This project involves the installation of a rooftop solar photovoltaic system at an existing site controlled by Delta Mosquito and Vector Control District in Tulare County. The photovoltaic system and associated equipment, such as electrical conduits and controls, will be located on the same parcel, will not occupy more than 500 square feet of ground surface at the site, and the location of the associated equipment will not contain plants protected by the Native Plant Protection Act. The associated equipment will not require any of the permits listed in Public Resources Code section 21080.35 (d).

This project is therefore statutorily exempt from CEQA under Public Resources Code section 21080.35 as the installation of a solar energy system on rooftops. The project is also categorically exempt from environmental review pursuant to CEQA Guidelines section 15301 as minor alterations to existing facilities that involve no expansion of an existing or former use at the sites, and categorically exempt pursuant to CEQA Guidelines section 15303 as the installation of small new equipment in small structures.

The project will not impact an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies; does not involve any cumulative impacts of successive projects of the same type in the same place that might be considered significant; does not involve unusual circumstances that might have a significant effect on the environment; will not result in damage to scenic resources within a highway officially designated as a state scenic highway; the project site is not included on any list compiled pursuant to Government Code section 65962.5; and the project will not cause a substantial adverse change in the significance of a historical resource. Therefore, none of the exceptions to categorical exemptions listed in CEQA Guidelines section 15300.2 apply to this project and this project will not have a significant effect on the environment.

b) Agreement **IS NOT** exempt.

BUDGET DETAIL/PROJECT COST AND SAVINGS

This loan is made to the Delta Mosquito and Vector Control District (Borrower) in Tulare County for an energy savings project. The project consists of the energy generation measure listed in Table 1 and will be funded using ECAA loan funds.

Table 1 summarizes the estimated project cost(s), saving(s), and simple payback(s) for the project.

TABLE 1: Summary of Project Cost and Savings:

Energy Efficiency Measure	Estimated Total Project Cost	Energy Commission Loan	Estimated Annual Energy Cost Savings	GhG Emissions Reduction (Metric Tons of CO2)	Simple Payback* (Years)
103.7 kW PV system	\$408,127	\$408,127	\$26,086	34.1	15.6
TOTALS:	\$408,127	\$408,127	\$26,086	34.1	15.6

*The simple payback is based on the Loan amount.

The Borrower shall implement each measure listed in Table 1.

If the Borrower does not complete one or more of the measures or deviates from the quantities and specifications listed in Table 1, the California Energy Commission (CEC) project manager will calculate the maximum loan amount supported by the project. The loan amount will be determined by the lesser of 1) multiplying the annual energy cost savings by 17; 2) total project costs; or 3) approved loan amount.

The Borrower shall notify the CEC project manager in writing if the Borrower expects any information in Table 1 to change. CEC staff will advise the Borrower of the procedure to approve any changes. Written documentation is required for any changes to the information included in this attachment.

If the Borrower has received disbursements exceeding the maximum loan amount supported by the project, the Borrower shall refund the difference to the CEC within 30 days of notification.
