March 12, 2026 Business Meeting
Backup Materials for Association for Energy Affordability,
Inc.**

The following backup materials for the above-referenced agenda item are available in this PDF packet as listed below:

1. Proposed Resolution
2. Grant Request Form
3. Scope of Work

CALIFORNIA ENERGY COMMISSION

PROPOSED RESOLUTION: Association for Energy Affordability, Inc.

RESOLUTION NO: 26-0312-XX

RESOLVED, that the State Energy Resources Conservation and Development Commission (CEC) adopts the staff CEQA findings contained in the Agreement or Amendment Request Form (as applicable); and

RESOLVED, that the CEC approves Agreement EPC-25-046 with Association for Energy Affordability for a \$1,985,004 grant. The project will design, test, and commercialize integrated, spray-applied robotic and aerosol-based attic and wall retrofit solutions, that make it faster, safer, and more affordable to improve the envelopes of existing California homes; and

FURTHER BE IT RESOLVED, that the Executive Director or their designee shall execute the same on behalf of the CEC.

APPROVED AND ADOPTED this 12th day of March 2026, by the following vote:

AYE:

NAY:

ABSENT:

ABSTAIN:

CERTIFICATION

The undersigned Secretariat to the CEC does hereby certify that the foregoing is a full, true, and correct copy of a resolution duly and regularly approved and adopted by affirmative vote of the CEC at a meeting held on March 12, 2026.

Kim Todd
Secretariat

GRANT REQUEST FORM (GRF)

A. New Agreement Number

IMPORTANT: New Agreement # to be completed by Contracts, Grants, and Loans Office.

New Agreement Number: EPC-25-046

B. Division Information

1. Division Name: ERDD
2. Agreement Manager: Felix Villanueva
3. MS-:51
4. Phone Number: 916-776-0822

C. Recipient's Information

1. Recipient's Legal Name: Association for Energy Affordability, Inc.

D. Title of Project

Title of project: Integrating Emerging Spray-applied Envelope Retrofit Solutions for Rapid Deployment

E. Term and Amount

1. Start Date: 4/01/2026
2. End Date: 9/30/2030
3. Amount: \$1,985,004.00

F. Business Meeting Information

1. Are the ARFVTP agreements \$75K and under delegated to Executive Director? No
2. The Proposed Business Meeting Date: 3/12/2026
3. Consent or Discussion? Discussion
4. Business Meeting Presenter Name: Jeanie Mar
5. Time Needed for Business Meeting: 5 minutes.
6. The email subscription topic is: Electric Program Investment Charge (EPIC) Program

Project Description:

Proposed resolution approving agreement EPC-25-046 with Association for Energy Affordability, Inc. for a \$1,985,004 grant and adopting staff's recommendation that this action is exempt from CEQA. This project will demonstrate an integrated, rapidly deployable building envelope retrofit solution that combines advanced air sealing, robotic attic preparation, and spray-applied exterior insulation to significantly reduce energy use and emissions. By improving airtightness and thermal performance, the project enables cost-effective building electrification without increasing peak electrical demand or requiring major structural modifications. Field demonstrations will be conducted in low-income and disadvantaged multifamily communities to validate performance, affordability, and minimal resident disruption. The project also addresses worker safety and scalability through automation and streamlined installation practices. Results will inform utility programs and market adoption pathways to support widespread building decarbonization across California.

G. California Environmental Quality Act (CEQA) Compliance

1. Is Agreement considered a “Project” under CEQA?

Yes

If yes, skip to question 2.

If no, complete the following (PRC 21065 and 14 CCR 15378) and explain why Agreement is not considered a “Project”:

2. If Agreement is considered a “Project” under CEQA answer the following questions.

a) Agreement **IS** exempt?

Yes

Statutory Exemption?

No

If yes, list PRC and/or CCR section number(s) and separate each with a comma. If no, enter “None” and go to the next question.

PRC section number: None

CCR section number: None

Categorical Exemption?

Yes

If yes, list CCR section number(s) and separate each with a comma. If no, enter “None” and go to the next question.

CCR section number: Cal. Code Regs., tit. 14, § 15301;

Cal. Code Regs., tit. 14, § 15306 ;

Common Sense Exemption? 14 CCR 15061 (b) (3)

No

If yes, explain reason why Agreement is exempt under the above section. If no, enter “Not applicable” and go to the next section.

Cal. Code Regs., tit. 14, sec. 15301 provides that projects which consist of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, and which involve negligible or no expansion of use beyond that existing at the time of the lead agency’s determination, are categorically exempt from the provisions of the California Environmental Quality Act. The project would include developing and commercialize easily deployable spray-applied thermal and air sealing retrofit solutions for walls and attics in existing residential buildings, especially, residential buildings. The equipment and materials would include but may not be limited to insulation; weatherstripping; paint; and evaluation, measurement, and verification equipment (e.g., power meters, flow meters, sensors, and data loggers). The physical work would consist of installing the specified equipment and utilizing the identified materials. The project would not involve the addition of residential units or any substantial expansion of existing buildings. All work would be conducted within existing laboratory and residential buildings, with the residential sites expected to be primarily multifamily properties. Therefore, the project falls within section 15301 and will not have a significant effect on the environment.

Cal. Code Regs., tit. 14, sect. 15306 provides that projects which consist of basic data collection, research, experimental management, and resource evaluation activities which do not result in a serious or major disturbance to environmental resources are categorically exempt from the provisions of CEQA. The project will gather data through a structured measurement and verification (M&V) plan that includes baseline modeling, pre-retrofit monitoring, in-field performance tracking, and post-retrofit evaluation. Prior to installation, the team will conduct building science modeling and 12 months of pre-retrofit monitoring to establish baseline energy use, air leakage, emissions, and hygrothermal performance. During installation, technologies will provide real-time leakage reduction data and quality control documentation. Following installation, the project will include 12 months of post-retrofit monitoring to quantify energy savings, air leakage reductions, indoor environmental impacts, and overall project benefits, with results used to validate performance and inform commercialization pathways. Thus, the project falls within section 15306 and will not have a significant effect on the environment. For these reasons, the proposed work will not have any significant effect on the environment and falls under sections 15301 and 15306.

Additionally, the project will not impact an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies; does not involve any cumulative impacts of successive projects of the same type in the same place that might be considered significant; does not involve unusual circumstances that might have a significant effect on the environment; will not result in damage to scenic resources within a highway officially designated as a state scenic highway; the project is not included on any list compiled pursuant to Government Code section 659625.5; and the project will not cause a substantial adverse change in the significance of a historical resource. Therefore, none of the exemptions to categorical exemptions listed in CEQA Guidelines section 15300.2 apply to this project and will not have a significant effect on the environment.

b) Agreement **IS NOT** exempt.

IMPORTANT: consult with the legal office to determine next steps.

No

If yes, answer yes or no to all that applies. If no, list all as “no” and “None” as “yes”.

Additional Documents	Applies
Initial Study	No
Negative Declaration	No
Mitigated Negative Declaration	No
Environmental Impact Report	No
Statement of Overriding Considerations	No
None	Yes

H. Is this project considered “Infrastructure”?

No

I. Subcontractors

List all Subcontractors listed in the Budget (s) (major and minor). Insert additional rows if needed. If no subcontractors to report, enter “No subcontractors to report” and “0” to funds. **Delete** any unused rows from the table.

Subcontractor Legal Company Name	CEC Funds	Match Funds
The Regents of the University of California on behalf of the Davis campus	\$ 524,988	\$0
Signetron, Inc.	\$ 500,000	\$100,000
RDH Building Science Inc.	\$ 70,000	\$0
David Baker, an Architectural Corporation	\$ 80,000	\$0
Self-Help Enterprises	\$ 10,000	\$0
National Community Renaissance	\$ 10,000	\$0

J. Vendors and Sellers for Equipment and Materials/Miscellaneous

List all Vendors and Sellers listed in Budget(s) for Equipment and Materials/Miscellaneous. Insert additional rows if needed. If no vendors or sellers to report, enter “No vendors or sellers to report” and “0” to funds. **Delete** any unused rows from the table.

Vendor/Seller Legal Company Name	CEC Funds	Match Funds
Aeroseal, LLC	\$175,000	\$125,000
Atticare Construction	\$188,400	\$0
TBD	\$5,000	\$0

K. Key Partners

List all key partner(s). Insert additional rows if needed. If no key partners to report, enter “No key partners to report.” **Delete** any unused rows from the table.

Key Partner Legal Company Name
No key partners to report

L. Budget Information

Include all budget information. Insert additional rows if needed. If no budget information to report, enter “N/A” for “Not Applicable” and “0” to Amount. **Delete** any unused rows from the table.

