EXECUTIVE SUMMARY

California voters passed the California Clean Energy Jobs Act (Proposition 39) in November 2012 to create jobs, save energy, reduce energy costs and greenhouse gas emissions, and provide job training and workforce development in related fields. By focusing on public schools, community colleges, and other school facilities, the Act created energy and cost savings, and improved the classroom-learning environment for students and educators across California—all while advancing California's broader climate and energy goals.

Implementation of the California Clean Energy Jobs Act occurred through interconnected programs at several different agencies, including the California Energy Commission, the California Community Colleges Chancellor's Office, the California Workforce Development Board, and the California Conservation Corps. These programs included:

- Direct grants for energy audits, retrofits, and clean energy project development for K-12 schools and community colleges;
- Loans and technical assistance to support these projects; and
- Job training and workforce development programs intended to grow and maintain the state's pool of qualified clean energy workers.

The California Clean Energy Jobs Act was designed to last for five years, through June 30, 2018. In 2017, Senate Bill 110 (Committee on Budget and Fiscal Review, Chapter 55, Statutes of 2017), modified the California Clean Energy Jobs Act to establish the Clean Energy Job Creation Program with three new programs: The School Bus Replacement Program, the Energy Conservation Assistance Act – Education Subaccount Competitive Loan Program, and the Proposition 39 K-12 Competitive Grant Program. After June 30, 2018, any remaining Proposition 39 K-12 funds were reallocated to support these programs. SB 110 also required that any future Proposition 39 funding must be provided through direct legislative appropriation.

All energy efficiency and renewable energy projects funded by Proposition 39 were expected to be complete by June 30, 2020, and all final project reports were required June 30, 2021. However, on May 13, 2020, in response to the COVID-19 pandemic and statewide school closures, the Energy Commission extended those deadlines by one year. All projects funded by Proposition 39 must now be complete by June 30, 2021, and all final project reports must be submitted by June 30, 2022.

The Citizens Oversight Board is pleased to present our 6th Annual Report to the California Legislature, which documents the continuing energy and cost savings results from completed and in-progress projects and the increased volume and geographic diversity of projects throughout the state. This report and appendices, including reports from the participating agencies, focuses on program activities in the most recent program year for which we have data: June 30, 2019 through June 30, 2020.

Recommendations

Although the interconnected Proposition 39 programs are implemented at several different agencies, the Citizens Oversight Board is the only body responsible for evaluating the progress and impediments of Proposition 39 in its entirety. The Board believes that Proposition 39 has demonstrated success across multiple categories: energy savings, job creation, job training, and improvements to classroom environments. It has also resulted in significant economic and employment impacts throughout the state, including over \$3.3 billion in economic activity and an estimated 19,812 direct, indirect, and induced jobs, many of which are local in nature. We remain impressed that the Program advanced equity by providing energy-efficiency focused workforce-training and supportive services that prepared at-risk youth, women, veterans, ex-offenders, and other disadvantaged job seekers apply for, enter, and successfully complete a state-registered building trade apprenticeship program.

Given the success of Proposition 39, the Citizens Oversight Board recommends the Legislature continue to appropriate funding to energy efficiency and clean energy projects in K-12 schools and community colleges so that school energy improvements continue to help meet California's energy and climate goals. We are pleased to note the Legislature's support for a Proposition 39 K-12 Competitive Grant Program in SB 110 and believe, if funded, it would result in significant energy savings and reductions in greenhouse gas emissions going forward.

As with past reports, the Board remains encouraged by the performance of the Energy Conservation Assistance Act Education Subaccount (ECAA-Ed) loan program and Bright Schools technical assistance program. We have previously recommended that the Legislature continue funding the ECAA-Ed program, and are pleased to note the Legislature's reallocation of remaining Proposition 39 K-12 funds through SB 110 to support the ECAA-Ed Competitive Loan Program. We believe the ECAA-Ed Competitive Loan Program will result in significant energy savings and reductions in greenhouse gas emissions going forward.

The Board is also encouraged by the significant progress realized to date through the School Bus Replacement Program, created through SB 110 and supported by the reallocation of \$75 million in remaining Proposition 39 K-12 funds. We believe the emissions reductions and associated health benefits associated with the School Bus Replacement Program investments are significant and recommend the Legislature continue to appropriate funding to support the School Bus Replacement Program.

The Board no longer receives reports from the California Conservation Corps or the California Workforce Development Board (CWDB) on their pre-apprenticeship training and workforce development activities. However, the Citizens Oversight Board appreciates that the CWDB's successful pre-apprenticeship training program developed under Proposition 39 is scaling up through the High Road Construction Careers Initiative to support the continued development of a skilled and diverse workforce in California.

Finally, while the COVID-19 pandemic, school closures, and the economic recession were extraordinarily disruptive events in 2020 and into 2021, the Board appreciates the School

Energy Efficiency Stimulus (SEES) Program created by Assembly Bill (AB) 841 (Chapter 372, Statutes of 2020). Improving ventilation and energy efficiency in California schools, while also replacing inefficient and wasteful water fixtures, will help prepare for the safe reopening of schools and protect the health of our children and teachers alike, while also advancing high-quality jobs in underserved communities. Although the Board has no direct role or oversight of the SEES Program, we are confident of its future success and the benefits it will provide to all Californians.

CHAPTER 1: The California Clean Energy Jobs Act and its Enduring Impact

The Citizens Oversight Board (COB) is pleased to present its sixth annual report to the California Legislature on the California Clean Energy Jobs Act (CCEJA), an important component of the state's broader energy, climate, workforce, and education goals. The CCEJA was established through legislation after voters approved the Proposition 39 initiative in the November 6, 2012, statewide general election.¹ The statute changed the corporate income tax code for multistate businesses and established a path to support clean energy job creation and important energy efficiency and clean energy improvements at California's public schools, community colleges, and other public facilities. The program was funded for five years with revenues from the tax code change, beginning in fiscal year 2013-14 and ending in fiscal year 2017-18.

In this report to the Legislature, which covers the period from June 30, 2019, until June 30, 2020, the Citizens Oversight Board considers the objectives of energy efficiency and clean energy jobs when determining our recommendations and conclusions regarding the CCEJA.

The appendices include information received from the California Energy Commission, the California Community Colleges Chancellor's Office, and the California Workforce Development Board, used to develop this report.² Additionally, the appendices include the Proposition 39 implementation legislation, and more recent legislation modifying the program. Finally, the appendices include Proposition 39 K-12 allocations by legislative district, to demonstrate that although direct funding for projects has ceased, project construction is ongoing and project benefits continue to increase throughout the state.

This report and all appendices are also available publicly on the [Energy Commission's Citizens Oversight Board website](#).

Objectives of the California Clean Energy Jobs Act

The main objectives of the CCEJA are laid out in the California Public Resources Code,³ which states that the program is intended to achieve the following:

- a) Create good-paying energy efficiency and clean energy jobs in California.

¹ California Secretary of State. Statement of Vote: November 6, 2012 General Election. 2012. [Statewide Results for Proposition 39](https://elections.cdn.sos.ca.gov/sov/2012-general/ssov/ballot-measures-summary-by-county.pdf), <https://elections.cdn.sos.ca.gov/sov/2012-general/ssov/ballot-measures-summary-by-county.pdf>.

² The California Conservation Corps' (CCC) Energy Corps training program received Proposition 39 funding through June 30, 2018, and the CCC provided a final report to the COB in March 2018.

³ [California Public Resources Code § 26201](#), https://california.public.law/codes/ca_pub_res_code_section_26201.

- b) Put Californians to work repairing and updating schools and public buildings to improve their energy efficiency and make other clean energy improvements that create jobs and save energy and money.
- c) Promote the creation of new private sector jobs improving the energy efficiency of commercial and residential buildings.
- d) Achieve the maximum amount of job creation and energy benefits with available funds.
- e) Supplement, complement, and leverage existing energy efficiency and clean energy programs to create increased economic and energy benefits for California in coordination with the California Energy Commission and the California Public Utilities Commission.
- f) Provide a full public accounting of all money spent and jobs and benefits achieved so the programs and projects funded pursuant to this division can be reviewed and evaluated.

The following legislative actions defined the structure and organization of the CCEJA and established the Citizens Oversight Board:

- [Senate Bill 73 \(Committee on Budget and Fiscal Review, Chapter 29, Statutes of 2013\)](#): Enabling Legislation for Proposition 39 and creation of the Citizens Oversight Board; and
- [Assembly Bill 2227 \(Quirk, Chapter 683, Statutes of 2014\)](#): Subsequent legislation on CCEJA Citizens Oversight Board implementation

The California Energy Commission (Energy Commission)⁴ and the California Community Colleges Chancellor's Office⁵ also adopted regulatory guidelines to help meet program objectives.

The most recent legislation affecting these programs, [Senate Bill 110 \(Committee on Budget and Fiscal Review, Chapter 55, Statutes of 2017\)](#), extended the overall CCEJA program beyond 2018. SB 110 is discussed in more detail below.

Overview of the Original CCEJA Programs, Funding, and Timelines

Each year, the Energy Commission, the California Community Colleges Chancellor's Office, the California Conservation Corps,⁶ and the California Workforce Investment Board⁷ developed annual reports on their progress implementing CCEJA programs. These reports were submitted to the Citizens Oversight Board for review and approval at the first Citizens Oversight Board meeting, held in February of each year. The Citizens Oversight Board evaluated and summarized the information for inclusion into its annual report to the Legislature, along with findings and recommendations. The agency reports are included as appendices to the Citizens Oversight Board report.

The CCEJA programs fall into three categories:

- **Direct grants** for energy audits, retrofits, and clean energy project development (administered by the Energy Commission for K-12 schools and the California Community Colleges Chancellor's Office for community colleges);
- **Loans and technical assistance** to support these projects (administered through existing loan programs of the Energy Commission); and
- **Job training and workforce development programs** intended to grow and maintain the state's pool of qualified clean energy workers (administered through the California Community Colleges Chancellor's Office, the California Workforce Development Board, and the California Conservation Corps).

The CCEJA was funded via the Clean Energy Job Creation Fund, which sits in the State Treasury. The fund was capitalized each year from corporate tax receipts generated by the tax loophole closed by 2012's Proposition 39. Senate Bill 73 (Committee on Budget and Fiscal Review, Chapter 29, Statutes of 2013) is the implementing legislation for Proposition 39.

Table 1-1 provides an overview of the CCEJA programs by agency and funding levels, beginning in fiscal year 2013-14 and ending in fiscal year 2017-18. There were no additional appropriations for the Proposition 39 programs after Fiscal Year 2017-2018.

⁶ The California Conservation Corps' (CCC) Energy Corps training program received Proposition 39 funding through June 30, 2018, and thereafter received funding through the Greenhouse Gas Reduction Fund (GGRF). The CCC provided a final report to the COB in March 2018.

⁷ The California Workforce Development Board (CWDB) received Proposition 39 funding through June 30, 2018, and thereafter received funding through SB 1 and the Greenhouse Gas Reduction Fund (GGRF). The CWDB provided a final job creation and training report to the COB in February 2020.

Table 1-1: Original Clean Energy Job Creation Fund Distribution

Program	State Agency	Category	Budget (in millions)
<i>Energy Project Grants and Loans</i>			
Local Educational Agency K-12 Proposition 39 Award Program	California Energy Commission / California Department of Education	Energy Efficiency and clean energy projects	2013/14 - \$381 2014/15 - \$279 2015/16 - \$313.4 2016/17 - \$398.8 2017/18 - \$376.2

Bright Schools Program	California Energy Commission	Leverage: K-12 school and college technical assistance	**Receives 10% of ECAA-Ed
<i>Workforce Training Grants</i>			
Proposition 39 Pre-Apprenticeship support, training and placement grants	California Workforce Development Board	Job training/workforce development	2013/14 - ***\$3 2014/15 - ***\$3 2015/16 - ***\$3 2016/17 - ***\$3 2017/18 - ***\$3
Energy Corps Apprenticeship Program	California Conservation Corps	Job training/workforce development	2013/14 - \$5 2014/15 - \$5 2015/16 - \$5.4 2016/17 - \$5.5 2017/18 - \$5.7

Program	State Agency	Category	Budget (in millions)
Community College Workforce and Economic Development Division Programs	California Community Colleges Chancellor's Office (CCCCO)	Job training/workforce development	*Receives 12.8% of CCCCCO Proposition 39 Energy Program funds
Job Data Collection and Analysis			
Proposition 39 Jobs Reporting	California Workforce Development Board	Jobs Data Collection and Analysis	***Unfunded mandate, uses funding from Prop 39 Pre-Apprenticeship support, training and placement grants
Citizens Oversight Board Staff and Audit Functions			
Citizens Oversight Board		Staff and audit functions	Not funded through Prop 39

Source: Citizens Oversight Board

As noted above, the Community College job training and workforce development programs were not directly funded by Proposition 39, but rather funded by a percentage of the overall funding provided to the Chancellor's Office. Additionally, the collection and analysis of jobs data by the California Workforce Development Board was funded by a percentage of Pre-Apprenticeship training and placement grants. Finally, staff support for the Citizens Oversight Board and funding to perform CCEJA program audits were not funded directly by Proposition 39, but rather through the Energy Commission's budget.

The following tables provide a six-year overview of results at K-12 schools and community colleges, as well as important economic and fiscal information related to the CCEJA programs.

Table 1-2 shows that although the K-12 Proposition 39 Program was slow to ramp up, it increased in size and impact each year. Between December 2015 and June 2016, the number of completed EEPs increased by 35, representing an increase of 206%.

Between June 2016 and June 2017, the number of completed EEPs increased by another 122, representing an increase of 235% for that 12-month period. Between June 2017 and June 2018, the number of completed EEPs increased by another 118, representing an increase of 68% for that 12-month period. Between June 2018 and June 2019, the number of completed EEPs increased by another 230, representing an increase of 79% for that 12-month period. Between June 2019 and June 2020, the number of completed EEPs increased by 440, representing an increase of 84% for that 12-month period. Cumulatively, between December 2015 and June 2020, the total number of completed EEPs increased by over 5500%.

Table 1-2: Cumulative Summary of K-12 Final Project Completion Reports

	totals as of Dec. 2015	Program totals as of June 2016	Program totals as of June 2017	Program totals as of June 2018	Program totals as of June 2019	Program totals as of June 2020
Number of Completed EEPs	17	52	174	292	522	962
<i>Spending</i>						
Total Gross Project Cost	\$8.6 million	\$34 million	\$116 million	\$190 million	\$367 million	\$673 million
Total P-39 Share	\$6.2 million	\$27 million	\$97 million	\$153 million	\$318 million	\$585 million
Leveraged Funding	\$2.4 million	\$7 million	\$19 million	\$37 million	\$49 million	\$88 million
<i>Energy Savings</i>						
kWh Savings	3,005,227	13,804,252	42,820,936	63,925,295	125,712,267	224,174,133
Therm Savings	3,352	54,641	146,126	225,828	344,789	620,828
GHG emissions reduction	1,056 tons	5,080 tons	15,624 tons	22,191 tons	43,060 tons	76,821 tons
Savings-to- investment ratio (SIR)	1.26	1.44	1.36	1.36	1.37	1.38

Source: California Energy Commission

The energy savings associated with these EEPs also increased dramatically, from 3,005,227 kilowatt-hours (kWh) saved in December 2015 to 13,804,252 kWh saved in June 2016, representing an increase of over 350%. Between June 2016 and June 2017, the total kWh savings increased by another 210% for that 12-month period, to 42,820,936 kWh saved. Between June 2017 and June 2018, the total kWh savings increased by another 49% for that 12-month period, to 63,925,295 kWh saved. Between June 2018 and June 2019, the total kWh savings increased by another 97% for that 12-month period, to 125,712,267 kWh saved. Between June 2019 and June 2020, the total kWh savings increased by another 78% for that 12-month period, to 224,174,133 kWh saved. Cumulatively, between December 2015 and June 2020, the total number of kWh savings increased by over 7,350%.

Finally, as shown in **Table 1-2**, these EEPs created considerable GHG savings. Between December 2015 and June 2016, GHG savings increased from 1,056 tons to 5,080 tons, representing an increase in GHG savings of over 380%. Between June 2016 and June 2017,

GHG savings increased from 5,080 tons to 15,624 tons, representing an increase in GHG savings of over 208% for that 12-month period. Between June 2017 and June 2018, GHG savings increased from 15,624 tons to 22,191 tons, representing an increase in GHG savings of over 42% for that 12-month period. Between June 2018 and June 2019, GHG savings increased from 22,191 tons to 43,060 tons, representing an increase in GHG savings of over 94% for that 12-month period. Between June 2019 and June 2020, GHG savings increased from 43,060 tons to 76,821 tons, representing an increase of 78% for that 12-month period. Cumulatively, between December 2015 and June 2020, the total amount of GHG savings increased by over 7,175%.

Table 1-3 shows that while projects at the Community Colleges were also slow to start, they continued to develop over time and program benefits also significantly increased. Between December 2015 and June 2016, the number of completed projects increased from 108 to 260, with the additional 152 representing an increase of over 140%. Between June 2016 and June 2017, the number of completed projects increased from 260 to 384; the additional 124 projects represent an increase of an additional 48%. Between June 2017 and June 2018, the number of completed projects increased from 384 to 534; the additional 150 projects represent an increase of an additional 39%. Between June 2018 and June 2019, the number of completed projects increased from 534 to 818; the additional 284 projects represent an increase of an additional 53%. Cumulatively, between December 2015 and June 2019, the total number of completed projects at the Community Colleges increased by 657%.

The energy savings associated with completed projects in the community college system also increased dramatically, from 14,920,769 kWh saved in December 2015 to 31,170,157 kWh saved in June 2016, representing an increase of approximately 109%. Between June 2016 and June 2017, the total kWh savings increased by another 28%, to 39,995,939 kWh saved. Between June 2017 and June 2018, the total kWh savings increased by another 31%, to 52,576,014 kWh saved. Between June 2018 and June 2019, the total kWh savings increased by another 71%, to 90,077,554 kWh saved. Cumulatively, between December 2015 and June 2019, the total number of kWh savings increased by almost 504%.

In 2019-20, remaining Proposition 39 funds of \$5.8 million supported an additional 25 projects at 16 Community College Districts. These projects are expected to result in annual savings of 1.7 million kWh of electricity and 8,000 gas therms, resulting in \$244,000 in annual energy cost savings and \$6,541 in one-time energy incentives at Community Colleges.

Table 1-3: Cumulative Summary of Community College Final Project Reports

	Program totals as of 2015	Program totals as of 2016	Program totals as of 2017	Program totals as of 2018	Program totals as of 2019	Program totals as of 2020*
Number of closed-out projects	108	260	384	534	818	843
Spending						
Total Gross Project Cost	\$ 25.6 million	\$ 56.3 million	\$ 74.0 million	\$ 104.7 million	\$ 207.5 million	213.4 million
Total P-39 Share	\$ 17.7 million	\$ 36.4 million	\$ 49.5 million	\$ 74.5 million	\$ 142.4 million	\$148.3 million
Total Leveraged Funding with incentives	\$ 3.5 million	\$ 6.2 million	\$ 7.7 million	\$ 9.2 million	\$ 13.6 million	\$13.6 million
Energy Savings						
kWh Savings	14,920,769	31,170,157	39,995,939	52,576,014	90,077,554	91,777,554
Therm Savings	175,042	315,790	567,906	895,909	1,484,265	1,492,265

*Remaining Proposition 39 funds of \$5.8 million supported 25 additional projects at 16 Community College Districts.

SB 110 Program Changes

The CCEJA passed initially as a five-year program, beginning in fiscal year 2013-2014 and ending in fiscal year 2017-2018. In 2017, several LEAs expressed concern with the program schedule, noting that it effectively limited the availability of program funds to four years. In response to these concerns, the Legislature approved Senate Bill 110 (SB 110) (Committee on Budget and Fiscal Review, Chapter 55, Statutes of 2017), which extended the overall CCEJA program beyond 2018 as the Clean Energy Job Creation Program. SB 110 also removed the direct allocation of funds collected from the Proposition 39 tax change and required, after June 30, 2018, that any remaining Proposition 39 K-12 funds from the original five-year program be awarded through competitive grant and loan programs as follows:

- \$75 million allocated for the School Bus Replacement Program, with priority given to older buses and buses operating in disadvantaged communities, and to school districts with a majority of students eligible for free or reduced-price meals in the prior year.
- Up to \$100 million to the ECAA-Ed account for loans to LEAs on a competitive basis, with priority given to LEAs with a higher percentage of students eligible for free or reduced-price meals in the prior year, energy savings, geographic diversity, and diversity in the size of LEA student populations.

- Any remaining funds would be distributed to LEAs through a Proposition 39 K-12 competitive grant program based on size.

On March 1, 2018, the Energy Commission estimated that \$114.5 million in unrequested funds remained in the Clean Energy Job Creation Fund from the Proposition 39 K-12 Program. Based on this estimate, \$75 million was available to the School Bus Replacement Program and up to \$39.5 million was available to the ECAA-Ed Competitive Loan Program. No additional funds remained to support a K-12 Competitive Grant Program.

Commencing with the 2018-19 Fiscal Year, SB 110 required the Legislature to appropriate any additional funding for the Clean Energy Job Creation Program through the annual budget process. However, no additional funding allocations were provided by the Legislature after the 2017-18 fiscal year. If the Legislature provides additional funding in the future, SB 110 requires that eleven percent be allocated to the community college districts, and remaining funds be allocated to LEAs.⁸

School Bus Replacement Program

SB 110 established the School Bus Replacement Program to replace the oldest diesel school buses or those operating in disadvantaged and low-income communities throughout California with battery-electric, and gave priority to school districts or county offices of education with a majority of students eligible for free or reduced-price meals. The Energy Commission began developing the program in early 2018 and provided a briefing on the conceptual program design to the COB in March 2018. The COB discussed the program options and provided recommendations to the Energy Commission. The one-time \$75 million allocation from Proposition 39 supported the purchase of battery-electric school buses at school districts, county offices of education, and joint power authorities in four regions: Northern California, Central California, Southern California, and Los Angeles County. In addition, funding from the Clean Transportation Program was also awarded to provide charging infrastructure necessary to operate the buses. Finally, the California Energy Commission also provided \$1 million in Clean Transportation Program funds for workforce training and development, which includes awards to local community colleges to develop and implement curricula for school districts that received awards for electric school buses. For more information on the School Bus Replacement Program, see Chapter 3.

ECAA-Ed Competitive Program

The ECAA-Ed Financing Program is a revolving loan program funded by the Clean Energy Job Creation Fund that provides zero percent financing to eligible entities for energy efficiency, demand reduction, and energy generation projects. SB 110 established the ECAA-Ed Competitive Loan Program to fund energy project loans to LEAs on a competitive basis. The Program Opportunity Notice (PON) solicitation (PON-18-101) for approximately \$38.5 million

⁸ SB 110 requires that any future allocations to LEAs be prioritized based on the LEA's percentage of students eligible for free or reduced-price meals in the prior year, geographic diversity that provides funding to all regions of the state, and workforce needs determined by the California Workforce Investment Board and local workforce investment boards.

was released in February 2018, with a final application date of May 31, 2019. Seven applications received funding, totaling \$6.7 million, and are currently in construction. Because not all funds were awarded, a second ECAA-Ed competitive solicitation, PON-19-101, was released with a final application date of June 29, 2020. Due to the interruption and hardship caused by the COVID-19 pandemic, the Energy Commission extended the deadline to submit applications from June 29, 2020, to August 27, 2020. For more information on the ECAA-Ed Competitive Loan Program, see Chapter 3.

AB841 School Energy Efficiency Stimulus Program

Although the Proposition 39 Program is winding down, the School Energy Efficiency Stimulus Program (SEES) was created in 2020 by Assembly Bill (AB) 841 (Chapter 372, Statutes of 2020). The SEES will provide funding to public schools within the service territories of the large electric and natural gas utilities in California.

The SEES Program includes two new grant programs, the School Reopening Ventilation and Energy Efficiency Verification and Repair Program (SRVEVR), and the School Noncompliant Plumbing Fixture and Appliance Program (SNPFA). The SRVEVR Program will provide funding to LEAs for HVAC assessment, maintenance and adjustment, filter replacement, carbon dioxide monitor installations, and other repairs, replacements and improvements to HVAC systems. SVREVR will prioritize investments in facilities in underserved communities and those near freeways or industrial facilities. The SNPFA Program will provide grants to local educational agencies and state agencies to replace noncompliant plumbing fixtures and appliances that fail to meet water efficiency standards and prioritize funding for underserved communities.

A public workshop on the new programs was held in January 2021. The Energy Commission expects to adopt the final program guidelines and begin approving applications by May 1, 2021.

CHAPTER 2: Citizens Oversight Board Mandates, Meeting History, and Audit Progress

The Citizens Oversight Board is composed of nine members: three members appointed by each the Treasurer, the Controller, and the Attorney General. The California Public Utilities Commission and California Energy Commission (Energy Commission) also each designate ex-officio (non-voting) members to serve on the board. Currently the board has six members and three vacancies.

Mandates of the Citizens Oversight Board

[Assembly Bill 2227 \(Quirk, Chapter 683, Statutes of 2014\)](#) defines the Board's main responsibilities and adds these to the Public Resources Code.⁹

Those duties include:

1. Annually review all expenditures from the Job Creation Fund
2. Commission and review an annual independent audit of the Job Creation Fund and of a selection of completed projects to assess the effectiveness of the expenditures in meeting the objectives of this division
3. Publish a complete accounting of all expenditures each year, posting the information on a publicly accessible Internet Website
4. Submit an evaluation of the program to the Legislature identifying any changes needed to meet the objectives of this division

The major responsibilities of the Citizens Oversight Board are to produce annual audits, including a program audit of the CCEJA and an independent financial audit of the Clean Energy Job Creation Fund, and to provide an annual report to the Legislature evaluating the overall program. This report represents the Board's annual report to the Legislature. Findings from both the program audit and the financial audit are discussed below.

⁹ Public Resources Code Sections 26210-26217. [Link to PRC Section 26210](#), [Link to PRC Section 26211](#), [Link to PRC Section 26212](#), [Link to PRC Section 26213](#), [Link to PRC Section 26214](#), [Link to PRC Section 26215](#), [Link to PRC Section 26216](#), [Link to PRC Section 26217](#).

Meeting History of the Citizens Oversight Board

Below is a brief description of Citizens Oversight Board meetings that took place in 2020 and early 2021.¹⁰

2020

- February 13, 2020: The Citizens Oversight Board met to review and accept agency reports on prior year activities for the various programs of the Clean Energy Jobs Act. The Board nominated and approved Adrienne Alvord and Randall Martinez as Chair and Vice Chair, respectively.
- April 4, 2020: The Citizens Oversight Board met to approve the fifth annual report to the Legislature.
- August 26, 2020: The Citizens Oversight Board met to review and approve the Program Audit from the State Controller's Office. The Board also received updates on the School Bus Replacement Program and the ECAA-Ed Competitive Loan Program authorized by SB 110.

2021

- February 17, 2021: The Citizens Oversight Board met to review and accept agency reports and data from the Energy Commission and the California Community Colleges Chancellor's Office on the prior year program activities funded by the Clean Energy Jobs Act. The Board nominated and approved Adrienne Alvord and Randall Martinez as Chair and Vice Chair, respectively. Randy Young, appointed by State Controller Betty Yee in early February, participated in his first meeting.
- March 23, 2021: The Citizens Oversight Board met to approve the sixth annual report to the Legislature.

The Financial Audits of the Clean Energy Job Creation Fund and Program Audits of the Clean Energy Jobs Act

In June 2016, the Citizens Oversight Board entered into an interagency agreement with the California State Controller's Office (SCO) to provide Financial Audits of the Clean Energy Job Creation Fund and Program Audits for the California Clean Energy Jobs Act (CCEJA) programs.¹¹ The Financial Audits review the balance sheet and related statement of appropriations, expenditures, and changes in the fund balance to ensure that the financial statements of the Clean Energy Job Creation Fund conform to accounting principles generally accepted in the United States. The Program Audits review the oversight practices of both the

¹⁰ [Link to agendas, minutes, and transcripts of the board meetings](https://www.energy.ca.gov/programs-and-topics/programs/california-clean-energy-jobs-act-proposition-39-k-12-program-1-1) <https://www.energy.ca.gov/programs-and-topics/programs/california-clean-energy-jobs-act-proposition-39-k-12-program-1-1>.

¹¹ [Link to COB audits and other materials](https://www.energy.ca.gov/programs-and-topics/programs/california-clean-energy-jobs-act-proposition-39-k-12-program-1-0) <https://www.energy.ca.gov/programs-and-topics/programs/california-clean-energy-jobs-act-proposition-39-k-12-program-1-0>.

California Energy Commission (Energy Commission) and Community Colleges Chancellor's Office (CCCCO) and audit a selection of completed projects from both CCEJA programs to determine whether they are consistent with the California Public Resources Code and adopted program guidelines.

Previous financial audits found that the Energy Commission's program guidelines and Energy Expenditure Plan Handbook, as well as the Community Colleges Chancellor's Office program guidelines, complied with applicable provisions of the California Public Resources Code (the Code). Furthermore, the audits found that both agencies had adequate controls in place to ensure the completeness and accuracy of reporting forms submitted by program recipients.

The most recent Financial Audit¹² of the Clean Energy Job Creation Fund, conducted in 2019, noted that implementation of the statewide accounting, budget, cash management information technology (IT) system, Financial Information System for California (FI\$Cal), created significant challenges and delays at both the California Conservation Corps and the Community Colleges Chancellor's Office. This, in turn, delayed year-end reconciliations and affected the ability to finalize FY 2017-2018 accounting records and provide supporting documentation. Both agencies sought assistance to resolve Fi\$Cal issues.

The CCEJA Program Audit issued in June 2020¹³ (2020 Program Audit) covered the period from July 1, 2018, through June 30, 2019. The 2020 Program Audit focused on completed projects to determine if they were consistent with the Code and adopted program guidelines.

Table 2-1: 2020 State Controller's Office Audit Summary

Agency Type	Completed Project Costs	Number of Agencies
Local Educational Agencies (LEAs)	\$171,890,450	212
Community College Districts (CCDs)	\$66,985,654	59
Total	\$238,876,104	271

Source: Citizens Oversight Board

From these completed projects, the SCO randomly selected a sample of 17 LEAs and four CCDs with a total of \$45,102,262 in completed project costs, representing approximately 19 percent of completed project costs.

Although the 2020 Program Audit overall showed a high degree of compliance with the Code and adopted program guidelines, some areas of concern were found. The audit found that: six LEAs sole-sourced portions of their project costs; 12 LEAs and four CCDs did not include projected energy savings in the awarded contracts, and four LEAs did not have a signed

¹² [Link to 2019 Financial Audit of the CCEJA](https://www.energy.ca.gov/sites/default/files/2020-05/2019_Financial_Audit_of_the_Clean_Energy_Job_Creation_Fund_ADA.pdf) https://www.energy.ca.gov/sites/default/files/2020-05/2019_Financial_Audit_of_the_Clean_Energy_Job_Creation_Fund_ADA.pdf.

¹³ [Link to the 2020 Program Audit of the CCEJA](https://www.energy.ca.gov/sites/default/files/2020-07/2020_Program_Audit_of_the_Clean_Energy_Jobs_Act_ADA.pdf) https://www.energy.ca.gov/sites/default/files/2020-07/2020_Program_Audit_of_the_Clean_Energy_Jobs_Act_ADA.pdf.

contract; one LEA spent Proposition 39 funds on ineligible expenditures; and nine LEAs submitted final project completion reports after the deadline. The SCO discussed the audit results with the LEAs and CCDs during audit fieldwork and notified them when the audit was complete. Responses from the LEAs and CCDs are included in the final audit.

Regarding sole source issues, several districts cited differences between both the language and requirements of the Public Resources Code, the Proposition 39 program guidelines, and the Public Contract Code that allows districts to enter into contracts for professional services, as well as confusion over which legal requirements districts must follow. Additionally, LEAs have indicated that only a limited number of companies were available to provide needed energy services. Over the course of the Proposition 39 Program, the COB has consistently requested that implementing agencies remind program applicants that sole-sourcing is not permitted.

When an audit finds that project costs were either sole-sourced or incurred prior to the program eligibility period of December 13, 2013, LEAs can file a Summary Review or Formal Appeal with the Education Audit Appeals Panel (EAAP). If the EAAP does not waive or reduce reimbursements or penalties, LEAs must reimburse the California Department of Education (CDE) through a repayment plan.¹⁴

Table 2-2, below, presents the recovery status for local educational agencies that were subject to audit findings from 2017 through 2020 for either sole-source or funds spent prior to the eligibility period starting December 19, 2013. The amount of Proposition 39 recovered funds is available in CDE's Consolidated Entitlement Schedule.¹⁵

¹⁴ For more information, see the [link to the audit appeal process](http://eaap.ca.gov/) <http://eaap.ca.gov/>.

¹⁵ For more information regarding Proposition 39 recovered funds, see the [Consolidated Entitlement Schedule](https://www.cde.ca.gov/fg/aa/ca/prop39cceja.asp) <https://www.cde.ca.gov/fg/aa/ca/prop39cceja.asp>.

Table 2-2: Prop 39 Recovery Status of SCO's Audit Findings for LEAs

Local Educational Agency	Date of SCO Report	Amount of Sole-Source Findings	Amount of Findings for Funds Spent Prior to Eligibility Period / Applied to Ineligible Expenditures*	Total Amount of Findings	CDE's Recovery Status
Bonsall Unified	June 2017	\$106,215	\$0	\$106,215	The funds will be recovered over six years.
Chino Valley Unified	June 2017	\$185,690	\$0	\$185,690	The funds have been recovered.
Happy Camp Union Elementary	June 2017	\$184,441	\$0	\$184,441	Finding was waived through the Summary Review.
Nuvview Bridge Early College High	June 2017	\$0	\$20,485	\$20,485	The funds have been recovered.
Seiad Elementary	June 2017	\$30,710	\$0	\$30,710	The funds have been recovered.
Cambrian Elementary	July 2018	\$17,028	\$0	\$17,028	The invoice is outstanding.
Clovis Unified	July 2018	\$20,300	\$277,681	\$297,981	The invoice is outstanding.
Harmony Union Elementary	July 2018	\$17,705	\$0	\$17,705	The invoice is outstanding.
Learning Works	July 2018	\$1,068	\$0	\$1,068	Reimbursement waived by Summary Review.

CHAPTER 3: Proposition 39 Clean Energy Jobs Act Programs

Energy Project Grant Programs

California Energy Commission's Local Educational Agency K-12 Award Program

The most recent report from the California Energy Commission summarizes results from the start of the Prop 39 K-12 Program in December of 2013 through June 30, 2020. The Energy Commission provided guidelines and administration for the entire K-12 program and was primarily responsible for receiving, reviewing and approving energy expenditure plan (EEPs) applications submitted by eligible Local Educational Agencies (LEAs). Upon EEP approval, the Energy Commission notified the California Department of Education, which then distributed funding on a quarterly basis.

As of June 30, 2020, the California Department of Education reported 2,189 eligible K-12 LEAs in California--these include public school districts, charter schools, three state special schools (e.g. schools for the deaf and blind),¹⁶ and county offices of education. As of June 30, 2020, a total of 1,750 LEAs participated in the program. Together, those 1,750 LEAs submitted 2,121 EEPs for energy efficiency and renewable energy projects at 7,189 school sites, for \$1.542 billion of program funding. An additional \$153.9 million supported project planning. Overall funding is shown in **Figure 3-1**.

Because no additional funding allocations were provided from the Legislature after the 2017-18 fiscal year, no new EEPs were approved after June 30, 2018. Any modifications to EEPs after June 30, 2018 resulted from modifications to existing approved EEPs, the closure of LEAs, or other adjustments to existing funding.

¹⁶ California Department of Education, [Link to State Special Schools information](https://www.cde.ca.gov/sp/ss/) <https://www.cde.ca.gov/sp/ss/>.

Figure 3-1: Proposition 39 K-12 Program Overall Funding Status as of June 30, 2020

Source: California Energy Commission

K-12 participation in the program was geographically diverse, with LEAs in all of California's 58 counties benefitting from the program overall. The highest LEA participation occurred in the counties of Alpine, Calaveras, Colusa, Del Norte, Glenn, Lake, Merced, Modoc, San Benito, San Luis Obispo, Sierra, Siskiyou, and Yuba, where the participation rate was 100 percent. Participation by each county can be seen in **Table 3-1**.

LEAs are required to provide annual progress reports on approved EEPs until all energy measures within an approved EEP are completed. LEAs must then submit a final project completion report 12 to 15 months after the project completion date. This includes a full year of energy usage data after all approved energy measures are installed.

As shown in **Table 3-2**, from the program launch through June 30, 2020, LEAs completed their EEPs and submitted 962 final project completion reports. These completed EEPs represent \$673 million in gross project costs. Of this amount, the Proposition 39 K-12 Program provided roughly \$585 million in grant funds, and LEAs contributed the remaining \$88 million in leveraged funding. The reported annual saved energy usage for these completed projects is 224,174,133 kWh and 620,828 therms, which is equivalent to roughly 76,821 tons of greenhouse gas emissions¹⁷ reduction.

Analyses of these reports show that the combined savings-to-investment ratio (SIR) for these 962 projects is \$1.38 in returns for every \$1.00 invested.

¹⁷ Based on 653 lbs of CO₂e/MWh and 11.69 lbs of CO₂e/therm.

Table 3-2: Cumulative Summary of Final Project Completion Reports

	Previous Report (as of June 2016)	Previous Report (as of June 2017)	Previous Report (as of June 2018)	Previous Report (as of June 2019)	Previous Report (as of June 2020)
Number of Completed EEPs	52	174	292	522	962
<i>Spending</i>					
Total Gross Project Cost	\$34 million	\$116 million	\$190 million	\$367 million	\$673 million
Prop. 39 Share	\$27 million	\$97 million	\$153 million	\$318 million	\$585 million
Leveraged Funding	\$7 million	\$19 million	\$37 million	\$49 million	\$88 million
<i>Energy Savings</i>					
kWh Savings	13,804,252	42,820,936	63,925,295	125,712,267	224,174,133
Therm Savings	54,641	146,126	225,828	344,789	620,828
GHG emissions reduction	5,080 tons	15,624 tons	22,191 tons	43,060 tons	76,821 tons
Savings-to-investment ratio (SIR)	1.44	1.36	1.36	1.37	1.38
Total Cost Savings	\$2.4 million	\$7.8 million	\$11.9 million	\$23.4 million	\$42.8 million

Source: California Energy Commission

California Community Colleges Chancellor's Office Clean Energy Jobs Act Implementation

The Community Colleges Chancellors Office used the CCEJA to support energy projects throughout the state. While no new funds were allocated to the Community Colleges Chancellor's Office since fiscal year 2017-18, the program continues to gather data and close out projects. In 2019-20, remaining Proposition 39 funds of \$5.8 million supported an additional 25 projects at 16 Community College Districts. This investment is projected to result in annual savings of 1.7 million kWh of electricity and 8,000 gas therms, resulting in \$244,000 in annual energy cost savings and \$6,541 in one-time energy incentives at Community Colleges.

The Proposition 39 Program has been successful at Community College Districts. Comparing energy use data from 2017-18 to baseline data from 2012-13 indicates that system-wide energy use has declined by just over 6 percent across the state. **Table 3-3** shows the system-

wide energy usage and savings for the Community College system since the program started in fiscal year 2012-13.

Table 3-3: Community Colleges System-wide Energy Usage and Savings

Fiscal Year	Average British Thermal Units Per Gross Square Foot Per Week	Percent Reduction of Baseline Year
2012-2013	1,606	Baseline Year
2018-2019	1,489	-7.29% from Baseline Year

Source: California Community College Chancellor's Office

California Community Colleges Board of Governor's Sustainability and Energy Awards

The California Community Colleges Board of Governors established the Energy and Sustainability Awards in 2012 to honor leaders and exemplary energy and sustainability efforts. The awards are presented each year to recognize the ongoing efforts of community colleges to achieve environmental sustainability. The award categories recognize Excellence in Energy and Sustainability for Innovative Projects, Faculty/Student Initiatives, and Sustainability Champion. The 2020 award winners include projects and faculty throughout the state, including Contra Costa Community College District, Citrus Community College District, Hartnell Community College District, Los Angeles Community College District, and Rancho Santiago Community College District.¹⁸

Loans and Technical Assistance Programs

California Energy Commission's Energy Conservation Assistance Act Education Subaccount and SB110 Competitive Loan Program

The ECAA loan program has existed since 1979, providing loans totaling approximately \$442 million to 882 entities, and technical assistance since 1982. In 2013, the Energy Conservation Assistance Act – Education (ECAA-Ed) was established within the ECAA program exclusively for K-12 schools. Both ECAA and ECAA-Ed have been highly successful and well received. The ECAA-Ed revolving loan program continued offering its zero percent financing to eligible Local Education Agencies to finance energy efficiency, demand reduction, and energy generation projects at K-12 local educational agencies and community college districts. To date, the program has a zero percent default rate.

In 2017, SB 110 (Budget Committee, Chapter 55, Statutes 2017) modified the ECAA-Ed program to a competitive solicitation process, with funding distributed by region, size of the

¹⁸ For more information, see the [Link to the California Community College Board of Governors Meeting Documents](https://go.boarddocs.com/ca/cccchan/Board.nsf/goto?open&id=BW7SJJ6F1993) <https://go.boarddocs.com/ca/cccchan/Board.nsf/goto?open&id=BW7SJJ6F1993>.

local educational agency (LEA), student participation in the Free and Reduced Price Meals (FRPM) program, and projected project energy savings. The allocation for the ECAA-Ed Competitive Loan Program is from the remaining Proposition 39 program funds after fully funding the School Bus Replacement Program.

The first ECAA-Ed competitive solicitation for approximately \$38.5 million, Energy Commission PON-18-101, was released February 5, 2019, with a final application date of May 31, 2019. The Energy Commission received 21 applications. After administrative screening and review, applications were technically reviewed, then scored and ranked based on the criteria established in SB110. Seven applications received funding, totaling \$6.7 million, and are currently in construction.

As not all funds were awarded, a second ECAA-Ed competitive solicitation, Energy Commission PON-19-101, was released with a final application date of June 29, 2020. Due to the interruption and hardship caused by the COVID-19 pandemic, the Energy Commission extended the deadline to submit applications from June 29, 2020, to August 27, 2020.

As of June 30, 2020, the Energy Commission approved 42 ECAA-Ed Loans from both the original program funds of fiscal years 2013-14 and 2014-15 as well as the SB 110 Competitive Loan Program funds from fiscal year 2019-20. A total of \$64.5 million of the \$89 million from those funds have been approved. Of the 42 approved loans, 34 represent completed projects totaling \$56.1 million of funding. Of this amount, \$52.4 million was disbursed to loan recipients, and the remaining \$3.8 million was liquidated and returned to ECAA-Ed account.

Table 3-4 provides an overview of program loans and associated status.

Table 3-4: ECAA-Ed Financing Loan Status Overview as of June 30, 2020

Loan Status	# of Loans	Loan Funds Approved (in millions)
Loans with Final Project Completion Reports	29	\$43.9
Loans with Outstanding Completed project Final Reports	3	\$4.5
Completed Loan Projects (Final Reports due after 6/30/20)	2	\$4.0
Loans Still in Construction	8	\$3.7
Totals	42	\$56.1

Source: California Energy Commission

Loan recipients are required to report post-installation energy consumption and project savings after project completion. Thirty-one loan recipients submitted post-installation reports, and the reported total annual energy savings were 21.514 million kWh and 15,286 therms, which is equivalent to 7,114 tons of reduced greenhouse gas emissions.

California Energy Commission's Bright Schools Program

The Bright Schools Program provides local educational agencies and community college districts with technical assistance to identify energy efficiency measures in existing facilities

and apply for Proposition 39 K-12 Program funding. The Bright Schools Program received its funding allocation directly from the ECAA program--of \$56 million allocated to ECAA, \$5.5 million was allocated to the Bright Schools Program. It did not receive funding in fiscal years 2015-16, 2016-17, or 2017-18.

As of June 30, 2020, 200 technical assistance requests were approved, totaling over \$3.5 million. The average cost for a technical assistance request was \$16,500, with a limit of \$20,000 per request. Eighty Bright Schools Program energy audit reports were successfully used to support Proposition 39 K-12 energy expenditure plans.

Table 3-5 shows the status and amount of related funding for schools that received technical assistance energy studies.

Table 3-5: Bright Schools Program Technical Assistance Overview as of June 30, 2020

Technical Assistance (TA) Status	# of Program Participants	Amount Spent
Completed	195	\$2,777,910
In Progress	2	N/A
Withdrawn	3	\$28,225
Contractor Administration	N/A	\$567,371
TOTALS	200	\$3,373,506

Source: California Energy Commission

The completed energy studies identified total annual energy savings of 28,647 MWh and 305,025 therms, which is equivalent to 11,135 tons of reduced greenhouse gas emissions.

Workforce Training Grant Programs

California Workforce Development Board Proposition 39 Pre-Apprenticeship Support, Training and Placement

The California Workforce Development Board (CWDB) invested \$13.3 million in Proposition 39 program funds from 2014 through June 30, 2018 to develop 12 construction pre-apprenticeship programs throughout the state that each bring together labor, community, education, and workforce organizations in a partnership to serve disadvantaged Californians. These pre-apprenticeship pilot programs advanced equity by providing energy-efficiency focused workforce-training and coordinating a range of supportive services to prepare at risk youth, women, veterans, ex-offenders, and other disadvantaged job seekers apply for, enter, and successfully complete a state-registered building trade apprenticeship program. This

program was one of the most innovative aspects of the Clean Energy Jobs Act, and is consistently looked at by other states as a model for clean energy industry training.¹⁹

Using the National Building Trades Multi-Craft Core Curriculum (MC3), the 12 partnerships prepared participants for a bright future by providing an industry-valued credential (the MC3 certificate) and connecting them with a state registered apprenticeship program for the next step in their construction careers. According to the CWDB, over 2,700 individuals were enrolled in the pre-apprenticeship program, and ten of the 12 pre-apprenticeship training programs exceeded their enrollment targets, and the others reached 90-95% of their target. The programs also sustained high graduation rates – approximately 78%, or nearly 2,100 individuals completed training and earned the MC3 certificate.²⁰ After program completion, approximately 79%, or 1,660 pre-apprenticeship graduates, found meaningful placement opportunities as follows:

- State-registered apprenticeship: 41% (683)
- Construction or energy-efficiency specific employment: 23% (372)
- Post-secondary education: 10% (166)
- Other employment: 26% (439)

Building on the success of the pre-apprenticeship training program developed under Proposition 39, the CWDB is now scaling up its High Road Construction Careers (HRCC) initiative with funding from the Road Repair & Accountability Act of 2017 (Senate Bill 1).²¹ The HRCC: SB 1 program is investing in 11 regional-scale training partnerships covering all 58 California counties, with cohorts for the multi-craft pre-apprenticeship having already begun in some regions.²² Training partnerships will also be supported by an investment in technical assistance. In addition, the CWDB is reviewing applications to the HRCC: CCI Program, which will invest up to an additional \$5.6M of Greenhouse Gas Reduction Fund (GGRF) monies into these regional-scale training partnerships delivering multi-craft pre-apprenticeship. The CWDB expects to announce awards by April 2021.²³ Beyond expanded coverage and capacity to serve

(See also: “High Road Construction Careers regional map,” <https://cwdb.ca.gov/initiatives/hrcc/high-road-construction-careers-regional-map/>.)

23 Request for Applications (RFA) for the HRCC: CCI Program, https://cwdb.ca.gov/wp-content/uploads/sites/43/2021/01/CWDB-HRCC-CCI-RFA-62330-January-2021_ACCESSIBLE.pdf.

more disadvantaged Californians, this next phase of the HRCC initiative will more directly connect pre-apprentices to California's climate change efforts – namely by requiring all programs to teach the Green Construction module of the MC3 (which is otherwise an elective course) and to report on extra-curricular activities (e.g., site visits, hands-on projects, guest lectures, etc.) that support climate change mitigation and adaptation.

California Conservation Corps' Energy Corps Training Program

The Board no longer receives reports from the California Conservation Corps and the information presented below has not changed since the last report in March 2018.

The California Conservation Corps' (CCC) Energy Corps training program received Proposition 39 funding through June 30, 2018, and thereafter received funding through the Greenhouse Gas Reduction Fund (GGRF). The CCC provided a final report to the COB in March 2018. In February 2019, CCC staff indicated that they were continuing to install energy efficient lamps, controllers, ballasts and other equipment purchased by LEAs with Proposition 39 funds; with GGRF covering labor costs.

The CCC training program funded by Proposition 39 included three categories of training: energy opportunity surveys/ energy audits, energy efficiency retrofits and renewable energy work, and educational programs. Energy Corps members (youth aged 18 to 25, as well as recently returned veterans up to age 29) provided energy surveys and performed retrofit work for schools and public agencies in partnership with energy-efficiency firms. With funding from Proposition 39, the CCC trained 708 Corps members to conduct energy surveys and trained another 408 Corps members to perform energy efficiency retrofits. Altogether, from FY 2013-14 through FY 17-18, the CCC completed 93 retrofit projects involving more than 124,000 lighting fixture replacements and more than 8,000 control retrofits that save schools more than 6.5 million kWh per year. In addition, the CCC completed more than 1,300 energy surveys at more than 13,000 buildings, representing over 79 million square feet. These surveys provided detailed information about energy systems and energy use data and represent the largest data set of energy use and efficiency information about K-12 schools ever collected in California.

California Community College Workforce and Economic Development Program

The information below from California Community Colleges Chancellors Office represents program results through 2019.

The Community College Workforce and Economic Development Program received 12.8% of the California Community College Proposition 39 annual fund allocation for use in job training and workforce development projects. This amount totals more than \$27.9 million from fiscal year 2013-14 through fiscal year 2017-18.

The funds were divided into grants for community colleges to purchase new equipment, create and improve student curriculum, and provide professional development for faculty to prepare students for jobs in the clean energy sector. The program also supported regional collaboration in the energy, construction and utility sectors, including the development of partnerships and networks to support continued student and faculty success.

For the 2018-19 academic year, the community college workforce program has distributed 2,350 certificates for completing 6-18 units, 4,117 certificates for completing 18 units or more, and 887 other degrees and certifications including industry apprenticeship certifications. Another 1,619 students received Associate of Arts/science degrees. Approximately 8,973 community college students statewide participated in these programs.

Proposition 39 Job Creation

The estimates of employment and economic activity from the California Workforce Development Board represent program results through 2018.

The California Clean Energy Jobs Act (CCEJA) created significant economic and fiscal benefits throughout the program. As shown in **Table 3-6**, the California Workforce Development Board estimates that through the end of 2018, more than 19,812 total jobs were created through the Energy Commission's K-12 Proposition 39 Award Program.²⁴ This included 8,702 direct jobs, 3,811 indirect jobs, and over 7,299 induced jobs. Any funding changes after 2017-2018 were primarily a result of amendments or cancellations to existing EEPs, LEA closures, or other adjustments to existing funding. Because no additional funding allocations were distributed after the 2017-2018 fiscal year, the employment estimates through the end of 2018 remain unchanged. Nevertheless, the substantial investments from the K-12 program have increased economic activity and employment, on top of energy savings and greenhouse gas emissions that would not have otherwise occurred.

²⁴ California Energy Commission, [Link to February 19, 2019 Proposition 39 Jobs Report](https://www.energy.ca.gov/filebrowser/download/161)
<https://www.energy.ca.gov/filebrowser/download/161>.

Table 3-6: Economic and Employment Impacts of Proposition 39 Grants Calculated through 2018

Proposition 39 grants \$1.5 billion (2016 dollars)	Economic Activity (2016 dollars)	Employment (number of jobs created)
Direct Jobs (e.g. electricians installing new systems at schools)	\$1.481 billion	8,702
Indirect Jobs (e.g. suppliers of energy equipment used in projects)	\$711.3 million	3,811
Induced Jobs (e.g. workers in retail or restaurant industries who benefit from spending by direct workers)	\$1.156 billion	7,299
Total	\$3.349 billion	19,812

SB 110 School Bus Replacement Program

School Bus Replacement Program

Senate Bill 110 appropriated the remaining funds from the Proposition 39 K-12 program to establish the School Bus Replacement Program at the Energy Commission. The bill provided one-time funding of \$75 million to replace older diesel-powered school buses with battery-electric school buses in disadvantaged and low-income communities throughout California.

To allow a wider coverage of the program the funds were distributed between four regions in California: Northern California, Central California, Southern California, and Los Angeles County. Additional funding of almost \$14 million from the Energy Commission's in Clean Transportation Program were leveraged to provide the necessary charging infrastructure schools would need to operate the buses. Also, \$1 million in Clean Transportation Program funds were set aside for workforce training and development to ensure proper maintenance of the buses and infrastructure in the years to come.

The Energy Commission received more than 200 applications for more than 1,600 diesel school buses requested for replacement, some buses as old as 1978. Individual buses were then evaluated based on three factors: age of bus, applicant's percentage of FRPM recipients, and applicant's disadvantaged community score according to the CalEnviroScreen 3.0. From the applications received, an initial list of ranked buses was released in November 2018.

The second phase of the program included selecting a manufacturer or dealer that could design, construct, and deliver electric school buses. In November 2018 a solicitation was released to establish a bulk purchase price for replacement buses. Applications were evaluated and scored for the technical evaluation portion based on the following criteria: relevant experience and qualifications; project readiness and implementation; client references; battery and fuel range; warranty, service, and support; innovation; economic benefits to California; and ability to leverage funding. Applications passing the technical evaluation advanced to the next screen, where the lowest-cost bid was selected for each school bus type (Type A, Type C, Type D, and each type with or without chair lifts). The bus bid forms were ranked in order from lowest to highest cost per bus by bus type.

Table 3-7 shows a breakdown of each awarded manufacturer's bid amount for each bus type. The Lion Electric Co. was the awardee for the Type A electric school bus without wheelchair lift, and the Type C and D electric school buses with and without wheelchair lift. A-Z Bus Incorporated was the awardee for electric school bus Type A with wheelchair lift.

Table 3-7: School Bus Replacement Program Manufacturers' Bid Amounts

Applicant	Bus Type	Bid Amount
The Lion Electric Co.	Type A Without Chair Lift	\$269,489
A-Z Bus Sales, Inc. – California (Micro Bird)	Type A With Chair Lift	\$291,524
The Lion Electric Co.	Type C Without Chair Lift	\$319,284
The Lion Electric Co.	Type C With Chair Lift	\$327,727
The Lion Electric Co.	Type D Without Chair Lift	\$330,109
The Lion Electric Co.	Type D With Chair Lift	\$337,467

Source: California Energy Commission

Once manufacturers were selected, funding was allocated based on bid price using the rank list to determine which applicants would be awarded funding for new buses. From the initial rank list of buses, the CEC funded 235 electric school buses. The applicants received funding for the replacement school bus, with an additional \$60,000 in infrastructure funding per bus from the Clean Transportation Program/Alternative Renewable Fuel and Vehicle Technology Program.

Table 3-8 shows a breakdown of the number of awardees, number of buses awarded, and the total bus and infrastructure awards in each of the four regions. Nearly 90 percent of the awardees are in disadvantaged communities.

Table 3-8: Description of School Bus Replacement Program Awards

Region	Number of Awardees	Number of Buses Awarded ²⁵	Total Bus Award	Total Infrastructure Award
North	18	59	\$18,757,482	\$3,600,000
Central	23	58	\$18,656,366	\$3,420,000
Los Angeles	15	61	\$18,695,665	\$3,660,000
South	11	57	\$18,590,844	\$3,420,000
Totals	66	235	\$74,700,357	\$14,100,000

Source: California Energy Commission

In July 2019, the CEC approved most of the electric school bus replacement and manufacturing agreements. **Table 3-9** shows the Energy Commission's timeline for anticipated bus delivery. At the close of 2019, 11 of the 235 buses funded were delivered to school districts. By the end of 2020, 61 of the 235 buses were delivered to school districts. By September 2022, it is anticipated that all buses are will be delivered.

Table 3-9: Estimated Bus Delivery Timeline

Cumulative Percentage of Delivered Buses	Latest Bus Delivery Date
5%	12/31/2019
25%	12/31/2020
50%	12/31/2021
100%	9/30/2022

Source: California Energy Commission

²⁵The number of buses awarded to each region differed based upon the cost of each bus type requested in each school district.

Benefits

The School Bus Replacement Program will minimize adolescent bus rider exposure to hazardous emissions while reducing tailpipe emissions of smog-forming nitrogen oxides by 98,000 lbs. and toxic diesel soot by more than 2,500 lbs.²⁶

An analysis of cost savings of electric school buses over their diesel counterparts indicates a lifetime fuel savings cost of about \$28,000, or roughly 27 percent savings per bus.²⁷

Furthermore, vehicle-to-grid (V2G) enabled electric school buses have the potential to reduce electricity generation related greenhouse gas emissions by 1,420 tons of CO₂ equivalence, and help grid operators integrate renewable generation by providing excess capacity and bulk storage when needed. School buses have been determined to be a good application for V2G because of the large batteries, predictable duty cycles, and long down times throughout the day when energy demand is greatest. These factors can also provide on-site resiliency in the case of an emergency power shutoff by the utility or during a catastrophic event such as a wildfire.

For more information on the School Bus Replacement Program, see the Energy Commission's Proposition 39 2019-20 Progress Report in Appendix A.

²⁶ Toxic diesel soot is fine particulate matter that is 2.5 microns or less in diameter.

²⁷ Based on 13,000 average annual miles.

CHAPTER 4: Overall Findings and Recommendations

As discussed in the chapters above, the administration of Proposition 39 involves multiple agencies and institutions across the state. The Citizens Oversight Board is the only body involved in the program that has the opportunity to work across all of these agencies.

As such, we are in a good position to offer high-level findings and recommendations for the Proposition 39 program. We hope these recommendations are useful to both legislators and agency staff.

Findings

The Citizens Oversight Board continues to be impressed with the outcomes from the California Clean Energy Jobs Act programs. This year significantly more projects were completed, and project benefits continue to accrue statewide. We are especially impressed by the geographic diversity of these projects throughout the state, as well as the high participation rates among disadvantaged and small, rural schools. We believe Proposition 39 has demonstrated success across multiple categories: energy savings, job creation, job training, and improvements to classroom environments. It has also resulted in significant economic and employment impacts throughout the state, including over \$3.3 billion in economic activity and an estimated 19,812 direct, indirect, and induced jobs, many of which are local in nature.

We also remain impressed with the job training aspects of this program across the California Conservation Corps, Community Colleges, and Workforce Development Board. The pre-apprenticeship program run through the California Workforce Development Board (CWDB) is especially impressive and has become a model for other states looking to provide targeted, effective job and workforce training. This program has advanced equity by providing energy-efficiency focused workforce-training and coordinating a range of supportive services to prepare at-risk youth, women, veterans, ex-offenders, and other disadvantaged job seekers to apply for, enter, and successfully complete a state-registered building trade apprenticeship program. This puts them in a position to gain high-quality, career-track jobs in the building trades. The Citizens Oversight Board appreciates that this successful workforce development program developed under Proposition 39 is expanding statewide through the CWDB's High Road Construction Careers Initiative, to support the continued development of a skilled and diverse workforce in California.

Given the success of Proposition 39, the Citizens Oversight Board recommends the Legislature continue to appropriate funding to energy efficiency and clean energy projects in K-12 schools and community colleges so that school energy improvements continue to help meet California's energy and climate goals. We are pleased to note the Legislature's support for a Proposition 39 K-12 Competitive Grant Program in SB 110 and believe, if funded, it would result in significant energy savings and reductions in greenhouse gas emissions going forward.

As with past reports, the Board remains encouraged by the performance of the Energy Conservation Assistance Act Education Subaccount (ECAA-Ed) loan program and Bright Schools technical assistance program. We have previously recommended that the Legislature continue funding the ECAA-Ed program, and are pleased to note the Legislature's reallocation of remaining Proposition 39 K-12 funds through SB 110 to support the ECAA-Ed Competitive Loan Program. We believe the ECAA-Ed Competitive Loan Program will result in significant energy savings and reductions in greenhouse gas emissions going forward.

The Board is also encouraged by the significant progress realized to date through the School Bus Replacement Program, created through SB 110 and supported by the reallocation of \$75 million in remaining Proposition 39 K-12 funds. We believe the emissions reductions and associated health benefits associated with the School Bus Replacement Program investments are significant and recommend the Legislature provide funding to support the School Bus Replacement Program.

There is no doubt that the California Clean Energy Jobs Act continues to create real value for the state of California, and contributes to meeting the state's larger education, energy, climate, and economic development goals. While the Board recognizes and fully supports the School Energy Efficiency Stimulus (SEES) Program created by AB 841 in 2020 to support the safe reopening of schools and protect the health of children and teachers alike, we believe the Legislature should also continue to fund portions of the California Clean Energy Jobs Act with one-time appropriations now that direct funding from tax revenues generated by Proposition 39 has ended.

Recommendations

1. **Provide direct appropriations to the Energy Commission for the development of a Proposition 39 K-12 Competitive Grant Program as called for by SB 110, to support continued energy savings, emission reductions, and job creation at California's public schools.** SB 110 (Committee on Budget and Fiscal Review, Chapter 55, Statutes of 2017) established three new programs: The School Bus Replacement Program, the Energy Conservation Assistance Act – Education (ECAA-Ed) Competitive Loan Program, and the Proposition 39 K-12 Competitive Grant Program. After June 30, 2018, \$75 million of remaining Proposition 39 K-12 funds were reallocated to support the School Bus Replacement Program, and \$38.5 million of remaining funds were reallocated to support the ECAA-Ed Competitive Loan Program. Unfortunately, no funds remained to support a K-12 Competitive Grant Program. We believe the energy savings, emissions reductions, and job creation associated with Proposition 39 investments are substantial and continue to accrue as projects are completed. Given the success of the Proposition 39 K-12 program to date, we recommend the Legislature provide a one-time appropriation of \$125 million to support a K-12 Competitive Grant Program.

2. **Provide direct appropriations to the Energy Commission to support the Energy Conservation Assistance Act – Education (ECAA-Ed) Competitive Loan Program.** SB 110 (Committee on Budget and Fiscal Review, Chapter 55, Statutes of 2017) established the ECAA-Ed Competitive Loan Program, expecting that up to \$100 million would be available to support for loans to LEAs on a competitive basis. Because only \$38.5 million in funding was available, we recommend the Legislature provide a one-time appropriation of \$60 million to support the ECAA-Ed Competitive Loan Program.
3. **Provide direct appropriations to the California Community Colleges Chancellor's Office to support continued energy savings, emission reductions, and job creation at California's Community Colleges.** We believe the energy savings, emissions reductions, and job creation associated with Proposition 39 investments at the community colleges are substantial and continue to accrue as projects are completed. Given the success of the Proposition 39 program to date, we recommend the Legislature provide a one-time appropriation of \$50 million to support continued progress at Community Colleges.
4. **Provide direct appropriations to the Energy Commission to support the School Bus Replacement Program.** We believe the emissions reductions and associated health benefits associated with the School Bus Replacement Program investments are significant and will replace some of the oldest and dirtiest buses in California. Because the zero-emission buses can charge during off-peak hours, and store energy for later use, they can also reduce demand on the grid during peak hours. We recommend the Legislature provide a one-time appropriation of \$75 million to continue replacing diesel buses throughout California.

DISCLAIMER

Staff members of the California Energy Commission prepared this report. As such, it does not necessarily represent the views of the Energy Commission, its employees, or the State of California. The Energy Commission, the State of California, its employees, contractors and subcontractors make no warrant, express or implied, and assume no legal liability for the information in this report; nor does any party represent that the uses of this information will not infringe upon privately owned rights. This report has not been approved or disapproved by the Energy Commission nor has the Commission passed upon the accuracy or adequacy of the information in this report.

ABSTRACT

The California Energy Commission prepared this report for the Citizens Oversight Board in accordance with Senate Bill 73 (Committee on Budget and Fiscal Review, Chapter 29, Statutes of 2013), adopted by the Legislature and signed into law by former Governor Edmund G. Brown Jr. on June 27, 2013. To alleviate the burden to local educational agencies, information required to be reported to the Citizens Oversight Board by local educational agencies is contained within this report.

This report summarizes results from the start of the Proposition 39 K-12 Program (December 19, 2013) through the end of the 2019-2020 fiscal year. During this period, the Energy Commission approved 2,108 energy expenditure plans from 1,739 local educational agencies, representing \$1.53 billion in approved project funding. Of the approved energy expenditure plans, 962 are complete with corresponding final reports. Another 361 energy expenditure plans are also complete, and the local educational agencies are in the process of collecting the required 12 months of post-installation energy consumption data required for the final reports. An additional 382 energy expenditure plans include projects that are still under construction.

This progress report also summarizes results of the Energy Conservation Assistance Act — Education Subaccount Financing Program, including the Bright Schools Program, and the School Bus Replacement Program. For Fiscal Years 2013–14 through 2019–20, the Energy Commission approved 42 Energy Conservation Assistance Act — Education Subaccount loans totaling \$64.6 million. During the same period, the Bright Schools Program funded \$3.3 million to provide technical assistance to 173 local educational agencies and community colleges. The School Bus Replacement Program has awarded \$74.7 million for replacement electric buses and \$14.1 million for electric bus charging infrastructure.

Executive Summary

Background and Purpose

The California Clean Energy Jobs Act (Proposition 39) changed the corporate income tax code and allocated projected revenue to the general fund and the Clean Energy Job Creation Fund for five fiscal years, beginning with Fiscal Year 2013–14. The California Energy Commission (CEC) administers four components of the California Clean Energy Jobs Act: a grant program (Proposition 39: California Clean Energy Jobs Act, K-12 Program), a revolving zero percent loan program (Energy Conservation Assistance Act – Education Subaccount Financing Program), a technical assistance program (Bright Schools Program), and a school bus retrofit and replacement program (School Bus Replacement Program). All four of these programs receive funds from the Clean Energy Job Creation Fund created by Proposition 39.

Proposition 39 and its enabling legislation established a Citizens Oversight Board to review expenditures, audit the Clean Energy Job Creation Fund, and maintain transparency and accountability of this fund. Public Resources Code Section 26240(d) requires, in part, that the CEC *prepare an annual summary of expenditures, energy savings, the effective cost of saved energy or return on investment, and employment effects of each year's completed projects, and provide this report to the Citizens Oversight Board*. This is the CEC's sixth progress report to the Citizens Oversight Board. The report summarizes results from the start of the Proposition 39 K–12 Program (December 19, 2013) through the end of the 2019–20 fiscal year (June 30, 2020).

Cumulative Results: December 19, 2013, Through June 30, 2020

The CEC approved the first energy expenditure plans in Fiscal Year 2013-14, resulting in approximately \$19 million approved for disbursement by the California Department of Education to eligible local educational agencies. As of June 30, 2020, \$1.7 billion in Proposition 39 funding has been approved—\$154.6 million for energy planning and \$1.53 billion for energy projects. No additional Proposition 39 funding has been allocated after the 2017-18 fiscal year; any funding changes that occurred after this period were a result of energy expenditure plan amendments, closure of local education agencies (primarily charter schools), cancellation of energy expenditure plans, and other adjustments to existing funding. One result of these adjustments is some of the previously reported data related to the number of approved energy expenditure plans, the number of affected school sites, and funding amounts have decreased.

During this reporting period, 1,739 local educational agencies received approval for 2,108 energy expenditure plans, benefiting 7,125 sites in approved energy expenditure plans.

Figure 1 illustrates the cumulative energy expenditure plan approvals.

Figure 1: Cumulative Energy Expenditure Plan Approvals

Source: California Energy Commission

Local educational agencies throughout California reported spending \$1.17 billion of the \$1.70 billion in disbursed Proposition 39 funds. Projects are moving toward completion, as indicated by project implementation expenditure reporting, which has risen by more than \$90 million between July 1, 2019, and June 30, 2020. All Proposition 39-funded projects must be completed by June 30, 2021. **Figure 2** compares the total funding approved and spent from the reporting periods.

Figure 2: Proposition 39 Cumulative Funding Approved and Spent by Reporting Period

Source: California Energy Commission

Spending Summary

Reports have been submitted for 1,705 energy expenditure plans. There are 962 reports representing completed project final reports that include the required 12 months of post-installation energy consumption data as required by statute. An additional 361 reports represent energy expenditure plans with completed energy project installations in the stage of collecting 12 months of post-installation energy usage data, and 382 represent energy expenditure plans that include projects still in the construction phase. **Table 1** summarizes Proposition 39 K–12 Program spending.

Table 1: Proposition 39 K-12 Cumulative Spending as of June 30, 2020

Energy Expenditure Plan (EEP) Status	Number of EEPs With Reports	Prop 39 Funds Spent (in millions)	Total Amount Spent (in millions)
EEPs With Completed Project Final Reports	962	\$585	\$673
EEPs With Completed Projects	361	\$226	\$308
EEPs Still in Construction	382	\$358	\$429
Totals	<u>1,705</u>	<u>\$1,169</u>	<u>\$1,410</u>

Source: California Energy Commission

Participation Summary

As of June 30, 2020, the California Department of Education reported 2,189 eligible local educational agencies, falling into four categories: public school districts, charter schools, state special schools, and county offices of education. State special schools provide technical assistance, educational programs and services to students who are blind, visually impaired, deaf, and hard of hearing. As of June 30, 2020, 1,739 local educational agencies submitted at least one energy expenditure plan. The highest program participation rate is from the three state special schools-School for the Blind, School for the Deaf, Deaf and Hard of Hearing-with 100 percent of all the state special schools submitting an energy expenditure plan.

Identifying Energy Savings

Local educational agencies are required to report post installation energy savings 12 months after project completion. The CEC allows the use of several methods (see *Proposition 39: California Clean Energy Jobs Act Guidelines*) to determine and report energy savings after completion of an energy project. These methods provide local educational agencies with the flexibility to evaluate program benefits without the use of formal measurement and verification procedures such as costly data logging. Local educational agencies submitted 962 completed project final reports, totaling an annual energy savings of 224,174 megawatt-hours and 620,828 therms and resulting in reduced greenhouse gas emissions by about 76,821 tons of carbon dioxide equivalent annually.

Each energy expenditure plan must have a savings-to-investment ratio of 1.01 or greater, meaning that for every \$1.00 invested, a minimum of \$1.01 must be saved over the life of the energy project. Staff analysis concluded the combined savings-to-investment ratio for these 962 completed projects (with estimated savings determined by a variety of methods as described above) is 1.38; that is, for every \$1.00 invested in these projects, an estimated \$1.38 will be saved over the expected useful life of the installed energy technologies.

Energy-use intensity — the metric used to measure the energy performance at a school site — generally decreased among the school sites that have completed energy projects. Analysis concluded, on average, 92.73 British thermal units were required per square foot before energy project installation and dropped to 83.30 British thermal units per square foot after energy project installation, resulting in energy efficiency gains.

CEC staff forecasts that due to the widespread fires throughout the state in 2020, coupled with the prolonged closure of project site buildings because of the COVID-19 pandemic, the reporting of site energy-use intensity will not be possible in most cases. Moreover, given that most school buildings (project sites) were not open for typical usage during the reporting months of April through June 2020 and beyond for next year's report, the energy use at the school sites would likely be an aberration from normal usage.

Energy Conservation Assistance Act — Education Financing Program

In Fiscal Years 2013–14 and 2014–15, \$56 million in job creation funds were allocated to the Energy Conservation Assistance Act — Education to fund loans and technical assistance projects. Of the \$56 million, \$50.5 million was allocated to finance zero percent loans to K–12 local educational agencies and community college districts for energy efficiency, demand reduction, and clean energy generation projects. The remaining \$5.5 million was allocated to the Bright Schools Program for technical assistance to the same eligible entities.

As of June 30, 2020, 42 loans were approved, totaling \$64.6 million. Loan recipients have spent \$56.1 million. **Table 2** provides an overview of program loans and associated status. The increase in available funding over the original allocation to the Energy Conservation Assistance Act - Education loan program of \$50.5 million is a result of loan repayments.

Loan repayments, based on energy cost savings, are made twice per year once the project is complete, for a maximum of 20 years. All borrowers have met their obligations, and the Energy Conservation Assistance Act – Education loan program has not experienced any defaults.

Table 2: Energy Conservation Assistance Act — Education Loan Program Status Overview as of June 30, 2020

Loan Status	Number of Loans	Loan Funds Spent (in millions)
Loans With Completed Project Final Reports	29	43.9
Loans with Outstanding Completed project Final Reports	3	4.5
Completed Projects (Final Reports Due after 6/30/20)	2	4.0
Projects in Construction Stage	8	3.7
Totals	<u>42</u>	<u>\$56.1</u>

Source: California Energy Commission

Loan recipients are required to report post-installation energy consumption and project savings 12 months after project completion. Three local educational agencies with completed projects, accounting for \$4.5 million in loan funds spent, did not submit their completed project final reports before June 30, 2020. Twenty-nine loan recipients submitted post installation reports and the reported total annual energy savings were 21.5 million kilowatt-hours and 15,286 therms, equivalent to about 7,114 tons of reduced carbon dioxide equivalent emissions annually.

Bright Schools Program Cumulative Results

The Bright Schools Program provides local educational agencies and community college districts with technical assistance to identify energy efficiency measures in existing buildings and assist in applying for Proposition 39 K-12 Program funding. Of the \$56 million allocated to the Energy Conservation Assistance Act, \$5.5 million was allocated to the Bright Schools Program. The contract to provide technical assistance for the Bright Schools Program expired January 30, 2020, and the contract balance of \$2.1 million was returned to the Energy Conservation Assistance Act- Education Loan Program. A new contract for the program was executed and funded by another source.

As of June 30, 2020, 200 technical assistance requests from local educational agencies were approved via work authorizations, totaling \$3.5 million. The average cost of an approved work authorization is \$16,500, with a limit of \$20,000 per work authorization. Eighty Bright Schools Program energy audit reports have been used to support the development of a Proposition 39 K-12 energy expenditure plan. **Table 3** shows the status and amount of related funding of technical assistance approved for work authorizations.

Table 3: Bright Schools Program Technical Assistance Overview as of June 30, 2020

Technical Assistance Status	Number of Technical Assistance Requests	Amount Spent
Completed	197	\$2,777,910
In Progress	0	N/A
Withdrawn	3	\$28,225
Contractor Administration	N/A	\$567,371
TOTALS	200	<u>\$3,373,506</u>

Source: California Energy Commission

Estimating Energy Cost Savings

Energy studies from the Bright Schools Program identify potential school site energy projects and calculate estimated energy savings. Of the 197 technical assistance-approved work authorizations completed, 159 were energy audits, 22 were energy expenditure plan preparations, 15 were project bid specifications, and 1 was for engineering support service. The total annual energy savings identified in the completed energy audits are 28,647 megawatt-hours and 305,025 therms, equivalent to roughly 11,135 tons of reduced carbon dioxide equivalent emissions annually.

School Bus Replacement Program

To maximize funding opportunities and energy benefits for local educational agencies, Senate Bill 110 (Committee on Budget and Fiscal Review, Chapter 55, Statutes of 2017) appropriated remaining funds from the Proposition 39 K–12 Program to establish the School Bus Replacement Program at the Energy Commission. Senate Bill 110 provided for a one-time funding of \$75 million to replace older diesel school buses with battery-electric school buses in disadvantaged and low-income communities throughout California.

The \$75 million used exclusively for the purchase of battery-electric school buses was distributed among four regions in California: Northern California, Central California, Southern California, and Los Angeles County. In addition, nearly \$14 million in Clean Transportation Program funds (formerly known as the Alternative and Renewable Fuel and Vehicle Technology Program) was awarded to provide the necessary charging infrastructure to operate the buses. Finally, the CEC provided \$1 million in Clean Transportation Program funds for workforce training and development, awarding the contract to a local community college to develop and implement curricula for school districts that were awarded electric school buses; the curricula include automotive instructor training, maintenance, and service.

CHAPTER 1:

Proposition 39 K-12 Program

Background

The Proposition 39 K-12 Program provides grant funds for energy projects — energy efficiency measures and clean energy generation — at sites within a local educational agency (LEA), which includes public school districts, charter schools, county offices of education (COE), and state special schools. For this reporting period, there were 2,189 eligible LEAs in the state. LEAs submit energy expenditure plans (EEP) to the California Energy Commission (CEC) for the technical review, evaluation, and approval to fund the proposed energy project detailed in the energy expenditure plan. Upon the approval of the EEP, the CEC notifies the California Department of Education (CDE), which distributes funding from the Clean Energy Job Creation Fund to the LEAs.

During the first five fiscal years of the Proposition 39 K-12 Program, (2013–14, 2014–15, 2015–16, 2016–17, and 2017–18), the California Legislature appropriated \$1.748 billion to the Proposition 39 K-12 Program. No additional funding was appropriated in Fiscal Years 2018–19 or 2019–20.

Figure 3 summarizes the distribution of LEA types and the associated funding allocation for the five fiscal years of program funding.

LEAs are allocated funds based on the size of student population (average daily attendance or ADA) and the number of students eligible for free and reduced-priced meals (FRPM). The California Department of Education defines average daily attendance (ADA) as the total days of student attendance divided by the total days of instruction. Because public school districts typically have multiple school sites that house more students, they receive a much larger funding allocation than other LEAs, such as charter schools. For example, while charter schools represent 54 percent of eligible LEAs, their allocation is only 17 percent of total funding because they are typically smaller and have fewer students.

