STATE OF CALIFORNIA
STATE ENERGY RESOURCES
CONSERVATION AND DEVELOPMENT COMMISSION

IN THE MATTER OF:

**2025 Energy Code Third-Party
Compliance Software, Right-Energy
Title 24 Version 2025.2.0**

Docket No.: 24-BSTD-03

**Order to Approve the Right-Energy
Title 24 Version 2025.2.0 Alternative
Calculation Method Compliance
Software Application**

I. BACKGROUND

The Warren-Alquist State Energy Resources Conservation and Development Act, Public Resources Code sections 25000 et seq., 25402.1(b), requires the California Energy Commission (CEC) to, among other things, establish a process for certifying calculation methods for demonstrating compliance with its building energy efficiency standards.

As allowed by the 2025 Energy Code, California Code of Regulations (CCR), Title 24, Part 1, Chapter 10, Section 10-109(c)3, MiTek Wrightsoft has submitted an application requesting the Commission approve Right-Energy Title 24 Version 2025.2.0 as an alternative calculation method (ACM) to demonstrate performance compliance with the single-family residential new-construction requirements of the 2025 Energy Code.

As specified by the 2025 Energy Code, Section 10-109(c)3, ACM applications must meet the applicable application requirements of Section 10-116(b) and provide documentation demonstrating that the candidate software meets the requirements, specifications, and criteria specified in Sections 10-109(c)1A, 10-109(c)1B, 10-109(c)1C, 10-109(c)1D and 10-109(c)1E, as appropriate.

CEC staff has reviewed the Right-Energy Title 24 Version 2025.2.0 ACM application submitted by MiTek Wrightsoft and determined that it contains the documentation, building energy modeling functionality, and aligns with the current version of the 2025 ACM Reference Manuals as required by the above sections of the 2025 Energy Code.

II. STAFF RECOMMENDATION

CEC staff has considered the Right-Energy Title 24 Version 2025.2.0 ACM application for the 2025 Energy Code and has concluded that it contains the applicable documentation and building energy modeling functionality and aligns with the current

version of the 2025 ACM Reference Manuals as required by Sections 10-109(c)3 and 10-116(b) of the 2025 Energy Code. Therefore, staff recommends approval of Right-Energy Title 24 Version 2025.2.0 as an ACM to demonstrate performance compliance with the single-family residential new-construction requirements of the 2025 Energy Code.

Staff has also considered the application of CEQA to the proposed approval and concluded that the proposed action is exempt from CEQA because it can be seen with certainty that the approval of this application will not have a significant effect on the environment.

III. ENERGY COMMISSION FINDINGS

1. CCR, Title 24, Part 1, Section 10-109(c)3 requires third-party ACM compliance software be approved by the CEC through an application process.
2. MiTek Wrightsoft submitted an ACM application for Right-Energy Title 24 Version 2025.2.0 in November 2025.
3. CCR, Title 24, Part 1, Section 10-109(c)3 requires that ACM applications include documentation demonstrating that the compliance software meets the requirements, specifications, and criteria specified in CCR, Title 24, Part 1, Sections 10-109(c)1A, 10-109(c)1B, 10-109(c)1C, 10-109(c)1D and 10-109(c)1E, as appropriate.
4. MiTek Wrightsoft's Right-Energy Title 24 Version 2025.2.0 ACM application contained documentation which demonstrates compliance with the requirements, specifications, and criteria specified in CCR, Title 24, Part 1, Sections 10-109(c)1A, 10-109(c)1B, 10-109(c)1C, 10-109(c)1D and 10-109(c)1E for building performance compliance with the single-family residential new-construction requirements of the 2025 Energy Code.
5. CCR, Title 24, Part 1, Section 10-109(c)3 also requires that applications contain the application requirements of CCR, Title 24, Part 1, section 10-116(b).
6. CCR, Title 24, Part 1, Section 10-116(b) contains application requirements for ACM applications. The applicable requirements for the Right-Energy Title 24 Version 2025.2.0 ACM application include a compliance software vendor certification statement, computer runs and summary sheets as specified by the ACM Reference Manual, a user manual and changelog describing the functional and analytical capabilities of the ACM candidate compliance software, an executable of the candidate ACM compliance software, and an application fee deposit.
7. Staff evaluated the submitted application for compliance with the above applicable regulations to ensure that Right-Energy Title 24 Version 2025.2.0 would be compliant upon CEC approval.

