## **DISCLAIMER**

Staff members of the California Energy Commission prepared this report. As such, it does not necessarily represent the views of the Energy Commission, its employees, or the State of California. The Energy Commission, the State of California, its employees, contractors and subcontractors make no warrant, express or implied, and assume no legal liability for the information in this report; nor does any party represent that the uses of this information will not infringe upon privately owned rights. This report has not been approved or disapproved by the Energy Commission nor has the Commission passed upon the accuracy or adequacy of the information in this report.

# ABSTRACT

The California Energy Commission prepared this report for the Citizens Oversight Board in accordance with Senate Bill 73 (Committee on Budget and Fiscal Review, Chapter 29, Statutes of 2013), adopted by the Legislature and signed into law by former Governor Edmund G. Brown Jr. on June 27, 2013. To alleviate the burden to local educational agencies, information required to be reported to the Citizens Oversight Board by local educational agencies is contained within this report.

This report summarizes results from the start of the Proposition 39 K-12 Program (December 19, 2013) through the end of the 2019-2020 fiscal year. During this period, the Energy Commission approved 2,108 energy expenditure plans from 1,739 local educational agencies, representing \$1.53 billion in approved project funding. Of the approved energy expenditure plans, 962 are complete with corresponding final reports. Another 361 energy expenditure plans are also complete, and the local educational agencies are in the process of collecting the required 12 months of post-installation energy consumption data required for the final reports. An additional 382 energy expenditure plans include projects that are still under construction.

This progress report also summarizes results of the Energy Conservation Assistance Act — Education Subaccount Financing Program, including the Bright Schools Program, and the School Bus Replacement Program. For Fiscal Years 2013–14 through 2019–20, the Energy Commission approved 42 Energy Conservation Assistance Act — Education Subaccount loans totaling \$64.6 million. During the same period, the Bright Schools Program funded \$3.3 million to provide technical assistance to 173 local educational agencies and community colleges. The School Bus Replacement Program has awarded \$74.7 million for replacement electric buses and \$14.1 million for electric bus charging infrastructure.

# Executive Summary

---

## Background and Purpose

The California Clean Energy Jobs Act (Proposition 39) changed the corporate income tax code and allocated projected revenue to the general fund and the Clean Energy Job Creation Fund for five fiscal years, beginning with Fiscal Year 2013–14. The California Energy Commission (CEC) administers four components of the California Clean Energy Jobs Act: a grant program (Proposition 39: California Clean Energy Jobs Act, K-12 Program), a revolving zero percent loan program (Energy Conservation Assistance Act – Education Subaccount Financing Program), a technical assistance program (Bright Schools Program), and a school bus retrofit and replacement program (School Bus Replacement Program). All four of these programs receive funds from the Clean Energy Job Creation Fund created by Proposition 39.

Proposition 39 and its enabling legislation established a Citizens Oversight Board to review expenditures, audit the Clean Energy Job Creation Fund, and maintain transparency and accountability of this fund. Public Resources Code Section 26240(d) requires, in part, that the CEC *prepare an annual summary of expenditures, energy savings, the effective cost of saved energy or return on investment, and employment effects of each year's completed projects, and provide this report to the Citizens Oversight Board*. This is the CEC's sixth progress report to the Citizens Oversight Board. The report summarizes results from the start of the Proposition 39 K–12 Program (December 19, 2013) through the end of the 2019–20 fiscal year (June 30, 2020).

## Cumulative Results: December 19, 2013, Through June 30, 2020

The CEC approved the first energy expenditure plans in Fiscal Year 2013-14, resulting in approximately \$19 million approved for disbursement by the California Department of Education to eligible local educational agencies. As of June 30, 2020, \$1.7 billion in Proposition 39 funding has been approved—\$154.6 million for energy planning and \$1.53 billion for energy projects. No additional Proposition 39 funding has been allocated after the 2017-18 fiscal year; any funding changes that occurred after this period were a result of energy expenditure plan amendments, closure of local education agencies (primarily charter schools), cancellation of energy expenditure plans, and other adjustments to existing funding. One result of these adjustments is some of the previously reported data related to the number of approved energy expenditure plans, the number of affected school sites, and funding amounts have decreased.

During this reporting period, 1,739 local educational agencies received approval for 2,108 energy expenditure plans, benefiting 7,125 sites in approved energy expenditure plans.

**Figure 1** illustrates the cumulative energy expenditure plan approvals.

**Figure 1: Cumulative Energy Expenditure Plan Approvals**

Source: California Energy Commission

Local educational agencies throughout California reported spending \$1.17 billion of the \$1.70 billion in disbursed Proposition 39 funds. Projects are moving toward completion, as indicated by project implementation expenditure reporting, which has risen by more than \$90 million between July 1, 2019, and June 30, 2020. All Proposition 39-funded projects must be completed by June 30, 2021. **Figure 2** compares the total funding approved and spent from the reporting periods.

**Figure 2: Proposition 39 Cumulative Funding Approved and Spent by Reporting Period**

Source: California Energy Commission

## Spending Summary

Reports have been submitted for 1,705 energy expenditure plans. There are 962 reports representing completed project final reports that include the required 12 months of post-installation energy consumption data as required by statute. An additional 361 reports represent energy expenditure plans with completed energy project installations in the stage of collecting 12 months of post-installation energy usage data, and 382 represent energy expenditure plans that include projects still in the construction phase. **Table 1** summarizes Proposition 39 K–12 Program spending.

**Table 1: Proposition 39 K-12 Cumulative Spending as of June 30, 2020**

Energy Expenditure Plan (EEP) Status	Number of EEPs With Reports	Prop 39 Funds Spent (in millions)	Total Amount Spent (in millions)
EEPs With Completed Project Final Reports	962	\$585	\$673
EEPs With Completed Projects	361	\$226	\$308
EEPs Still in Construction	382	\$358	\$429
Totals	<u>1,705</u>	<u>\$1,169</u>	<u>\$1,410</u>

Source: California Energy Commission

## Participation Summary

As of June 30, 2020, the California Department of Education reported 2,189 eligible local educational agencies, falling into four categories: public school districts, charter schools, state special schools, and county offices of education. State special schools provide technical assistance, educational programs and services to students who are blind, visually impaired, deaf, and hard of hearing. As of June 30, 2020, 1,739 local educational agencies submitted at least one energy expenditure plan. The highest program participation rate is from the three state special schools-School for the Blind, School for the Deaf, Deaf and Hard of Hearing-with 100 percent of all the state special schools submitting an energy expenditure plan.

## Identifying Energy Savings

Local educational agencies are required to report post installation energy savings 12 months after project completion. The CEC allows the use of several methods (see *Proposition 39: California Clean Energy Jobs Act Guidelines*) to determine and report energy savings after completion of an energy project. These methods provide local educational agencies with the flexibility to evaluate program benefits without the use of formal measurement and verification procedures such as costly data logging. Local educational agencies submitted 962 completed project final reports, totaling an annual energy savings of 224,174 megawatt-hours and 620,828 therms and resulting in reduced greenhouse gas emissions by about 76,821 tons of carbon dioxide equivalent annually.

Each energy expenditure plan must have a savings-to-investment ratio of 1.01 or greater, meaning that for every \$1.00 invested, a minimum of \$1.01 must be saved over the life of the energy project. Staff analysis concluded the combined savings-to-investment ratio for these 962 completed projects (with estimated savings determined by a variety of methods as described above) is 1.38; that is, for every \$1.00 invested in these projects, an estimated \$1.38 will be saved over the expected useful life of the installed energy technologies.