Funding Source	Funding Year of Appropriation	Budget List Number	Amount
EPIC	25-26	301.001M	\$ 1,985,004

TOTAL Amount: \$ 1,985,004

R&D Program Area: ICMB: Buildings

Explanation for “Other” selection Not applicable

Reimbursement Contract #: Not applicable

Federal Agreement #: Not Applicable

M. Recipient’s Contact Information

1. Recipient’s Administrator/Officer

Name: Andrew Brooks

Address: 5900 Hollis St Ste R2

City, State, Zip: Emeryville, CA 94608-2098

Phone: 510-431-1791

E-Mail: abrooks@aea.us.org

2. Recipient’s Project Manager

Name: G.G. Merkel
Address: 5900 Hollis St Ste R2
City, State, Zip: Emeryville, CA 94608-2098
Phone: 510-431-1795
E-Mail: gmerkel@aea.us.org

N. Selection Process Used

There are three types of selection process. List the one used for this GRF.

Selection Process	Additional Information
Competitive Solicitation #	GFO-24-310
First Come First Served Solicitation #	Not applicable
Other	Not applicable

O. Attached Items

1. List all items that should be attached to this GRF by entering “Yes” or “No”.

Item Number	Item Name	Attached
1	Exhibit A, Scope of Work/Schedule	Yes
2	Exhibit B, Budget Detail	Yes
3	CEC 105, Questionnaire for Identifying Conflicts	Yes.
4	Recipient Resolution	Yes.
5	Awardee CEQA Documentation	Yes.

Approved By

Individuals who approve this form must enter their full name and approval date in the MS Word version.

Agreement Manager: Felix Villanueva

Approval Date: 1/22/26

Branch Manager: Anthony Ng

Approval Date: 1/29/2026

Director: Jonah Steinbuck (*delegated to Manager*)

Approval Date: N/A

1
2 **II. PURPOSE OF AGREEMENT, PROBLEM/SOLUTION STATEMENT, AND**
3 **GOALS AND OBJECTIVES**

4
5 **A. Purpose of Agreement**
6

7 The purpose of this Agreement is to fund the design, hardware development, and in-field
8 procedures to commercialize easily deployable spray-applied thermal and air sealing
9 retrofit solutions for walls and attics in existing residential buildings. The Recipient,
10 Association for Energy Affordability, Inc., will demonstrate technologies that include a
11 robotic system for automated cleaning and preparation processes, aerosol sealing and a
12 spray-applied cork, and an exterior insulation finishing system that is applied like stucco
13 over the existing wall. These technologies have a high potential for integrating
14 seamlessly with existing delivery systems at low cost and are thus poised to overcome
15 critical market barriers to achieving California’s statutory energy goals for the existing
16 building stock.

17
18 **B. Problem/ Solution Statement**

19 The decarbonization of California's building sector has fostered the need for innovative
20 envelope retrofit technologies, yet significant barriers prevent widespread
21 implementation at scale. Many building retrofits exclude envelope improvements due to
22 complexity, cost, and relatively long payback periods. California's light-weight building
23 stock and seismic challenges constrain the problem of envelope retrofits to a limited set
24 of possible solutions. At the same time, California’s mild climate creates unique
25 opportunities for targeted, spray-applied attic and wall solutions that don't require waiting
26 for cost compression of pre-fabricated envelope retrofit products, and they offer a non-
27 invasive point of access that can address performance of the whole building with little
28 industry disruption.

29
30 Current market conditions, supply chain inefficiencies, and lack of affordable emerging
31 technological solutions have made advancements in industrialized envelope retrofits
32 costly due to demolition, asbestos abatement, and structural repairs. Current envelope
33 retrofit delivery requires complex coordination between multiple contractors and trades,
34 creating delays, quality control issues, and increased costs. This exacerbates
35 construction timelines for industrialized or prefabricated approaches and instead owners
36 turn to standard drill and fill insulation or foam-based rigid exterior insulation finish
37 systems (EIFS) retrofits that rely on carbon-intensive materials or invasive methods, that
38 require displacement for residents during construction. These conventional approaches
39 still often result in thermal bridging, inconsistent coverage, and moisture management
40 issues that compromise performance or durability. Attic retrofit methods include attic
41 preparation, air sealing and insulation and still face barriers to scale in California.
42 Traditional attic retrofits require workers to enter dangerous environments with

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 temperatures reaching 120-140°F, creating safety hazards and limiting access to critical
2 air leakage areas. Manual air sealing techniques are invasive, time-consuming, and
3 achieve limited leakage reduction compared to a new generation of automated
4 technologies that are practical and available today. Air sealing retrofits are significantly
5 under incentivized due to outdated assumptions in energy simulations that fail to capture
6 the performance of advanced sealing technologies.

7
8 **Solution**

9 To address this critical gap in rapidly deployable retrofit solutions, this project advances
10 three complementary technologies that overcome fundamental market barriers: 1. a
11 robot with autonomous navigation and cleaning in attic spaces, eliminating worker safety
12 risks while accessing previously unreachable areas; 2. a retrofit application using aerosol
13 sealant injection from attics rather than occupied spaces, achieving 30-50% envelope
14 leakage reduction for the whole building non-invasively in less than a day per unit; 3. a
15 spray-applied exterior insulation finishing system that is applied like stucco over the
16 existing wall. It is composed of a mixture of cork and lime, offering an R-value of 3.8 per
17 inch and flexibility in applied thickness.

18
19 By combining all three technologies under a single contracting entity, the solution
20 eliminates complicated trade coordination and provides streamlined delivery that reduces
21 project timelines while improving quality control and customer experience.

22
23 The integrated approach targets attics as the most cost-effective envelope intervention
24 point, delivering whole-building infiltration reductions of 50%. This avoids the high costs
25 and invasiveness of other envelope interventions while providing sufficient thermal
26 improvements for California's mild climate conditions.

27
28 These automated systems serve as proof of concept to manufacturers, project owners,
29 and contractors illustrating what is possible and what types of products are needed as
30 California's retrofit industry scales to meet decarbonization goals over the coming years.

31
32 **C. Goals and Objectives of the Agreement**

33 **Agreement Goals**

34 The goals of this Agreement are to:

- 35 • Design, develop, and test a pre-commercial robotic application product to clean
36 and prepare existing attics for air sealing, and address attic envelope leakage
37 prior to attic insulation installation.
- 38 • Demonstrate an integrated attic and exterior wall thermal retrofit approach
39 achieving 50% building infiltration reduction and adding R-7 min (nominal) of
40 added insulation.
- 41 • Validate system performance across five or more multifamily buildings in
42 disadvantaged communities.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

- 1 • Develop, document, and test field-application protocols, either individually or in
2 combination, for automated cleaning of existing attic spaces, sealing technology
3 with re-insulation, and EIFS applied over an existing stucco substrate (that has
4 been treated and sealed)
- 5 • Evaluate the .037 cork EIFS as a durable, low-cost, low-global warming potential
6 and easy-to-install alternative to conventional EIFS through a full-scale mock-up
7 and field demonstration.
- 8 • Generate detailed performance maps from the field testing to provide input data
9 for building energy simulations across California’s climate zones.
- 10 • Evaluate the environmental, grid, and cost implications of the integrated solution,
11 including emissions reductions and ratepayer impacts.
- 12 • Generate field performance data to inform California incentive program
13 workpapers for advanced air sealing methods

14
15 Ratepayer Benefits:² This Agreement will result in ratepayer benefits of greater
16 electricity reliability, lower costs, and increased safety by reducing thermal loads of
17 buildings through advanced envelope improvements. State analyses—the California
18 Building Decarbonization Assessment, the Building Decarbonization Coalition's
19 Roadmap to Decarbonize Buildings, and the CPUC's Building-Decarbonization
20 proceeding (R.19-01-011)—all conclude that achieving AB 3232 goals will require
21 widespread deeper efficiency. Our project advances building envelope technology that
22 directly supports these critical elements. The Agreement advances technologies for
23 comprehensive building envelope retrofitting that dramatically reduces thermal loads
24 through advanced air sealing and insulation systems. These improvements reduce 50%
25 of heating energy and 10-15% cooling energy, and reduce heating and cooling costs for
26 tenants, while increasing hours of maintained comfort during power outages providing
27 better thermal comfort that helps residents during extreme climate events. Reducing
28 thermal loads through envelope improvements will control electricity costs and support
29 grid stability as buildings electrify and aid in achieving SB100’s renewable integration
30 goals by creating buildings that require less energy during peak demand periods when
31 renewable generation may be limited.

32
33 Streamlining attic retrofits and minimizing uncontrolled air infiltration enables
34 widespread envelope improvements at significantly lower costs than traditional
35 methods. By expanding the total addressable market for deep efficiency retrofits rather
36 than merely improving individual building performance, the project helps close the

² California Public Resources Code, Section 25711.5(a) requires projects funded by the Electric Program Investment Charge (EPIC) to result in ratepayer benefits. The California Public Utilities Commission, which established the EPIC in 2011, defines ratepayer benefits as greater reliability, lower costs, and increased safety (See CPUC “Phase 2” Decision 12-05-037 at page 19, May 24, 2012, http://docs.cpuc.ca.gov/PublishedDocs/WORD_PDF/FINAL_DECISION/167664.PDF).

