CEC-057 (Revised 1/20)

Approval by the Executive Director of EnergyPro 8.2 Compliance Software

Docket # 19-BSTD-01

The executive director hereby approves EnergyPro 8.2 as an update to EnergyPro 8.0 that incorporates the new version of California Building Energy Code Compliance (CBECC) compliance managers, pursuant to Sections 1.2.1 and 1.3.2 of the 2019 Alternative Calculation Method (ACM) Approval Manual.

On September 11, 2019, the California Energy Commission (CEC) approved EnergyPro Version 8.0 as an alternative calculation method for demonstrating performance compliance with the residential provisions of the 2019 California Energy Code (Energy Code). On December 11, 2019, the CEC approved EnergyPro 8.0 as an alternative calculation method for demonstrating performance compliance with the nonresidential provisions of the 2019 Energy Code. When the CEC approved EnergyPro 8.0, it directed the executive director to, among other things, "review and approve updates to vender software, consistent with Section 1 of the 2019 ACM Approval Manual."

On July 30, 2020, the executive director approved CBECC-Res 2019.1.3 and CBECC-Com 2019.1.3 as the public domain software for estimating energy consumed by residential and nonresidential buildings under Public Resources Code section 25402.1(a), for demonstrating compliance with the performance-based provisions of the 2019 Energy Code.

On September 8, 2020, EnergySoft, LLC submitted an application to the CEC for approval of EnergyPro 8.2 as an update to its compliance software that incorporates the compliance managers of CBECC-Res 2019.1.3 and CBECC-Com 2019.1.3. The application contained the elements required by Section 1.1 of the 2019 ACM Approval Manual and Energy Commission staff determined that the application was complete and able to be approved.

Information for obtaining EnergyPro 8.2 is posted on the CEC's 2019 Standards website for approved computer compliance programs:
