**2. If Agreement is considered a “Project” under CEQA answer the following questions.**

a) Agreement **IS** exempt?

Yes

Statutory Exemption?

PRC section number: None

CCR section number: None

Categorical Exemption?

If yes, list CCR section number(s) and separate each with a comma. If no, enter “None” and go to the next question.

CCR section number: Cal. Code Regs., tit. 14, section 15301 and 15303

This project includes two sites: 980 Industrial Road Building 5B (San Carlos) and 3200 Imjin Road MB507 (Marina).

Cal. Code Regs., tit. 14, section 15301 provides that the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of existing or former use are exempt from CEQA.

Joby currently leases space at the San Carlos project site to perform laboratory research and small-scale manufacturing of aircraft assemblies. This project will expand the aviation battery manufacturing capability with the addition of a new, high-volume battery module line at the San Carlos site. Joby also leases a portion of the Marina site with plans to expand into the adjacent space to perform additive manufacturing of aircraft assemblies. This project will expand Joby’s aviation battery manufacturing capability with the addition of a 3D additive printer and support equipment at the Marine site, which feeds parts to the high-volume battery module line.

The proposed work would happen in the existing buildings and is scoped to include tenant improvements only, including light demo, concrete grinding/polishing, painting, compressed air, and power drops for additional manufacturing capacity. The project therefore involves negligible expansion of existing or former use of the sites. For these reasons, this project will have no significant impact on the environment and is exempt under CEQA Guidelines section 15301.

Cal. Code regs., tit. 14, section 15303 provides that the construction and location of limited number of new, small facilities or structures; installation of small new equipment and facilities in small structures; and the conversion of existing small structures from one use to another where only minor modifications are made in the exterior of the structure are exempt from CEQA.

CEC-270 (Revised 09/2025)

The modifications to the existing sites include the addition and demolition of walls, and relocation of electrical and plumbing. All work will take place in existing buildings. The result of these upgrades and additions of new equipment will increase the manufacturing capability of aviation batteries. The only additions will be inside the existing building and minor to incorporate the new equipment. For these reasons, the work under this project will have no significant impact on the environment and is exempt under CEQA Guidelines section 15303.

The project does not involve any unusual circumstances, will not result in damage to any scenic resources within a highway officially designated as a state scenic highway, none of the sites are included on any list compiled pursuant to Government Code section 65962.5, and the project will not cause a substantial adverse change in the significance of a historical resource. The project, when considered as a whole, will not result in a cumulative impact that is significant on the environment. Therefore, none of the exceptions to exemptions listed in CEQA Guidelines section 15300.2 apply to this project and this project will not have a significant effect on the environment.