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 current efficiency gap and put California back on pace to meet its 2030 emissions
2 reductions, energy-savings, and renewable-integration targets. The infiltration control
3 and thermal load reduction achieved through comprehensive envelope retrofitting
4 creates a foundation for successful building electrification and decarbonization across
5 California's diverse building stock.

6
7 Technological Advancement and Breakthroughs:³ This Agreement will lead to
8 technological advancement and breakthroughs to overcome barriers to the achievement
9 of the State of California's statutory energy goals by furthering the development of
10 automated retrofit systems optimized for California's unique climates and building stock.
11 The project commercializes autonomous robotics for residential retrofit applications and
12 adapts aerosol sealing technology for non-invasive retrofit implementation, overcoming
13 primary barriers of worker safety, access limitations, and installation invasiveness that
14 have prevented scaling of envelope retrofits. The automated systems will meet
15 California's need for rapidly deployable retrofit solutions and provide lessons learned to
16 enable workforce development of future retrofit technologies. Field-validated
17 performance data will align incentive programs with breakthrough technology
18 capabilities, accelerating market transformation.

19
20 **Agreement Objectives**

21 The objectives of this Agreement are to:

- 22 • Deploy commercialization-ready robotic cleaning systems achieving 2-3x faster
23 attic preparation compared to manual methods
- 24 • Design, develop, and test commercialization-ready products to enter the
25 residential market to clean and prepare existing attics for air sealing and address
26 envelope leakage in attics
- 27 • Demonstrate AeroSeal, a patented, non-toxic aerosol technology that seals leaks
28 in heating, ventilating, and air conditioning (HVAC) ductwork, ability to achieve
29 50% building infiltration reduction from baseline through field validation.
- 30 • Demonstrate commercial-ready improvements for robot applications achieving
31 50% cleaning of existing attic conditions
- 32 • Validate automated systems performance across five or more multifamily
33 buildings in disadvantaged communities
- 34 • Generate detailed performance maps from field testing to provide input data for
35 building energy simulations to inform California incentive program workpapers for
36 advanced air sealing methods.
- 37 • Establish integrated contractor workflows combining robotic preparation with
38 automated air sealing for single-entity deployment

³ California Public Resources Code, Section 25711.5(a) also requires EPIC-funded projects to lead to technological advancement and breakthroughs to overcome barriers that prevent the achievement of the state's statutory and energy goals.

1
2 **III. TASK 1 GENERAL PROJECT TASKS**

3 **PRODUCTS**

4 **Subtask 1.1 Products**

5 The goal of this subtask is to establish the requirements for submitting project products
6 (e.g., reports, summaries, plans, and presentation materials). Unless otherwise
7 specified by the Commission Agreement Manager (CAM), the Recipient must deliver
8 products as required below by the dates listed in the **Project Schedule (Part V)**. All
9 products submitted which will be viewed by the public, must comply with the
10 accessibility requirements of Section 508 of the federal Rehabilitation Act of 1973, as
11 amended (29 U.S.C. Sec. 794d), and regulations implementing that act as set forth in
12 Part 1194 of Title 36 of the Federal Code of Regulations. All technical tasks should
13 include product(s). Products that require a draft version are indicated by marking **“(draft**
14 **and final)”** after the product name in the “Products” section of the task/subtask. If
15 “(draft and final)” does not appear after the product name, only a final version of the
16 product is required. With respect to due dates within this Scope of Work, **“days”**
17 means working days.

18
19 **The Recipient shall:**

20
21 For products that require a draft version, including the Final Report Outline and Final
22 Report

- 23
- 24 • Submit all draft products to the CAM for review and comment in accordance with
25 the Project Schedule (Part V). The CAM will provide written comments to the
26 Recipient on the draft product within 15 days of receipt, unless otherwise
27 specified in the task/subtask for which the product is required.
 - 28 • Consider incorporating all CAM comments into the final product. If the Recipient
29 disagrees with any comment, provide a written response explaining why the
30 comment was not incorporated into the final product.
 - 31 • Submit the revised product and responses to comments within 10 days of notice
32 by the CAM, unless the CAM specifies a longer time period, or approves a
33 request for additional time.

34 For products that require a final version only

- 35
- 36 • Submit the product to the CAM for acceptance. The CAM may request minor
37 revisions or explanations prior to acceptance.

38 For all products

- 39
- 40 • Submit all data and documents required as products in accordance with the
41 following:

42 Instructions for Submitting Electronic Files and Developing Software:

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 ○ **Electronic File Format**

- 2 ▪ Submit all data and documents required as products under this
3 Agreement in an electronic file format that is fully editable and
4 compatible with the California Energy Commission's (CEC) software
5 and Microsoft (MS)-operating computing platforms, or with any other
6 format approved by the CAM. Deliver an electronic copy of the full text
7 of any Agreement data and documents in a format specified by the
8 CAM, such as memory stick.
9

10 The following describes the accepted formats for electronic data and
11 documents provided to the CEC as products under this Agreement, and
12 establishes the software versions that will be required to review and approve
13 all software products:

- 14 ▪ Data sets will be in MS Access or MS Excel file format (version 2007 or
15 later), or any other format approved by the CAM.
16 ▪ Text documents will be in MS Word file format, version 2007 or later.
17 ▪ Project management documents will be in Microsoft Project file format,
18 version 2007 or later.
19

20 ○ **Software Application Development**

21 Use the following standard Application Architecture components in compatible
22 versions for any software application development required by this Agreement
23 (e.g., databases, models, modeling tools), unless the CAM approves other
24 software applications such as open source programs:

- 25 ▪ Microsoft ASP.NET framework (version 3.5 and up). Recommend 4.0.
26 ▪ Microsoft Internet Information Services (IIS), (version 6 and up)
27 Recommend 7.5.
28 ▪ Visual Studio.NET (version 2008 and up). Recommend 2010.
29 ▪ C# Programming Language with Presentation (UI), Business Object
30 and Data Layers.
31 ▪ SQL (Structured Query Language).
32 ▪ Microsoft SQL Server 2008, Stored Procedures. Recommend 2008
33 R2.
34 ▪ Microsoft SQL Reporting Services. Recommend 2008 R2.
35 ▪ XML (external interfaces).
36

37 Any exceptions to the Electronic File Format requirements above must be
38 approved in writing by the CAM. The CAM will consult with the CEC's
39 Information Technology Services Branch to determine whether the exceptions
40 are allowable.
41

Association For Energy Affordability, Inc.

MEETINGS

Subtask 1.2 Kick-off Meeting

The goal of this subtask is to establish the lines of communication and procedures for implementing this Agreement.

The Recipient shall:

- Attend a “Kick-off” meeting with the CAM, and other CEC staff relevant to the Agreement. The Recipient’s Project Manager and any other individuals deemed necessary by the CAM or the Project Manager shall participate in this meeting. The administrative and technical aspects of the Agreement will be discussed at the meeting. Prior to the meeting, the CAM will provide an agenda to all potential meeting participants. The meeting may take place in person or by electronic conferencing (e.g., Teams, Zoom), with approval of the CAM.

The Kick-off meeting will include discussion of the following:

- The CAM’s expectations for accomplishing tasks described in the Scope of Work;
 - An updated Project Schedule;
 - Terms and conditions of the Agreement;
 - Invoicing and auditing procedures;
 - Travel;
 - Equipment purchases;
 - Administrative and Technical products (subtask 1.1);
 - CPR meetings (subtask 1.3);
 - Monthly Calls (subtask 1.5)
 - Quarterly Progress reports (subtask 1.6)
 - Final Report (subtask 1.7)
 - Match funds (subtask 1.8);
 - Permit documentation (subtask 1.9);
 - Subawards (subtask 1.10);
 - Technical Advisory Committee meetings (subtasks 1.11 and 1.12);
 - Agreement changes;
 - Performance Evaluations; and
 - Any other relevant topics.
- Provide *Kick-off Meeting Presentation* to include but not limited to:
 - Project overview (i.e. project description, goals and objectives, technical tasks, expected benefits, etc.)
 - Project schedule that identifies milestones
 - List of potential risk factors and hurdles, and mitigation strategy
 - Provide an *Updated Project Schedule, Match Funds Status Letter, and Permit Status Letter*, as needed to reflect any changes in the documents.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 **The CAM shall:**

- 2 • Designate the date and location of the meeting.
3 • Send the Recipient a *Kick-off Meeting Agenda*.