Figure 3: Proposition 39 K-12 Program–LEA Distribution and Funding Allocation

Source: California Energy Commission

Geographically, the highest LEA participation occurred in the counties of Alpine, Calaveras, Colusa, Del Norte, Glenn, Lake, Merced, Modoc, San Benito, San Luis Obispo, Sierra, Siskiyou, and Yuba, where the participation rate was 100 percent for the LEAs in these counties. Participation by each county can be seen in **Table 4**.

Summary of Submitted and Approved Energy Expenditure Plans

LEAs are required to request funding for energy projects by submitting an EEP to the CEC. As of June 30, 2018, 2,121 plans totaling \$1.54 billion in funding had been approved. **Table 6** summarizes the number of EEPs approved, the number of school sites, and the amount of funding approved by fiscal year. No new EEPs were approved after the 2017–18 fiscal year.

Table 6: EEPs Approved by Fiscal Year as of June 30, 2018

Fiscal Year	EEPs Approved	School Sites	Funding Approved (in millions)
2013-14	31	75	\$19
2014-15	398	1,235	\$260
2015-16	533	2,015	\$429
2016-17	470	1,779	\$382
2017-18	689	2,085	\$452
TOTALS	2,121	7,189	<u>\$1,542</u>

Source: California Energy Commission

As with any project, changes are sometimes necessary. LEAs with significant changes to previously approved EEPs must submit an amendment request to the CEC. Significant changes include the deletion of eligible energy efficiency and clean energy generation measures, the addition of measures not included in the approved EEP, cost increases or decreases of more

than 15 percent, and a change of more than 15 percent in the approved quantity of equipment installed.

Funding Approved by Type of LEA

There are four types of LEAs: (1) public school districts, (2) charter schools, (3) county offices of education, and (4) state special schools. **Figure 4** illustrates the distribution of approved EEP funding.

Figure 4: Proposition 39 K-12 Funding Approved by Type of LEA as of June 30, 2020

Source: California Energy Commission

Public school districts represent most of the approved EEPs, with \$1.35 billion awarded for energy project funding and \$112.2 million for energy planning funding. Charter schools have the second most energy projects approved, with \$171 million in energy project funding and \$38.4 million for energy planning funding. County offices of education have \$15 million in approved energy project funding and \$3.2 million in energy planning funding. The three state special schools provide comprehensive educational programs for blind, visually impaired, or deaf students and have combined energy project funding of \$611,537 and \$123,351 in energy planning funds as of June 30, 2020.

Allocations by Tier Level

Allocations to LEAs are based primarily on the prior year’s average daily attendance, with four tier levels defining the minimum amount that an eligible LEA will receive each year. These allocations are shown in Table 7. **Table 8** indicates participation by tier level.

Table 7: Minimum Funding Award Levels

Tier Levels	Average Daily Attendance Prior Year	Minimum Funding Awards
Tier 1	100 or fewer	\$15,000 plus FRPM adder*
Tier 2	101 to 1,000	Based on prior year ADA or \$50,000 (whichever amount is larger) plus FRPM adder*
Tier 3	1,001 to 1,999	Based on prior year ADA or \$100,000 (whichever amount is larger) plus FRPM adder*
Tier 4	2,000 or more	Based on prior year ADA plus FRPM adder*

Source: California Energy Commission

*FRPM = Free and reduced-priced meals. Eighty-five percent of the award amount is based on ADA in the prior year, while 15 percent is based on percentage of FRPM in each LEA.

Table 8: Participation by Tier Level

Tier Levels	LEA Participation Since Prop. 39 Inception (By Number of LEAs)
Tier 1	167 (69%) [out of 238]
Tier 2	952 (73%) [out of 1,307]
Tier 3	152 (89%) [out of 171]
Tier 4	468 (99%) [out of 473]

Source: California Energy Commission

Local Educational Agencies With High Free and Reduced-Priced Meal (FRPM) Ratios

Under Senate Bill (SB) 73 (Committee on Budget and Fiscal Review, Chapter 29, Statutes of 2013), the Proposition 39 K-12 Program allocates awards based on a formula. Eighty-five percent of the award is based on the LEA's average daily attendance reported to the CDE in

April and May in the prior fiscal year, and 15 percent is based on FRPM in the prior year. For this report, an LEA is considered to have a high ratio of FRPM if the ratio of FRPM/ADA is 0.75 or greater.

Approved Eligible Energy Measures

Each approved EEP including amended EEPs can represent multiple eligible energy measures — energy efficiency and clean energy generation measures — at several school sites within an LEA. This representation has resulted in the installation of thousands of energy efficiency and clean energy generation measures throughout the state. 54.7 percent of the approved energy measures are lighting-related; nearly 21 percent fall into the category of control measures for heating, ventilation, and air conditioning (HVAC) and lighting; approximately 14 percent are HVAC measures; approximately 7 percent are other efficiency measures that include plug loads, pumps, motors, building envelope, domestic hot water, kitchen equipment, high-efficiency transformers, energy storage, pool equipment, irrigation sprinklers, and pump controls; and slightly more than 2 percent are attributed to photovoltaic (PV) generation and power purchase agreements.

Table 9 summarizes the breakdown and the costs associated with each category.

Table 9: Summary of Eligible Energy Measure Categories as of June 30, 2020

Energy Measure Category	Total # of Measures Approved	Total % of Measures Approved	Total Project Cost of Measures Approved	Total % of Project Cost of Measures Approved
Lighting	12,458	54.7%	\$738,863,868	41%
HVAC & Lighting - Controls	4,736	20.8%	\$154,189,173	9%
HVAC	3,361	14.8%	\$602,908,675	33%
Other Energy Efficiency Measures	1,657	7.3%	\$116,776,359	7%
Self-Generation (PV)	547	2.4%	\$174,315,601	10%
TOTALS	22,759	100%	<u>\$1,787,320,673</u>	100%

LEA Reporting Results

Reporting Schedule

LEAs are required to provide annual progress reports on approved EEPs until all energy measures within an approved EEP are installed. Annual progress reports are submitted at the

end of each fiscal year. When all energy measures in an EEP are installed, LEAs must submit a project completion final report 12 to 15 months after the project completion date. This statutory requirement (Public Resources Code Section 26240[b]) is designed to show a full year of energy usage data indicating energy savings after all approved energy measures are installed.

94 LEAs failed to meet the statutory submittal requirement for final project completion reporting during the most recent reporting period. These LEAs are indicated in Appendix D. The CEC will continue to reach out to the LEAs that have not responded. Final project completion reporting is a condition of funding, and nonresponsive LEAs will likely result in a CDE audit finding.

CEC staff forecasts that due to the widespread fires throughout the state in 2020 and the prolonged closure of project site buildings due to the COVID-19 pandemic, the reporting of site energy use intensity will not be possible in most cases. Furthermore, given that most school buildings (project sites) were not open for typical usage during the reporting months of April through June 2020 and beyond for next year's report, the energy use at the school sites would likely be an aberration from normal usage. Moreover, the submission of project completion final reports is likely to be delayed.

Cost-Effectiveness Criteria: Savings-to-Investment Ratio

Public Resources Code Section 26206(c) requires that all projects be cost-effective, and Public Resources Code Section 26235(a)(2)(D) requires the CEC to establish guidelines for methods for cost-effectiveness determination. In the *Proposition 39: California Clean Energy Jobs Act 2016 Program Implementation Guidelines* (2016 Guidelines),¹ the CEC established the savings-to-investment ratio (SIR) as the cost-effectiveness determination, which is calculated based on the net present value of savings divided by project installation costs, subtracting project rebates and other nonrepayable funds.

An EEP must have an SIR of 1.01 or higher to be approved thereby qualifying for funding. This ratio compares the investment the LEA will make now with the savings it will achieve over the life of the project. For every \$1.00 invested, a minimum of \$1.01 must be saved. Savings include energy cost savings and a fixed maintenance savings of 3 percent of the total project installation cost. Finally, non-energy benefits such as health, safety, enhanced comfort better indoor air quality, and improved learning environment may also be considered in the SIR calculation. The CEC values non-energy benefits at a fixed 5 percent of the total project installation cost.

¹ Antonio, Marites, Haile Bucaneg, Joji Castillo, Cheng Moua, Ryan Nelson, Elizabeth Shirakh, and Joseph Wang. 2016. *Proposition 39: California Clean Energy Jobs Act –2016 Program Implementation Guidelines*. California Energy Commission, Energy Efficiency Division. Current Publication Number: CEC-400-2020-006-CMF. https://www2.energy.ca.gov/publications/displayOneReport_cms.php?pubNum=CEC-400-2020-006-CMF

In addition, the 2016 Guidelines allow some leveraged funding to be subtracted from the total project cost in the SIR calculation. Examples include nonrepayable funds such as bond funding, deferred maintenance, and general operation budgets.

Identifying Energy Savings

There are many nuanced and unique factors that affect energy usage, such as building operations, student population, building expansion, and weather patterns. School sites with multiple buildings often have one or more energy (electric and natural gas) meters that measure aggregate or total energy consumption, making it difficult to measure and attribute energy savings to specific energy efficiency measures.

The CEC allows LEAs to use several methods detailed in the 2016 Guidelines to report energy savings after completion of an energy project, giving LEAs the flexibility to determine program benefits without the use of formal measurement and verification procedures that would otherwise comprise most of the project costs. These methods include:

1. The Utility Incentive Completion Report.
2. The CEC Energy Savings Calculator.
3. The LEA's own post installation energy savings report.
4. Third-party post installation energy savings report.

Project Completion Final Reports (January 31, 2014, to June 30, 2020)

From the program launch through June 30, 2020, 806 LEAs have completed and installed all measures contained in their EEPs and have submitted 962 project completion final reports. These completed EEPs represent \$673 million in gross project costs. Of this amount, the Proposition 39 K-12 Program provided roughly \$585 million in grant funds and LEAs contributed the remaining \$88 million in leveraged funding. The reported annual energy saved for these completed projects is 224,174 megawatt-hours (MWh) and 620,828 therms, resulting in about 76,821 tons of carbon dioxide (CO₂) equivalent reduction annually. These completed EEPs represent 199,152 million square feet of conditioned space. Appendix A lists LEAs that have completed construction and have submitted a final project completion report.

Analyses of these reports conclude the combined SIR for these 962 projects is \$1.38 in return for every \$1.00 invested. **Table 10** summarizes the comparison of the last two reporting periods.

Table 10: Cumulative Summary of Final Project Completion Reports

Number of Completed EEPs	522	962
<i>Funding</i>		
Total Gross Project Cost	\$367 million	\$673 million
Prop. 39 Share	\$318 million	\$585 million
Leveraged Funding	\$49 million	\$88 million
<i>Annual Energy Savings</i>		
kWh Savings	125,712,267	224,174,133
Therm Savings	344,789	620,828
CO ₂ equivalent emissions reduction	43,060 tons	76,821 tons
SIR	1.37	1.38
Total Cost Savings	\$23.4 million	\$42.8 million

Source: California Energy Commission

Two trends emerged in reviewing the final project completion reports.

1) Most of the 806 LEAs with completed energy projects experienced a decrease in energy-use intensity (EUI), a metric that measures the energy performance at a school site. The EUI indicates the amount of energy used per square foot of building space per year. It is calculated by dividing the annual energy use (electricity, gas, fuel) by the gross square footage of the school. For this reporting period, on average of 9.43 kilo British thermal units (kBtu) per square foot of space was saved for those projects that have final project completion reports. Those LEAs that did not experience a decrease in EUI identified changes to operating hours, schedules, and increased student populations, which may have accounted for the increase in the EUI.

2) The reported "after" project energy savings in the final project completion reports typically matched or exceeded the estimated energy savings identified in the approved EEPs. If the reported energy savings deviated significantly from the estimated energy savings, most LEAs identified potential reasons for the difference. **Table 11** summarizes the reported EUI data.

Table 11: Energy Use Intensity Summary

Total Combined Annual Weighted Average EUI
Before: 92.73 kBtu/square foot
After: 8.303 kBtu/square foot

Source: California Energy Commission

Annual Progress Reports

The CEC requires LEAs to submit an annual progress report for each EEP that has been submitted. These reports summarize the completion status of energy projects up to June 30, 2020.

CEC staff works closely with LEAs to achieve a high rate of progress report submission. Of the annual progress reports due by September 30, 2020, the CEC received 785, which account for 94 percent of total reports due.

Three hundred and sixty-one annual progress reports, submitted by 348 LEAs, reported that they had completed energy projects but have yet to submit a final project completion report. LEAs are required to submit final project completion reports with post-installation energy savings and energy usage 12 to 15 months after the project completion date. (See Appendix B). Based on the reports, these projects account for \$308 million in gross project costs, which included \$226 million of Proposition 39 K-12 Program funding and \$82 million in leveraged funding from sources such as utility incentives, bonds, deferred maintenance, and general operation budgets.

CEC staff received 382 annual progress reports submitted by 343 LEAs for energy projects not yet completed. LEAs must provide annual progress reports until all energy measures are completed and installed. Based on these reports, LEAs with projects under construction spent \$429 million in gross project costs, which included \$358 million of Proposition 39 K-12 Program funding and \$71 million in leveraged funding. Appendix C lists all LEAs with energy projects in construction stage.

Implementation Overview

Program Implementation Summary

The Proposition 39 K-12 Program began six months after former Governor Edmund G. Brown Jr. signed SB 73 in June 2013, which provided the framework and appropriations necessary to carry out the requirements of Proposition 39. The CEC began a comprehensive public process to design and develop the program and the program implementation guidelines. Statewide public outreach included five public meetings and three webinars, which reached more than

500 participants and 180 docket submittals (13-CCEJA-01). On December 19, 2013, the CEC adopted the *Proposition 39: California Clean Energy Jobs Act – 2013 Program Implementation Guidelines* (2013 Guidelines). Once the 2013 Guidelines were adopted, CEC staff expedited program implementation. Starting in January 2014, the CEC released the EEP application forms, program handbook, and energy savings calculators; established an electronic submission process; hired and trained staff members; provided 10 training seminars and two program application instruction webinars that reached more than 800 LEAs statewide; and established a program call center.

The Proposition 39 grant application used by the LEAs was automated with an EEP on-line application system deployed in 2015. This system improved the speed and accuracy of the grant and EEP submission and review process. Two modules were also added to the online system: one for amending approved EEPs and one for submitting required reports. The first annual progress reports were submitted by LEAs in November 2015 and are required to be submitted each year through the end of the program. LEAs could submit new EEPs through February 26, 2018 and can submit amendments after that date adhering to amendment submittal criteria.

The COVID-19 pandemic has led to a dramatic loss of human life worldwide and presents an unprecedented challenge to most aspects of our daily life including the education system. All LEAs have experienced closure of buildings to different degrees since mid-March 2020. This has had a significant impact on our Proposition 39 participating LEAs because they are not able to complete installation of their approved energy projects and gather relevant energy usage data post energy measure installation. To provide relief to this unforeseen impact of COVID-19 impact, the LEAs were granted an opportunity to complete their approved energy projects. A resolution to the *Proposition 39: California Clean Energy Jobs Act – 2020 Program Implementation Guidelines* extended two key program milestone dates: project completion date was changed from June 30, 2020, to June 30, **2021** and the project completion final report due date was changed from June 30, 2021, to June 30, 2022.

Program Implementation Updates and Resources

The CEC provided extensive program communication, outreach, and education through webinars, workshops, conference presentations, press releases, blog posts, listserv announcements, direct phone calls, direct mail, and public meetings. Through these efforts, the CEC identified and addressed barriers to program participation. Since the CEC adopted the 2013 Guidelines, there have been three revisions to address barriers to meet charter school eligibility requirements and for some LEAs to meet the project SIR requirement. In June 2014, the first revision changed charter school eligibility, making it easier for charter schools to participate in the program. Further modifications to the SIR for all LEAs were made in December 2014 and July 2016.

On June 30, 2016, the CEC launched the [Proposition 39 Publicly Searchable Database](#) to meet this legislative requirement and offer a new level of data transparency for these publicly funded programs. With several ways for the public to view detailed program information, the interactive database provides quick searches for Proposition 39 K-12 and community college district (CCD) metrics.

More complex [Proposition 39 K-12 Program research data](#) are also available. This database includes LEA reporting data that are regularly updated, provides clean energy project site information that is reported by LEAs, and includes utility-reported school energy consumption and billing data by school site.

Senate Bill 110

On July 12, 2017, Governor Brown signed SB 110 (Committee on Budget and Fiscal Review, Chapter 55, Statutes of 2017), which included language to extend the Proposition 39 K–12 Program indefinitely.

To give LEAs an opportunity to use any unrequested Proposition 39 K-12 Program grant funds, SB 110 created three additional grant programs and allocated funds for loans and technical assistance. Of the unrequested funds, the first \$75 million was used to fund a School Bus Replacement Program and the remainder (up to \$100 million) was used to fund a competitive Energy Conservation Assistance Act-Education Subaccount (ECAA-Ed) loan program. Although a continuation of a Proposition 39 K-12 Program was also authorized in SB 110, there were not sufficient funds for the program. Any additional program funding is subject to appropriation in the annual budget act.

CHAPTER 2:

Energy Conservation Assistance Act — Education Subaccount (ECAA-Ed)

Financing Program

Background

The ECAA-Ed Financing Program is a revolving loan program from the Clean Energy Job Creation Fund that provides zero percent loan financing to eligible entities for energy efficiency, demand reduction, and energy generation projects. All LEAs that are eligible to receive Proposition 39 K-12 Program awards are also eligible to apply for an ECAA-Ed loan for energy-related projects. Loan repayments, based on energy cost savings, are made twice per year once the project is complete for a maximum of 20 years.

In accordance with the authorization of SB 110 (2017), a transfer of funds was received into the ECAA-Ed account. CEC issued a \$36 million program opportunity notice (PON) on a competitive basis for K-12 LEAs to finance a wide range of energy efficiency and renewable energy projects. The PON divided the state into four regions: north, central, south, and Los Angeles County. The PON further categorized the LEAs by size: small (less than 1,000 students), medium (between 1,000 – 2,000 students), and large (more than 2,000 students). Each region was allocated \$9 million, with \$3 million set aside for each size of LEAs. CEC received 21 applications by the due date of May 31, 2019. Out of the 21 applications, 7 were selected for funding for a total of \$6,718,789. The funds not allocated to the awardees are put toward another PON, and the results of that PON will be in FY 20/21 report.

ECAA-Ed Funding

Funding from the Clean Energy Job Creation Fund was allocated to the CEC in Fiscal Years 2013-14 and 2014-15 for zero-interest revolving loans and technical assistance. No funding was allocated in Fiscal Years 2015-16, 2016-17, 2017-18, or 2018-19.

During the 2019-20 fiscal year, the ECAA-Ed Program received funding in accordance with the authorization of SB 110. **Table 12** shows the funding received.

Table 12: ECAA-Ed Financing and Bright Schools Program Allocations

Fiscal Year	ECAA-Ed Financing (Energy Project Loans)	Bright Schools (Technical Assistance)	TOTAL
2013-14	\$25,291,524	\$2,708,476	\$28,000,000
2014-15	\$25,200,000	\$2,800,000	\$28,000,000
2015-16	0	0	0
2016-17	0	0	0
2017-18	0	0	0
2018-19	0	0	0
2019-20	38,524,000	0	38,524,000
TOTALS	<u>\$89,015,524</u>	<u>\$5,508,476</u>	<u>\$94,524,000</u>

Source: California Energy Commission

Approved Loans

As of June 30, 2020, the CEC approved 42 ECAA-Ed loans. This amount represents \$64.5 million of the \$89.0 million originally allocated to the loan program. ECAA-Ed loan recipients request loan fund disbursements based on paid invoices submitted to the CEC for reimbursement. A loan recipient's total reimbursement request may be less than the approved loan amount because of a scope change or a reduction in actual total project cost. Any funds remaining in the loan account are liquidated and used to fund additional ECAA-Ed loans.

Of the 42 approved loans, 34 loan recipients have completed projects representing nearly \$56.1 million in loans. Of this amount, \$52.4 million was disbursed to loan recipients, and the remaining \$3.8 million was liquidated and returned to ECAA-Ed account.

Appendix E summarized the approved and completed loans and the cumulative expenditures of each loan as of June 30, 2020.

Project Completion Final Reports

Resources Code Section 26240(b) requires each loan recipient to submit a project completion final report 12 to 15 months after the project completion date. A project is considered complete when all loan-funded energy measures are installed. This statutory condition is designed to provide, among other informational items, a full year of energy usage data after all approved energy measures have been installed.

As of June 30, 2020, 31 loan recipients submitted project completion final reports. These projects saved 21,514,871 kilowatt-hours (kWh) and 15,286 therms, which are equivalent to

7,114 tons of reduced CO₂ equivalent emissions annually. Reported energy savings resulted in an annual energy cost savings of \$2.4 million. Appendix F summarizes the energy data obtained from these loan recipients

Remaining Funds

As of June 30, 2020, approximately \$8,079,614 of the original loan funds remained in the ECAA-Ed account, which includes earnings generated by the account. An additional \$3,435,437 was returned to the fund because of liquidation from loan-funded projects that were completed under budget.

Repayments and Defaults

Loan repayments are made twice yearly after the loan project is complete and are based on annual energy cost savings. To date, all borrowers have met their loan obligations, and the ECAA-Ed Financing Program has not experienced any defaults.

Bright Schools Program

Background

The Bright Schools Program (BSP) helps public K–12 schools and community colleges identify energy saving projects in existing buildings. The program provides a range of technical assistance services, including energy audits, third-party proposal reviews, and professional engineering support.

Funding

Public Resources Code Section 25416(d) authorizes the CEC to set aside up to 10 percent of the Clean Energy Job Creation Funds for technical assistance to help eligible entities identify Proposition 39 K–12 Program energy efficiency, demand reduction, and generation projects. In Fiscal Years 2013–14 and 2014–15, the BSP received \$5.5 million. It has not received funding in subsequent fiscal years.

Through a competitive contract solicitation, the CEC selected a prime contractor and a team of professional energy engineers to assist with and support the objectives of the BSP. **Table 13** shows program expenditures as of June 30, 2020.

Table 13: Bright Schools Program Encumbrance and Expenditures as of June 30, 2020

Allocations, Encumbrances, and Expenditures	
Total Allocation	\$5,600,000
Amount Reallocated to ECAA-Ed Loan Program	\$91,524
Contract Amount Encumbered	\$5,508,476
Expenditures as of 6/30/20	\$3,373,506
Contract Balance	<u>\$2,134,970</u>

Source: California Energy Commission

Of the \$5.6 million allocated to the program, roughly \$5.5 million had been encumbered as of June 30, 2020. The remaining \$91,524 was reallocated to the ECAA-Ed Loan Program in 2015, resulting from unused funds from a previous BSP support contract.

Expenditures of \$3,373,506 have provided technical assistance to 173 LEAs and community colleges to identify cost-effective energy projects. At least 80 BSP energy audit reports have been successfully used to support Proposition 39 K-12 EEPs.

The balance in the amount of \$2,134,970 was returned to the ECAA-Ed Loan Program when the contract expired in January 2020.

Energy Audit Reports

BSP energy audits have identified energy measure opportunities at 343 school sites. These energy measure recommendations represent an estimated potential annual energy savings of nearly 28,647 MWh of electricity and 305,025 therms of natural gas, which are equivalent to 11,135 tons of reduced CO2 equivalent emissions annually. The estimated annual energy cost savings are \$4.6 million. The identified energy measures would require an investment of more than \$70 million and would be eligible for utility incentives of nearly \$2.5 million.

Appendix G lists the details of the information above and includes the energy savings metrics and Proposition 39 K-12 Program funding spent for program participants.

CHAPTER 3:

School Bus Replacement Program

Solicitations

The School Bus Replacement Program used a two-phased approach to select buses for funding. During the first phase, staff released a solicitation in May 2018 titled *School Bus Replacement for California Public School Districts, County Offices of Education, and Joint Power Authorities* (GFO-17-607). This grant funding opportunity allowed all school districts, COE, and joint power authorities (JPA) in California to apply for up to 10 buses for replacement.

The CEC received more than 200 applications totaling over 1,600 diesel school buses requested for replacement, the oldest of which was a 1978 diesel school bus. Individual school buses were evaluated based on three factors: age of bus, applicant's percentage of free and reduced-price meals recipients (FRPM), and applicant's disadvantaged community score from CalEnviroScreen 3.0, a web-based mapping application developed by the California Air Resources Board. Preference was given to applicants with higher percentages of FRPM and disadvantaged community scores. From the applications received, an initial list of ranked buses was released in November 2018.

The second phase of the program kicked off in November 2018, with a solicitation to select an electric school bus manufacturer(s) or dealer to design, construct, and deliver electric school buses to the public school districts, COEs, and JPAs that applied for the replacement of its school buses. The purpose of this solicitation was to establish a bulk purchase price for school districts, COEs, and JPAs. Applications were evaluated and scored for the technical evaluation portion based on the following criteria: relevant experience and qualifications; project readiness and implementation; client references; battery and fuel range; warranty, service, and support; innovation; economic benefits to California; and ability to leverage funding. Applications passing the technical evaluation advanced to the next screen, where the lowest-cost bid was selected for each school bus type (Type A, Type C, Type D, and each type with or without chair lifts). The bus bid forms were ranked in order from lowest to highest cost per bus by bus type.

Awards

Table 14 shows a breakdown of each awarded manufacturer's bid amount for each bus type. The Lion Electric Co. was the awardee for the Type A electric school bus without wheelchair lift, and the Type C and D electric school buses with and without wheelchair lift. A-Z Bus Incorporated was the awardee for electric school bus Type A with wheelchair lift.

Table 14: School Bus Replacement Program Manufacturers' Bid Amounts

Applicant	Bus Type	Bid Amount
The Lion Electric Co.	Type A Without Chair Lift	\$269,489
A-Z Bus Sales, Inc. – California (Micro Bird)	Type A With Chair Lift	\$291,524
The Lion Electric Co.	Type C Without Chair Lift	\$319,284
The Lion Electric Co.	Type C With Chair Lift	\$327,727
The Lion Electric Co.	Type D Without Chair Lift	\$330,109
The Lion Electric Co.	Type D With Chair Lift	\$337,467

Source: California Energy Commission

Once the manufacturers were selected, CEC staff allocated funding based on bid price using the rank list to determine which applicants would be awarded funding for new buses. From the initial rank list of buses, the CEC funded 235 electric school buses. The applicants received funding for the replacement school bus, with an additional \$60,000 in infrastructure funding per bus. The infrastructure funding came from the Clean Transportation Program (formally known as the Alternative Renewable Fuel and Vehicle Technology Program).

