**FIFTH REVISED NOTICE OF PROPOSED AWARDS****Clean Transportation Program****Grant Solicitation GFO-15-605****Light Duty Vehicle Hydrogen Refueling Infrastructure****December 23, 2019**

On April 6, 2016, the California Energy Commission (CEC) released a Grant Solicitation and Application Package entitled “Light Duty Vehicle Hydrogen Refueling Infrastructure” under the Clean Transportation Program (formerly known as the Alternative and Renewable Fuel and Vehicle Technology Program). This grant solicitation provided funding to expand the network of publicly accessible hydrogen refueling stations that serve fuel cell electric vehicles (FCEVs) in California. There is a total of \$33 million of grant funding available for agreements under this solicitation. The CEC, at its sole discretion, reserves the right to increase or reduce the amount of funding available at any time.

On February 17, 2017, the CEC released a Notice of Proposed Awards (NOPA) that identified the applicants selected to receive funding and the recommended funding amounts. On March 15, 2017, the CEC released a revised NOPA that listed the station applications that received passing scores in the Main Station Competition, but were not proposed for funding, and those applications that were ineligible for funding. On November 8, 2017, the CEC released a second revised NOPA awarding funds to applications for five additional stations. On January 11, 2019, the CEC released a third revised NOPA that removed four stations and awarded three additional stations. On August 7, 2019, the CEC released a fourth revised NOPA that removed two stations and awarded one additional station.

This fifth revised NOPA updates the August 7, 2019 NOPA. This NOPA awards funds to a previously withdrawn hydrogen refueling station in Laguna Beach and withdraws a hydrogen refueling station located in Santa Nella. This notice will be mailed to all parties who submitted an application to GFO-15-605 and will be posted on the CEC’s website at: <http://www.energy.ca.gov/contracts/index.html>.