4
5 **Recipient Products:**

- 6 • Kick-off Meeting Presentation
7 • Updated Project Schedule (*if applicable*)
8 • Match Funds Status Letter (subtask 1.7) (*if applicable*)
9 • Permit Status Letter (subtask 1.8) (*if applicable*)

10
11 **CAM Product:**

- 12 • Kick-off Meeting Agenda
13

14 **Subtask 1.3 Critical Project Review (CPR) Meetings**

15 The goal of this subtask is to determine if the project should continue to receive CEC
16 funding, and if so whether any modifications must be made to the tasks, products,
17 schedule, or budget. CPR meetings provide the opportunity for frank discussions
18 between the CEC and the Recipient. As determined by the CAM, discussions may
19 include project status, challenges, successes, advisory group findings and
20 recommendations, final report preparation, and progress on technical transfer and
21 production readiness activities (if applicable). Participants will include the CAM and the
22 Recipient and may include the Commission Agreement Officer and any other individuals
23 selected by the CAM to provide support to the CEC.

24
25 CPR meetings generally take place at key, predetermined points in the Agreement, as
26 determined by the CAM and as shown in the Task List on page 1 of this Exhibit.
27 However, the CAM may schedule additional CPR meetings as necessary. The budget
28 may be reallocated to cover the additional costs borne by the Recipient, but the overall
29 Agreement amount will not increase. CPR meetings generally take place at the CEC,
30 but they may take place at another location, or may be conducted via electronic
31 conferencing (e.g., WebEx) as determined by the CAM.
32

33 **The Recipient shall:**

- 34 • Prepare and submit a *CPR Report* for each CPR meeting that: (1) discusses the
35 progress of the Agreement toward achieving its goals and objectives; and (2)
36 includes recommendations and conclusions regarding continued work on the
37 project.
38 • Attend the CPR meeting.
39 • Present the CPR Report and any other required information at each CPR
40 meeting.
41
42
43

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

The CAM shall:

- Determine the location, date, and time of each CPR meeting with the Recipient's input.
- Send the Recipient a *CPR Agenda* with a list of expected CPR participants in advance of the CPR meeting. If applicable, the agenda may include a discussion of match funding and permits.
- Conduct and make a record of each CPR meeting. Provide the Recipient with a schedule for providing a Progress Determination on continuation of the project.
- Determine whether to continue the project, and if so whether modifications are needed to the tasks, schedule, products, or budget for the remainder of the Agreement. A determination of unsatisfactory progress This may result in project delays, including a potential Stop Work Order, while the CEC determines whether the project should continue.
- Provide the Recipient with a *Progress Determination* on continuation of the project, in accordance with the schedule. The Progress Determination may include a requirement that the Recipient revise one or more products.

Recipient Products:

- CPR Report(s)

CAM Products:

- CPR Agenda(s)
- Progress Determination

Subtask 1.4 Final Meeting

The goal of this subtask is to complete the closeout of this Agreement.

The Recipient shall:

- Meet with CEC staff to present project findings, conclusions, and recommendations. The final meeting must be completed during the closeout of this Agreement. This meeting will be attended by the Recipient and CAM, at a minimum. The meeting may occur in person or by electronic conferencing (e.g., WebEx), with approval of the CAM.

The technical and administrative aspects of Agreement closeout will be discussed at the meeting, which may be divided into two separate meetings at the CAM's discretion.

- The technical portion of the meeting will involve the presentation of findings, conclusions, and recommended next steps (if any) for the Agreement. The CAM will determine the appropriate meeting participants.
- The administrative portion of the meeting will involve a discussion with the CAM of the following Agreement closeout items:
 - Disposition of any procured equipment.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

- The CEC’s request for specific “generated” data (not already provided in Agreement products).
 - Need to document the Recipient’s disclosure of “subject inventions” developed under the Agreement.
 - “Surviving” Agreement provisions such as repayment provisions and confidential products.
 - Final invoicing and release of retention.
- Prepare a *Final Meeting Agreement Summary* that documents any agreement made between the Recipient and Commission staff during the meeting.
 - Prepare a *Schedule for Completing Agreement Closeout Activities*.
 - Provide copies of *All Final Products* organized by the tasks in the Agreement.

Products:

- Final Meeting Agreement Summary (*if applicable*)
- Schedule for Completing Agreement Closeout Activities
- All Final Products

MONTHLY CALLS, REPORTS AND INVOICES

Subtask 1.5 Monthly Calls

The goal of this task is to have calls at least monthly between the CAM and Recipient to verify that satisfactory and continued progress is made towards achieving the objectives of this Agreement on time and within budget.

The objectives of this task are to verbally summarize activities performed during the reporting period, to identify activities planned for the next reporting period, to identify issues that may affect performance and expenditures, to verify match funds are being proportionally spent concurrently or in advance of CEC funds or are being spent in accordance with an approved Match Funding Spending Plan, to form the basis for determining whether invoices are consistent with work performed, and to answer any other questions from the CAM. Monthly calls might not be held on those months when a quarterly progress report is submitted or the CAM determines that a monthly call is unnecessary.

The CAM shall:

- Schedule monthly calls.
- Provide questions to the Recipient prior to the monthly call.
- Provide call summary notes to Recipient of items discussed during call.

The Recipient shall:

- Review the questions provided by CAM prior to the monthly call
- Provide verbal answers to the CAM during the call.

Product:

- Email to CAM concurring with call summary notes.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 Subtask 1.6 Quarterly Progress Reports and Invoices

2 The goals of this subtask are to: (1) periodically verify that satisfactory and continued
3 progress is made towards achieving the project objectives of this Agreement; and (2)
4 ensure that invoices contain all required information and are submitted in the
5 appropriate format.

7 The Recipient shall:

- 8 • Submit a *Quarterly Progress Report* to the CAM. Each progress report must:
 - 9 ○ Summarize progress made on all Agreement activities as specified in the
 - 10 scope of work for the reporting period, including accomplishments,
 - 11 problems, milestones, products, schedule, fiscal status, and an assessment
 - 12 of the ability to complete the Agreement within the current budget and any
 - 13 anticipated cost overruns. Progress reports are due to the CAM the 10th
 - 14 day of each January, April, July, and October. The Quarterly Progress
 - 15 Report template can be found on the ECAMS Resources webpage
 - 16 available at: <https://www.energy.ca.gov/media/4691>
- 17 • Submit a monthly or quarterly *Invoice* on the invoice template(s) provided by the
- 18 CAM.

20 Recipient Products:

- 21 • Quarterly Progress Reports
- 22 • Invoices

24 CAM Product:

- 25 • Invoice template

26 Subtask 1.7 Final Report

27 The goal of this subtask is to prepare a comprehensive Final Report that describes the
28 original purpose, approach, results, and conclusions of the work performed under this
29 Agreement. When creating the Final Report Outline and the Final Report, the Recipient
30 must use the CEC Style Manual provided by the CAM.

31 Subtask 1.7.1 Final Report Outline

33 The Recipient shall:

- 34 • Prepare a *Final Report Outline* in accordance with the *Energy Commission Style*
35 *Manual* provided by the CAM.

37 Recipient Products:

- 38 • Final Report Outline (draft and final)

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 **CAM Products:**

- 2 • Energy Commission Style Manual
- 3 • Comments on Draft Final Report Outline
- 4 • Acceptance of Final Report Outline

5
6 **Subtask 1.7.2 Final Report**

7
8 **The Recipient shall:**

- 9 • Prepare a *Final Report* for this Agreement in accordance with the approved Final
10 Report Outline, Energy Commission Style Manual, and Final Report Template
11 provided by the CAM with the following considerations:
 - 12 ○ Ensure that the report includes the following items, in the following order:
 - 13 ▪ Cover page (**required**)
 - 14 ▪ Credits page on the reverse side of cover with legal disclaimer
15 (**required**)
 - 16 ▪ Acknowledgements page (optional)
 - 17 ▪ Preface (**required**)
 - 18 ▪ Abstract, keywords, and citation page (**required**)
 - 19 ▪ Table of Contents (**required**, followed by List of Figures and List of
20 Tables, if needed)
 - 21 ▪ Executive summary (**required**)
 - 22 ▪ Body of the report (**required**)
 - 23 ▪ References (if applicable)
 - 24 ▪ Glossary/Acronyms (If more than 10 acronyms or abbreviations are
25 used, it is required.)
 - 26 ▪ Bibliography (if applicable)
 - 27 ▪ Appendices (if applicable) (Create a separate volume if very large.)
 - 28 ▪ Attachments (if applicable)
- 29 • Submit a draft of the Executive Summary to the TAC for review and comment.
- 30 • Develop and submit a *Summary of TAC Comments on Draft Final Report*
31 received on the Executive Summary. For each comment received, the Recipient
32 will identify in the summary the following:
 - 33 ○ Comments the Recipient proposes to incorporate.
 - 34 ○ Comments the Recipient does propose to incorporate and an explanation for
35 why.
- 36 • Submit a draft of the report to the CAM for review and comment. The CAM will
37 provide written comments to the Recipient on the draft product within 15 days of
38 receipt.
- 39 • Incorporate all CAM comments into the *Final Report*. If the Recipient disagrees
40 with any comment, provide a *Written Responses to Comments* explaining why
41 the comments were not incorporated into the final product.
- 42 • Submit the revised *Final Report* electronically with any Written Responses to
43 Comments within 10 days of receipt of CAM's Written Comments on the Draft Final

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 Report, unless the CAM specifies a longer time period or approves a request for
2 additional time.