Table 15 shows a breakdown of the number of awardees, number of buses awarded, and the total bus and infrastructure awards in each of the four regions. Nearly 90 percent of the awardees are in disadvantaged communities. Since the last COB report, some schools decided not to accept awards or changed the types of buses originally awarded based on various needs of each district. As a result, the CEC was able to award buses to additional school districts in various regions, continuing to fund the next buses in line on the rank list.

Table 15: Description of School Bus Replacement Program Awards

Region	Number of Awardees	Number of Buses Awarded ²	Total Bus Award	Total Infrastructure Award
North	18	59	\$18,757,482	\$3,600,000
Central	23	58	\$18,656,366	\$3,420,000
Los Angeles	15	61	\$18,695,665	\$3,660,000
South	11	57	\$18,590,844	\$3,420,000
Totals	66	235	<u>\$74,700,357</u>	<u>\$14,100,000</u>

Source: California Energy Commission

In July 2019, the CEC approved most of the electric school bus replacement and manufacturing agreements. Recipients with fully executed agreements are placing orders with manufacturers for new battery-electric school buses and working with their local utilities to install the necessary electric infrastructure.

The table below shows the CEC's timeline for anticipated bus delivery. At the close of 2019, 11 of the 235 buses funded were delivered to school districts. By the end of 2020, 61 of the 235 buses were delivered to school districts. The CEC expects to have all buses delivered by September 2022.

Table 16 below indicates the estimated timeline for bus deliveries.

Table 16: Estimated Bus Delivery Timeline

Cumulative Percentage of Delivered Buses	Latest Bus Delivery Date
5%	12/31/2019
25%	12/31/2020
50%	12/31/2021
100%	9/30/2022

Source: California Energy Commission

²The number of buses awarded to each region differed based upon the cost of each bus type requested in each school district.

Infrastructure

The CEC is working with electric utilities, both public and investor-owned, to assist in upgrading the electrical infrastructure required to charge the awarded buses while emphasizing the need to plan for future electrical capacity needs. Electric vehicle supply equipment (EVSE) is required to be, at a minimum, an AC Level 2 network charger. AC Level 2 network chargers operate between 208-240 volts and provide charging rates ranging from 3-19.2 kW. The network description means that these chargers are programmable so the user can determine the conditions that need to be met for charging to occur, including low energy costs or an abundance of renewable energy on the grid. Also, EVSE is required to be ENERGY STAR®-certified, and capable of charging a vehicle at a minimum of 6.2 kilowatts (kW); however, the CEC recommends EVSEs capable of charging at 19.2 kW. Networked EVSEs provide recipients with the ability to set charging for buses to off-peak demand hours, provide remote diagnostics, and allow remote start of connected vehicles. The CEC has funded 25 chargers as of November 2020 and expects to fund 230 chargers by the end of the program.

Workforce Development

In anticipation of the CEC's School Bus Replacement Program, the CEC began to work with California schools in 2018 to understand the importance and role of school bus training for zero-emission school bus technology. Schools expressed a need for training for school bus maintenance and service technicians, as well as training for bus operators for battery-electric technology. As part of their application for the School Bus Replacement Program, nearly 200 applicants identified a need for workforce development.

In 2019, the CEC approved a \$1.0 million contract with Cerritos Community College to develop and implement the "Electric School Bus Training Project." Cerritos Community College developed the curriculum with the Southern California Regional Transit Training Consortium (SCRTTC) and college faculty throughout the state. Faculty from the colleges will provide the training in the school bus regions, through a hybrid of in-person and online training.

The training project includes automotive instructor-led training to maintenance and service technicians for 96 hours. The training project also includes school bus operator training for 12 hours. The training content includes the following:

- Electric Vehicle School Bus and Charging Infrastructure Familiarization
- Circuit Diagnostic with Digital Volt Ohm Meter
- Computerized Engine Management Systems
- Complexity of the Harness and Computer Functions in the Modern Chassis
- Programmable Logic Controller Input/Output Systems Diagnostics
- Network Systems Electronics Diagnosis and Repair
- Electric Bus Driver Training Familiarization

On March 5, 2020, the CEC, with Cerritos Community College, conducted an “Electric School Bus Technician Training Project: Kick-Off Webinar”. The purpose of the webinar was to orient schools to the training project, explain the logistics of training, and answer questions.

School bus manufacturers and electric vehicle charging infrastructure companies also offer training to new electric school bus owners along with warrantied and ongoing support. Some of the examples of training include the following:

- The Lion Electric Company has developed learning centers in the state (Lion Academy), offering training to technicians and drivers, as well as support for customers through the steps of the purchase process for an electric school bus.
- A-Z Bus Sales also provides driver training and mechanic safety training for battery electric school buses.
- Sunline Transit Agency in the Coachella Valley is the host site for the federally funded Federal Transit Administration’s West Coast Center of Excellence in Zero Emission Technology (CoEZET). Sunline has developed a workforce training program focused on maintaining and operating zero-emission buses in public transit fleets and envisions this training being offered to schools in the future.
- Twin Rivers Unified School District in Sacramento has refined and developed its own in-house training program to familiarize school bus drivers with the new zero-emission school buses and infrastructure technology.

Next Steps

With the nation’s shutdown due to COVID-19, the School Bus Replacement Program experienced setbacks in expected delivery timelines, as manufacturers experienced supply chain disruption and halts in manufacturing.

During the shutdown, CEC staff implemented processes to minimize program delays. For example, staff streamlined electronic invoicing systems to expedite payment to school districts. Furthermore, staff conducted virtual bus inspections on behalf of school districts, with the agreement between all parties that buses could be held at manufacturing plants until schools could reopen and arrange to take delivery of the buses. As manufacturing plants and districts begin to reopen, the CEC and school bus manufacturers are working with the school districts to get bus deliveries back on track. By the end of 2020, at least 25 percent of the 235 buses will still be delivered to school districts.

The CEC will continue to work with the manufacturers and school districts to meet and exceed targeted deliveries for the remainder of the school buses. The CEC will also be working with all stakeholders to collect data, such as operating and maintenance costs, driving range, and annual mileage, to quantify the benefits of electric school buses

Benefits

Cost savings analysis of electric school buses over their diesel counterparts indicates a lifetime fuel savings cost of about \$28,000, or roughly 27 percent savings per bus.³ Electric school buses require less maintenance than their diesel counterparts due to the reduction of moving components within the electric drivetrain and motor of the vehicles, providing a greater ability to minimize time out of operation. The reduction of operating costs provides recipients an incentive to adopt zero-emission vehicle (ZEV) technologies for bus fleets.

The CEC's School Bus Replacement Program will help reduce tailpipe emissions of smog-forming nitrogen oxides by 98,000 lbs. and toxic diesel soot by more than 2,500 lbs.⁴ Minimizing exposure to hazardous emissions reduces the risk to adolescent bus riders of developing respiratory diseases such as asthma and helps the state achieve emissions reductions goals.⁵

Moreover, vehicle-to-grid (V2G) enabled electric school buses have the potential added benefit of serving grid operators, including balancing renewable peaks and valleys, as well as providing excess capacity and bulk storage when needed, which could be utilized as a revenue source by bus operators. V2G enabled battery electric school buses have the potential to reduce electricity generation related greenhouse gas emissions by 1,420 tons of CO₂ equivalence and eliminate \$18,300 of air pollution externalities over their lifetime (Ercan, et al. 2016)⁶. School buses have been determined to be a good application for V2G because of the large batteries, predictable duty cycles, and long down times throughout the day when energy demand is greatest. These factors can also provide on-site resiliency in the case of an emergency power shutoff by the utility or during a catastrophic event such as a wildfire.

³ Based on 13,000 average annual miles.

⁴ Toxic diesel soot is fine particulate matter that is 2.5 microns or less in diameter.

APPENDIX E:
Energy Conservation Assistance Act: Education
Subaccount – Approved Zero-Interest Loans

Appendix E
Energy Conservation Assistance Act - Education Subaccount (ECAA-Ed)
Approved and Completed Zero Interest Energy Loans
Cumulative as of June 30, 2020

Loan Number	Local Education Agency or Community College District Name	Business Meeting Approval Date	Project Completion Date (Completed Projects only)	Final Project Competition Report (FPCR) Due Date* (Completed Projects only)	Approved Loan Amount	Funds Expended**	Project Summary	Status/Comments
001-13-ECG	Sanger Unified School District	5/14/2014	12/31/2016	FPCR Complete	\$1,242,492	\$1,064,779.58	Install energy efficiency measures at three facilities.	Project Complete. Funds expended is the final disbursed amount.
001-14-ECG	Pittsburg Unified School District	7/22/2014	7/31/2017	FPCR Complete	\$1,766,665	\$1,465,000.00	Install a 150 kW PV system, lighting retrofits for 9 schools, and occupancy controls for HVAC systems at 3 schools.	Project Complete. Funds expended is the final disbursed amount.
002-14-ECG	Tulare City School District	10/7/2014	12/31/2015	FPCR Complete	\$3,000,000	\$3,000,000.00	Install PV at 8 schools.	Project Complete. Funds expended is the final disbursed amount.
003-14-ECG	Hartnell Community College District	8/27/2014	4/1/2016	FPCR Complete	\$3,000,000	\$3,000,000.00	Upgrade boiler and install solar PV.	Project Complete. Funds expended is the final disbursed amount.
004-14-ECG	Kern Community College District	10/7/2014	12/31/2015	FPCR Complete	\$3,000,000	\$3,000,000.00	Install a solar PV at Porterville College	Project Complete. Funds expended is the final disbursed amount.
005-14-ECG	Yuba Community College District	10/7/2014	12/15/2014	FPCR Complete	\$710,000	\$710,000.00	Install a new EMS system and VFD control for a well pump.	Project Complete. Funds expended is the final disbursed amount.
006-14-ECG	Campbell Unified School District - Rosemary Elementary	11/17/2014	12/16/2016	FPCR Complete	\$794,812	\$740,302.72	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
007-14-ECG	Campbell Unified School District - Rolling Hills Middle School	11/17/2014	12/16/2016	FPCR Complete	\$692,584	\$540,530.62	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
008-14-ECG	Campbell Unified School District - Marshall Lane Elementary	11/17/2014	12/16/2016	FPCR Complete	\$478,754	\$399,802.42	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
009-14-ECG	Campbell Unified School District - Lynhaven Elementary	11/17/2014	12/31/2015	FPCR Complete	\$65,887	\$65,887.00	Install energy efficiency measures.	Project Complete. Funds expended is the final disbursed amount.
010-14-ECG	Campbell Unified School District - Forest Hill Elementary	11/17/2014	12/16/2016	FPCR Complete	\$534,346	\$477,586.42	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
013-14-ECG	Campbell Unified School District - Castlemont Elementary	11/17/2014	12/31/2015	FPCR Complete	\$81,218	\$78,652.00	Install energy efficiency measures.	Project Complete. Funds expended is the final disbursed amount.
014-14-ECG	Campbell Unified School District - Blackford Elementary	11/17/2014	12/16/2016	FPCR Complete	\$513,000	\$337,551.73	Install a PV system.	Project Complete. Funds expended is the final disbursed amount.
015-14-ECG	Campbell Unified School District - Sherman Oaks Elementary	11/17/2014	12/16/2016	FPCR Complete	\$1,084,933	\$1,019,759.46	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
016-14-ECG	Campbell Unified School District - Monroe Middle School	11/17/2014	12/16/2016	FPCR Complete	\$1,078,750	\$739,657.08	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
017-14-ECG	Campbell Unified School District - Capri Elementary and Village School	11/17/2014	12/16/2016	FPCR Complete	\$796,007	\$619,447.62	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
018-14-ECG	Campbell Unified School District - Campbell Middle School and Corporate Yard	11/17/2014	12/16/2016	FPCR Complete	\$1,378,638	\$1,378,638.00	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.

Loan Number	Local Education Agency or Community College District Name	Business Meeting Approval Date	Project Completion Date (Completed Projects only)	Final Project Competition Report (FPCR) Due Date* (Completed Projects only)	Approved Loan Amount	Funds Expended**	Project Summary	Status/Comments
011-14-ECG	Newport Mesa Unified School District	11/17/2014	2/29/2016	FPCR Complete	\$3,000,000	\$3,000,000.00	Install renewable energy measures.	Project Complete. Funds expended is the final disbursed amount.
019-14-ECG	Monterey Peninsula Unified School District	12/10/2014	9/25/2015	FPCR Complete	\$3,000,000	\$3,000,000.00	Install 820.6 kW PV system.	Project Complete. Funds expended is the final disbursed amount.
020-14-ECG	Chico Unified School District	4/8/2015	12/15/2015	FPCR Complete	\$3,000,000	\$2,588,712.21	Install PV systems at 5 schools.	Project Complete. Funds expended is the final disbursed amount.
021-14-ECG	Sequoias Community College School District	2/25/2015	12/17/2015	FPCR Complete	\$3,000,000	\$2,981,074.36	Install a 0.798 MW PV system.	Project Complete. Funds expended is the final disbursed amount.
023-14-ECG	Sylvan Union School District	4/8/2015	11/30/2016	FPCR Complete	\$1,799,839	\$1,461,700.70	Install energy efficiency measures at 8 schools, District Office, Central Kitchen, and Maintenance Facility.	Project Complete. Funds expended is the final disbursed amount.
001-15-ECG	Salida Union School District	7/8/2015	10/21/2016	FPCR Complete	\$2,054,469	\$2,054,469.00	Install energy efficiency measures and photovoltaic installations at multiple District facilities	Project Complete. Funds expended is the final disbursed amount.
002-15-ECG	Montague Elementary School District	8/12/2015	8/25/2016	FPCR Complete	\$419,520	\$419,520.00	Install energy efficiency measures and renewal energy measures at District facilities.	Project Complete. Funds expended is the final disbursed amount.
003-15-ECG	Durham Unified School District	9/9/2015	6/30/2017	FPCR Complete	\$2,000,000	\$1,282,606.67	Install a total of 575.1 kW PV.	Project Complete. Funds expended is the final disbursed amount.
004-15-ECG	Vista del Mar Union School District	10/14/2015	-	-	\$0	\$0.00	Install a 55 kWdc PV.	Cancelled
005-15-ECG	Oroville Union High School District	12/9/2015	6/30/2017	FPCR Complete	\$2,800,000	\$2,800,000.00	Install 839 kW roof and parking structure mounted PV system.	Project Complete. Funds expended is the final disbursed amount.
006-15-ECG	Soledad Unified School District	3/9/2016	3/27/2017	FPCR Complete	\$2,000,000	\$1,851,350.96	Install a total of 463 kW PV.	Project Complete. Funds expended is the final disbursed amount.
007-15-ECG	Benicia Unified School District	5/17/2016	4/24/2018	FPCR Complete	\$3,000,000	\$3,000,000.00	Install a 721.35 kWdc PV	Project Complete. Funds expended is the final disbursed amount.
001-16-ECG	Woodlake Unified School District	7/13/2016	8/16/2017	11/16/2018*	\$1,000,000	\$1,000,000.00	Install a 324.4 kWdc PV	Project Complete. Funds expended is the final disbursed amount.
002-16-ECG	Waterford Unified School District	11/9/2016	6/30/2018	9/30/2019	\$708,227	\$550,541.00	Install exterior and interior lighting including controls at two schools.	Project Complete. Funds expended is the final disbursed amount.
003-16-ECG	Berryessa Union School District	4/12/2017	8/31/2018	FPCR Complete	\$911,000	\$848,134.00	Install more efficient interior lights, exterior lights and lighting controls.	Project Complete. Funds expended is the final disbursed amount.
004-16-ECG	Princeton Joint Unified School District	6/14/2017	-	-	\$0	\$0.00	Install a 110.55 kWdc PV.	Cancelled
001-17-ECG	Soledad Unified School District	10/11/2017	6/20/2018	9/20/2019	\$3,000,000	\$3,000,000.00	Install a 675 kWdc PV.	Project Complete. Funds expended is the final disbursed amount.
002-17-ECG	Alpaugh Unified School District	1/17/2018	3/1/2020	6/1/2021	\$2,100,000	\$1,751,910.00	Install a 410.4 kWdc PV.	Project Complete. Funds expended is the final disbursed amount.
003-17-ECG	Sequoia Union High School District	1/17/2018	3/1/2020	6/1/2021	\$2,200,000	\$2,200,000.00	Install a 777.0 kWdc PV.	Project Complete. Funds expended is the final disbursed amount.
004-17-ECG	Merced Community College District	2/21/2018	-	-	\$1,627,600	\$1,489,094.00	Install a 525.0 kWdc PV.	Implementation
001-19-ECG	Eureka City Schools	12/11/2019			\$463,733	\$0.00	Install a 132 kWdc PV	Implementation
002-19-ECG	Southern Humboldt Unified School District	12/11/2019			\$1,048,320	\$0.00	install a 279 kWdc PV	Implementation
003-19-ECG	Cutten Elementary School District	12/11/2019			\$182,560	\$0.00	install a 52 kWdc PV	Implementation
004-19-ECG	Classic Academy High School	12/11/2019			\$585,565	\$181,031.00	install a 170 kWdc PV	Implementation

Loan Number	Local Education Agency or Community College District Name	Business Meeting Approval Date	Project Completion Date (Completed Projects only)	Final Project Completion Report (FPCR) Due Date* (Completed Projects only)	Approved Loan Amount	Funds Expended**	Project Summary	Status/Comments
005-19-ECG	Mattole Unified School District	12/11/2019			\$44,800	\$0.00	install a 12.8 kWdc PV	Implementation
006-19-ECG	Palm Springs Unified School District	12/11/2019			\$1,643,480	\$0.00	install a 495 kWdc PV	Implementation
007-19-ECG	Parlier Unified School District	12/11/2019			\$2,750,331	\$2,064,000.00	install a 898.5 kWdc PV and indoor and outdoor LED lightiing retrofit	Implementation
TOTAL	44		34		\$64,557,530	\$56,161,738.55		
	\$0.00					\$47,925,162.55		

* Final Project Completion Report due but not received.

**Amounts in bold are the final loan funds disbursed for completed projects.

Summary:

Total Number of Loans	42
Number of Loans Approved	44
Loans cancelled	2
Number of Loans in Implementation	8
Number of Completed Projects/Loans	34
Number of Projects/Loans with FPCR	29

Total Funds Approved	\$64,557,530.00
Total Funds Expended	\$56,161,738.55
Remaining Funds for Projects in Implementation	\$5,118,040.00
Funds from Projects Completed under Budget	\$3,435,437.45
Total Funds for Completed Loans	\$52,427,613.55

FPCR	\$43,925,162.55
no FPCR	\$4,550,541.00
const.	\$3,734,125.00

An asterisk (*) next to an LEA denotes that the Bright Schools Program provided the following two types of assistance: (1) energy audit and (2) Energy Expenditure Plan preparation.

APPENDIX H:

Glossary – List of Acronyms/Definitions

Glossary—List of Acronyms/Definitions

Acronym/Term	Definition
2013 Guidelines	The Proposition 39: California Clean Energy Jobs Act - 2013 Program Implementation Guidelines
2016 Guidelines	The Proposition 39: California Clean Energy Jobs Act - 2016 Program Implementation Guidelines
ADA	Average daily attendance - The average number of students per school day. Average Daily Attendance- total days of student attendance divided by the total days of instruction
Btu	British thermal unit - The quantity of heat required to raise the temperature of one pound of water by one degree Fahrenheit.
CalEnviroScreen 3.0	The California Communities Environmental Health Screening Tool.
California Clean Energy Jobs Act	Also known as Proposition 39, it allocates revenue to local educational agencies to support energy efficiency and renewable energy projects.
CCD	Community college district - A type of special district with administrative and fiscal independence created to oversee public community colleges.
CDE	California Department of Education - The department responsible for overseeing the state's public school system and enforcing education law and regulation.
CEC	California Energy Commission, formally the Resources Conservation and Development Commission.
CO ₂	Carbon dioxide - A heavy, odorless, incombustible gas.
COB	Citizens Oversight Board - The board created in PRC Section 26210 that provides accountability, independent audits, and public disclosure of all Proposition 39 program funding.
COE	County Office of Education - The agency serving as an intermediary between the California Department of Education and local school districts.

Acronym/Term	Definition
ECAA-Ed	Energy Conservation Assistance Act-Education Subaccount - A revolving loan program funded by the Clean Energy Job Creation Fund.
EEP	Energy expenditure plan - The request by an LEA for Proposition 39 funding. The energy expenditure plan is submitted to the CEC and includes technical description and specifications for proposed eligible energy measures.
Energy Measure	An installation or modification in a school site that improves energy efficiency or expands clean energy generation.
EUI	Energy-use intensity - The amount of energy used in a building relative to the size of the building, based on kBtu of energy per square foot of conditioned space.
EVSE	Electric vehicle supply equipment – The charging equipment for electric vehicles.
FRPM	Free and reduced-priced meals - Meal discounts made available to students from households that meet total household income parameters.
HVAC	Heating, ventilation, and air conditioning - The technology of indoor environmental comfort.
JPA	Joint power authorities - Two or more public agencies jointly exercising powers, limited by the combined territorial jurisdictions of the individual agencies.
K-12	Kindergarten through 12th grade - The sum of primary and secondary publicly supported education.
kBtu	KiloBtu-1,000 British thermal units.
kW	Kilowatt-1,000 watts.
kWh	Kilowatt-hour - Energy unit used in measuring electrical power, the work done by 1 kilowatt acting for one hour.
LEA	Local educational agency - A county office of education, school district, charter school, or state special school.
MWh	Megawatt-hour - Energy unit used in measuring electrical power, the work done by 1 megawatt acting for one hour.
PV	Photovoltaic - A technology designed to convert sunlight to electricity using semiconducting materials.

Acronym/Term	Definition
SB	An acronym for Senate Bill – Legislation originating in the California State Senate.
School Bus Type A	A school bus made of a bus body constructed upon a cutaway front-section vehicle with a left driver's door, designed to carry 10 or more people.
School Bus Type C	A school bus often called a "conventional" bus, the body is installed upon a flat-back cowl chassis with gross vehicle weight rating of more than 10,000 pounds, designed for carrying more than 10 persons. All of the engine is in front of the windshield and the entrance door is behind the front wheels.
School Bus Type D	A "transit-style" school bus, with a body installed upon a chassis, with the engine mounted in the front, mid-ship, or rear with a gross vehicle weight rating of more than 10,000 pounds, and designed for carrying more than 10 persons. The engine is often behind the windshield and beside the driver's seat (referred to as forward-engine or "FE"), or it may be at the rear of the bus, behind the rear wheels (rear-engine or "RE"). The entrance door is ahead of the front wheels.
SIR	Savings-to-investment ratio - The SIR is the ratio of the present value savings to the present value costs of an energy efficiency measure or alternative energy generation.
Vehicle-to grid(V2G) enabled electric school buses	Bi-directional charging via use of a type 1 combined charging system.
ZEV	Zero emissions vehicle – A vehicle that emits no exhaust gas from the onboard source of power.

Citizens Oversight Board
Proposition 39 Clean Energy Jobs Act
Final Summary Report

California Community Colleges Chancellor's Office
Facilities Planning and Utilization
Final Summary Report

Executive Summary

The California Community Colleges Chancellor's Office (Chancellor's Office) progressively makes improvements with each year of the Proposition 39 Clean Energy Jobs Act. Proposition 39 is an initiative to create jobs in California by improving energy efficiency and expanding clean energy generation.

Districts utilized the Proposition 39 program funding that was distributed to them for energy efficiency projects within the given deadline ending in fiscal year 2019-20. However, 23 districts had project savings that resulted in remaining funds of \$5.8 million. With assistance from General Counsel, the Proposition 39 program was extended, which allowed those districts to use those remaining funds. These projects helped reduced energy usage, cost savings and creating clean energy jobs throughout the community college system.

This program has also helping districts move towards meeting the goals for the State of California's goals in addressing climate change and sustainability. The Proposition 39 program is managed by two divisions within the Chancellor's Office to implement the requirements set by Senate Bill 73 (Ch. 29, Stats. 2013). The College Finance and Facilities Division's Facilities Planning and Utilization Unit oversees the funding allocated towards improving energy efficiency on community college campuses. The Workforce and Economic Development Division oversees the workforce training and development program on community college campuses. The Workforce and Economic Development Division closed out their program and reported last year.

The Facilities Planning and Utilization Unit has partnered with investor-owned utility groups and the consulting firm Willdan Group, Inc., to work with districts on reviewing, approving, administering and verifying clean energy projects and energy savings. The investor-owned utility groups and Willdan Group, Inc. have been an integral part of the partnership with the Chancellor's Office by assisting community colleges across the state.

The Proposition 39 extension brought back Willdan Group, Inc. to assist with the closeout of the program and their contract ended in December 2020.

Identifying Energy Savings

As required by Proposition 39, the districts' projects must meet energy savings requirements to be eligible for funding. The detailed method and procedure for determining energy savings for Proposition 39 funded projects are outlined in Sections 4.1 and 4.2 of the California Community Colleges Proposition 39 Guidelines.¹ These procedures follow California Public Utility Commission-approved protocols for determining energy savings for projects. There are different protocols for project type (energy efficiency, solar photovoltaic, MBCx/RCx, etc.) and the standards for each project

¹<http://cccutilitypartnership.com>

type are outlined in the guidelines. Energy savings are based on the difference between annual energy use under existing conditions and annual energy use under proposed conditions, and the corresponding cost of energy saved, as described in Senate Bill 73.

Annual energy savings, and the corresponding annual energy cost savings, will be used to determine the cost-effectiveness of Proposition 39 projects and for program reporting. For certain projects, the utility incentive programs measure energy savings against state energy code baselines rather than actual usage, and this will be used as the basis for the utility incentive payment. Once the proposed energy savings are calculated or determined following the process described above, a Form B and utility incentive application (if appropriate) is submitted by the district for review and approval.