Energy-use intensity — the metric used to measure the energy performance at a school site — generally decreased among the school sites that have completed energy projects. Analysis concluded, on average, 92.73 British thermal units were required per square foot before energy project installation and dropped to 83.30 British thermal units per square foot after energy project installation, resulting in energy efficiency gains.

CEC staff forecasts that due to the widespread fires throughout the state in 2020, coupled with the prolonged closure of project site buildings because of the COVID-19 pandemic, the reporting of site energy-use intensity will not be possible in most cases. Moreover, given that most school buildings (project sites) were not open for typical usage during the reporting months of April through June 2020 and beyond for next year's report, the energy use at the school sites would likely be an aberration from normal usage.

## **Energy Conservation Assistance Act — Education Financing Program**

In Fiscal Years 2013–14 and 2014–15, \$56 million in job creation funds were allocated to the Energy Conservation Assistance Act — Education to fund loans and technical assistance projects. Of the \$56 million, \$50.5 million was allocated to finance zero percent loans to K–12 local educational agencies and community college districts for energy efficiency, demand reduction, and clean energy generation projects. The remaining \$5.5 million was allocated to the Bright Schools Program for technical assistance to the same eligible entities.

As of June 30, 2020, 42 loans were approved, totaling \$64.6 million. Loan recipients have spent \$56.1 million. **Table 2** provides an overview of program loans and associated status. The increase in available funding over the original allocation to the Energy Conservation Assistance Act - Education loan program of \$50.5 million is a result of loan repayments.

Loan repayments, based on energy cost savings, are made twice per year once the project is complete, for a maximum of 20 years. All borrowers have met their obligations, and the Energy Conservation Assistance Act – Education loan program has not experienced any defaults.

**Table 2: Energy Conservation Assistance Act — Education Loan Program Status Overview as of June 30, 2020**

Loan Status	Number of Loans	Loan Funds Spent (in millions)
Loans With Completed Project Final Reports	29	43.9
Loans with Outstanding Completed project Final Reports	3	4.5
Completed Projects (Final Reports Due after 6/30/20)	2	4.0
Projects in Construction Stage	8	3.7
<b>Totals</b>	<b><u>42</u></b>	<b><u>\$56.1</u></b>

Source: California Energy Commission

Loan recipients are required to report post-installation energy consumption and project savings 12 months after project completion. Three local educational agencies with completed projects, accounting for \$4.5 million in loan funds spent, did not submit their completed project final reports before June 30, 2020. Twenty-nine loan recipients submitted post installation reports and the reported total annual energy savings were 21.5 million kilowatt-hours and 15,286 therms, equivalent to about 7,114 tons of reduced carbon dioxide equivalent emissions annually.

## Bright Schools Program Cumulative Results

The Bright Schools Program provides local educational agencies and community college districts with technical assistance to identify energy efficiency measures in existing buildings and assist in applying for Proposition 39 K-12 Program funding. Of the \$56 million allocated to the Energy Conservation Assistance Act, \$5.5 million was allocated to the Bright Schools Program. The contract to provide technical assistance for the Bright Schools Program expired January 30, 2020, and the contract balance of \$2.1 million was returned to the Energy Conservation Assistance Act- Education Loan Program. A new contract for the program was executed and funded by another source.

As of June 30, 2020, 200 technical assistance requests from local educational agencies were approved via work authorizations, totaling \$3.5 million. The average cost of an approved work authorization is \$16,500, with a limit of \$20,000 per work authorization. Eighty Bright Schools Program energy audit reports have been used to support the development of a Proposition 39 K-12 energy expenditure plan. **Table 3** shows the status and amount of related funding of technical assistance approved for work authorizations.

**Table 3: Bright Schools Program Technical Assistance Overview as of June 30, 2020**

Technical Assistance Status	Number of Technical Assistance Requests	Amount Spent
Completed	197	\$2,777,910
In Progress	0	N/A
Withdrawn	3	\$28,225
Contractor Administration	N/A	\$567,371
<b>TOTALS</b>	<b>200</b>	<b><u>\$3,373,506</u></b>

Source: California Energy Commission

### **Estimating Energy Cost Savings**

Energy studies from the Bright Schools Program identify potential school site energy projects and calculate estimated energy savings. Of the 197 technical assistance-approved work authorizations completed, 159 were energy audits, 22 were energy expenditure plan preparations, 15 were project bid specifications, and 1 was for engineering support service. The total annual energy savings identified in the completed energy audits are 28,647 megawatt-hours and 305,025 therms, equivalent to roughly 11,135 tons of reduced carbon dioxide equivalent emissions annually.

### **School Bus Replacement Program**

To maximize funding opportunities and energy benefits for local educational agencies, Senate Bill 110 (Committee on Budget and Fiscal Review, Chapter 55, Statutes of 2017) appropriated remaining funds from the Proposition 39 K–12 Program to establish the School Bus Replacement Program at the Energy Commission. Senate Bill 110 provided for a one-time funding of \$75 million to replace older diesel school buses with battery-electric school buses in disadvantaged and low-income communities throughout California.

The \$75 million used exclusively for the purchase of battery-electric school buses was distributed among four regions in California: Northern California, Central California, Southern California, and Los Angeles County. In addition, nearly \$14 million in Clean Transportation Program funds (formerly known as the Alternative and Renewable Fuel and Vehicle Technology Program) was awarded to provide the necessary charging infrastructure to operate the buses. Finally, the CEC provided \$1 million in Clean Transportation Program funds for workforce training and development, awarding the contract to a local community college to develop and implement curricula for school districts that were awarded electric school buses; the curricula include automotive instructor training, maintenance, and service.

# CHAPTER 1:

## Proposition 39 K-12 Program

---

### Background

The Proposition 39 K-12 Program provides grant funds for energy projects — energy efficiency measures and clean energy generation — at sites within a local educational agency (LEA), which includes public school districts, charter schools, county offices of education (COE), and state special schools. For this reporting period, there were 2,189 eligible LEAs in the state. LEAs submit energy expenditure plans (EEP) to the California Energy Commission (CEC) for the technical review, evaluation, and approval to fund the proposed energy project detailed in the energy expenditure plan. Upon the approval of the EEP, the CEC notifies the California Department of Education (CDE), which distributes funding from the Clean Energy Job Creation Fund to the LEAs.

During the first five fiscal years of the Proposition 39 K-12 Program, (2013–14, 2014–15, 2015–16, 2016–17, and 2017–18), the California Legislature appropriated \$1.748 billion to the Proposition 39 K-12 Program. No additional funding was appropriated in Fiscal Years 2018–19 or 2019–20.

**Figure 3** summarizes the distribution of LEA types and the associated funding allocation for the five fiscal years of program funding.

LEAs are allocated funds based on the size of student population (average daily attendance or ADA) and the number of students eligible for free and reduced-priced meals (FRPM). The California Department of Education defines average daily attendance (ADA) as the total days of student attendance divided by the total days of instruction. Because public school districts typically have multiple school sites that house more students, they receive a much larger funding allocation than other LEAs, such as charter schools. For example, while charter schools represent 54 percent of eligible LEAs, their allocation is only 17 percent of total funding because they are typically smaller and have fewer students.