3
4 **Products:**

- 5 • Summary of TAC Comments on Draft Final Report
- 6 • Draft Final Report
- 7 • Written Responses to Comments (*if applicable*)
- 8 • Final Report

9
10 **CAM Product:**

- 11 • Written Comments on the Draft Final Report

12
13 **MATCH FUNDS, PERMITS, AND SUBAWARDS**

14 **Subtask 1.8 Match Funds**

15 The goal of this subtask is to ensure that the Recipient obtains any match funds
16 planned for this Agreement and applies them to the Agreement during the Agreement
17 term.

18
19 While the costs to obtain and document match funds are not reimbursable under this
20 Agreement, the Recipient may spend match funds for this task. Match funds must be
21 identified in writing, and the Recipient must obtain any associated commitments before
22 incurring any costs for which the Recipient will request reimbursement.

23
24 **The Recipient shall:**

- 25 • Prepare a *Match Funds Status Letter* that documents the match funds committed
26 to this Agreement. If no match funds were part of the application that led to the
27 CEC awarding this Agreement and none have been identified at the time this
28 Agreement starts, then state this in the letter.

29
30 If match funds were a part of the application that led to the CEC awarding this
31 Agreement, then provide in the letter:

- 32 ○ A list of the match funds that identifies:
 - 33 ■ The amount of cash match funds, their source(s) (including a contact
34 name, address, and telephone number), and the task(s) to which the
35 match funds will be applied.
 - 36 ■ The amount of each in-kind contribution, a description of the
37 contribution type (e.g., property, services), the documented market or
38 book value, the source (including a contact name, address, and
39 telephone number), and the task(s) to which the match funds will be
40 applied. If the in-kind contribution is equipment or other tangible or real
41 property, the Recipient must identify its owner and provide a contact
42 name, address, telephone number, and the address where the
43 property is located.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

- If different from the solicitation application, provide a letter of commitment from an authorized representative of each source of match funding that the funds or contributions have been secured.
- At the Kick-off meeting, discuss match funds and the impact on the project if they are significantly reduced or not obtained as committed. If applicable, match funds will be included as a line item in the progress reports and will be a topic at CPR meetings.
- Provide a *Supplemental Match Funds Notification Letter* to the CAM of receipt of additional match funds.
- Provide a *Match Funds Reduction Notification Letter* to the CAM if existing match funds are reduced during the course of the Agreement. Reduction of match funds may trigger a CPR meeting.

Products:

- Match Funds Status Letter
- Supplemental Match Funds Notification Letter (*if applicable*)
- Match Funds Reduction Notification Letter (*if applicable*)

Subtask 1.9 Permits

The goal of this subtask is to obtain all permits required for work completed under this Agreement in advance of the date they are needed to keep the Agreement schedule on track. Permit costs and the expenses associated with obtaining permits are not reimbursable under this Agreement, with the exception of costs incurred by University of California recipients. Permits must be identified and obtained before the Recipient may incur any costs related to the use of the permit(s) for which the Recipient will request reimbursement.

The Recipient shall:

- Prepare a *Permit Status Letter* that documents the permits required to conduct this Agreement. If no permits are required at the start of this Agreement, then state this in the letter. If permits will be required during the course of the Agreement, provide in the letter:
 - A list of the permits that identifies: (1) the type of permit; and (2) the name, address, and telephone number of the permitting jurisdictions or lead agencies.
 - The schedule the Recipient will follow in applying for and obtaining the permits.

The list of permits and the schedule for obtaining them will be discussed at the Kick-off meeting (subtask 1.2), and a timetable for submitting the updated list, schedule, and copies of the permits will be developed. The impact on the project if the permits are not obtained in a timely fashion or are denied will also be discussed. If applicable, permits will be included as a line item in progress reports and will be a topic at CPR meetings.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

- 1 • If during the course of the Agreement additional permits become necessary, then
- 2 provide the CAM with an *Updated List of Permits* (including the appropriate
- 3 information on each permit) and an *Updated Schedule for Acquiring Permits*.
- 4 • Send the CAM a *Copy of Each Approved Permit*.
- 5 • If during the course of the Agreement permits are not obtained on time or are
- 6 denied, notify the CAM within 5 days. Either of these events may trigger a CPR
- 7 meeting.
- 8

9 **Products:**

- 10 • Permit Status Letter
- 11 • Updated List of Permits (*if applicable*)
- 12 • Updated Schedule for Acquiring Permits (*if applicable*)
- 13 • Copy of Each Approved Permit (*if applicable*)
- 14

15 **Subtask 1.10 Obtain and Execute Subawards and Agreements with Site Hosts**

16 The goals of this subtask are to: (1) procure and execute subrecipients and site host
17 agreements, as applicable, required to carry out the tasks under this Agreement; and
18 (2) ensure that the subrecipients and site host agreements are consistent with the
19 Agreement terms and conditions and the Recipient's own contracting policies and
20 procedures.

21
22 **The Recipient shall:**

- 23 • Execute and manage subawards and coordinate subrecipients activities in
- 24 accordance with the requirements of this Agreement.
- 25 • Execute and manage site host agreements and ensure the right to use the
- 26 project site throughout the term of the Agreement, as applicable. A site host
- 27 agreement is not required if the Recipient is the site host.
- 28 • Notify the CEC in writing immediately, but no later than five calendar days, if
- 29 there is a reasonable likelihood the project site cannot be acquired or can no
- 30 longer be used for the project.
- 31 • Incorporate this Agreement by reference into each subaward.
- 32 • Include any required CEC flow-down provisions in each subaward, in addition to
- 33 a statement that the terms of this Agreement will prevail if they conflict with the
- 34 subaward terms.
- 35 • Submit a *Subaward and Site Letter* to the CAM describing the subawards and
- 36 any site host agreement needed or stating that no subawards or site host
- 37 agreements are required.
- 38 • If requested by the CAM, submit a draft of each *Subaward* and any *Site Host*
- 39 *Agreement* required to conduct the work under this Agreement.
- 40 • If requested by the CAM, submit a final copy of each executed *Subaward* and
- 41 any *Site Host Agreement*.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

- Notify and receive written approval from the CAM prior to adding any new subrecipient (see the terms regarding subrecipient additions in the terms and conditions).

Products:

- Subaward and Site Letter
- Draft Subawards *(if requested by the CAM)*
- Draft Site Host Agreement *(if requested by the CAM)*
- Final Subawards *(if requested by the CAM)*
- Final Site Host Agreement *(if requested by the CAM)*

TECHNICAL ADVISORY COMMITTEE

Subtask 1.11 Technical Advisory Committee (TAC)

The goal of this subtask is to create an advisory committee for this Agreement. The TAC should be composed of diverse professionals. The composition will vary depending on interest, availability, and need. TAC members will serve at the CAM's discretion.

The purpose of the TAC is to:

- Provide guidance in project direction. The guidance may include scope and methodologies, timing, and coordination with other projects. The guidance may be based on:
 - Technical area expertise;
 - Knowledge of market applications; or
 - Linkages between the Agreement work and other past, present, or future projects (both public and private sectors) that TAC members are aware of in a particular area.
- Review products and provide recommendations for needed product adjustments, refinements, or enhancements.
- Evaluate the tangible benefits of the project to the state of California, and provide recommendations as needed to enhance the benefits.
- Provide recommendations regarding information dissemination, market pathways, or commercialization strategies relevant to the project products.
- Help set the project team's goals and contribute to the development and evaluation of its statement of proposed objectives as the project evolves.
- Provide a credible and objective sounding board on the wide range of technical and financial barriers and opportunities.
- Help identify key areas where the project has a competitive advantage, value proposition, or strength upon which to build.
- Advocate, to the extent the TAC members feel is appropriate, on behalf of the project in its effort to build partnerships, governmental support, and relationships with a national spectrum of influential leaders.
- Ask probing questions that ensure a long-term perspective on decision-making and progress toward the project's strategic goals.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 The TAC may be composed of qualified professionals spanning the following types of
2 disciplines:

- 3 • Researchers knowledgeable about the project subject matter;
- 4 • Members of trades that will apply the results of the project (e.g., designers,
5 engineers, architects, contractors, and trade representatives);
- 6 • Public interest market transformation implementers;
- 7 • Product developers relevant to the project;
- 8 • U.S. Department of Energy research managers, or experts from other federal or
9 state agencies relevant to the project;
- 10 • Public interest environmental groups;
- 11 • Utility representatives;
- 12 • Air district staff; and
- 13 • Members of relevant technical society committees.