Final project energy savings are determined after project installation through a Measurement & Verification process described in Section 12 of the Proposition 39 Guidelines. This process for projects funded with Proposition 39 funds follow the general approach of the International Performance Measurement and Verification Protocol guidelines for measurement of savings and verification of project completion. The utility Measurement & Verification process for projects implemented under the incentive programs are leveraged to the fullest extent possible to avoid duplication of efforts.

IMPLEMENTATION OVERVIEW

The Chancellor's Office Proposition 39 program was extended an additional year to allow districts to use their remaining funds, which will assist districts in meeting the new Climate Change and Sustainability goals established by the Chancellor's Office. As such, there were no changes made in the Proposition 39 program.

FUNDING STATUS

The Chancellor's Office requests that districts create a project list every first quarter of the calendar year. A master list of projects was created when Proposition 39 was initiated. Since then, districts have used their master list as a basis for upcoming projects. In consultation with the investor-owned utility groups and Willdan Group, Inc., districts also have projects generated by the consultants. The Chancellor's Office also uses the system-wide Facilities Utilization Space Inventory Options Net (FUSION) database to generate a list of potential projects. Districts enter scheduled maintenance projects as well as capital outlay projects, which is a potential pool of Proposition 39 projects.

Districts work with local investor-owned utility group and Willdan Group, Inc. to determine the types of projects that are viable. These projects are in loading order as determined by the California Public Utilities Commission and take into consideration the cost effectiveness to reach a savings-to-investment-ratio of 1.05.

Program funds are distributed to districts on a full-time equivalent student basis; however, program funds are not released to districts until they submit project request forms (Form B) to the Chancellor's Office. The investor-owned utility groups and Willdan Group, Inc. review the Form Bs before the districts submit to the Chancellor's Office. The Chancellor's Office releases the funds to the districts when they have a viable project.

As shown in Tables 1 and 2, the Chancellor's Office splits the five years of Proposition 39 funding between the Facilities Planning and Utilization Unit and the Workforce and Economic Development Division (Table 1). The Facilities Planning and Utilization Unit distributed a total \$184.9 million to the community college districts, which is used for the actual construction work done on district campuses. Currently, there is only \$5.8 million in project savings from the \$184.9 million. A portion of the allocation is set aside for the consultant for the administration of the program as well as assisting districts with the engineering work and verification of the projects.

Table 1: Chancellor's Office Proposition 39 Allocation (FY 2013-14 through FY 2017-18)

Chancellor's Office Division Allocation	Allocation	Year 1	Year 2	Year 3	Year 4	Year 5
		2013-14	2014-15	2015-16	2016-17	2017-18
Workforce & Economic Development	12.80%	\$6,000,000	\$4,790,000	\$4,950,000	\$6,290,000	\$5,950,000
Facilities Planning & Utilization	87.20%					
District Allocation		\$39,800,000	\$31,595,000	\$32,672,000	\$41,875,000	\$38,962,000
Proposition 39 Consulting Contract		\$1,200,000	\$1,115,000	\$1,115,000	\$1,115,000	\$1,588,000
Total	100%	\$47,000,000	\$37,500,000	\$38,737,000	\$49,280,000	\$46,500,000

Table 2: Chancellor's Office Proposition 39 Total Allocation

Chancellor's Office Division Allocation	Allocation	Total
Workforce & Economic Development	12.80%	\$27,980,000
Facilities Planning & Utilization	87.20%	
District Allocation		\$184,904,000
Proposition 39 Consulting Contract		\$6,133,000
Total	100%	\$219,017,000

In Table 3, the remaining funds are broken out by the districts that had projects savings. Out of the 23 districts that had the savings, only 16 were able to use their remaining funds. This was due to a small dollar amount remaining for some districts, COVID-19 restrictions, and a district (Lassen Community College District) being able to use their remaining savings in a prior Proposition 39 project.

Table 3. Program Extension – Revised Funding

District	Prop 39 Funds Available from Project Savings	Administration Fee	Revised Prop 39 Allocation
Barstow Community College District	\$ 16,271.00	\$ 1,141.00	\$ 15,130.00
Copper Mountain Community College District	\$ 14,356.00	\$ 1,007.00	\$ 13,349.00
Feather River Community College District	\$ 93,747.00	\$ 6,574.00	\$ 87,173.00
Foothill-DeAnza Community College District	\$ 551,955.00	\$ 38,704.00	\$ 513,251.00
Gavilan Joint Community College District	\$ 10,422.00	\$ 731.00	\$ 9,691.00
Imperial Community College District	\$ 282,938.00	\$ 19,840.00	\$ 263,098.00
Lassen Community College District	\$ 41,514.00	\$ 2,911.00	
Long Beach Community College District	\$ 6,518.00	\$ 457.00	\$ 6,061.00
Los Angeles Community College District	\$ 474,681.00	\$ 33,286.00	\$ 441,395.00
Los Rios Community College District	\$ 135,445.00	\$ 9,498.00	\$ 125,947.00
Marin Community College District	\$ 1,678.00	\$ 5,026.00	\$ 66,652.00
Monterey Peninsula Community College District	\$ 158,552.00	\$ 11,118.00	\$ 147,434.00
North Orange County Community College District	\$ 691,234.00	\$ 47,961.00	\$ 643,273.00
Pasadena Area Community College District	\$ 12,585.00	\$ 7,895.00	\$ 104,690.00
Peralta Community College District	\$ 1,540,184.00	\$ 108,000.00	\$ 1,432,184.00
Redwoods Community College District	\$ 2,228.00	\$ 3,662.00	\$ 48,566.00
Riverside Community College District	\$ 2,234.00	\$ 157.00	\$ 2,077.00
San Joaquin Delta Community College District	\$ 9,623.00	\$ 675.00	\$ 8,948.00
San Luis Obispo County Community College District	\$ 16,258.00	\$ 1,140.00	\$ 15,118.00
Santa Monica Community College District	\$ 1,487,369.00	\$ 104,298.00	\$ 1,383,071.00
Sierra Joint Community College District	\$ 18.00	\$ 1.00	\$ 17.00
Sonoma County Junior College District	\$ 24,843.00	\$ 1,742.00	\$ 23,101.00
Yuba Community College District	\$ 18.00	\$ 1.00	\$ 17.00
TOTAL	5,794,671.00	\$ 405,825.00	\$ 5,350,243.00

As shown in Table 4 and Table 5, the energy savings and job creation throughout the life of the program can be seen. Year 6 (2018-19) represented a big push from the Chancellor's Office and the system to expend as much of the program funds as possible and it tails off in Year 7 (2019-20) as can be seen in the number of projects and total project cost. In Table 6, it shows the distribution of different project types which include lighting, heating/ventilation/air condition (HVAC), controls (combined lighting and HVAC controls), self-generation, MBCx/RCx, other efficiency measures and technical assistance.

Table 4. Proposition 39 Program Summary 1

Program Year	No. of Projects Closed Out	Prop 39 Total Project Cost	Energy Cost Savings (\$/yr)	Electricity Savings (kWh/yr)
Year 1 (2013-14)	6	\$ 1,395,145	\$ 164,695	1,266,885

Results of Closed-out Projects:

SUMMARY OF YEAR 8 CLOSED-OUT PROJECTS

Twenty-five completed projects were closed out by 16 community college districts in fiscal year 2020-21. This report provides a summary of key data points for the 25 closed-out projects below, with more detail available on the attached spreadsheets. The energy projects spreadsheets section has a summary of the total project information for each district in the front, followed by a spreadsheet for each district with detailed project information.

Projects are not counted as completed and closed-out until they have been installed, verified by the investor-owned utility (or consultant if they are located in publicly owned utility territory) and the total project costs and job hours created by the project have been reported in the project close out forms.

The 25 projects were completed and closed-out at a cost of \$5.8 million including Proposition 39 funds, utility incentives and any district funding required to complete the project. The projects have generated savings of 1.65 million kilowatt-hours (kWh) and more than 8,300 gas therms, resulting in than \$245,000 in energy cost savings. This is the equivalent of powering more than 272 homes. The projects also generated the equivalent of 4.1 one-year jobs in construction and construction related fields and 1.3 training years in the communities served by the districts.

Summary of Proposition 39 Total Year 8 Closed-Out Projects

- 16² Districts
- 25 Total Closed-out projects
- \$5,832,892 Total project costs
- 1,651,177 kWh savings
- 441 kW savings
- 8,292 therm savings
- \$244,549 Energy cost savings
- 4.1 Direct job years (FTEs)
- 1.3 Trainee job years (FTEs)
- 8,527 Direct job hours
- 2,713 Apprentice direct job hours
- \$6,541 Incentives paid
- 272 Homes powered

Of the 25 projects closed-out, the majority were lighting projects; these projects generate the highest savings-to-investment-ratio and continue to be integral projects for districts to meet the savings-to-investment ratio requirements (see Table 4). There were 15 lighting projects, which accounted for 60 percent of the total number of closed-out projects. HVAC and controls (combined lighting and HVAC controls) accounted for 7 projects, or 24 percent of the total number of closed-out projects. The remaining projects such as self-generation, MBCx/RCx and other amount to 12 percent of the total.

Table 7: Proposition 39 Projects Closed Out in Year 8

Project Type	Count	% of Total Projects
Lighting	15	60%
HVAC	6	24%
Controls (combined lighting and HVAC controls)	1	4%
Self-Generation	0	0%
MBCx/RCx	1	4%
Other energy efficiency measures	2	8%
Tech Assist	0	0%
Total Projects	25	100%

² Not all districts closed-out a project for each fiscal year. This may be due to multi-year projects, scheduling conflicts, contracting issues and other interruptions that take place during project development or construction

OVERALL: PROPOSITION 39 CLOSED OUT PROJECTS

Over the course of the entire Proposition 39 program, of the 957 total projects that were closed-out, the majority were lighting projects; these projects generate the highest savings-to-investment-ratio and continue to be integral projects for districts to meet the savings-to-investment ratio requirements (see Table 5). Additionally, there were 556 lighting projects, which accounted for more than 58 percent of the total number of closed-out projects. HVAC and controls (combined lighting and HVAC controls) accounted for 323 projects, or 34 % of the total number of closed-out projects. The remaining projects such as self-generation, MBCx/RCx, and other amount to approximately 8 % of the total or 78 projects.

Completed/Closed-Out Projects

SUMMARY BY DISTRICT

This document provides a summary of the data included in the attached spreadsheets for closed-out projects for each community college district, including total project costs, incentive amounts, kilowatt-hours (kWh) and gas therms saved and other project metrics.

PROPOSITION 39 DISTRICT PROJECTS COMPLETED/CLOSED-OUT

Barstow Community College District

Year 8 (Fiscal Year 2020-21)
1 Closed-out projects

Energy Usage Data Summary

The following data is submitted and self-certified by the districts on a fiscal year basis. Districts are able to update prior submitted energy usage data so this may affect the current and prior year's totals and calculations. At a glance, by comparing the 2018-19 energy usage data with the 2012-13 baseline data, the systemwide energy usage has been reduced by 7.29 %. A total of 34 districts have reduced their energy usage on campus while 16 districts have increased their usage as compared to the energy usage baseline data. A total of 22 districts have not reported their baseline energy usage or reported their 2018-19 energy usage data so we are unable to calculate the change at their district.

Currently, districts are submitting their fiscal year 2019-20 energy usage data. Therefore, we currently do not have fiscal year 2019-20 progress data to compare against the baseline year. For further detail

and information, please see the attached spreadsheet showing the energy usage data summary and per district.

SYSTEMWIDE ENERGY USAGE DATA

- Fiscal year 2012-13 (baseline year) average British thermal units per gross square foot per week: 1,606
- Fiscal year 2018-19 average British thermal units per gross square foot per week: 1,489
- Percent reduction/gain of baseline year: -7.29 %

ENERGY USAGE PER DISTRICT

Allan Hancock Joint Community College District

- Fiscal year 2012-13 (baseline year) average British thermal units per gross square foot per week: 1,673
- Fiscal year 2018-19 average British thermal units per gross square foot per week: N/A

Board of Governor's Sustainability and Energy Awards

The California Community Colleges Board of Governors established the Energy and Sustainability Awards in 2012 to honor leaders and exemplary energy and sustainability efforts within the California community college system. The Board of Governors presents these awards each year to recognize and promote the ongoing efforts of community colleges to achieve environmental sustainability. After the Proposition 39 California Clean Energy Jobs Act was enacted, the awards evolved to include these projects. The California Community Colleges Board of Governors Energy and Sustainability Awards are granted for the following categories:

- **Excellence in Energy and Sustainability—Innovative Projects:** This category recognizes the use and implementation of innovative technologies and progressive practices within their project.
- **Excellence in Energy and Sustainability—Faculty/Student Initiatives:** This category recognizes faculty and students who have excelled in developing sustainability initiatives for their college.
- **Excellence in Energy and Sustainability—Sustainability Champion:** This category recognizes contributions to the community college system in the area of energy and sustainability.

The selection process for the Excellence in Energy and Sustainability awards begins with a call to districts for nominations in all award categories. Award nominations are presented to the California Community Colleges/Investor Owned Utilities (CCC/IOU) Energy Resource and Sustainability Partnership (Partnership) for review and final selection.

The winners of the Board of Governors' Sustainability and Energy Awards are listed below. More information on the winning projects can be seen in the January 2021 Board of Governors Energy and Sustainability Award Program [Board Item](#).

2020 Winners

EXCELLENCE IN ENERGY AND SUSTAINABILITY—INNOVATIVE PROJECTS

Best Overall Innovative Project — Large District: Contra Costa Community College District, Contra Costa College Science Building

Best Overall Innovative Project — Medium District: Citrus Community College District, Citrus College – Retro Commissioning (RCx) at Citrus College

Best Overall Innovative Project — Small District: Hartnell Community College District, Hartnell College

EXCELLENCE IN ENERGY AND SUSTAINABILITY—FACULTY/STUDENT INITIATIVES:

The 2020 Board of Governors Faculty/Student Initiative Award winner is Los Angeles Community College District (LACCD) for the development of the LACCD Virtual Climate Crisis Curriculum.

EXCELLENCE IN ENERGY AND SUSTAINABILITY—SUSTAINABILITY CHAMPION:

Peter Hardash, former Vice Chancellor of Business Operations of Rancho Santiago Community College District.

Scaling Up Pre-Apprenticeship in California	7
Conclusion.....	8

Introduction

From 2014 through 2018, the California Workforce Development Board (CWDB) invested \$13.3 million of California Clean Energy Jobs Act (Proposition 39, or Prop 39) funds to build twelve construction pre-apprenticeship training partnerships across the state. These pilot projects – the foundation of the CWDB’s High Road Construction Careers (HRCC) initiative – created a coherent system of energy efficiency focused job-training and placement programs serving disadvantaged Californians.

The Prop 39-funded training partnerships built regional pipelines to middle class careers for at-risk youth, women, justice-involved, and other disadvantaged or under-represented job seekers. Using the industry-recognized Multi-Craft Core Curriculum (MC3), these twelve pilot projects prepared more than 2,000 disadvantaged Californians for a future in construction industry careers. Partnering with local Building Trades Councils and the state-registered apprenticeship community, Prop 39-funded projects brought together community, education, and workforce organizations to create the critical link between pre-apprenticeship and apprenticeship programs. Pre-apprenticeship graduates earned an industry-valued credential (i.e., the MC3 certificate) and were connected to joint labor-management state-registered apprenticeship programs in the construction trades, or found placement in other meaningful employment and educational opportunities.

In addition to overseeing program implementation, the CWDB developed resources to inform future investments in construction pre-apprenticeship based on the experiences and accomplishments of Prop 39-funded training partnerships. These resources – described in greater detail below – include best practices reports and a series of short videos highlighting Prop 39-funded pilot projects, as well as guidelines for MC3-based pre-apprenticeship. By distributing these resources widely and presenting on the work with Prop 39-funded partnerships over the years, the CWDB has not only increased awareness of successful construction pre-apprenticeship training among practitioners and policymakers, but also has secured tens of millions of dollars for the High Road Construction Careers initiative to expand efforts and impact.

Cumulative Results

The CWDB considers the Prop 39-funded pre-apprenticeship program a success in terms of the number of people served, the increasing diversity and preparedness of candidates for apprenticeship in the building and construction trades, and the outcomes achieved by training partnerships and program participants. In addition to presenting the cumulative results of Prop 39-funded pre-apprenticeship, this section provides a brief explanation of the data in order to clarify the meaning and significance of each category and how the results came to fruition.

The information presented below reflects additional and corrected data available after the CWDB submitted its training report to the Prop 39 Citizens Oversight Board in February 2019. Also, one grantee, the Flintridge Center located in Pasadena, is continuing its pre-apprenticeship program with Prop 39 funding and anticipates expending all funds by the end of March 2020. Accordingly, the participant and outcome data presented below is nearly final and will be updated to reflect additional participants and outcomes.

Enrollment. 2,701 individuals were enrolled in a Prop 39-funded, multi-craft pre-apprenticeship program and received some level of training as well as various supportive services. Ten of the 12 programs exceeded their targets for enrollment, with the others reaching 90%-95% of their target.

Demographics of enrollees. The CWDB advances equity in workforce development by focusing on individuals and communities with high need – namely, people with barriers to employment and populations that are under-represented in an industry and/or occupation. Implementing an equity agenda has many facets, targeted recruitment and retention being one critical component. To that end, community-based organizations (CBOs) played an essential role in effectively recruiting and serving participants from the priority populations listed below. Some participant characteristics were undercounted, because programs were required to report on age, gender, and veteran status only whereas most, but not all, programs reported on income, homelessness, and involvement with the criminal justice system as well. It should also be noted that figures below add up to more than 100 percent, as individuals identified with and were counted under more than one category.

- Total participants enrolled: 2,701
 - Low-Income: 51% (1,367)
 - Youth (ages 18-24): 27% (742)
 - Women: 17% (471)
 - Formerly-incarcerated and justice-involved: 16% (419)
 - Homeless: 6% (165)
 - Veteran: 3% (93)

Training Completion. Training partnerships sustained high graduation rates over the course of the Prop 39-funded program, which is notable considering the challenges with trainee retention and program completion in the construction industry. About 78%, or nearly 2,100 of the

individuals enrolled completed the training and earned the Multi-Craft Core Curriculum (MC3) certificate. The high completion rate was attributable to an emphasis on meeting the needs of pre-apprentices by offering or coordinating a variety of supportive services that enabled individuals to complete training (e.g., stipends and counseling), be prepared for apprenticeship requirements (e.g., remedial math and reading courses and addiction treatment), and gain employability skills and support systems for the long haul (e.g., anger management and financial literacy). Addressing supportive services is as much a participant retention strategy as it is an equity strategy.

Placement. Earning an MC3 certificate, an industry-recognized credential, was fundamental to creating structured pathways to state-registered apprenticeship, one of the CWDB's main goals of the program. Planning for placement was an essential element of Prop 39-funded programs nonetheless, because entry into apprenticeship is neither guaranteed nor instantaneous. For that reason, Prop 39-funded training partnership involved key labor organizations – local Building & Construction Trades Councils (BTCs) as well as state-registered apprenticeship program coordinators – to leverage industry and trade- or craft-specific knowledge and decision-making power over hiring new apprentices. While apprenticeship was the ideal outcome for many pre-apprentices, training partnerships facilitated and tracked other meaningful placement opportunities as listed below.

- Total placements secured¹: 1660 (79% of pre-apprenticeship graduates)
 - State-registered apprenticeship: 41% (683)
 - Construction or energy-efficiency specific employment: 23% (372)
 - Post-secondary education: 10% (166)
 - Other employment: 26% (439)

Increasing the representation of women in the building and construction trades continues to be a major goal for the industry and apprenticeship community, both in California and across the country. In fact, this goal was added to California's Unemployment Insurance Code, in the section pertaining to rules for pre-apprenticeship programs in the building and construction trades. Therefore, it is remarkable that the percentage of women placed in state-registered apprenticeship exceeded the share of total apprenticeship placements under Prop 39 (56% for women compared to 41% overall). Put another way, nearly 1 in 3 graduates placed in state-registered apprenticeship were women whereas women constituted only about 1 in 6 pre-apprenticeship enrollments.

¹ The CWDB expects placements to increase over time as some Prop 39-funded programs continue serving participants with other funding and as pre-apprenticeship graduates participate in other workforce development programs. Many factors impact placement rates, including staggered cohorts; gaps between training completion date and the timing of apprenticeship openings; and postponed placement for Conservation Corps members who choose to finish their term.

Lessons Learned

For the CWDB, Prop 39 funding represented an investment in the pilot phase of a single, comprehensive High Road Construction Careers (HRCC) initiative that could meet the workforce needs of the construction sector industry-wide. Consequently, the CWDB dedicated some Prop 39 funding to technical assistance to not only support grantees with program implementation, but also to support the CWDB with building a model for construction sector pre-apprenticeship by producing and disseminating several different types of educational resources. This research and development component of the CWDB's Prop 39 program involved hosting Communities of Practice, identifying and sharing key lessons, and producing best practices reports as well as a series of short videos.

The CWDB and its technical assistance provider, the California Labor Federation's Workforce & Economic Development Program (CLF/WED), hosted Communities of Practice regularly over the course of the Prop 39 program from 2014-2018. These convenings enabled grantees to learn from each other's experiences and innovations, identify common challenges and brainstorm possible solutions, and receive training aimed at improving services and outcomes. Developing effective recruitment and retention plans to increase the representation of women in the construction trades and incorporating trauma-informed care among the supportive services available to pre-apprentices are examples of major developments facilitated through the Communities of Practice.

Based on training partnerships' experiences during the first few years of HRCC: Prop 39 implementation, the CWDB and CLF/WED identified three major lessons for the successful design and execution of multi-craft pre-apprenticeship. Stemming from the CWDB's high road principles of equity, climate/environmental sustainability, and job quality, the lessons have been presented in annual reports to the Prop 39 Citizens Oversight Board and include:

1. Active involvement with the local building trades is key to apprenticeship placement, which is the ideal outcome for most graduates of pre-apprenticeship;
2. Placement into state-registered apprenticeship is not an overnight process; and
3. A successful program provides more than just curriculum.

Expanding on these core lessons, the CWDB and CLF/WED then produced a more comprehensive promising practices report featuring pilot projects' learnings and innovations (["Building a Statewide System of High Road Pre-Apprenticeship in California: Lessons from the California Clean Energy Jobs Act" report](#), July 2019). First, the report explains the need for and benefit of broad, industry-based training to develop a skilled and diverse construction workforce in California – one capable of performing the wide array of construction work, including but not limited to clean energy deployment. The report then covers the elements of successful pre-apprenticeship programs, detailing: the roles and contributions of labor, community, workforce, and employer organizations within a training partnership; strategies to orient training to meet industry demand; comprehensive programming (from

recruitment, training and supportive service, to job placement) that serves priority populations and ensures training leads to high-quality career outcomes; and assessments of program evaluation and opportunities for expansion.

To bolster pre-apprenticeship programs' connection to regional labor market demand and advance high road principles of job quality and equity, the CWDB promotes the expanded use of Community Workforce Agreements (CWAs) on major public infrastructure projects, including projects critical to safeguarding the climate and environment. To that end, the CWDB commissioned a report about building effective partnerships between community and building trades organizations as it applies to the development, adoption, and implementation of CWAs. The report, ["Making Collaboration Work: Best Practices for Community-Trades Partnerships,"](#) was prepared by the East Bay Alliance for a Sustainable Economy (EBASE) and the Building & Construction Trades Council of Alameda County and outlines strategies for collaboration to overcome challenges stemming from different organizational structures, leadership styles, and cultures. Furthermore, the report describes the major components of strong CWAs, including targeted hire and the value of quality pre-apprenticeship programs to help meet community workforce provisions and targets. Policymakers may also find useful the discussion of the benefits of CWAs for public agencies, contractors, and developers, and relevant case studies of successful CWA policies from across California.

Lastly, the CWDB and CLF/WED had a series of short videos made to be able to show what pre-apprenticeship entails and let pre-apprentices directly tell their stories about the deep and lasting impact these programs have had in their lives. Most of the videos focus on a particular Prop 39-funded training partnership and highlight their niche or unique contribution, such as a particular population served (e.g., formerly-incarcerated individuals and women) or linkages established with particular energy and transportation projects (e.g., MCE Solar One in Richmond and High Speed Rail in Fresno). The videos can be accessed from the [CWDB's YouTube channel](#).

Scaling Up Pre-Apprenticeship in California

Based on progress developing a model training program under Prop 39 and an ongoing need to develop a skilled and diverse construction industry workforce in California, the Road Repair & Accountability Act of 2017 (Senate Bill 1, or SB 1) directed and funded the CWDB to expand the High Road Construction Careers initiative. Specifically, SB 1 mandated the CWDB to: (1) develop guidelines for local agencies to “participate in, invest in, or partner with” construction pre-apprenticeship programs and (2) establish a pre-apprenticeship program statewide with \$25 million in SB 1 funding.

The CWDB published the [“SB 1 Workforce Guidelines”](#) in 2019, outlining ten standards for multi-craft construction pre-apprenticeship in California. The standards expound on the lessons learned under Prop 39 pertaining to the key elements of successful pre-apprenticeship programs and partnerships to expand the use of Community Workforce Agreements. The Guidelines are relevant and applicable to a wide range of entities involved in executing major construction projects and related workforce development programs, not just local agencies receiving SB 1 transportation program funding that were the designated audience as per SB 1.

Secondly, the CWDB launched the HRCC: SB 1 program in November 2019 by issuing a Request for Applications for the first three years of SB 1 funding available (\$15M out of a total \$25M). This program will look very similar to the one under Prop 39 in terms of goals, activities, priority populations, and an emphasis on training partnerships for project implementation. One key difference is scale, with the CWDB establishing 12 regions of the state and requiring applicants to propose projects that operate region-wide. Applications are under review and the CWDB anticipates announcing awards by May 2020. Notably, virtually all of the entities supported by Prop 39 are expected to continue the work at greater scale under the HRCC: SB 1 program.

