Percentage of Retail Sales Covered by Retired Unbundled RECs[3]:	0%

[1]The eligible renewable percentage above does not reflect RPS compliance, which is determined using a different methodology.

[2]Unspecified power is electricity that has been purchased through open market transactions and is not traceable to a specific generation source.

[3]Renewable energy credits (RECs) are tracking instruments issued for renewable generation. Unbundled renewable energy credits (RECs) represent renewable generation that was not delivered to serve retail sales. Unbundled RECs are not reflected in the power mix or GHG emissions intensities above.

The unbundled RECs retired in association with UC Clean Power Program's portfolio were procured from eligible renewable sources such as solar, wind, hydroelectric, biowaste, biomass, or geothermal energy. For additional information on unbundled RECs retired in association with the UC Clean Power Program please reach out via email at UC_ESP@ucop.edu.