**Figure 3: Proposition 39 K-12 Program–LEA Distribution and Funding Allocation**

Source: California Energy Commission

Geographically, the highest LEA participation occurred in the counties of Alpine, Calaveras, Colusa, Del Norte, Glenn, Lake, Merced, Modoc, San Benito, San Luis Obispo, Sierra, Siskiyou, and Yuba, where the participation rate was 100 percent for the LEAs in these counties. Participation by each county can be seen in **Table 4**.

## Appropriations

**Table 5** summarizes Fiscal Years 2013–14, 2014–15, 2015–16, 2016–17, and 2017–18 Clean Energy Job Creation Fund appropriations for the CEC’s programs. There were no new appropriations after the 2017–18 fiscal year.

**Table 5: Clean Energy Job Creation Fund Overview of CEC Appropriations**

Category	FY 2013-14 (in millions)	FY 2014-15 (in millions)	FY 2015-16 (in millions)	FY 2016-17 (in millions)	FY 2017-18 (in millions)	TOTALS (in millions)
K-12 Program	\$381.0	\$279.0	\$313.4	\$398.8	\$376.2	\$1,748.4

Source: California Energy Commission

## Summary of Submitted and Approved Energy Expenditure Plans

LEAs are required to request funding for energy projects by submitting an EEP to the CEC. As of June 30, 2018, 2,121 plans totaling \$1.54 billion in funding had been approved. **Table 6** summarizes the number of EEPs approved, the number of school sites, and the amount of funding approved by fiscal year. No new EEPs were approved after the 2017–18 fiscal year.

**Table 6: EEPs Approved by Fiscal Year as of June 30, 2018**

Fiscal Year	EEPs Approved	School Sites	Funding Approved (in millions)
2013-14	31	75	\$19
2014-15	398	1,235	\$260
2015-16	533	2,015	\$429
2016-17	470	1,779	\$382
2017-18	689	2,085	\$452
<b>TOTALS</b>	<b>2,121</b>	<b>7,189</b>	<b><u>\$1,542</u></b>

Source: California Energy Commission

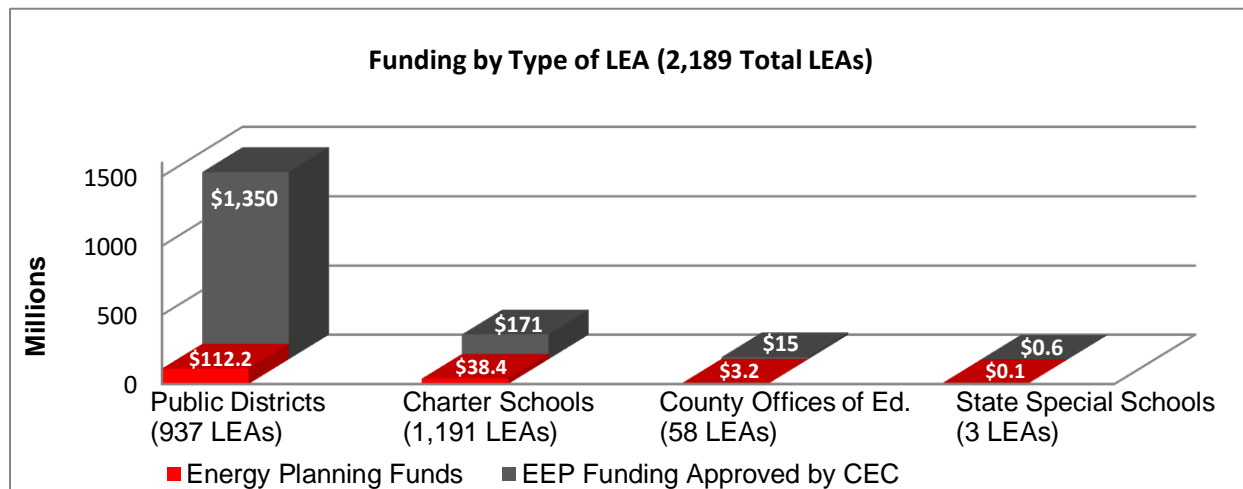

As with any project, changes are sometimes necessary. LEAs with significant changes to previously approved EEPs must submit an amendment request to the CEC. Significant changes include the deletion of eligible energy efficiency and clean energy generation measures, the addition of measures not included in the approved EEP, cost increases or decreases of more

than 15 percent, and a change of more than 15 percent in the approved quantity of equipment installed.

### Funding Approved by Type of LEA

There are four types of LEAs: (1) public school districts, (2) charter schools, (3) county offices of education, and (4) state special schools. **Figure 4** illustrates the distribution of approved EEP funding.

**Figure 4: Proposition 39 K-12 Funding Approved by Type of LEA as of June 30, 2020**

Source: California Energy Commission

Public school districts represent most of the approved EEPs, with \$1.35 billion awarded for energy project funding and \$112.2 million for energy planning funding. Charter schools have the second most energy projects approved, with \$171 million in energy project funding and \$38.4 million for energy planning funding. County offices of education have \$15 million in approved energy project funding and \$3.2 million in energy planning funding. The three state special schools provide comprehensive educational programs for blind, visually impaired, or deaf students and have combined energy project funding of \$611,537 and \$123,351 in energy planning funds as of June 30, 2020.

### Allocations by Tier Level

Allocations to LEAs are based primarily on the prior year's average daily attendance, with four tier levels defining the minimum amount that an eligible LEA will receive each year. These allocations are shown in Table 7. **Table 8** indicates participation by tier level.

**Table 7: Minimum Funding Award Levels**

Tier Levels	Average Daily Attendance Prior Year	Minimum Funding Awards
<b>Tier 1</b>	100 or fewer	\$15,000 plus FRPM adder*
<b>Tier 2</b>	101 to 1,000	Based on prior year ADA or \$50,000 (whichever amount is larger) plus FRPM adder*
<b>Tier 3</b>	1,001 to 1,999	Based on prior year ADA or \$100,000 (whichever amount is larger) plus FRPM adder*
<b>Tier 4</b>	2,000 or more	Based on prior year ADA plus FRPM adder*

Source: California Energy Commission

\*FRPM = Free and reduced-priced meals. Eighty-five percent of the award amount is based on ADA in the prior year, while 15 percent is based on percentage of FRPM in each LEA.

**Table 8: Participation by Tier Level**

Tier Levels	LEA Participation Since Prop. 39 Inception (By Number of LEAs)
<b>Tier 1</b>	167 (69%) [out of 238]
<b>Tier 2</b>	952 (73%) [out of 1,307]
<b>Tier 3</b>	152 (89%) [out of 171]
<b>Tier 4</b>	468 (99%) [out of 473]

Source: California Energy Commission

## Local Educational Agencies With High Free and Reduced-Priced Meal (FRPM) Ratios

Under Senate Bill (SB) 73 (Committee on Budget and Fiscal Review, Chapter 29, Statutes of 2013), the Proposition 39 K-12 Program allocates awards based on a formula. Eighty-five percent of the award is based on the LEA's average daily attendance reported to the CDE in

April and May in the prior fiscal year, and 15 percent is based on FRPM in the prior year. For this report, an LEA is considered to have a high ratio of FRPM if the ratio of FRPM/ADA is 0.75 or greater.