In addition, the Legislature appropriated \$10 million from the Greenhouse Gas Reduction Fund (GGRF) in Fiscal Year 2019-20 for the CWDB’s High Road Construction Careers initiative. It is expected, but not guaranteed that the HRCC initiative will receive an additional \$40M from the GGRF over the next four budget years. Again, the CWDB does not anticipate changing the program dramatically with new funding except with respect to two major GGRF requirements – viz., bolstering the nexus with greenhouse gas emission reductions and serving priority populations pursuant to AB 1550² (Gomez, 2016). These issues will be addressed in more detail in the CWDB’s Expenditure Record to the California Air Resources Board which is under development currently.

² Priority populations established under AB 1550 include residents of Disadvantaged Communities (based on CalEnviroScreen 3.0) as well as Low-Income Households and residents of Low-Income Communities based on county-specific median household income levels.

Conclusion

Thanks to dedicated multi-year funding under Prop 39, the CWDB built the foundation of a comprehensive High Road Construction Careers initiative by investing in 12 training partnerships delivering multi-craft pre-apprenticeship. Through targeted recruitment and retention, industry demand-driven training and certification, employer engagement (with clean energy employers and developers and state-registered apprenticeship programs), and multiple popular education efforts, Prop 39-funded training partnerships demonstrated the ability to advance the following goals that address the needs of the construction industry, low-income and other disadvantaged populations, and the State of California:

- Deliver clean energy skills to disadvantaged workers;
- Create structured pathways to apprenticeship;
- Build the energy-efficiency workforce; and
- Align training and supportive services systems and leverage funding.

Moreover, the accomplishments under Prop 39 proved the viability of taking multi-craft construction pre-apprenticeship to a regional scale, thereby increasing access to middle-class careers for more disadvantaged Californians while supporting further clean energy development statewide. With significant funding from SB 1 and the GGFR, the CWDB and Prop 39-funded training partnerships are in the process of launching a more ambitious High Road Construction Careers initiative and building a statewide system of high-road pre-apprenticeship in California.

The logo for High Road Construction Careers features the words "HIGH ROAD" in a large, bold, orange sans-serif font. The letter "A" in "ROAD" is stylized as a triangle pointing upwards. Below "HIGH ROAD" is the phrase "CONSTRUCTION CAREERS" in a smaller, grey, all-caps sans-serif font.

UCLA

Delivering quality pre-apprenticeship is multi-faceted and resource-intensive.

Prop 39 grew and diversified California's apprenticeship candidate pool.

Graduates secured apprenticeship slots and other meaningful placements.

Prop 39 helped develop a scalable model for pre-apprenticeship in California.

Hearing from pre-apprentices is the best way to appreciate the program's impact.

Appendix E: Senate Bill 73: Proposition 39 Implementation Legislation

Senate Bill No. 73

CHAPTER 29

An act to amend Section 25415 of, and to add Chapter 5 (commencing with Section 26225) to Division 16.3 of, the Public Resources Code, relating to energy, and making an appropriation therefor, to take effect immediately, bill related to the budget.

[Approved by Governor June 27, 2013. Filed with
Secretary of State June 27, 2013.]

LEGISLATIVE COUNSEL'S DIGEST

SB 73, Committee on Budget and Fiscal Review. Energy: Proposition 39 implementation.

(1) Existing law, the Energy Conservation Assistance Act of 1979, establishes the State Energy Conservation Assistance Account, a continuously appropriated account, for the purposes of funding loans to schools, hospitals, public care institutions, and units of local government to maximize energy savings. Existing law requires each eligible institution to which an allocation has been made under the act to repay the principal amount of the allocation, plus interest, in not more than 30 equal semiannual payments, as determined by the State Energy Resources Conservation and Development Commission, or the Energy Commission. Existing law requires the Energy Commission, except as specified, to periodically set interest rates on the loans based on surveys of existing financial markets and at rates not less than 1 % per annum.

This bill would permit not more than 40 equal semiannual payments and authorization of no-interest loans.

(2) The California Clean Energy Jobs Act, an initiative approved by the voters as Proposition 39 at the November 6, 2012, statewide general election, made changes to corporate income taxes and, except as specified, provides for the transfer of \$550,000,000 annually from the General Fund to the Clean Energy Job Creation Fund, or the Job Creation Fund, for 5 fiscal years beginning with the 2013–14 fiscal year. Moneys in the Job Creation Fund are available, upon appropriation by the Legislature, for purposes of funding eligible projects that create jobs in California improving energy efficiency and expanding clean energy generation. Existing law provides for the allocation of available funds to public school facilities, university and college facilities, and other public buildings and facilities, as well as job training and workforce development and public-private partnerships for eligible projects, as specified. Existing law establishes prescribed criteria that apply to all expenditures from the Job Creation Fund.

This bill would appropriate \$3,000,000 from the Job Creation Fund to the California Workforce Investment Board to develop and implement a

competitive grant program, in consultation with the Energy Commission and the Public Utilities Commission, for eligible community-based and other training workforce organizations preparing disadvantaged youth or veterans for employment, as specified.

This bill would, for the 2013–14 fiscal year, transfer \$28,000,000 from the Job Creation Fund to the Education Subaccount, which this bill would create in the State Energy Conservation Assistance Account. This bill would appropriate moneys in the Education Subaccount to the Energy Commission for the purpose of low-interest and no-interest revolving loans and loan loss reserves for eligible projects and technical assistance, as prescribed. This bill would require funds remaining in the Education Subaccount after the 2017–18 fiscal year to continue to be available in future years for loans to local education agencies, as defined, and community college districts, as specified. This bill would require the funds deposited annually in the Job Creation Fund and remaining in the fund, as prescribed, to be allocated, to the extent consistent with the act, to local education agencies by the Superintendent of Public Instruction, as specified, and to community college districts by the Chancellor of the California Community Colleges at his or her discretion. This bill would require the Energy Commission to maintain information on the local education agencies and community college districts that receive grants, loans, or other financial assistance pursuant to these provisions.

This bill would require the Energy Commission, in consultation with the Superintendent of Public Instruction, the Chancellor of the California Community Colleges, and the Public Utilities Commission, to establish specified guidelines. This bill would require the Energy Commission to adopt these guidelines at a publicly noticed meeting and provide an opportunity for public comment, as prescribed. This bill would require the Superintendent of Public Instruction and the Chancellor of the California Community Colleges to require that funds be paid back if they are not used in accordance with prescribed provisions.

(3) The California Clean Energy Jobs Act creates the Citizens Oversight Board with specified responsibilities relative to the review of expenditures from the Job Creation Fund, including the submission of an evaluation to the Legislature.

This bill would require an entity, as a condition of receiving funds from the Job Creation Fund, not sooner than one year but no later than 15 months after the entity completes its first eligible project with a grant, loan, or other assistance from the Job Creation Fund, to submit a report of its project expenditures to the Citizens Oversight Board, as specified. This bill would require the California Workforce Investment Board, in consultation with the Energy Commission, to utilize reports filed with the Citizens Oversight Board to quantify total employment affiliated with funded projects, as well as to estimate new trainee, apprentice, or full-time jobs resulting from Job Creation Fund activity, and would require the California Workforce Investment Board to prepare a report with this information annually and to submit it to the Citizens Oversight Board. This bill would require the Citizens

Oversight Board to report specified information it receives to the Legislature annually as part of its responsibility to submit an evaluation to the Legislature and to post this report on a publicly accessible Internet Web site.

(4) This bill would declare that it is to take effect immediately as a bill providing for appropriations related to the Budget Bill.

Appropriation: yes.

The people of the State of California do enact as follows:

SECTION 1. The Legislature finds and declares all of the following:

(a) With the passage of Proposition 39 at the November 6, 2012, statewide general election, the people of California declared their intent to have multistate businesses treated equally under the Revenue and Taxation Code and to establish a path forward for schools and clean energy jobs.

(b) Between the 2013–14 and 2017–18 fiscal years, Proposition 39 will dedicate up to \$550,000,000 annually to the Clean Energy Job Creation Fund.

(c) Proposition 39 establishes objectives for clean energy job creation, including funding energy efficiency projects and renewable energy installations in public schools, universities, and other public facilities.

(d) Proposition 39 identifies energy efficiency retrofits and clean energy installations at public schools as ways to promote private sector jobs to save energy and money.

(e) The United States Environmental Protection Agency estimates that schools waste 30 percent of their energy unnecessarily through inefficiencies. The financial savings from more efficient buildings would provide schools with the flexibility to pay for other upgrades and programs that enhance student learning.

(f) With the passage of Proposition 39, the state will be able to reduce energy demand at public schools and provide long-term savings and budgetary flexibility so schools can concentrate their limited resources on education and not utility bills.

(g) Proposition 39 also establishes a Citizens Oversight Board to review expenditures, audit the Clean Energy Job Creation Fund, and maintain accountability of the fund.

(h) It is the intent of the Legislature to establish guidelines for clean energy expenditures from the Clean Energy Job Creation Fund.

(i) It is further the intent of the Legislature to ensure that schools receive and prioritize high-quality facility retrofits and installations that lead to persistent energy savings.

(j) It is further the intent of the Legislature to quickly increase the number of jobs in California supporting energy retrofit improvements, and to accomplish this, to direct the State Energy Resources Conservation and Development Commission to proceed quickly to develop necessary guidelines and procedures for project identification and investment.

(k) In addition to energy efficiency retrofits and clean energy installations, it is the intent of the Legislature that funds be available for allocation to local educational agencies to develop expertise in energy management capability. Energy managers can provide schools, particularly the smallest and neediest, with resources and best practices to implement energy efficiency and clean energy installations across California's more than 1,000 school districts with schools having kindergarten or grades 1 to 12, inclusive, as well as oversight to ensure proper reporting and data analysis for eligible projects.

SEC. 2. Chapter 5 (commencing with Section 26225) is added to Division 16.3 of the Public Resources Code, to read:

CHAPTER 5. PROPOSITION 39 IMPLEMENTATION

26225. For the purposes of this chapter, the following terms have the following meanings:

(a) "Chancellor" means the Chancellor of the California Community Colleges.

(b) "Energy Commission" means the State Energy Resources Conservation and Development Commission.

(c) "Local education agency" or "LEA" means a school district, county office of education, charter school, or state special school.

(d) "Job Creation Fund" means the Clean Energy Job Creation Fund established in Section 26205.

26227. (a) (1) For the 2013–14 fiscal year, twenty-eight million dollars (\$28,000,000) shall be transferred from the Job Creation Fund to the Education Subaccount, which is hereby created in the State Energy Conservation Assistance Account created pursuant to Section 25416. The moneys in the Education Subaccount are appropriated to the Energy Commission for the purpose of low-interest and no-interest revolving loans and loan loss reserves for eligible projects and technical assistance.

(2) For the 2013–14 fiscal year, funds in the Education Subaccount shall be available for local education agencies and community college districts. If a local education agency or community college district has an eligible project, the amount of the funding resources gap that is to be considered a reasonable loan value from the Education Subaccount is the project cost less the amount of any grant awarded pursuant to Section 26233 and less any state, federal, or local incentives. A local education agency or community college district may need to meet additional credit or other financial qualifying criteria applicable pursuant to the Energy Conservation Assistance Act of 1979 (Chapter 5.2 (commencing with Section 25410) of Division 15). The Energy Commission shall facilitate a local education agency or community college district's participation in both the Job Creation Fund and Energy Conservation Assistance Account programs through coordinated information, documentation, and review processes regarding the project and the borrowing entity.

(b) For the 2014–15 through 2017–18 fiscal years, inclusive, the amount transferred from the Job Creation Fund to the Energy Conservation Assistance Account shall be determined in the annual budget.

(c) Funds remaining in the Education Subaccount after the 2017–18 fiscal year shall continue to be available in future years for loans to local education agencies and community college districts pursuant to this section.

26230. (a) The sum of three million dollars (\$3,000,000) is hereby appropriated from the Job Creation Fund to the California Workforce Investment Board to develop and implement a competitive grant program for eligible community-based and other training workforce organizations preparing disadvantaged youth or veterans for employment.

(b) In developing and implementing the program, the board shall do all of the following:

(1) In consultation with the Energy Commission and the Public Utilities Commission, develop a competitive process to award grants to eligible entities and evaluate and select applications for grants.

(2) Administer grants to eligible entities for the purposes of work experience and job training on energy efficiency and clean energy projects.

(c) In awarding the grants, the California Workforce Investment Board shall give priority to projects that include the following elements:

(1) Specific skills gained through hands-on application related to energy efficiency and clean energy that is embedded in, or linked to, a broader occupational training program.

(2) Actual work experience gained through hands-on clean energy project implementation.

(3) Industry-recognized credentials and certificates.

(4) Training that demonstrates a high probability of placement of trainees into career track jobs.

(5) A partnership with state-approved apprenticeship programs that promote industry-recognized skills and credentials through work experience and lead to placement in a state-approved apprenticeship programs.

26233. (a) Commencing with the 2013–14 fiscal year and through the 2017–18 fiscal year, inclusive, the funds deposited annually in the Job Creation Fund and remaining after the transfer pursuant to Section 26227 and the appropriation pursuant to Section 26230 shall be allocated, to the extent consistent with this division, as follows:

(1) Eighty-nine percent of the funds shall be available to local educational agencies and allocated by the Superintendent of Public Instruction pursuant to subdivision (b).

(2) Eleven percent of the funds shall be available to community college districts and allocated by the Chancellor of the California Community Colleges at his or her discretion.

(b) The Superintendent of Public Instruction shall allocate the funds provided in paragraph (1) of subdivision (a) as follows:

(1) Eighty-five percent on the basis of average daily attendance reported as of the second principal apportionment for the prior fiscal year.

(A) For every local education agency with average daily attendance as reported pursuant to this subdivision of 100 or less, the amount awarded shall be fifteen thousand dollars (\$15,000).

(B) For every local education agency with average daily attendance as reported pursuant to this subdivision in excess of 100, but 1,000 or less, the amount awarded shall be either that local educational agency's proportional award on the basis of average daily attendance or fifty thousand dollars (\$50,000), whichever amount is larger.

(C) For every local education agency with average daily attendance as reported pursuant to this subdivision in excess of 1,000, but less than 2,000, the amount awarded shall be either that local education agency's proportional award on the basis of average daily attendance or one hundred thousand dollars (\$100,000), whichever amount is larger.

(D) For every local education agency with average daily attendance as reported pursuant to this subdivision of 2,000 or more, the amount awarded shall be the local education agency's proportional award on the basis of average daily attendance.

(2) Fifteen percent on the basis of students eligible for free and reduced-price meals in the prior year.

(3) For every local education agency that receives over one million dollars (\$1,000,000) pursuant to this subdivision, not less than 50 percent of the funds shall be used for projects larger than two hundred fifty thousand dollars (\$250,000) that achieve substantial energy efficiency, clean energy, and jobs benefits.

(c) A local education agency subject to subparagraph (A) or (B) of paragraph (1) of subdivision (b) may submit a written request to the Superintendent of Public Instruction, by August 1 of each year, to receive in the current year its funding allocation for both the current year and the following year, both of which would be based on the average daily attendance used in the current year for determining funding pursuant to the applicable subparagraph. A local education agency requesting funding pursuant to this subdivision shall not receive a funding allocation in the year following the request.

(d) A local education agency shall encumber funds received pursuant to this section by June 30, 2018.

26235. (a) The Energy Commission, in consultation with the Superintendent of Public Instruction, the Chancellor of the California Community Colleges, and the Public Utilities Commission, shall establish guidelines for the following:

(1) Standard methods for estimating energy benefits, including reasonable assumptions for current and future costs of energy, and guidelines to compute the cost of energy saved as a result of implementing eligible projects funded by this chapter.

(2) Contractor qualifications, licensing, and certifications appropriate for the work to be performed, provided that the Energy Commission shall not create any new qualification, license, or certification pursuant to this subparagraph.

(3) Project evaluation, including the following:

(A) Benchmarks or energy rating systems to select best candidate facilities.

(B) Use of energy surveys or audits to inform project opportunities, costs, and savings.

(C) Sequencing of facility improvements.

(D) Methodologies for cost-effectiveness determination.

(4) To ensure that adequate energy audit, measurement, and verification procedures are employed to ensure that energy savings and greenhouse gas emissions reductions occur as a result of any funding provided pursuant to this section. The Energy Commission shall develop a simple preinstallation verification form that includes project description, estimated energy savings, expected number of jobs created, current energy usage, and costs. The Energy Commission may develop benchmarking and other innovative facility evaluation systems in coordination with the University of California.

(5) Achievement of the maximum feasible energy efficiency or clean energy benefits, as well as job creation benefits for Californians, resulting from projects implemented pursuant to this chapter.

(6) Where applicable, ensuring LEAs assist classified school employees with training and information to better understand how they can support and maximize the achievement of energy savings envisioned by the funded project.

(b) The Energy Commission shall allow the use of data analytics of energy usage data, where possible, in the energy auditing, evaluation, inventorying, measuring, and verification of projects. To ensure quality of results, data analytics providers shall have received prior technical validation by the Energy Commission, a local utility, or the Public Utilities Commission.

(c) A community college district or LEA shall not use a sole source process to award funds pursuant to this chapter. A community college district or LEA may use the best value criteria as defined in paragraph (1) of subdivision (c) of Section 20133 of the Public Contract Code to award funds pursuant to this chapter.

(d) The Energy Commission shall adopt the guidelines in accordance with this section at a publicly noticed meeting and provide an opportunity for public comment. The Energy Commission shall provide written public notice of a meeting at least 30 days prior to the meeting.

(1) For substantive revision of the guidelines, the Energy Commission shall provide written notice of a meeting at least 15 days prior to the meeting at which the revision is to be considered or adopted.

(2) The adoption or revision of guidelines pursuant to this subdivision is exempt from Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

(e) Each participating LEA shall prioritize the eligible projects within its jurisdiction taking into consideration, as applicable, at least the following factors:

(1) The age of the school facilities, as well as any plans to close or demolish the facilities.

(2) The proportion of pupils eligible for funds under Title I of the federal No Child Left Behind Act of 2001 (20 U.S.C. Sec. 6301 et seq.) at particular schoolsites.

(3) Whether the facilities have been recently modernized.

(4) The facilities' hours of operation, including whether the facilities are operated on a year-round basis.

(5) The school's energy intensity as determined from an energy rating or benchmark system such as the United States Environmental Protection Agency's Energy Star system or other acceptable benchmarking approach that may be available from local utilities, the American Society for Heating, Refrigerating, and Air-Conditioning Engineers, Inc., or reputable building analysis software as is appropriate to the size, budget, and expertise available to the school.

(6) The estimated financial return of each project's investment over the expected lifecycle of the project, in terms of net present value and return on investment.

(7) Each project's potential for energy demand reduction.

(8) The anticipated health and safety improvements or other nonenergy benefits for each project.

(9) The individual or collective project's ability to facilitate matriculation of local residents into state-certified apprenticeship programs.

(10) The expected number of trainees and direct full-time employees likely to be engaged for each LEA's annual funding commitments based upon a formula to be made available by the Energy Commission or California Workforce Investment Board. The formula shall be stated as labor-intensities per total project dollar expended, and may differentiate by type of improvement, equipment, or building trade involved.

(11) The ability of the project to enhance workforce development and employment opportunities, utilize members of the California Conservation Corps, certified local conservation corps, Youth Build, veterans, Green Partnership Academies, nonprofit organizations, high school career technical academies, high school regional occupational programs, or state-certified apprenticeship programs, or to accommodate learning opportunities for school pupils or at-risk youth in the community.

(f) The Superintendent of Public Instruction shall not distribute funds to an LEA unless the LEA has submitted to the Energy Commission, and the Energy Commission has approved, an expenditure plan that outlines the energy projects to be funded. An LEA shall utilize a simple form expenditure plan developed by the Energy Commission. The Energy Commission shall promptly review the plan to ensure that it meets the criteria specified in this section and in the guidelines developed by the Energy Commission. A portion of the funds may be distributed to an LEA upon request for energy audits and other plan development activities prior to submission of the plan.

(g) This section shall not affect the eligibility of any eligible entity awarded a grant pursuant to this section to receive other incentives available

from federal, state, and local government, or from public utilities or other sources, or to leverage the grant from this section with any other incentive.

(h) Any limitation of funds awarded to individual projects pursuant to this chapter shall not preclude or otherwise limit the total amount of funds that a recipient LEA or community college may otherwise be eligible to receive as a result of identifying multiple projects that meet the overall objectives and criteria described in this chapter.

(i) For a school facility that is not publicly owned, a school district receiving moneys pursuant to this chapter for a project for that facility shall require that the school repay to the state all moneys received from the Job Creation Fund for the project if the school voluntarily vacates the facility within five years of project completion. The facility owner shall repay to the state all moneys received from the Job Creation Fund for the project if the school was forced to vacate the facility within the life of the project completion. All benefits of these public funds should be received by the school utilizing the facility.

(j) It is the intent of the Legislature that monetary savings at eligible institutions from retrofit and installation projects pursuant to this section be used to benefit students and learning at those institutions.

26237. The Energy Commission shall maintain information on the local education agencies and community college districts that receive grants, loans, or other financial assistance under this chapter. The publicly available and searchable database shall include relevant metrics, to be determined by the Energy Commission, for electric, gas, and cost savings of the projects.

26240. (a) In order to later quantify the costs and benefits of funded projects, an entity that receives funds from the Job Creation Fund shall authorize its local electric and gas utilities to provide 12 months of past and ongoing usage and billing records at the school facility site level to the Energy Commission.

(b) As a condition of receiving funds from the Job Creation Fund, not sooner than one year but no later than 15 months after an entity completes its first eligible project with a grant, loan, or other assistance from the Job Creation Fund, the entity shall submit a report of its project expenditures to the Citizens Oversight Board created pursuant to Chapter 3 (commencing with Section 26210). To the extent practical, this report shall also contain information on any of the following:

(1) The total final gross project cost before deducting any incentives or other grants and the percentage of total project cost derived from the Job Creation Fund.

(2) The estimated amount of energy saved, accompanied by specified energy consumption and utility bill cost data for the individual facility where the project is located, in a format to be specified by the Energy Commission.

(3) The nameplate rating of new clean energy generation installed.

(4) The number of trainees.

(5) The number of direct full-time equivalent employees and the average number of months or years of utilization of each of these employees.

(6) The amount of time between awarding of the financial assistance and the completion of the project or training activities.

(7) The entity's energy intensity before and after project completion, as determined from an energy rating or benchmark system, to be determined by the Energy Commission, such as the United States Environmental Protection Agency's Energy Star system or other acceptable benchmarking approach that may be available from local utilities, the American Society for Heating, Refrigerating, and Air-Conditioning Engineers, Inc., or a publicly available building analysis software as is appropriate to the size, budget, and expertise available to the school.

(c) If an LEA completes more than one project, the required information for a second and any subsequent project shall be submitted no later than the first full quarter following project completion.

(d) To minimize the calculation burden on LEAs, the Energy Commission shall develop a method to utilize the data submitted by each recipient LEA in its project reports, such as utility consumption data, building operating characteristics, and other information, to calculate for each project, LEA, or the state as a whole the actual or estimated energy and cost savings. This method shall include a means to combine gas and electric savings into a combined cost of saved energy factor and to report on other economic and investment performance metrics. The Energy Commission shall prepare an annual summary of the expenditures, energy savings, effective cost of saved energy or return on investment, and employment effects of each year's completed projects, and shall provide this report to the Citizens Oversight Board.

(e) The California Workforce Investment Board, in consultation with the Energy Commission, shall utilize the reports filed with the Citizens Oversight Board to quantify total employment affiliated with funded projects, as well as to estimate new trainee, apprentice, or full-time jobs resulting from Job Creation Fund activity. The California Workforce Investment Board shall prepare a report with this information annually and submit it to the Citizens Oversight Board.

(f) The Citizens Oversight Board shall report the information it receives pursuant to subdivisions (a) to (e), inclusive, to the Legislature as part of its responsibilities pursuant to subdivision (d) of Section 26210. The Citizens Oversight Board's report shall be submitted annually and posted on a publicly accessible Internet Web site.

(g) Funding provided to LEAs pursuant to this chapter is subject to annual audits required by Section 41020 of the Education Code. Funding provided to community college districts pursuant to this chapter is subject to annual audits required by Section 84040 of the Education Code.

(h) (1) The Superintendent of Public Instruction shall require local education agencies to pay back funds if they are not used in accordance with state statute or regulations, if a project is torn down or remodeled, or if the property is deemed to be surplus and sold prior to the payback of the project.

(2) The Chancellor of the California Community Colleges shall require a community college to pay back funds if they are not used in accordance with state statute or regulations, if a project is torn down or remodeled, or if the property is deemed to be surplus and sold prior to the payback of the project.

SEC. 3. Section 25415 of the Public Resources Code is amended to read:

25415. (a) Each eligible institution to which an allocation has been made under this chapter shall repay the principal amount of the allocation, plus interest, in not more than 40 equal semiannual payments, as determined by the commission. Loan repayments shall be made in accordance with a schedule established by the commission. The repayment period may not exceed the life of the equipment, as determined by the commission or the lease term of the building in which the energy conservation measures will be installed.

(b) Notwithstanding any other law, the commission shall, unless it determines that the purposes of this chapter would be better served by establishing an alternative interest rate schedule, periodically set interest rates on the loans based on surveys of existing financial markets and may authorize no-interest loans.

(c) The governing body of each eligible institution shall annually budget an amount at least sufficient to make the semiannual payments required in this section. The amount shall not be raised by the levy of additional taxes but shall instead be obtained by a savings in energy costs or other sources.

SEC. 4. This act is a bill providing for appropriations related to the Budget Bill within the meaning of subdivision (e) of Section 12 of Article IV of the California Constitution, has been identified as related to the budget in the Budget Bill, and shall take effect immediately.

