1 2 3 4	•	<ul> <li>Discussion of lessons learned and future adjustments</li> <li>Submit updated <i>Quarterly Measurement, Verification &amp; Performance Evaluation Reports</i> summarizing performance of the LDES systems and microgrid, including but not limited to the following.</li> </ul>
5 6 7 8 9		<ul> <li>Measured LDES performance relative to nameplate guarantees; MWh throughput (subtotal and total); roundtrip efficiency; auxiliary load reports; generation mix reports; subsystem and system availability and reliability metrics; costs and economic savings; and summary statistics on utility distribution grid performance including outages, voltage, and frequency monitoring.</li> </ul>
10	•	Conduct TAC Meeting #3 per subtask 1.10
11		o Document, submit, and discuss this tasks lessons learned during the TAC meeting
12		with the TAC and the CAM.
13	•	Prepare a CPR Report #5 and participate in CPR Meeting, per subtask 1.3
14		
15	Produ	ICTS: Management Marification & Deuferman a Frankration Dian (Draft and Final)
10	•	Measurement, Verification & Performance Evaluation Plan (Draft and Final)
17	•	Initial Measurement, Verification & Performance Evaluation Report
18	•	Quarterly Measurement, Verification & Performance Evaluation Reports
19	•	CPR Report #5
20		
21		
22	TASK	8: EVALUATION OF PROJECT BENEFITS
23	The go	pal of this task is to report the benefits resulting from this project.
24		
25	I ne R	ecipient snall:
20	•	Complete the Initial Project Benefits Questionnaire. The Initial Project Benefits
27		'Relevant data collection period' and submitted to the CAM for review and approval
29	•	Complete the Annual Survey by January 31st of each year. The Annual Survey includes
30	-	but is not limited to the following information:
31		<ul> <li>Technology commercialization progress</li> </ul>
32		<ul> <li>New media and publications</li> </ul>
33		<ul> <li>Company growth</li> </ul>
34		<ul> <li>Follow-on funding and awards received</li> </ul>
35	•	Complete the Final Project Benefits Questionnaire. The Final Project Benefits
36		Questionnaire shall be completed by the Recipient with 'Final' selected for the 'Relevant
37		data collection period' and submitted to the CAM for review and approval.
38	•	Respond to CAM questions regarding the questionnaire drafts.
39	•	Complete and update the project profile on the CEC's public online project and recipient
40		directory on the <u>Energize Innovation website</u> ( <u>www.energizeinnovation.tund</u> ), and
41 12		provide Documentation of Project Prome on Energizemnovation. Jund, including the
42 //3	•	If the Prime Recipient is an Innovation Partner on the project, complete and undate the
44	•	organizational profile on the CEC's public online project and recipient directory on the
45		Energize Innovation website (www.energizeinnovation.fund). and provide
46		Documentation of Organization Profile on EnergizeInnovation.fund, including the profile
47		link.
48		

#### 49 **Products:**

- 1 Initial Project Benefits Questionnaire • 2 Annual Survev(s) • 3 **Final Project Benefits Questionnaire** • 4 Documentation of Project Profile on EnergizeInnovation.fund • 5 Documentation of Organization Profile on EnergizeInnovation.fund • 6 7 TASK 9: TECHNOLOGY/KNOWLEDGE TRANSFER ACTIVITIES 8 9 The goal of this task is to ensure the technological learning that resulted from the 10 demonstration(s) is captured and disseminated to the range of professions that will be 11 responsible for future deployments of this technology or similar technologies. 12 13 The Recipient Shall: 14 Develop and submit a Project Case Study Plan that outlines how the Recipient will 15 document the planning, construction, commissioning, and operation of the technology or 16 system being demonstrated. The Project Case Study Plan should include: 17 • An outline of the objectives, goals, and activities of the case study. 18 0 The organization that will be conducting the case study and the plan for 19 conducting it. 20 • A list of professions and practitioners involved in the technology's deployment. 21 Specific activities the recipient will take to ensure the learning that results from 0 22 the project is disseminated to those professions and practitioners. 23 Presentations/webinars/training events to disseminate the results of the case 0 24 study. 25 Present the draft *Project Case Study Plan* to the TAC for review and comment. • 26 Develop and submit a Summary of TAC Comments that summarizes comments • 27 received from the TAC members on the draft Project Case Study Plan. This document 28 will identify: 29 TAC comments the recipient proposes to incorporate into the final *Technology* 30 Transfer Plan. 31 TAC comments the recipient does not propose to incorporate with and 0 32 explanation why. 33 • Submit the final *Project Case Study Plan* to the CAM for approval. 34 Execute the final Project Case Study Plan and develop and submit a Project Case 35 Study. 36 When directed by the CAM, develop presentation materials for a CEC sponsored 37 conference/workshop(s) on the project. 38 • When directed by the CAM, participate in knowledge sharing event(s) sponsored by the 39 California CEC. 40 Provide at least (6) six High Quality Digital Photographs (minimum resolution of 41 1300x500 pixels in landscape ratio) of pre and post technology installation at the project 42 sites or related project photographs. 43 44 Products: 45 Project Case Study Plan (draft and final) 46 Summary of TAC Comments •
- Project Case Study (draft and final)

High Quality Digital Photographs

### V. PROJECT SCHEDULE

Please see the attached Excel spreadsheet.

#### STATE OF CALIFORNIA

#### STATE ENERGY RESOURCES CONSERVATION AND DEVELOPMENT COMMISSION

#### **RESOLUTION: Indian Energy LLC**

**RESOLVED**, that the State Energy Resources Conservation and Development Commission (CEC) adopts the staff CEQA findings contained in the Agreement or Amendment Request Form (as applicable); and

**RESOLVED**, that the CEC approves Agreement LDS-22-001 with Indian Energy LLC for a grant of up to \$31,259,680 to deploy a 60 megawatt-hour hybrid long-duration energy storage battery system, which is the first award under the Long-Duration Energy Storage Program. This project will use vanadium flow batteries and zinc hybrid cathode batteries in a hybrid-module arrangement combined with carport-mounted solar photovoltaics in a behind-the-meter microgrid to demonstrate sustained critical operations for the Viejas Tribe of Kumeyaay Indians; and

**FURTHER BE IT RESOLVED**, that the Executive Director or their designee shall execute the same on behalf of the CEC.

# **CERTIFICATION**

The undersigned Secretariat to the CEC does hereby certify that the foregoing is a full, true, and correct copy of a resolution duly and regularly adopted at a meeting of the CEC held on October 12, 2022.
