Subject: Eastside Power Authority AB2514 Compliance Filing

Stephen Sloan
Exofficio Director

Dear Mr. Mathias:

Scott A. Edwards
Manager

Consistent with AB2514, the Eastside Power Authority Board of Directors took the following action regarding storage at its October 27, 2014 meeting: ESPA found no cost-effective technologies and/or projects available for ESPA power alternatives, and the Board set no target for Energy Storage procurement.

Member Districts:

Delano-Earlimart
Irrigation District

ESPA procures capacity reserve in the wholesale market and one member participates 600 kW of pumping load in Demand Response.

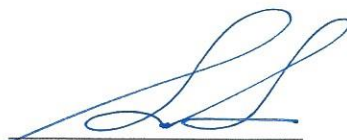

Lindsay-Strathmore
Irrigation District

ESPA staff still does not find cost-effective Energy Storage solutions but continues to consider storage as part of any load management or power resource development, and to monitor publications and research on energy storage technologies and prices.

Terra Bella
Irrigation District

Associate Districts:

Kern-Tulare Water
District

Scott Edwards
General Manager, Eastside Power Authority

San Luis Water
District