Appendix F: Senate Bill 110: Clean Energy Job Creation Program and Citizens Oversight Board Legislation

Senate Bill No. 110

CHAPTER 55

An act to amend Sections 26211, 26212, 26213, 26214, 26215, 26216, 26217, 26227, 26233, and 26240 of, and to add Sections 26205.5 and 26227.2 to, the Public Resources Code, relating to energy, and making an appropriation therefor, to take effect immediately, bill related to the budget.

[Approved by Governor July 10, 2017. Filed with
Secretary of State July 10, 2017.]

LEGISLATIVE COUNSEL'S DIGEST

SB 110, Committee on Budget and Fiscal Review. Clean Energy Job Creation Program and citizen oversight board.

The California Clean Energy Jobs Act, an initiative approved by the voters as Proposition 39 at the November 6, 2012, statewide general election, made changes to corporate income taxes and, except as specified, provides for the transfer of \$550,000,000 annually from the General Fund to the Clean Energy Job Creation Fund for 5 fiscal years beginning with the 2013–14 fiscal year. Moneys in the fund are available, upon appropriation by the Legislature, for purposes of funding eligible projects that create jobs in California improving energy efficiency and expanding clean energy generation.

Existing law, until fiscal year 2017–18, provides for the allocation of moneys in the Clean Energy Job Creation Fund to local educational agencies and community college districts, as specified, and requires that funds remaining after the 2017–18 fiscal year continue to be available in future years for loans to local educational agencies and community college districts. Existing law, until July 1, 2019, prescribes the operation of the Citizens Oversight Board and establishes the authority and duties of the board, which relate to assessing the effectiveness of the expenditures from the fund in meeting the act's objectives.

This bill would appropriate available remaining funds in the Job Creation Fund, as determined by the State Energy Resources Conservation and Development Commission as of March 1, 2018, for purposes relating to improving energy efficiency at local educational agencies, as specified.

This bill would, commencing with the 2018–19 fiscal year, establish the Clean Energy Job Creation Program with the purpose of funding specified projects in public schools and community colleges that create jobs in California improving energy efficiency and expanding clean energy generation and would subject these projects to requirements similar to those imposed on projects under the California Clean Energy Jobs Act. The bill would extend the operation of the board and of its authority and duties indefinitely.

This bill would declare that it is to take effect immediately as a bill providing for appropriations related to the Budget Bill.

Appropriation: yes.

The people of the State of California do enact as follows:

SECTION 1. Section 26205.5 is added to the Public Resources Code, to read:

26205.5. (a) Of the moneys provided to the Job Creation Fund for purposes of paragraph (1) of subdivision (a) of Section 26205, the available remaining funds, which are the funds allocated to a local educational agency that has not submitted an energy expenditure plan, as determined by the Energy Commission as of March 1, 2018, shall be appropriated as follows:

(1) The first seventy-five million dollars (\$75,000,000) shall be provided to school districts and county offices of education for grants or loans for schoolbus retrofit or replacement through a program administered by the Energy Commission, in consultation with the State Air Resources Board.

(A) Priority shall be given to school districts and county offices of education operating the oldest schoolbuses or schoolbuses operating in disadvantaged communities, as identified pursuant to Section 39711 of the Health and Safety Code, as determined by the State Air Resources Board, and to school districts or county offices of education with a majority of students eligible for free or reduced-price meals in the prior year.

(B) Any schoolbuses that have been replaced pursuant to this paragraph shall be scrapped.

(C) A local air district may administer funding provided pursuant to this paragraph, if authorized by the Energy Commission.

(2) The next one hundred million dollars (\$100,000,000) shall be deposited into the Education Subaccount, created pursuant to Section 26227, for the purpose of low-interest and no-interest revolving loans and loan loss reserves for eligible projects and technical assistance on a competitive basis. Priority shall be given to local educational agencies based on the percentage of students eligible for free or reduced-price meals in the prior year, energy savings, geographic diversity, and diversity in the size of the local educational agencies' student populations. If a local educational agency has a project eligible for a loan under this paragraph, the maximum loan amount for the project shall be the project cost reduced by both of the following, as applicable:

(A) The amount of any grant awarded for the project pursuant to paragraph (3).

(B) Any state, federal, or local incentives that have been provided for the project.

(3) (A) (i) The remaining moneys, if any, shall be provided to local educational agencies in accordance with subdivision (b) of Section 26227.2, as implemented by the Energy Commission, in consultation with the State Department of Education, as follows:

(I) Ten percent shall be for local educational agencies with an average daily attendance of not more than 1,000.

(II) Ten percent shall be for local educational agencies with an average daily attendance of more than 1,000 and not more than 2,000.

(III) Eighty percent shall be for local educational agencies with an average daily attendance of more than 2,000.

(ii) The Energy Commission may adjust the funding allocations specified in clause (i) and may add additional categories based on average daily attendance to further the purposes of Section 26227.2.

(B) The Energy Commission shall facilitate local educational agency pursuit of funding under this paragraph and from the State Energy Conservation Assistance Account through coordinated information, documentation, and review processes regarding the project.

(C) For purposes of this paragraph, average daily attendance shall be those numbers as reported in the prior year, as determined by the State Department of Education.

(b) A local educational agency that receives moneys pursuant to this section shall encumber those moneys within nine months of allocation.

(c) The Energy Commission may adopt implementing guidelines that are consistent with the requirements of Chapter 3 (commencing with Section 26210).

(d) For purposes of this section, the following definitions apply:

(1) “Energy Commission” means the State Energy Resources Conservation and Development Commission.

(2) “Local educational agency” means a school district, county office of education, charter school, or state special school.

SEC. 2. Section 26211 of the Public Resources Code is amended to read:

26211. Funding for the board shall be available, upon appropriation by the Legislature, in the annual Budget Act.

SEC. 3. Section 26212 of the Public Resources Code is amended to read:

26212. (a) Members of the board shall serve for a term of four years and may be reappointed for up to two additional terms.

(b) A majority of board members shall constitute a quorum.

(c) The board’s principal office shall be located in the State Energy Resources Conservation and Development Commission’s office in Sacramento.

(d) Each board member shall be entitled to one vote. All votes shall be recorded and reported in the minutes of the board.

(e) The board shall select from among its members a chair and a vice chair, as provided in Section 26214.

(f) Members of the board shall not be compensated for their service, but may be reimbursed for actual and necessary expenses incurred in the performance of their duties.

(g) Requests for reimbursement for actual and necessary expenses shall be submitted to the chair for approval and may be paid in accordance with Section 26217.

SEC. 4. Section 26213 of the Public Resources Code is amended to read:

26213. (a) The board shall meet at least four times per year or as often as the chair or the board deems necessary to conduct its business.

(b) The chair shall, with the assistance of staff, prepare the agenda for each board meeting. Meeting agendas shall be prepared in advance of each meeting based on input from board members, staff, and the public.

(c) The board and any committees established by the board shall comply with, and be subject to, the requirements of the Bagley-Keene Open Meeting Act (Article 9 (commencing with Section 11120) of Chapter 1 of Part 1 of Division 3 of Title 2 of the Government Code).

(d) The board shall comply with, and be subject to, the requirements of the California Public Records Act (Chapter 3.5 (commencing with Section 6250) of Division 7 of Title 1 of the Government Code).

SEC. 5. Section 26214 of the Public Resources Code is amended to read:

26214. (a) The first meeting of the board, at which a chair shall be selected, may be held upon appointment of all nine members of the board and shall be called jointly by the Treasurer, the Controller, and the Attorney General.

(b) The board shall elect a chair and vice chair at the first meeting of the board each year and each such individual shall hold office for one year commencing on the following July 1 and ending when his or her successor takes office. If there is a vacancy during the year in the office of the chair or vice chair, a majority of the active members of the board shall elect a replacement chair or vice chair to serve the remainder of the year. If the interim vacancy is in the office of the chair, then the vice chair shall perform the duties of the chair until a successor is elected.

(c) The board shall establish rules of operation for the board that are consistent with the rules and practices applicable to other state boards.

(d) In the absence of the chair during a meeting, the vice chair shall perform all of the functions of the chair.

(e) The chair shall oversee meetings, serve as an ex officio member of all committees, work in partnership with staff to ensure board resolutions are carried out, call special meetings if necessary, appoint all committee chairs and recommend who will serve on committees, prepare agendas for meetings, coordinate the hiring and evaluations of staff and consultants, act as spokesperson for the board, periodically consult with board members on their roles, and ensure that the rules of procedure and decorum contained in this chapter are observed and enforced.

(f) The vice chair shall carry out special assignments as requested by the chair, understand the responsibilities of the chair, and be able to perform the duties of the chair in the chair's absence.

(g) Board staff activities shall not be duplicative of ongoing efforts by other state agencies, including, but not limited to, the State Department of Education and the State Energy Resources Conservation and Development Commission.

SEC. 6. Section 26215 of the Public Resources Code is amended to read:

26215. (a) The board may establish committees as it deems necessary and appropriate. The chair may, with board approval, define and limit a

committee's scope and authority, and establish rules of operation for the committees.

(b) Each committee shall meet and shall make recommendations and reports as deemed necessary or appropriate by the chair or the board.

(c) In the absence of the committee chair, the vice chair shall conduct routine business matters and meetings of the committee.

(d) The status, purpose, and authority of a committee shall be determined by the chair and approved by the board at the time the committee is established by the board. The board may modify a committee's status, purpose, or authority at any time.

(e) A committee may act within its delegated authority without further approval of the board. Committees and committee members shall not make or issue policy statements, recommendations, or media releases without prior approval of the board. A committee activity that implies action by the board or is outside the committee's delegated authority is prohibited without specific board approval.

SEC. 7. Section 26216 of the Public Resources Code is amended to read:

26216. (a) The board shall review and evaluate the progress and status of projects and shall prepare, approve, and distribute annual reports of its activities, findings, and recommendations to the Governor, the Legislature, and the public, to the extent these actions are consistent with subdivision (d) of Section 26210. Each annual report shall concern the activities of the board and its committees during the preceding calendar year and shall be distributed within 90 days of the end of the calendar year to which it pertains.

(b) The process for preparing, approving, and distributing the annual reports shall be as follows:

(1) The chair shall be responsible for preparing a draft annual report that shall be presented at a regularly scheduled meeting of the board.

(2) The draft annual report shall be discussed and considered by the board at the meeting and shall be approved as presented or with amendments or changes following the opportunity for, and receipt of, any public comment.

(3) After the meeting, the annual report shall be put into its final approved form and shall be distributed and published on the board's Internet Web site.

(c) The annual report distributed pursuant to this section shall be submitted to the Legislature in accordance with Section 9795 of the Government Code.

SEC. 8. Section 26217 of the Public Resources Code is amended to read:

26217. (a) Expenses of the board shall be accounted for and paid in a manner that is consistent with the State Administrative Manual and any related processes and procedures. The board may delegate to the chair or staff the authority to approve expenses, pay expenses, or both.

(b) Expenditure items exceeding the board's budget, or expenditure items the chair deems worthy of further consideration, shall be brought before the board for consideration at the next meeting.

(c) The chair shall be responsible for tracking the board's budget and regularly reporting to the board if expenditures are within the amounts

planned and what steps have been taken or are proposed to be taken to ensure that the board has sufficient funds to accomplish its annual mission.

(d) The chair may testify before a state authority and his or her actual and necessary travel, meal, and lodging expenses shall be reimbursed.

(e) The expenses of the board shall be published in the board's annual report required by Section 26216.

SEC. 9. Section 26227 of the Public Resources Code is amended to read:

26227. (a) (1) For the 2013–14 fiscal year, twenty-eight million dollars (\$28,000,000) shall be transferred from the Job Creation Fund to the Education Subaccount, which is hereby created in the State Energy Conservation Assistance Account created pursuant to Section 25416. The moneys in the Education Subaccount are appropriated to the Energy Commission for the purpose of low-interest and no-interest revolving loans and loan loss reserves for eligible projects and technical assistance.

(2) For the 2013–14 fiscal year, funds in the Education Subaccount shall be available for local educational agencies and community college districts. If a local educational agency or community college district has an eligible project, the amount of the funding resources gap that is to be considered a reasonable loan value from the Education Subaccount is the project cost less the amount of any grant awarded pursuant to Section 26233 and less any state, federal, or local incentives. A local educational agency or community college district may need to meet additional credit or other financial qualifying criteria applicable pursuant to the Energy Conservation Assistance Act of 1979 (Chapter 5.2 (commencing with Section 25410) of Division 15). The Energy Commission shall facilitate a local educational agency or community college district's participation in both the Job Creation Fund and Energy Conservation Assistance Account programs through coordinated information, documentation, and review processes regarding the project and the borrowing entity.

(b) For the 2014–15 through 2017–18 fiscal years, inclusive, the amount transferred from the Job Creation Fund to the Energy Conservation Assistance Account shall be determined in the annual budget.

(c) Funds remaining in the Education Subaccount after the 2017–18 fiscal year shall continue to be available in future years pursuant to Section 26205.5.

SEC. 10. Section 26227.2 is added to the Public Resources Code, to read:

26227.2. (a) Commencing with the 2018–19 fiscal year, the Clean Energy Job Creation Program is hereby established for the purpose of funding projects described in paragraph (1) or (2) of subdivision (a) of Section 26205 that create jobs in California improving energy efficiency and expanding clean energy generation.

(b) All of the following criteria shall apply to the Clean Energy Job Creation Program:

(1) Project selection and oversight shall be managed by, and funds shall be appropriated only to, existing state and local government agencies with established expertise in managing energy projects and programs.

(2) All projects shall be selected based on in-state job creation and energy benefits for each project type.

(3) All projects shall be cost effective with the total benefits being greater than the costs of the project over time. Project selection may, in addition to energy benefits, include consideration of nonenergy benefits, such as health and safety.

(4) All projects shall require contracts that identify the project specifications, costs, and projected energy savings.

(5) All projects shall be subject to audit.

(6) Program overhead costs, including administrative costs incurred by the Energy Commission, shall not exceed 4 percent of the total funding.

(7) Agencies administering the program shall coordinate with the Energy Commission and the Public Utilities Commission to avoid duplication and to maximize leverage of existing energy efficiency and clean energy efforts.

(8) Eligible expenditures include expenditures associated with technical assistance and with reducing project costs and delays, including the development and implementation of processes that reduce the costs of design, permitting or financing, or other barriers to project completion and job creation.

(c) Commencing with the 2018–19 fiscal year, funds appropriated in the annual Budget Act or another statute for the Clean Energy Job Creation Program shall be available as follows:

(1) Eleven percent of the funds shall be available to community college districts, to be allocated by the Chancellor of the California Community Colleges at his or her discretion for program purposes.

(2) (A) The remaining moneys shall be allocated to local educational agencies as follows:

(i) Ten percent shall be for local educational agencies with an average daily attendance of not more than 1,000.

(ii) Ten percent shall be for local educational agencies with an average daily attendance of more than 1,000 and not more than 2,000.

(iii) Eighty percent shall be for local educational agencies with an average daily attendance of more than 2,000.

(B) The Energy Commission may adjust the funding allocations specified in subparagraph (A) and may add additional categories based on average daily attendance to further the purposes of this section.

(C) The Energy Commission in allocating grants to local educational agencies pursuant to this section shall give priority based on the following:

(i) The local educational agency's percentage of students eligible for free or reduced-price meals in the prior year.

(ii) Geographic diversity that ensures urban, suburban, and rural local educational agencies receive grants and ensures the awarding of grant funding in all regions of the state.

(iii) Workforce needs of the areas in which the local educational agencies are located, as determined by the California Workforce Investment Board and the local workforce investment boards.

(d) A local educational agency that receives moneys pursuant to this section shall encumber those moneys within nine months of allocation.

(e) The Energy Commission may adopt implementing guidelines that are consistent with the requirements of Chapter 3 (commencing with Section 26210).

(f) For purposes of this section, a “local educational agency” means a school district, county office of education, charter school, or state special school.

SEC. 11. Section 26233 of the Public Resources Code is amended to read:

26233. (a) Commencing with the 2013–14 fiscal year and through the 2017–18 fiscal year, inclusive, the funds deposited annually in the Job Creation Fund and remaining after the transfer pursuant to Section 26227 and the appropriation pursuant to Section 26230 shall be allocated, to the extent consistent with this division, as follows:

(1) Eighty-nine percent of the funds shall be available to local educational agencies and allocated by the Superintendent of Public Instruction pursuant to subdivision (b).

(2) Eleven percent of the funds shall be available to community college districts and allocated by the Chancellor of the California Community Colleges at his or her discretion.

(b) The Superintendent of Public Instruction shall allocate the funds provided in paragraph (1) of subdivision (a) as follows:

(1) Eighty-five percent on the basis of average daily attendance reported as of the second principal apportionment for the prior fiscal year. For purposes of this section, average daily attendance for the state special schools shall be deemed to be 97 percent of the prior year enrollment as reported in the California Longitudinal Pupil Achievement Data System.

(A) For every local educational agency with average daily attendance as reported pursuant to this subdivision of 100 or less, the amount awarded shall be fifteen thousand dollars (\$15,000).

(B) For every local educational agency with average daily attendance as reported pursuant to this subdivision in excess of 100, but 1,000 or less, the amount awarded shall be either that local educational agency’s proportional award on the basis of average daily attendance or fifty thousand dollars (\$50,000), whichever amount is larger.

(C) For every local educational agency with average daily attendance as reported pursuant to this subdivision in excess of 1,000, but less than 2,000, the amount awarded shall be either that local educational agency’s proportional award on the basis of average daily attendance or one hundred thousand dollars (\$100,000), whichever amount is larger.

(D) For every local educational agency with average daily attendance as reported pursuant to this subdivision of 2,000 or more, the amount awarded shall be the local educational agency’s proportional award on the basis of average daily attendance.

(2) Fifteen percent on the basis of students eligible for free and reduced-price meals in the prior year.

(3) For every local educational agency that receives over one million dollars (\$1,000,000) pursuant to this subdivision, not less than 50 percent of the funds shall be used for projects larger than two hundred fifty thousand dollars (\$250,000) that achieve substantial energy efficiency, clean energy, and jobs benefits.

(c) A local educational agency subject to subparagraph (A) or (B) of paragraph (1) of subdivision (b) may submit a written request to the Superintendent of Public Instruction, by September 1 of each year, to receive in the current year its funding allocation for both the current year and the following year, both of which would be based on the average daily attendance used in the current year for determining funding pursuant to the applicable subparagraph. A local educational agency requesting funding pursuant to this subdivision shall not receive a funding allocation in the year following the request. This election applies to the funding available pursuant to paragraphs (1) and (2) of subdivision (b).

(d) A local educational agency shall encumber funds received pursuant to this section by June 30, 2019.

SEC. 12. Section 26240 of the Public Resources Code is amended to read:

26240. (a) To later quantify the costs and benefits of funded projects, an entity that receives funds from the Job Creation Fund or pursuant to subdivision (c) of Section 26227.2 shall authorize its local electric and gas utilities to provide 12 months of past and ongoing usage and billing records at the school facility site level to the Energy Commission.

(b) As a condition of receiving funds from the Job Creation Fund or pursuant to subdivision (c) of Section 26227.2, not sooner than one year but no later than 15 months after an entity completes its first eligible project with a grant, loan, or other assistance from the Job Creation Fund or pursuant to subdivision (c) of Section 26227.2, the entity shall submit a report of its project expenditures to the Citizens Oversight Board created pursuant to Chapter 3 (commencing with Section 26210). To the extent practical, this report shall also contain information on any of the following:

(1) The total final gross project cost before deducting any incentives or other grants and the percentage of total project cost derived from the Job Creation Fund or pursuant to subdivision (c) of Section 26227.2.

(2) The estimated amount of energy saved, accompanied by specified energy consumption and utility bill cost data for the individual facility where the project is located, in a format to be specified by the Energy Commission.

(3) The nameplate rating of new clean energy generation installed.

(4) The number of trainees.

(5) The number of direct full-time equivalent employees and the average number of months or years of utilization of each of these employees.

(6) The amount of time between awarding of the financial assistance and the completion of the project or training activities.

(7) The entity's energy intensity before and after project completion, as determined from an energy rating or benchmark system, to be determined by the Energy Commission, such as the United States Environmental

Protection Agency's Energy Star system or other acceptable benchmarking approach that may be available from local utilities, the American Society for Heating, Refrigerating, and Air-Conditioning Engineers, Inc., or a publicly available building analysis software as is appropriate to the size, budget, and expertise available to the school.

(c) If an LEA completes more than one project, the required information for a second and any subsequent project shall be submitted no later than the first full quarter following project completion.

(d) To minimize the calculation burden on LEAs, the Energy Commission shall develop a method to utilize the data submitted by each recipient LEA in its project reports, such as utility consumption data, building operating characteristics, and other information, to calculate for each project, LEA, or the state as a whole the actual or estimated energy and cost savings. This method shall include a means to combine gas and electric savings into a combined cost of saved energy factor and to report on other economic and investment performance metrics. The Energy Commission shall prepare an annual summary of the expenditures, energy savings, effective cost of saved energy or return on investment, and employment effects of each year's completed projects, and shall provide this report to the Citizens Oversight Board.

(e) The California Workforce Investment Board, in consultation with the Energy Commission, shall utilize the reports filed with the Citizens Oversight Board to quantify total employment affiliated with funded projects, as well as to estimate new trainee, apprentice, or full-time jobs resulting from Job Creation Fund activity or from funds appropriated pursuant to subdivision (c) of Section 26227.2. The California Workforce Investment Board shall prepare a report with this information annually and submit it to the Citizens Oversight Board.

(f) The Citizens Oversight Board shall report the information it receives pursuant to subdivisions (a) to (e), inclusive, to the Legislature as part of its responsibilities pursuant to subdivision (d) of Section 26210. The Citizens Oversight Board's report shall be submitted annually and posted on a publicly accessible Internet Web site.

(g) Funding provided to LEAs pursuant to this chapter is subject to annual audits required by Section 41020 of the Education Code. Funding provided to community college districts pursuant to this chapter is subject to annual audits required by Section 84040 of the Education Code.

(h) (1) The Superintendent of Public Instruction shall require local educational agencies to pay back funds if they are not used in accordance with state statute or regulations, if a project is torn down or remodeled, or if the property is deemed to be surplus and sold prior to the payback of the project.

(2) The Chancellor of the California Community Colleges shall require a community college to pay back funds if they are not used in accordance with state statute or regulations, if a project is torn down or remodeled, or if the property is deemed to be surplus and sold prior to the payback of the project.

SEC. 13. This act is a bill providing for appropriations related to the Budget Bill within the meaning of subdivision (e) of Section 12 of Article IV of the California Constitution, has been identified as related to the budget in the Budget Bill, and shall take effect immediately.

O

Appendix G: Proposition 39 K-12 Allocations by Legislative District

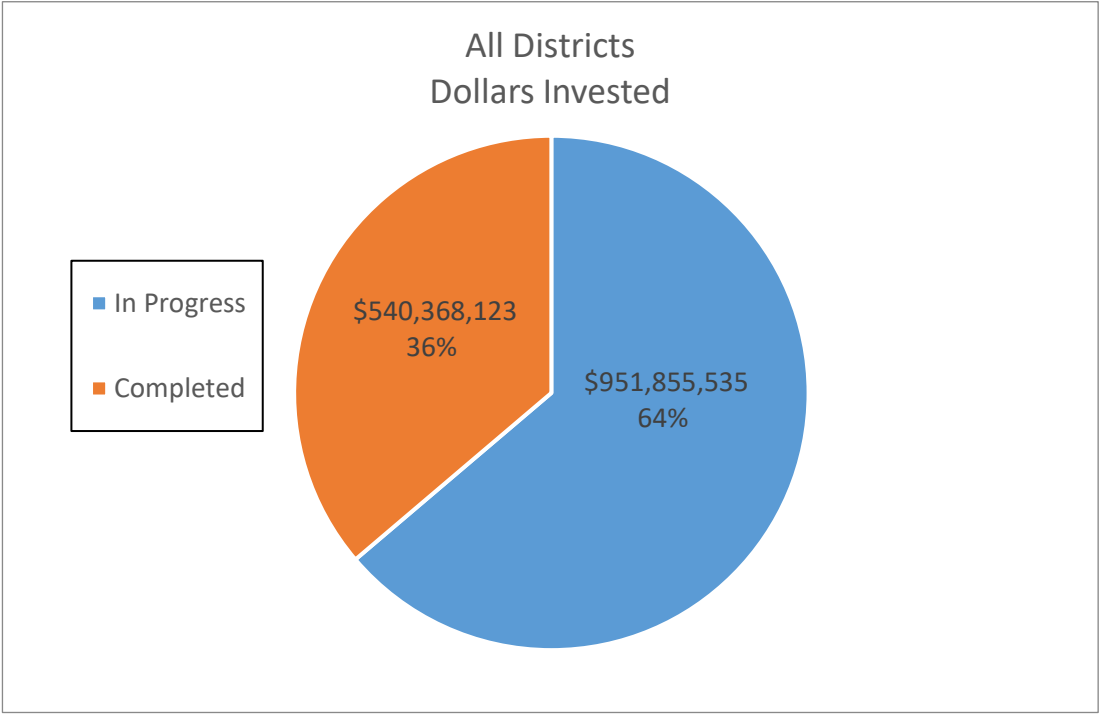

This Appendix contains information on Proposition 39 K-12 allocations and energy savings by legislative district through June 30, 2020. It is based on data collected by the Energy Commission. For each district, the total number of school sites identified in Energy Expenditure Plans is included, as well as the Proposition 39 cost/investment at each site, the annual electric savings, the annual dollar savings, and whether the projects at the school sites are completed or still in-progress. A fifteen-year estimate of electric savings and dollar savings is also included.

Finally, the appendix highlights similar information for districts with school sites located within disadvantaged communities (DAC), as defined by the CalEnviroScreen 3.0 tool.¹ This is different than a Proposition 39 disadvantaged Local Educational Agency (LEA) as defined in Senate Bill 73 (Committee on Budget and Fiscal Review, Chapter 29, Statutes of 2013), which identifies a disadvantaged LEA as one that has a ratio of free and reduced-priced meals (FRPM)/average daily attendance (ADA) of 0.75 or greater.

¹ For more information on CalEnviroScreen, see: <https://oehha.ca.gov/calenviroscreen>