8. The CEC confirms staff's recommendation and finds that the requirements of CCR, Title 24, Part 1, Sections 10-109 and 10-116 have been met. Therefore, Right-Energy Title 24 Version 2025.2.0 has met the requirements to be approved as a third-party ACM used to demonstrate performance compliance with the single-family residential new-construction requirements of the 2025 Energy Code.
9. The CEC has considered and agrees with staff's CEQA findings. The proposed action does not impose any new requirements and, therefore, has no potential for resulting in either a direct physical or reasonably foreseeable indirect physical change in the environment. If it is considered a project, it can be seen with certainty that the approval of the applications will not have a significant effect on the environment.

IV. CONCLUSION AND ORDER

The CEC hereby approves Right-Energy Title 24 Version 2025.2.0 as a third-party ACM for demonstrating performance compliance with the single-family residential new-construction requirements of the 2025 Energy Code.

The CEC also adopts staff's recommendation that these actions are either not a project under the California Environmental Quality Act (CEQA) or, if considered a project, they are exempt from CEQA under the common-sense exemption.

The CEC also directs the executive director or their designee to take all actions reasonably necessary to make the above-referenced software available and maintain the software in good form, including but not limited to reviewing and approving updates to third-party software consistent with bug fixes, correcting calculation and analytical errors, necessary ongoing software updates, user interface changes, and other minor updates.

IT IS SO ORDERED.

CERTIFICATION

The undersigned Secretariat to the CEC does hereby certify that the foregoing is a full, true, and correct copy of an order duly and regularly adopted at a meeting of the CEC held on January 21, 2026.

MEMORANDUM

FROM: Will Vicent, Deputy Director

SUBJECT: Basis for Finding that the action of approving the application submitted by MiTek Wrightsoft for approval of Right-Energy Title 24 Version 2025.2.0 as an Alternative Calculation Method for the 2025 Energy Code is either not a project or is exempt from the California Environmental Quality Act under the Common-Sense Exemption.

DATE: January 21, 2026

I. CEQA

The California Environmental Quality Act (CEQA) (Pub. Resources Code, sections 21000 *et seq.*; see also CEQA Guidelines, Cal. Code Regs. (CCR), tit. 14, sections 15000 *et seq.*) requires that state agencies consider the environmental impact of their discretionary decisions. CEQA allows for certain projects to be exempted from its requirements. Of relevance here, and discussed further below, is the common-sense exemption (14 CCR section 15061(b)(3)).

II. Approval of Right-Energy Title 24 Version 2025.2.0 as an Alternative Calculation Method (ACM) for the 2025 Energy Code

The Warren-Alquist State Energy Resources Conservation and Development Act, Public Resources Code sections 25000 *et seq.*, 25402.1(b), requires the California Energy Commission (CEC) to, among other things, establish a process for certifying calculation methods for demonstrating compliance with its building energy efficiency standards.

As allowed by the 2025 Energy Code, California Code of Regulations, Title 24, Part 1, Chapter 10, Section 10-109(c)3, MiTek Wrightsoft has submitted an application for the Commission to approve Right-Energy Title 24 Version 2025.2.0 as an alternative calculation method (ACM) to demonstrate performance compliance with the single-family residential new-construction requirements of the 2025 Energy Code.

As specified by the 2025 Energy Code, section 10-109(c)3, ACM applications must meet the application requirements of Section 10-116(b) and provide documentation demonstrating that the candidate software meets the requirements, specifications, and criteria specified in Sections 10-109(c)1A, 10-109(c)1B, 10-109(c)1C, 10-109(c)1D and 10-109(c)1E, as appropriate.