## Approved Eligible Energy Measures

Each approved EEP including amended EEPs can represent multiple eligible energy measures — energy efficiency and clean energy generation measures — at several school sites within an LEA. This representation has resulted in the installation of thousands of energy efficiency and clean energy generation measures throughout the state. 54.7 percent of the approved energy measures are lighting-related; nearly 21 percent fall into the category of control measures for heating, ventilation, and air conditioning (HVAC) and lighting; approximately 14 percent are HVAC measures; approximately 7 percent are other efficiency measures that include plug loads, pumps, motors, building envelope, domestic hot water, kitchen equipment, high-efficiency transformers, energy storage, pool equipment, irrigation sprinklers, and pump controls; and slightly more than 2 percent are attributed to photovoltaic (PV) generation and power purchase agreements.

**Table 9** summarizes the breakdown and the costs associated with each category.

**Table 9: Summary of Eligible Energy Measure Categories as of June 30, 2020**

Energy Measure Category	Total # of Measures Approved	Total % of Measures Approved	Total Project Cost of Measures Approved	Total % of Project Cost of Measures Approved
Lighting	12,458	54.7%	\$738,863,868	41%
HVAC & Lighting - Controls	4,736	20.8%	\$154,189,173	9%

## LEA Reporting Results

### Reporting Schedule

LEAs are required to provide annual progress reports on approved EEPs until all energy measures within an approved EEP are installed. Annual progress reports are submitted at the

end of each fiscal year. When all energy measures in an EEP are installed, LEAs must submit a project completion final report 12 to 15 months after the project completion date. This statutory requirement (Public Resources Code Section 26240[b]) is designed to show a full year of energy usage data indicating energy savings after all approved energy measures are installed.

94 LEAs failed to meet the statutory submittal requirement for final project completion reporting during the most recent reporting period. These LEAs are indicated in Appendix D. The CEC will continue to reach out to the LEAs that have not responded. Final project completion reporting is a condition of funding, and nonresponsive LEAs will likely result in a CDE audit finding.

CEC staff forecasts that due to the widespread fires throughout the state in 2020 and the prolonged closure of project site buildings due to the COVID-19 pandemic, the reporting of site energy use intensity will not be possible in most cases. Furthermore, given that most school buildings (project sites) were not open for typical usage during the reporting months of April through June 2020 and beyond for next year's report, the energy use at the school sites would likely be an aberration from normal usage. Moreover, the submission of project completion final reports is likely to be delayed.

## **Cost-Effectiveness Criteria: Savings-to-Investment Ratio**

Public Resources Code Section 26206(c) requires that all projects be cost-effective, and Public Resources Code Section 26235(a)(2)(D) requires the CEC to establish guidelines for methods for cost-effectiveness determination. In the *Proposition 39: California Clean Energy Jobs Act 2016 Program Implementation Guidelines* (2016 Guidelines),<sup>1</sup> the CEC established the savings-to-investment ratio (SIR) as the cost-effectiveness determination, which is calculated based on the net present value of savings divided by project installation costs, subtracting project rebates and other nonrepayable funds.

An EEP must have an SIR of 1.01 or higher to be approved thereby qualifying for funding. This ratio compares the investment the LEA will make now with the savings it will achieve over the life of the project. For every \$1.00 invested, a minimum of \$1.01 must be saved. Savings include energy cost savings and a fixed maintenance savings of 3 percent of the total project installation cost. Finally, non-energy benefits such as health, safety, enhanced comfort better indoor air quality, and improved learning environment may also be considered in the SIR calculation. The CEC values non-energy benefits at a fixed 5 percent of the total project installation cost.

---

1 Antonio, Marites, Haile Bucaneg, Joji Castillo, Cheng Moua, Ryan Nelson, Elizabeth Shirakh, and Joseph Wang. 2016. *Proposition 39: California Clean Energy Jobs Act –2016 Program Implementation Guidelines*. California Energy Commission, Energy Efficiency Division. Current Publication Number: CEC-400-2020-006-CMF. [https://ww2.energy.ca.gov/publications/displayOneReport\\_cms.php?pubNum=CEC-400-2020-006-CMF](https://ww2.energy.ca.gov/publications/displayOneReport_cms.php?pubNum=CEC-400-2020-006-CMF)

In addition, the 2016 Guidelines allow some leveraged funding to be subtracted from the total project cost in the SIR calculation. Examples include nonrepayable funds such as bond funding, deferred maintenance, and general operation budgets.

## **Identifying Energy Savings**

There are many nuanced and unique factors that affect energy usage, such as building operations, student population, building expansion, and weather patterns. School sites with multiple buildings often have one or more energy (electric and natural gas) meters that measure aggregate or total energy consumption, making it difficult to measure and attribute energy savings to specific energy efficiency measures.

The CEC allows LEAs to use several methods detailed in the 2016 Guidelines to report energy savings after completion of an energy project, giving LEAs the flexibility to determine program benefits without the use of formal measurement and verification procedures that would otherwise comprise most of the project costs. These methods include:

1. The Utility Incentive Completion Report.
2. The CEC Energy Savings Calculator.
3. The LEA's own post installation energy savings report.
4. Third-party post installation energy savings report.

## **Project Completion Final Reports (January 31, 2014, to June 30, 2020)**

From the program launch through June 30, 2020, 806 LEAs have completed and installed all measures contained in their EEPs and have submitted 962 project completion final reports. These completed EEPs represent \$673 million in gross project costs. Of this amount, the Proposition 39 K-12 Program provided roughly \$585 million in grant funds and LEAs contributed the remaining \$88 million in leveraged funding. The reported annual energy saved for these completed projects is 224,174 megawatt-hours (MWh) and 620,828 therms, resulting in about 76,821 tons of carbon dioxide (CO<sub>2</sub>) equivalent reduction annually. These completed EEPs represent 199,152 million square feet of conditioned space. Appendix A lists LEAs that have completed construction and have submitted a final project completion report.

Analyses of these reports conclude the combined SIR for these 962 projects is \$1.38 in return for every \$1.00 invested. **Table 10** summarizes the comparison of the last two reporting periods.

**Table 10: Cumulative Summary of Final Project Completion Reports**

<b>Number of Completed EEPs</b>	522	962
<b><i>Funding</i></b>		
<b>Total Gross Project Cost</b>	\$367 million	\$673 million
<b>Prop. 39 Share</b>	\$318 million	\$585 million
<b>Leveraged Funding</b>	\$49 million	\$88 million
<b><i>Annual Energy Savings</i></b>		
<b>kWh Savings</b>	125,712,267	224,174,133
<b>Therm Savings</b>	344,789	620,828
CO <sub>2</sub> equivalent emissions reduction	43,060 tons	76,821 tons
SIR	1.37	1.38
<b>Total Cost Savings</b>	<b>\$23.4 million</b>	<b>\$42.8 million</b>

Source: California Energy Commission

Two trends emerged in reviewing the final project completion reports.

1) Most of the 806 LEAs with completed energy projects experienced a decrease in energy-use intensity (EUI), a metric that measures the energy performance at a school site. The EUI indicates the amount of energy used per square foot of building space per year. It is calculated by dividing the annual energy use (electricity, gas, fuel) by the gross square footage of the school. For this reporting period, on average of 9.43 kilo British thermal units (kBtu) per square foot of space was saved for those projects that have final project completion reports. Those LEAs that did not experience a decrease in EUI identified changes to operating hours, schedules, and increased student populations, which may have accounted for the increase in the EUI.

