

NOTICE OF PROPOSED AWARD

Demonstrating Replicable, Innovative, Large-Scale Heat Recovery Systems in the Industrial Sector

GFO-19-503

February 27, 2020

On December 11, 2020, the California Energy Commission (CEC) released a competitive solicitation for innovative heat recovery systems that can be replicable at large scale to reduce California's industrial natural gas usage and greenhouse gas (GHG) emissions. Up to \$6 million in Natural Gas Research Program funding is available to fund applications.

The CEC received two proposals by the due date, February 4, 2020. Each proposal was screened, reviewed, evaluated, and scored using the solicitation criteria. Two proposals passed the stage one application screening.

The attached Notice of Proposed Awards identifies each applicant selected and recommended for funding by CEC staff and includes the recommended funding amount and score. The total amount recommended is \$2,977,953.

Funding of proposed projects from this solicitation is contingent upon the approval of these projects at a publicly noticed CEC business meeting and execution of a grant agreement. If the CEC is unable to timely negotiate and execute a funding agreement with an applicant, the commission, at its sole discretion, reserves the right to cancel or otherwise modify the pending award, and award the funds to others.

In addition, the CEC reserves the right to negotiate with successful applicants to modify the project scope, schedule, or level of funding.

This notice is being mailed to all parties that submitted an application to this solicitation and is also posted on the CEC's website at www.energy.ca.gov/contracts/.

For information, please contact Phil Dyer, Commission Agreement Officer, at (916)-654-4651, or Phil.Dyer@energy.ca.gov.