14
15 **The Recipient shall:**

- 16 • Prepare a *List of Potential TAC Members* that includes the names, companies,
17 physical and electronic addresses, and phone numbers of potential members.
18 The list will be discussed at the Kick-off meeting, and a schedule for recruiting
19 members and holding the first TAC meeting will be developed.
- 20 • Recruit TAC members. Ensure that each individual understands member
21 obligations and the TAC meeting schedule developed in subtask 1.12.
- 22 • Prepare a *List of TAC Members* once all TAC members have committed to
23 serving on the TAC.
- 24 • Submit *Documentation of TAC Member Commitment* (such as Letters of
25 Acceptance) from each TAC member.

26
27 **Products:**

- 28 • List of Potential TAC Members
- 29 • List of TAC Members
- 30 • Documentation of TAC Member Commitment

31
32 **Subtask 1.12 TAC Meetings**

33 The goal of this subtask is for the TAC to provide strategic guidance for the project by
34 participating in regular meetings, which may be held via teleconference.

35
36 **The Recipient shall:**

- 37 • Discuss the TAC meeting schedule with the CAM at the Kick-off meeting.
38 Determine the number and location of meetings (in-person and via
39 teleconference) in consultation with the CAM.
- 40 • Prepare a *TAC Meeting Schedule* that will be presented to the TAC members
41 during recruiting. Revise the schedule after the first TAC meeting to incorporate
42 meeting comments.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

- 1 • Prepare a *TAC Meeting Agenda* and *TAC Meeting Back-up Materials* for each
- 2 TAC meeting.
- 3 • Organize and lead TAC meetings in accordance with the TAC Meeting Schedule.
- 4 Changes to the schedule must be pre-approved in writing by the CAM.
- 5 • Prepare *TAC Meeting Summaries* for each TAC Meeting that include any
- 6 recommended resolutions of major TAC issues.
- 7

8 **The TAC shall:**

- 9 • Help set the project team's goals and contribute to the development and
- 10 evaluation of its statement of proposed objectives as the project evolves.
- 11 • Provide a credible and objective sounding board on the wide range of technical
- 12 and financial barriers and opportunities.
- 13 • Help identify key areas where the project has a competitive advantage, value
- 14 proposition, or strength upon which to build.
- 15 • Advocate on behalf of the project in its effort to build partnerships, governmental
- 16 support and relationships with a national spectrum of influential leaders.
- 17 • Ask probing questions that ensure a long-term perspective on decision-making
- 18 and progress toward the project's strategic goals.
- 19 • Review and provide comments to proposed project performance metrics.
- 20 • Review and provide comments to proposed project Draft Technology Transfer
- 21 Plan.
- 22

23 **Products:**

- 24 • TAC Meeting Schedule (draft and final)
- 25 • TAC Meeting Agendas (draft and final)
- 26 • TAC Meeting Back-up Materials
- 27 • TAC Meeting Summaries
- 28

29 **Subtask 1.13 Project Performance Metrics**

30 The goal of this subtask is to finalize key performance targets for the project based on
31 feedback from the TAC and report on final results in achieving those targets. The
32 performance targets should be a combination of scientific, engineering, techno-
33 economic, and/or programmatic metrics that provide the most significant indicator of the
34 research or technology's potential success.

35
36 **The Recipient shall:**

- 37 • Complete and submit the project performance metrics section of the *Initial*
- 38 *Project Benefits Questionnaire*, developed in the Evaluation of Project Benefits
- 39 task, to the CAM.
- 40 • Present the draft project performance metrics at the first TAC meeting to solicit
- 41 input and comments from the TAC members.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

- 1 • Develop and submit a *TAC Performance Metrics Summary* that summarizes
2 comments received from the TAC members on the proposed project
3 performance metrics. The *TAC Performance Metrics Summary* will identify:
 - 4 ○ TAC comments the Recipient proposes to incorporate into the *Initial*
5 *Project Benefits Questionnaire*, developed in the Evaluation of Project
6 Benefits task.
 - 7 ○ TAC comments the Recipient does not propose to incorporate with and
8 explanation why.
- 9 • Develop and submit a *Project Performance Metrics Results* document describing
10 the extent to which the Recipient met each of the performance metrics in the
11 *Final Project Benefits Questionnaire*, developed in the Evaluation of Project
12 Benefits task.
- 13 • Discuss the *Project Performance Metrics Results* at the Final Meeting.

14 **Products:**

- 15 • TAC Performance Metrics Summary
- 16 • Project Performance Metrics Results

17
18
19 **IV. TECHNICAL TASKS**

20 *Products that require a draft version are indicated by marking “(draft and final)” after*
21 *the product name in the “Products” section of the task/subtask. If “(draft and final)” does*
22 *not appear after the product name, only a final version of the product is required.*

23 **Subtask 1.1 (Products)** describes the procedure for submitting products to the CAM.

24
25 **TASK 2: Building Science Performance Modeling**

26 The goal of this task is to model and optimize the thermal, hygrothermal, air barrier,
27 constructability, and waterproofing performance of the thermal and air sealing envelope
28 retrofit and evaluate operational energy, costs, greenhouse emissions, and thermal
29 comfort. Modeling will occur pre-demonstration and will be updated post-demonstration
30 for accurate real-world conditions.

31
32 **Subtask 2.1 Building Performance Modeling**

33 The first goal of this task is to conduct a preliminary energy analysis calculating baseline
34 whole building and energy end use profiles, which will be updated in association with
35 Task 5. Disaggregate space conditioning (heating, cooling, and ventilation), lighting,
36 appliances, electrical plug loads, water heating end uses.

37
38 The second goal of this task is to model the economics and carbon impacts of thermal
39 load and air sealing investments, in parallel with Task 3.1. Results may also optimize
40 for, but are not limited to, passive resilience, thermal comfort, indoor air quality, peak
41 demand shift, or minimizing HVAC sizing needs.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 **The Recipient shall:**

- 2 • Collect building design and operation information needed to simulate a baseline
3 model
4 • Develop a whole building model using EnergyPlus (and other tools as needed)
5 that represents the target retrofit market, working with team members on specific
6 design, and selection of specific components of the model.

7 If beneficial, for each retrofit technology, simulate at least three representative years of
8 weather and grid emissions data (e.g., the most recent historical year, 2050 mid-point
9 scenario estimate)

- 10 • As needed, evaluate, and propose solutions for potential thermal, hygrothermal,
11 air barrier, constructability, and waterproofing issues to the team.
12 • For each simulation, disaggregate results at the whole building level, at the end-
13 use level (heating, cooling, domestic hot water, lighting, etc.), and at the level of
14 a representative sample of apartments.
15 • Each simulation may result in the suggested outputs:
16 ○ Thermal comfort metrics
17 ○ Indoor air quality metrics
18 ○ Resilience metrics by modeling the effect of adverse events such as
19 power outages of differing lengths on thermal comfort
20 ○ Utility bill costs
21 • Prepare and develop content for the *Building Science Performance Report*, to
22 include the following at a minimum:
23 ○ Summarize the performance of the final model compared to the
24 baseline.
25 ○ Summarize the findings of the modeling effort
26 ○ Define the envelope technologies and strategies selected and why
27 they were chosen, identifying findings that are specific to the
28 demonstration site as well as those that may be more generally
29 applicable to other projects.

30
31 **Products:**

- 32 • Building Science Performance Report (Draft and Final)
33

34 **Subtask 2.2 Existing Conditions Assessment and Hygrothermal Modeling**

35 The goal of this subtask is for the Recipient to collaborate with RDH Building Science
36 Inc. to assess pre-retrofit conditions to determine unanticipated conditions prior to
37 retrofit and model the interaction between the sealed envelope and attic ventilation to
38 ensure proper moisture management post-retrofit. Identify opportunities for additional
39 attic vents to reduce moisture risk, as well as methods of retrofitting existing attic vents
40 to harden against ember transport in the event of wildfires. This assessment will also
41 identify areas that require specific details or sequencing during design development of
42 the EIFS retrofit.
43

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

The Recipient shall:

- Identify attic irregularities such as irregular joist spacing, existing insulation conditions, access constraints, and non-standard mechanical penetrations. This will define the attic preparation procedures and priority air sealing areas, verified in coordination with an insulation contractor’s manual inspection.
- Create a hygrothermal model using Wärme Und Feuchte Instationär (WUFI) to confirm condensation and mold risk, pay attention to vapor transport and moisture accumulation patterns when air leakage is reduced in the attic. WUFI translates to German for Transient Heat and Moisture. WUFI numerically models how temperature and moisture evolve over time within building assemblies such as walls, roofs, and floors by solving coupled heat- and moisture-balance equations.
- Evaluate solutions for potential thermal, hygrothermal, and waterproofing issues.
- Document findings and recommendations in an *Existing Conditions and Moisture Risk Report*

Products:

- Existing Conditions and Moisture Risk Report

TASK 3: Design Development

The goal of this task is to review engineering and performance specifications to fully prepare final hardware for the attic demonstration, with the goal of scaling for commercialization, and evaluation of a cork-based stucco for demonstration. This task will evaluate material compatibility, installation workflows, code compliance requirements, and cost implications to ensure successful demonstration and future commercialization pathways in the California market. Coordination will occur across disciplines for a complete cost estimate and revised performance model evaluation and incorporate findings from Task 3.1. Each subtask will involve contractor engagement to understand deployment constraints, laboratory or controlled testing to validate performance, development of field demonstration protocols, and preparation of technical documentation including construction drawings and specifications.