2) The reported "after" project energy savings in the final project completion reports typically matched or exceeded the estimated energy savings identified in the approved EEPs. If the reported energy savings deviated significantly from the estimated energy savings, most LEAs identified potential reasons for the difference. **Table 11** summarizes the reported EUI data.

**Table 11: Energy Use Intensity Summary**

Total Combined Annual Weighted Average EUI
Before: 92.73 kBtu/square foot
After: 8.303 kBtu/square foot

Source: California Energy Commission

## Annual Progress Reports

The CEC requires LEAs to submit an annual progress report for each EEP that has been submitted. These reports summarize the completion status of energy projects up to June 30, 2020.

CEC staff works closely with LEAs to achieve a high rate of progress report submission. Of the annual progress reports due by September 30, 2020, the CEC received 785, which account for 94 percent of total reports due.

Three hundred and sixty-one annual progress reports, submitted by 348 LEAs, reported that they had completed energy projects but have yet to submit a final project completion report. LEAs are required to submit final project completion reports with post-installation energy savings and energy usage 12 to 15 months after the project completion date. (See Appendix B). Based on the reports, these projects account for \$308 million in gross project costs, which included \$226 million of Proposition 39 K-12 Program funding and \$82 million in leveraged funding from sources such as utility incentives, bonds, deferred maintenance, and general operation budgets.

CEC staff received 382 annual progress reports submitted by 343 LEAs for energy projects not yet completed. LEAs must provide annual progress reports until all energy measures are completed and installed. Based on these reports, LEAs with projects under construction spent \$429 million in gross project costs, which included \$358 million of Proposition 39 K-12 Program funding and \$71 million in leveraged funding. Appendix C lists all LEAs with energy projects in construction stage.

## Implementation Overview

### Program Implementation Summary

The Proposition 39 K-12 Program began six months after former Governor Edmund G. Brown Jr. signed SB 73 in June 2013, which provided the framework and appropriations necessary to carry out the requirements of Proposition 39. The CEC began a comprehensive public process to design and develop the program and the program implementation guidelines. Statewide public outreach included five public meetings and three webinars, which reached more than

500 participants and 180 docket submittals (13-CCEJA-01). On December 19, 2013, the CEC adopted the *Proposition 39: California Clean Energy Jobs Act – 2013 Program Implementation Guidelines* (2013 Guidelines). Once the 2013 Guidelines were adopted, CEC staff expedited program implementation. Starting in January 2014, the CEC released the EEP application forms, program handbook, and energy savings calculators; established an electronic submission process; hired and trained staff members; provided 10 training seminars and two program application instruction webinars that reached more than 800 LEAs statewide; and established a program call center.

The Proposition 39 grant application used by the LEAs was automated with an EEP on-line application system deployed in 2015. This system improved the speed and accuracy of the grant and EEP submission and review process. Two modules were also added to the online system: one for amending approved EEPs and one for submitting required reports. The first annual progress reports were submitted by LEAs in November 2015 and are required to be submitted each year through the end of the program. LEAs could submit new EEPs through February 26, 2018 and can submit amendments after that date adhering to amendment submittal criteria.

The COVID-19 pandemic has led to a dramatic loss of human life worldwide and presents an unprecedented challenge to most aspects of our daily life including the education system. All LEAs have experienced closure of buildings to different degrees since mid-March 2020. This has had a significant impact on our Proposition 39 participating LEAs because they are not able to complete installation of their approved energy projects and gather relevant energy usage data post energy measure installation. To provide relief to this unforeseen impact of COVID-19 impact, the LEAs were granted an opportunity to complete their approved energy projects. A resolution to the *Proposition 39: California Clean Energy Jobs Act – 2020 Program Implementation Guidelines* extended two key program milestone dates: project completion date was changed from June 30, 2020, to June 30, **2021** and the project completion final report due date was changed from June 30, 2021, to June 30, 2022.

## **Program Implementation Updates and Resources**

The CEC provided extensive program communication, outreach, and education through webinars, workshops, conference presentations, press releases, blog posts, listserv announcements, direct phone calls, direct mail, and public meetings. Through these efforts, the CEC identified and addressed barriers to program participation. Since the CEC adopted the 2013 Guidelines, there have been three revisions to address barriers to meet charter school eligibility requirements and for some LEAs to meet the project SIR requirement. In June 2014, the first revision changed charter school eligibility, making it easier for charter schools to participate in the program. Further modifications to the SIR for all LEAs were made in December 2014 and July 2016.

On June 30, 2016, the CEC launched the [Proposition 39 Publicly Searchable Database](#) to meet this legislative requirement and offer a new level of data transparency for these publicly funded programs. With several ways for the public to view detailed program information, the interactive database provides quick searches for Proposition 39 K-12 and community college district (CCD) metrics.

More complex [Proposition 39 K-12 Program research data](#) are also available. This database includes LEA reporting data that are regularly updated, provides clean energy project site information that is reported by LEAs, and includes utility-reported school energy consumption and billing data by school site.

### **Senate Bill 110**

On July 12, 2017, Governor Brown signed SB 110 (Committee on Budget and Fiscal Review, Chapter 55, Statutes of 2017), which included language to extend the Proposition 39 K–12 Program indefinitely.

To give LEAs an opportunity to use any unrequested Proposition 39 K-12 Program grant funds, SB 110 created three additional grant programs and allocated funds for loans and technical assistance. Of the unrequested funds, the first \$75 million was used to fund a School Bus Replacement Program and the remainder (up to \$100 million) was used to fund a competitive Energy Conservation Assistance Act-Education Subaccount (ECAA-Ed) loan program. Although a continuation of a Proposition 39 K-12 Program was also authorized in SB 110, there were not sufficient funds for the program. Any additional program funding is subject to appropriation in the annual budget act.

## **CHAPTER 2:**

# **Energy Conservation Assistance Act — Education Subaccount (ECAA-Ed)**

---

## **Financing Program**

### **Background**

The ECAA-Ed Financing Program is a revolving loan program from the Clean Energy Job Creation Fund that provides zero percent loan financing to eligible entities for energy efficiency, demand reduction, and energy generation projects. All LEAs that are eligible to receive Proposition 39 K–12 Program awards are also eligible to apply for an ECAA-Ed loan for energy-related projects. Loan repayments, based on energy cost savings, are made twice per year once the project is complete for a maximum of 20 years.

In accordance with the authorization of SB 110 (2017), a transfer of funds was received into the ECAA-Ed account. CEC issued a \$36 million program opportunity notice (PON) on a competitive basis for K–12 LEAs to finance a wide range of energy efficiency and renewable energy projects. The PON divided the state into four regions: north, central, south, and Los Angeles County. The PON further categorized the LEAs by size: small (less than 1,000 students), medium (between 1,000 – 2,000 students), and large (more than 2,000 students). Each region was allocated \$9 million, with \$3 million set aside for each size of LEAs. CEC received 21 applications by the due date of May 31, 2019. Out of the 21 applications, 7 were selected for funding for a total of \$6,718,789. The funds not allocated to the awardees are put toward another PON, and the results of that PON will be in FY 20/21 report.

### **ECAA-Ed Funding**

Funding from the Clean Energy Job Creation Fund was allocated to the CEC in Fiscal Years 2013–14 and 2014–15 for zero-interest revolving loans and technical assistance. No funding was allocated in Fiscal Years 2015–16, 2016–17, 2017–18, or 2018–19.

