

# Utility-Scale Solar Capacity and Electrical Generation by County

Notes: Reporting requirements are for power plants with a capacity of at least 1 MW and are in accordance with 20 CCR 1304. Counties without symbols had no utility-scale (commercial) solar generation installed. "Utility" is defined in 20 CCR 1302(16). Data is classified using the Jenk's Natural Breaks method, an algorithm developed to find and create optimized groups in a dataset.