Subtask 3.1 Site Requirement and Use Case Development

The goal of this subtask is to gather practitioner insights on proposed emerging technology design, future workflow requirements, current deployment constraints and implementation best practices for attic retrofits in California housing. Findings should inform design (Task 3), mock-up design (Task 4), and technology transfer activities (Task 7).

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 **The Recipient shall:**

- 2
- 3 • Evaluate contractor experience as it relates to technology, design, construction
- 4 and operation of deployment hardware. Document findings in a *Draft Contractor*
- 5 *Engagement Report*.
- 6 • Engage input, including but not limited to general, insulation and window
- 7 contractors to identify existing limitations, pain points, and inefficiencies in current
- 8 affordable multifamily housing construction and retrofit processes that may
- 9 impact demonstration technology design or scale.
- 10 • Present developed workflows and hardware solutions to contractors for feedback
- 11 on feasibility, installation complexity, and maintenance considerations. Capture
- 12 contractor identified modifications needed for successful field implementation.
- 13 • Work with contractors or industry experts to establish building typologies and site
- 14 conditions that are optimal for each demonstrated technology. Develop clear site
- 15 selection criteria and building assessment protocols to guide large-scale
- 16 deployment decisions.
- 17 • Document contractor concerns regarding training needs, equipment
- 18 requirements, timeline impacts and cost implications of construction. Develop
- 19 recommendations for addressing these barriers in future deployment strategies,
- 20 either incorporated into design development requirements or in market
- 21 transformation activities. Document all final findings in a *Final Contractor*
- 22 *Engagement Report*

23 **Products:**

- 24 • Contractor Engagement Report (Draft and Final)
- 25

26 **Subtask 3.2 Aerobarrier Hardware Design Improvement**

27 The goal of this subtask is to incorporate the findings of previous Subtasks 3.1 for the

28 vendor AeroSeal, LLC to revise and reduce the amount of equipment needed by

29 contractors to deliver Aerobarrier air sealing in attic or crawlspace applications.

30

31 **The Recipient shall:**

- 32 • Produce an *Attic Aerobarrier – Air Sealing Prototype Design Report* including
- 33 manufacturer specifications, incorporating the lessons learned shared by
- 34 insulation and air sealing contractors as part of Task 3.1. The report should
- 35 delineate issues, changes, and revisions from current practice to the final
- 36 prototype design for demonstration.
- 37 • Document all testing procedures, results, and performance metrics.
- 38 • Evaluate air sealing performance improvements under controlled conditions, if
- 39 necessary.
- 40 • For new hardware, develop *Attic Aerobarrier – Air Sealing Protocol for In-Field*
- 41 *Demonstration* to optimally operate new hardware in the field for demonstration.
- 42
- 43

2 **Products:**

- 3 • Attic Aerobarrier – Air Sealing Prototype Design Report
- 4 • Attic Aerobarrier – Air Sealing Protocol for In-Field Demonstration

5
6 **Subtask 3.3 Signetron Robo-Attic Design Improvement and Lab Testing**

7 The goal of this subtask is for the Recipient in collaboration with subrecipient Signetron,
8 Inc. to improve Robo-Attic to autonomously vacuum and prepare conditions for air
9 sealing improvements. Aim to incorporate findings from contractor interviews conducted
10 in Subtasks 3.1.

11
12 **The Recipient shall:**

- 13 • Produce a *Signetron - Prototype Performance Report* including issues, changes
14 and revisions related to Robo-Attic autonomy or cleaning improvements.
- 15 • Evaluate insulation vacuum system performance improvements under controlled
16 conditions in Signetron's laboratory facility.
- 17 • Document all testing procedures, results, and performance metrics. The report
18 may result in the suggested findings:
 - 19 ○ Computer vision algorithm updates resulting in a % improvement of attic
20 cleaning abilities
 - 21 ○ Robo-Attic movement updates enabling easier abilities to traverse joist
22 structures.
 - 23 ○ Updates regarding the types of insulation or debris able to be removed
24 safely
- 25 • Develop and produce *Signetron- Attic Preparation Protocol for In-Field*
26 *Demonstration* to optimally operate Robo-Attic.

27
28 **Products:**

- 29 • Signetron –Prototype Performance Report
- 30 • Signetron – Attic Preparation Protocol for In-Field Demonstration

31
32 **Subtask 3.4 Spray-Applied EIFS Schematic Design and Construction Documents**

33 The goal of this subtask is to fully coordinate the basic components, physical
34 constraints, and architectural impact of Diasen's Thermactive spray-applied EIFS retrofit
35 demonstration. Fully coordinate components across disciplines and prepare drawing
36 documents for a complete cost estimate. The design should aim to reduce permit
37 documentation as much as possible and account for the findings from Task 3.1.

38
39 **The Recipient shall:**

- 40 • Develop installation guidance and construction details in collaboration with
41 Diasen to consider transitions and interfaces, including base of wall, wall-to-roof
42 connections, and penetrations.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

- 1 • Review architectural implementation considerations and address potential
- 2 drainage system requirements (including drain mat installation, sequencing, and
- 3 flashing coordination) based on hygrothermal modeling results from Task 3.1.
- 4 • Prepare *Spray-Applied EIFS Construction Drawing Set and Specifications* that
- 5 fully describes the retrofit design package specifications for cost estimating and
- 6 review by city building officials. Prepare construction plans, elevations and details
- 7 as needed to show intent.
- 8 • Consult with City inspection authorities to determine special code or permitting
- 9 requirements.
- 10 • Develop a 3D digital mock-up visualizations, diagrams, renderings to describe
- 11 the final building result for team communication and marketing materials
- 12 • Assist waterproofing consultant in identifying and finalizing roof, window and
- 13 exterior penetration details, coordinated with owner standards.
- 14 • Participate in regular meetings with Owner/Design team (assume 2 per month)
- 15 • Ensure drawings and specifications of components conform to previous Subtask
- 16 3.1, funding needs, site constraints (e.g., asbestos, structural needs), and owner
- 17 project requirements.
- 18 • Identify if any certification and testing is needed to produce and deliver products
- 19 to meet California codes and standards.
- 20 • Develop attic preparation protocols to optimally operate Robo-Attic in the field for
- 21 demonstration.
- 22 • Prepare a CPR Report #1 and participate in a CPR meeting in accordance with
- 23 the subtask 1.3 (CPR Meetings)
- 24

Products:

- 25
- 26 • Spray-Applied EIFS - Construction Drawing Set and Specifications
- 27 • CPR Report
- 28

Task 4: Demonstration Systems Installation

29 The goal of this task is to fabricate and install variations of retrofit technologies in the

30 demonstration buildings.

31

32

Task 4.1 Initial Testing

33 The goal of this subtask is to conduct testing of prototype systems in the field prior to full

34 demonstration. Validate updated hardware and software performance, optimize

35 deployment protocols for full demonstration and evaluate any moisture risk

36

37

The Recipient shall:

- 38
- 39 • Complete a phased in-field test of final Aerobarrier hardware prototypes, Robo-
- 40 attic insulation vacuum system performance improvements under field
- 41 conditions, and hygrothermal risk of spray-applied cork product.
- 42 • Identify contractor transition points and involvement for each technology

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

- Document results to modify in-field protocols or technology as needed before proceeding to full demonstration on buildings in *Automated Spray-Applied Retrofit Mock-up Report*

Products:

- Automated Spray-Applied Retrofit Mock-Up Report

Task 4.2 Perform Field Demonstration

The goal of this subtask is to complete remaining retrofit demonstrations and verify proper operation of the newly installed air sealing and thermal retrofit components according to Task 3 and 4.1.