During the 2019-20 fiscal year, the ECAA-Ed Program received funding in accordance with the authorization of SB 110. **Table 12** shows the funding received.

**Table 12: ECAA-Ed Financing and Bright Schools Program Allocations**

Fiscal Year	ECAA-Ed Financing (Energy Project Loans)	Bright Schools (Technical Assistance)	TOTAL
2013-14	\$25,291,524	\$2,708,476	\$28,000,000
2014-15	\$25,200,000	\$2,800,000	\$28,000,000
2015-16	0	0	0
2016-17	0	0	0
2017-18	0	0	0
2018-19	0	0	0
2019-20	38,524,000	0	38,524,000
<b>TOTALS</b>	<b><u>\$89,015,524</u></b>	<b><u>\$5,508,476</u></b>	<b><u>\$94,524,000</u></b>

Source: California Energy Commission

### Approved Loans

As of June 30, 2020, the CEC approved 42 ECAA-Ed loans. This amount represents \$64.5 million of the \$89.0 million originally allocated to the loan program. ECAA-Ed loan recipients request loan fund disbursements based on paid invoices submitted to the CEC for reimbursement. A loan recipient's total reimbursement request may be less than the approved loan amount because of a scope change or a reduction in actual total project cost. Any funds remaining in the loan account are liquidated and used to fund additional ECAA-Ed loans.

Of the 42 approved loans, 34 loan recipients have completed projects representing nearly \$56.1 million in loans. Of this amount, \$52.4 million was disbursed to loan recipients, and the remaining \$3.8 million was liquidated and returned to ECAA-Ed account.

**Appendix E** summarized the approved and completed loans and the cumulative expenditures of each loan as of June 30, 2020.

### Project Completion Final Reports

Resources Code Section 26240(b) requires each loan recipient to submit a project completion final report 12 to 15 months after the project completion date. A project is considered complete when all loan-funded energy measures are installed. This statutory condition is designed to provide, among other informational items, a full year of energy usage data after all approved energy measures have been installed.

As of June 30, 2020, 31 loan recipients submitted project completion final reports. These projects saved 21,514,871 kilowatt-hours (kWh) and 15,286 therms, which are equivalent to

7,114 tons of reduced CO<sub>2</sub> equivalent emissions annually. Reported energy savings resulted in an annual energy cost savings of \$2.4 million. Appendix F summarizes the energy data obtained from these loan recipients

### **Remaining Funds**

As of June 30, 2020, approximately \$8,079,614 of the original loan funds remained in the ECAA-Ed account, which includes earnings generated by the account. An additional \$3,435,437 was returned to the fund because of liquidation from loan-funded projects that were completed under budget.

### **Repayments and Defaults**

Loan repayments are made twice yearly after the loan project is complete and are based on annual energy cost savings. To date, all borrowers have met their loan obligations, and the ECAA-Ed Financing Program has not experienced any defaults.

## **Bright Schools Program**

### **Background**

The Bright Schools Program (BSP) helps public K–12 schools and community colleges identify energy saving projects in existing buildings. The program provides a range of technical assistance services, including energy audits, third-party proposal reviews, and professional engineering support.

### **Funding**

Public Resources Code Section 25416(d) authorizes the CEC to set aside up to 10 percent of the Clean Energy Job Creation Funds for technical assistance to help eligible entities identify Proposition 39 K–12 Program energy efficiency, demand reduction, and generation projects. In Fiscal Years 2013–14 and 2014–15, the BSP received \$5.5 million. It has not received funding in subsequent fiscal years.

Through a competitive contract solicitation, the CEC selected a prime contractor and a team of professional energy engineers to assist with and support the objectives of the BSP. **Table 13** shows program expenditures as of June 30, 2020.

**Table 13: Bright Schools Program Encumbrance and Expenditures as of June 30, 2020**

Allocations, Encumbrances, and Expenditures	
Total Allocation	\$5,600,000
Amount Reallocated to ECAA-Ed Loan Program	\$91,524
Contract Amount Encumbered	\$5,508,476
Expenditures as of 6/30/20	\$3,373,506
Contract Balance	<b><u>\$2,134,970</u></b>

Source: California Energy Commission

Of the \$5.6 million allocated to the program, roughly \$5.5 million had been encumbered as of June 30, 2020. The remaining \$91,524 was reallocated to the ECAA-Ed Loan Program in 2015, resulting from unused funds from a previous BSP support contract.

Expenditures of \$3,373,506 have provided technical assistance to 173 LEAs and community colleges to identify cost-effective energy projects. At least 80 BSP energy audit reports have been successfully used to support Proposition 39 K-12 EEPs.

The balance in the amount of \$2,134,970 was returned to the ECAA-Ed Loan Program when the contract expired in January 2020.

### Energy Audit Reports

BSP energy audits have identified energy measure opportunities at 343 school sites. These energy measure recommendations represent an estimated potential annual energy savings of nearly 28,647 MWh of electricity and 305,025 therms of natural gas, which are equivalent to 11,135 tons of reduced CO2 equivalent emissions annually. The estimated annual energy cost savings are \$4.6 million. The identified energy measures would require an investment of more than \$70 million and would be eligible for utility incentives of nearly \$2.5 million.

**Appendix G** lists the details of the information above and includes the energy savings metrics and Proposition 39 K-12 Program funding spent for program participants.

# CHAPTER 3:

## School Bus Replacement Program

---

### Solicitations

The School Bus Replacement Program used a two-phased approach to select buses for funding. During the first phase, staff released a solicitation in May 2018 titled *School Bus Replacement for California Public School Districts, County Offices of Education, and Joint Power Authorities* (GFO-17-607). This grant funding opportunity allowed all school districts, COE, and joint power authorities (JPA) in California to apply for up to 10 buses for replacement.

The CEC received more than 200 applications totaling over 1,600 diesel school buses requested for replacement, the oldest of which was a 1978 diesel school bus. Individual school buses were evaluated based on three factors: age of bus, applicant's percentage of free and reduced-price meals recipients (FRPM), and applicant's disadvantaged community score from CalEnviroScreen 3.0, a web-based mapping application developed by the California Air Resources Board. Preference was given to applicants with higher percentages of FRPM and disadvantaged community scores. From the applications received, an initial list of ranked buses was released in November 2018.

The second phase of the program kicked off in November 2018, with a solicitation to select an electric school bus manufacturer(s) or dealer to design, construct, and deliver electric school buses to the public school districts, COEs, and JPAs that applied for the replacement of its school buses. The purpose of this solicitation was to establish a bulk purchase price for school districts, COEs, and JPAs. Applications were evaluated and scored for the technical evaluation portion based on the following criteria: relevant experience and qualifications; project readiness and implementation; client references; battery and fuel range; warranty, service, and support; innovation; economic benefits to California; and ability to leverage funding. Applications passing the technical evaluation advanced to the next screen, where the lowest-cost bid was selected for each school bus type (Type A, Type C, Type D, and each type with or without chair lifts). The bus bid forms were ranked in order from lowest to highest cost per bus by bus type.

### Awards

Table 14 shows a breakdown of each awarded manufacturer's bid amount for each bus type. The Lion Electric Co. was the awardee for the Type A electric school bus without wheelchair lift, and the Type C and D electric school buses with and without wheelchair lift. A-Z Bus Incorporated was the awardee for electric school bus Type A with wheelchair lift.

