

Form 801 Attachment
Stanford University, California Global Energy, Water and Infrastructure
Innovation Initiative
Monterrey, Nuevo Leon, Mexico
April 12-April 19, 2026

2. Entity's Business Activity:

The California-Global Energy, Water and Infrastructure Innovation Initiative at Stanford University focuses on regional, low-carbon development opportunities and works to advance a new, clean economy through novel technological, business, policy, and social solutions.

3.2. Payment Description:

Elsa Beljean, Senior International Relations Advisor and Corey Permann will travel to Monterrey, Nuevo León, Mexico, to participate in the Stanford Mexico Clean Economy 2050 Initiative High-Level Roundtable Series. This in-person engagement will convene government, academic, and private sector leaders to advance clean innovation in the energy-water nexus and transportation decarbonization, providing a key opportunity to contribute to technical discussions, strengthen regional partnerships, and explore collaboration with Nuevo León stakeholders.