The Recipient shall:

- As needed, coordinate demonstration, construction and installation of retrofit components according to Task 3 activities, if relevant, including, but not limited to:
 - clean and prepare existing attics for air sealing
 - address envelope leakage without insulation
 - Re-insulate attics with Title 24 compliant component
 - Add airsealing and thermal insulation barrier to exterior walls of the building
- Incorporate actual specifications into our predicted whole building energy models, as needed. Revised results will be referenced during Monitoring & Verification reporting.
- Assist in preparation of *Construction Memo* to document the completion of system installation, includes pre, mid and post construction field reports and site visit documentation
- Support the preparation of a *System Commissioning Report*, which will, at a minimum, describe the results of the commissioning process and highlight any unique challenges or complications with bringing systems online.
- Develop an *Operational Plan* to guide the operation of systems after the end of this project. Retrieve bids to calculate the value of a maintenance fund to reliably maintain grant-funded systems

Products:

- Construction Memo
- System Commissioning Report
- Operational Plan

Task 5: Demonstration Site Performance Measurement and Verification

The goal of this task is to monitor and verify the predicted performance of our demonstration for pre and post construction in a timeline that is pre-approved by the CAM.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1
2 **Task 5.1 Measurement and Verification Plan**

3 The goal of this subtask is to develop a measurement and verification plan for all
4 aspects of the project, including but not limited to energy consumption, air leakage,
5 moisture, effectiveness of installation and digital workflow performance on envelope
6 package approaches.
7

8 **The Recipient shall:**

- 9
- 10 • Develop a *Stakeholder Engagement Plan* documenting the strategy for soliciting
11 input for retrofit performance post-occupancy. The goals of this plan are:
 - 12 ○ To document lessons learned and concerns from the owner, residents and
13 contractors related specifically to technology adoption.
 - 14 • Develop a *Measurement and Verification (M&V) Plan* for grant-funded
15 technologies and whole building performance. The M&V Plan will include details
16 regarding approach to instrumentation, data collection, and data analysis and will
17 include:
 - 18 ○ Monitoring Equipment budgets
 - 19 ○ Schedule of metering/monitoring equipment to be used and how it will be
20 installed (where not already included as part of the construction scope)
 - 21 ○ Instrumentation calibration methodology
 - 22 ○ Data logging and acquisition methodology and schedule (minimum 12
23 months of pre and post construction (minimum 12 months pre- and post-
24 installation, including summer, winter, and shoulder seasons)
 - 25 ○ Description of the data analysis and quality assurance procedures
 - 26 ○ Data format protocols, data collection process
 - 27 ○ Description of the methods (e.g. protocols, practices) that will be
28 performed, to manage and protect Person Information and to comply with
29 the Information Practices Act
 - 30 ○ Monitoring plan must include measurement of:
 - 31 ■ % of attic's cleaned with robotic components
 - 32 ■ Whole Building air leakage reduction relative to baseline
 - 33 ■ Heating and cooling building energy consumption compared to both
34 the existing conditions and the Title 24 compliant requirements
 - 35 ■ The cost of each measure (e.g., per unit), installation time,
36 occupant disturbance, and comfort compared to current measures.
 - 37 ■ Measurement and assessment of the retrofit on air quality (e.g.,
38 CO₂, PM, NO_x):
 - 39 • Either Continuous or point measurements of in-apartment
40 IAQ sensors in a representative sample of apartments.
 - 41 • Quantify IAQ differences between demonstrated
42 technologies and typical current practice.
 - If relevant, speak to a Building Enclosure Validation that:

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

- Outlines the process to validate the thermal, air leakage, moisture, impacts on retrofitted facades, performance, effectiveness of installation and attachment method performance of windows or exterior EIFs post-installation.
- More closely tracks how long it took, what the costs were relative to current/earlier multifamily demonstrations, including with and without stud detection systems.
- Attic Air Leakage Validation
 - Perform air leakage testing to quantify in-unit, attic or whole building air leakage tests in general conformance with the methods described in ASTM E779 to validate assumed air leakage rates in the design energy models.
 - Perform qualitative air leakage testing in general conformance with the methods described in ASTM E1186 which includes visualization of leakage paths using theatrical smoke and infrared thermography. Qualitative air leakage testing will be used to improve perimeter detailing.
 - More closely track how long it took, what the costs were relative to current/earlier multifamily demonstrations
 - Water Testing
 - Perform water testing to include at least one test in general conformance with the methods described in ASTM E1105 to validate window and rough opening flashing performance.

Products:

- Stakeholder Engagement Plan
- Measurement and Verification (M&V) Plan

Task 5.2 Pre-Retrofit Performance

The goal of this subtask is to ensure that performance of envelope retrofit systems in demonstration buildings is documented in accordance with the M&V plan from subtask 5.1. The team will utilize monitoring to report on whole building and discrete technology performance prior to attic retrofit.

The Recipient shall:

- Develop a *Pre-Retrofit Performance Report* to document results gathered from implementing the M&V Plan

Products:

- Pre-Retrofit Performance Report

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 **Task 5.3 Post-Retrofit Performance**

2 The goal of this subtask is to ensure that performance of envelope retrofit systems in
3 demonstration buildings is documented in accordance with the M&V plan from subtask
4 5.1. The team will utilize monitoring to report on whole building and discrete technology
5 performance after attic retrofit activities occur.

6
7 **The Recipient shall:**

- 8 • Develop a *Post-Retrofit Performance Report* to document results gathered from
9 implementing the M&V Plan.
- 10 • Evaluate the performance and value of the thermal and air sealing benefits of
11 attic or wall retrofit independently.
- 12 • Prepare a *CPR Report #2* and participate in a CPR meeting in accordance with
13 subtask 1.3 (CPR Meetings)

14
15 **Products:**

- 16 • Post-Retrofit Performance Report
- 17 • CPR Report #2

18
19 **TASK 6: EVALUATION OF PROJECT BENEFITS**

20 The goal of this task is to report the benefits resulting from this project.

21
22 **The Recipient shall:**

- 23 • Complete the *Initial Project Benefits Questionnaire*. The Initial Project Benefits
24 Questionnaire shall be initially completed by the Recipient with 'Kick-off' selected
25 for the 'Relevant data collection period' and submitted to the CAM for review and
26 approval.
- 27 • Complete the *Annual Survey* by January 31st of each year. The Annual Survey
28 includes but is not limited to the following information:
 - 29 ○ Technology commercialization progress
 - 30 ○ New media and publications
 - 31 ○ Company growth
 - 32 ○ Follow-on funding and awards received
- 33 • Complete the *Final Project Benefits Questionnaire*. The Final Project Benefits
34 Questionnaire shall be completed by the Recipient with 'Final' selected for the
35 'Relevant data collection period' and submitted to the CAM for review and
36 approval.
- 37 • Respond to CAM questions regarding the questionnaire drafts.
- 38 • Complete and update the project profile on the CEC's public online project and
39 recipient directory on the [Energize Innovation website](http://www.energizeinnovation.fund)
40 (www.energizeinnovation.fund), and provide *Documentation of Project Profile on*
41 *EnergizeInnovation.fund*, including the profile link.
- 42 • If the Prime Recipient is an Innovation Partner on the project, complete and
43 update the organizational profile on the CEC's public online project and recipient
44 directory on the [Energize Innovation website](http://www.energizeinnovation.fund) (www.energizeinnovation.fund), and

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

1 provide *Documentation of Organization Profile on EnergizeInnovation.fund*,
2 including the profile link.
3

4 **Products:**

- 5 • Initial Project Benefits Questionnaire
- 6 • Annual Survey(s)
- 7 • Final Project Benefits Questionnaire
- 8 • Documentation of Project Profile on EnergizeInnovation.fund
- 9 • Documentation of Organization Profile on EnergizeInnovation.fund

10
11
12 **TASK 7: Technology/Knowledge Transfer Activities**

13 The goal of this task is to conduct activities that will accelerate the commercial adoption
14 of the technology being supported under this agreement. Eligible activities include, but
15 are not limited to, the following:

- 16 • Scale-up analysis including manufacturing analysis.
- 17 • Development of standardized contractor procedures for multifamily use-case.
- 18 • Market research, business plan development, and cost-performance modeling.

19
20 **The Recipient Shall:**

- 21 • Develop and submit a *Technology Transfer Plan* that identifies the proposed
22 activities the recipient will conduct to accelerate the successful commercial
23 adoption of the technology.
- 24 • Present the draft *Technology Transfer Plan* to the TAC for feedback and
25 comments.
- 26 • Develop and submit a *Summary of TAC Comments* that summarizes comments
27 received from the TAC members on the Draft Technology Transfer Plan. This
28 document will identify:
 - 29 ○ TAC comments the Recipient proposes to incorporate into the final
30 *Technology Transfer Plan*.
 - 31 ○ TAC comments the Recipient does not propose to incorporate with and
32 explanation why.
- 33 • Submit the final *Technology Transfer Plan* to the CAM for approval.
- 34 • Implement activities identified in final *Technology Transfer Plan*.
- 35 • Develop and submit a *Technology Transfer Summary Report* that includes high
36 level summaries of the activities, results, and lessons learned of tasks performed
37 relating to implementing the Final Technology Transfer Plan. This report should
38 not include any proprietary information.
- 39 • When directed by the CAM, develop presentation materials for an CEC-
40 sponsored conference/workshop(s) on the project.

Exhibit A
Scope of Work
Association For Energy Affordability, Inc.

- 1 • When directed by the CAM, participate in annual EPIC symposium(s) sponsored
2 by the CEC.
3 • Provide at least (6) six *High Quality Digital Photographs* (minimum resolution of
4 1300x500 pixels in landscape ratio) of pre and post technology installation at the
5 project sites or related project photographs.
6

7 **Products:**

- 8 • Technology Transfer Plan (draft and final)
9 • Summary of TAC Comments
10 • Technology Transfer Summary Report (draft and final)
11 • High Quality Digital Photographs
12

13 **I. PROJECT SCHEDULE**