**Table 14: School Bus Replacement Program Manufacturers' Bid Amounts**

Applicant	Bus Type	Bid Amount
The Lion Electric Co.	Type A Without Chair Lift	\$269,489
A-Z Bus Sales, Inc. – California (Micro Bird)	Type A With Chair Lift	\$291,524
The Lion Electric Co.	Type C Without Chair Lift	\$319,284
The Lion Electric Co.	Type C With Chair Lift	\$327,727
The Lion Electric Co.	Type D Without Chair Lift	\$330,109
The Lion Electric Co.	Type D With Chair Lift	\$337,467

Source: California Energy Commission

Once the manufacturers were selected, CEC staff allocated funding based on bid price using the rank list to determine which applicants would be awarded funding for new buses. From the initial rank list of buses, the CEC funded 235 electric school buses. The applicants received funding for the replacement school bus, with an additional \$60,000 in infrastructure funding per bus. The infrastructure funding came from the Clean Transportation Program (formally known as the Alternative Renewable Fuel and Vehicle Technology Program).

**Table 15** shows a breakdown of the number of awardees, number of buses awarded, and the total bus and infrastructure awards in each of the four regions. Nearly 90 percent of the awardees are in disadvantaged communities. Since the last COB report, some schools decided not to accept awards or changed the types of buses originally awarded based on various needs of each district. As a result, the CEC was able to award buses to additional school districts in various regions, continuing to fund the next buses in line on the rank list.

**Table 15: Description of School Bus Replacement Program Awards**

Region	Number of Awardees	Number of Buses Awarded <sup>2</sup>	Total Bus Award	Total Infrastructure Award
North	18	59	\$18,757,482	\$3,600,000
Central	23	58	\$18,656,366	\$3,420,000
Los Angeles	15	61	\$18,695,665	\$3,660,000
South	11	57	\$18,590,844	\$3,420,000
<b>Totals</b>	<b>66</b>	<b>235</b>	<b><u>\$74,700,357</u></b>	<b><u>\$14,100,000</u></b>

Source: California Energy Commission

In July 2019, the CEC approved most of the electric school bus replacement and manufacturing agreements. Recipients with fully executed agreements are placing orders with manufacturers for new battery-electric school buses and working with their local utilities to install the necessary electric infrastructure.

The table below shows the CEC's timeline for anticipated bus delivery. At the close of 2019, 11 of the 235 buses funded were delivered to school districts. By the end of 2020, 61 of the 235 buses were delivered to school districts. The CEC expects to have all buses delivered by September 2022.

**Table 16** below indicates the estimated timeline for bus deliveries.

**Table 16: Estimated Bus Delivery Timeline**

Cumulative Percentage of Delivered Buses	Latest Bus Delivery Date
5%	12/31/2019
25%	12/31/2020
50%	12/31/2021
100%	9/30/2022

Source: California Energy Commission

---

<sup>2</sup>The number of buses awarded to each region differed based upon the cost of each bus type requested in each school district.

## **Infrastructure**

The CEC is working with electric utilities, both public and investor-owned, to assist in upgrading the electrical infrastructure required to charge the awarded buses while emphasizing the need to plan for future electrical capacity needs. Electric vehicle supply equipment (EVSE) is required to be, at a minimum, an AC Level 2 network charger. AC Level 2 network chargers operate between 208-240 volts and provide charging rates ranging from 3-19.2 kW. The network description means that these chargers are programmable so the user can determine the conditions that need to be met for charging to occur, including low energy costs or an abundance of renewable energy on the grid. Also, EVSE is required to be ENERGY STAR®-certified, and capable of charging a vehicle at a minimum of 6.2 kilowatts (kW); however, the CEC recommends EVSEs capable of charging at 19.2 kW. Networked EVSEs provide recipients with the ability to set charging for buses to off-peak demand hours, provide remote diagnostics, and allow remote start of connected vehicles. The CEC has funded 25 chargers as of November 2020 and expects to fund 230 chargers by the end of the program.

## **Workforce Development**

In anticipation of the CEC's School Bus Replacement Program, the CEC began to work with California schools in 2018 to understand the importance and role of school bus training for zero-emission school bus technology. Schools expressed a need for training for school bus maintenance and service technicians, as well as training for bus operators for battery-electric technology. As part of their application for the School Bus Replacement Program, nearly 200 applicants identified a need for workforce development.

In 2019, the CEC approved a \$1.0 million contract with Cerritos Community College to develop and implement the "Electric School Bus Training Project." Cerritos Community College developed the curriculum with the Southern California Regional Transit Training Consortium (SCRTTC) and college faculty throughout the state. Faculty from the colleges will provide the training in the school bus regions, through a hybrid of in-person and online training.

The training project includes automotive instructor-led training to maintenance and service technicians for 96 hours. The training project also includes school bus operator training for 12 hours. The training content includes the following:

- Electric Vehicle School Bus and Charging Infrastructure Familiarization
- Circuit Diagnostic with Digital Volt Ohm Meter
- Computerized Engine Management Systems
- Complexity of the Harness and Computer Functions in the Modern Chassis
- Programmable Logic Controller Input/Output Systems Diagnostics
- Network Systems Electronics Diagnosis and Repair
- Electric Bus Driver Training Familiarization

On March 5, 2020, the CEC, with Cerritos Community College, conducted an “Electric School Bus Technician Training Project: Kick-Off Webinar”. The purpose of the webinar was to orient schools to the training project, explain the logistics of training, and answer questions.

School bus manufacturers and electric vehicle charging infrastructure companies also offer training to new electric school bus owners along with warrantied and ongoing support. Some of the examples of training include the following:

- The Lion Electric Company has developed learning centers in the state (Lion Academy), offering training to technicians and drivers, as well as support for customers through the steps of the purchase process for an electric school bus.
- A-Z Bus Sales also provides driver training and mechanic safety training for battery electric school buses.
- Sunline Transit Agency in the Coachella Valley is the host site for the federally funded Federal Transit Administration’s West Coast Center of Excellence in Zero Emission Technology (CoEZET). Sunline has developed a workforce training program focused on maintaining and operating zero-emission buses in public transit fleets and envisions this training being offered to schools in the future.
- Twin Rivers Unified School District in Sacramento has refined and developed its own in-house training program to familiarize school bus drivers with the new zero-emission school buses and infrastructure technology.

## **Next Steps**

With the nation’s shutdown due to COVID-19, the School Bus Replacement Program experienced setbacks in expected delivery timelines, as manufacturers experienced supply chain disruption and halts in manufacturing.

During the shutdown, CEC staff implemented processes to minimize program delays. For example, staff streamlined electronic invoicing systems to expedite payment to school districts. Furthermore, staff conducted virtual bus inspections on behalf of school districts, with the agreement between all parties that buses could be held at manufacturing plants until schools could reopen and arrange to take delivery of the buses. As manufacturing plants and districts begin to reopen, the CEC and school bus manufacturers are working with the school districts to get bus deliveries back on track. By the end of 2020, at least 25 percent of the 235 buses will still be delivered to school districts.

The CEC will continue to work with the manufacturers and school districts to meet and exceed targeted deliveries for the remainder of the school buses. The CEC will also be working with all stakeholders to collect data, such as operating and maintenance costs, driving range, and annual mileage, to quantify the benefits of electric school buses

## Benefits

Cost savings analysis of electric school buses over their diesel counterparts indicates a lifetime fuel savings cost of about \$28,000, or roughly 27 percent savings per bus.<sup>3</sup> Electric school buses require less maintenance than their diesel counterparts due to the reduction of moving components within the electric drivetrain and motor of the vehicles, providing a greater ability to minimize time out of operation. The reduction of operating costs provides recipients an incentive to adopt zero-emission vehicle (ZEV) technologies for bus fleets.

