| <p>The bar chart shows three bars representing GHG emissions intensity. The first bar (blue) for 2021 SDCP PowerOn is at 378 lbs CO<sub>2</sub>e/MWh. The second bar (green) for 2021 SDCP Power100 is at 0 lbs CO<sub>2</sub>e/MWh. The third bar (red) for 2021 CA Utility Average is at 456 lbs CO<sub>2</sub>e/MWh. The y-axis ranges from 0 to 1000.</p>   |                                 |                            | Geothermal  | 3.8%          | 0.0%          | 4.8%                           |                                 |                      |
|   |                                 |                            | Eligible Hydroelectric  | 0.5%          | 0.0%          | 1.0%                           |                                 |                      |

| <b>Percentage of Retail Sales Covered by Retired Unbundled RECs<sup>3</sup>:</b>  |                                 |                            |   | <b>0%</b>     | <b>0%</b>     |                                |                                 |                      |
| <p><sup>1</sup>The eligible renewable percentage above does not reflect RPS compliance, which is determined using a different methodology.</p> <p><sup>2</sup>Unspecified power is electricity that has been purchased through open market transactions and is not traceable to a specific generation source.</p> <p><sup>3</sup>Renewable energy credits (RECs) are tracking instruments issued for renewable generation. Unbundled renewable energy credits (RECs) represent renewable generation that was not delivered to serve retail sales. Unbundled RECs are not reflected in the power mix or GHG emissions intensities above.</p> |                                 |                            |   |               |               |                                |                                 |                      |