CEC staff has reviewed the Right-Energy Title 24 Version 2025.2.0 ACM application submitted by MiTek Wrightsoft and determined that it contains the documentation, building energy modeling functionality, and aligns with the current version of the 2025 ACM Reference Manuals as required by the above sections of the 2025 Energy Code.

III. The Proposed Action

As specified in Section 10-116(c) of the 2025 Energy Code, staff reviewed the Right-Energy Title 24 Version 2025.2.0 ACM application submitted by MiTek Wrightsoft and determined that it contains the documentation, building energy modeling functionality, and aligns with the current version of the 2025 ACM Reference Manuals as required by Section 10-109(c)3 and 10-116(b) of the 2025 Energy Code.

Based on the information submitted and staff analysis the CEC is considering approval of Right-Energy Title 24 Version 2025.2.0 as an ACM to demonstrate performance compliance with the single-family residential new-construction requirements of the 2025 Energy Code at its January 21, 2026, business meeting.

IV. Approval of Right-Energy Title 24 Version 2025.2.0 as an ACM for the 2025 Energy Code is not a project

CEQA only applies to an action “that has a potential for resulting in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment.” (14 CCR section 15378(a).)

As discussed above, the CEC is considering approval of Right-Energy Title 24 Version 2025.2.0 as an ACM for the 2025 Energy Code pursuant to the requirements of Section 10-109(c)3 and 10-116(b). This third-party ACM compliance software, Right-Energy Title 24 Version 2025.2.0, will be used as a tool to demonstrate performance compliance with the single-family residential new-construction requirements of the 2025 Energy Code.

Approval of the ACM compliance program, Right-Energy Title 24 Version 2025.2.0, does not impose any new requirements and therefore has no potential for resulting in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment. Accordingly, the approval of Right-Energy Title 24 Version 2025.2.0 does not meet the definition of a project under CEQA.

V. If approval of Right-Energy Title 24 Version 2025.2.0 as an ACM for the 2025 Energy Code were considered a project, it is exempt from CEQA under the Common-Sense Exemption

Approval of Right-Energy Title 24 Version 2025.2.0 as an ACM for the 2025 Energy Code is exempt from CEQA under the Common-Sense Exemption. The common-sense exemption states that, “Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA.” (14 CCR section 15061(b)(3).) A “significant effect on the environment” is defined as a “substantial, or a potentially substantial, adverse change” in the environment, and does not include an economic change by itself. (Pub. Resources Code, section 21068; 14 CCR section 15382.)

Approving Right-Energy Title 24 Version 2025.2.0 as an ACM assists the building energy community in demonstrating performance compliance with the 2025 Energy Code. Right-Energy Title 24 Version 2025.2.0 reflects the requirements of the 2025 Energy Code and building energy modeling requirements of Section 10-109(c), Title 24, Part 1. Right-Energy Title 24 Version 2025.2.0 contains no new requirements to comply with the 2025 Energy Code. As such, it can be seen with certainty that there is no possibility that the approval of Right-Energy Title 24 Version 2025.2.0 as an ACM will have any significant effect on the environment. Therefore, approving Right-Energy Title 24 Version 2025.2.0 as an ACM for the 2025 Energy Code is subject to the common-sense exemption in 14 CCR section 15061(b)(3).

VI. Conclusion

As shown above, the proposed approval of Right-Energy Title 24 Version 2025.2.0 as an ACM for the 2025 Energy Code is not a project because it does not impose any new requirements and, therefore, has no potential for resulting in a direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment. If approval of Right-Energy Title 24 Version 2025.2.0 as an ACM for the 2025 Energy Code were to be considered a project subject to CEQA, it can be seen with certainty that the approval would not have a significant effect on the environment and, therefore, is exempt pursuant to the Common-Sense Exemption under California Code of Regulations, Title 14, section 15061(b)(3).