The CEC's School Bus Replacement Program will help reduce tailpipe emissions of smog-forming nitrogen oxides by 98,000 lbs. and toxic diesel soot by more than 2,500 lbs.<sup>4</sup> Minimizing exposure to hazardous emissions reduces the risk to adolescent bus riders of developing respiratory diseases such as asthma and helps the state achieve emissions reductions goals.<sup>5</sup>

Moreover, vehicle-to-grid (V2G) enabled electric school buses have the potential added benefit of serving grid operators, including balancing renewable peaks and valleys, as well as providing excess capacity and bulk storage when needed, which could be utilized as a revenue source by bus operators. V2G enabled battery electric school buses have the potential to reduce electricity generation related greenhouse gas emissions by 1,420 tons of CO<sub>2</sub> equivalence and eliminate \$18,300 of air pollution externalities over their lifetime (Ercan, et al. 2016)<sup>6</sup>. School buses have been determined to be a good application for V2G because of the large batteries, predictable duty cycles, and long down times throughout the day when energy demand is greatest. These factors can also provide on-site resiliency in the case of an emergency power shutoff by the utility or during a catastrophic event such as a wildfire.

---

<sup>3</sup> Based on 13,000 average annual miles.

<sup>4</sup> Toxic diesel soot is fine particulate matter that is 2.5 microns or less in diameter.

**Appendix E**  
**Energy Conservation Assistance Act - Education Subaccount (ECAA-Ed)**  
**Approved and Completed Zero Interest Energy Loans**  
**Cumulative as of June 30, 2020**

Loan Number	Local Education Agency or Community College District Name	Business Meeting Approval Date	Project Completion Date (Completed Projects only)	Final Project Competition Report (FPCR) Due Date* (Completed Projects only)	Approved Loan Amount	Funds Expended**	Project Summary	Status/Comments
001-13-ECG	Sanger Unified School District	5/14/2014	12/31/2016	FPCR Complete	\$1,242,492	\$1,064,779.58	Install energy efficiency measures at three facilities.	Project Complete. Funds expended is the final disbursed amount.
001-14-ECG	Pittsburg Unified School District	7/22/2014	7/31/2017	FPCR Complete	\$1,766,665	\$1,465,000.00	Install a 150 kW PV system, lighting retrofits for 9 schools, and occupancy controls for HVAC systems at 3 schools.	Project Complete. Funds expended is the final disbursed amount.
002-14-ECG	Tulare City School District	10/7/2014	12/31/2015	FPCR Complete	\$3,000,000	\$3,000,000.00	Install PV at 8 schools.	Project Complete. Funds expended is the final disbursed amount.
003-14-ECG	Hartnell Community College District	8/27/2014	4/1/2016	FPCR Complete	\$3,000,000	\$3,000,000.00	Upgrade boiler and install solar PV.	Project Complete. Funds expended is the final disbursed amount.
004-14-ECG	Kern Community College District	10/7/2014	12/31/2015	FPCR Complete	\$3,000,000	\$3,000,000.00	Install a solar PV at Porterville College	Project Complete. Funds expended is the final disbursed amount.
005-14-ECG	Yuba Community College District	10/7/2014	12/15/2014	FPCR Complete	\$710,000	\$710,000.00	Install a new EMS system and VFD control for a well pump.	Project Complete. Funds expended is the final disbursed amount.
006-14-ECG	Campbell Unified School District - Rosemary Elementary	11/17/2014	12/16/2016	FPCR Complete	\$794,812	\$740,302.72	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
007-14-ECG	Campbell Unified School District - Rolling Hills Middle School	11/17/2014	12/16/2016	FPCR Complete	\$692,584	\$540,530.62	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
008-14-ECG	Campbell Unified School District - Marshall Lane Elementary	11/17/2014	12/16/2016	FPCR Complete	\$478,754	\$399,802.42	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
009-14-ECG	Campbell Unified School District - Lynhaven Elementary	11/17/2014	12/31/2015	FPCR Complete	\$65,887	\$65,887.00	Install energy efficiency measures.	Project Complete. Funds expended is the final disbursed amount.
010-14-ECG	Campbell Unified School District - Forest Hill Elementary	11/17/2014	12/16/2016	FPCR Complete	\$534,346	\$477,586.42	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
013-14-ECG	Campbell Unified School District - Castlemont Elementary	11/17/2014	12/31/2015	FPCR Complete	\$81,218	\$78,652.00	Install energy efficiency measures.	Project Complete. Funds expended is the final disbursed amount.
014-14-ECG	Campbell Unified School District - Blackford Elementary	11/17/2014	12/16/2016	FPCR Complete	\$513,000	\$337,551.73	Install a PV system.	Project Complete. Funds expended is the final disbursed amount.
015-14-ECG	Campbell Unified School District - Sherman Oaks Elementary	11/17/2014	12/16/2016	FPCR Complete	\$1,084,933	\$1,019,759.46	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
016-14-ECG	Campbell Unified School District - Monroe Middle School	11/17/2014	12/16/2016	FPCR Complete	\$1,078,750	\$739,657.08	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
017-14-ECG	Campbell Unified School District - Capri Elementary and Village School	11/17/2014	12/16/2016	FPCR Complete	\$796,007	\$619,447.62	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.
018-14-ECG	Campbell Unified School District - Campbell Middle School and Corporate Yard	11/17/2014	12/16/2016	FPCR Complete	\$1,378,638	\$1,378,638.00	Install energy efficiency measures and a PV system.	Project Complete. Funds expended is the final disbursed amount.

Loan Number	Local Education Agency or Community College District Name	Business Meeting Approval Date	Project Completion Date (Completed Projects only)	Final Project Competition Report (FPCR) Due Date* (Completed Projects only)	Approved Loan Amount	Funds Expended**	Project Summary	Status/Comments
011-14-ECG	Newport Mesa Unified School District	11/17/2014	2/29/2016	FPCR Complete	\$3,000,000	\$3,000,000.00	Install renewable energy measures.	Project Complete. Funds expended is the final disbursed amount.
019-14-ECG	Monterey Peninsula Unified School District	12/10/2014	9/25/2015	FPCR Complete	\$3,000,000	\$3,000,000.00	Install 820.6 kW PV system.	Project Complete. Funds expended is the final disbursed amount.
020-14-ECG	Chico Unified School District	4/8/2015	12/15/2015	FPCR Complete	\$3,000,000	\$2,588,712.21	Install PV systems at 5 schools.	Project Complete. Funds expended is the final disbursed amount.
021-14-ECG	Sequoias Community College School District	2/25/2015	12/17/2015	FPCR Complete	\$3,000,000	\$2,981,074.36	Install a 0.798 MW PV system.	Project Complete. Funds expended is the final disbursed amount.
023-14-ECG	Sylvan Union School District	4/8/2015	11/30/2016	FPCR Complete	\$1,799,839	\$1,461,700.70	Install energy efficiency measures at 8 schools, District Office, Central Kitchen, and Maintenance Facility.	Project Complete. Funds expended is the final disbursed amount.
001-15-ECG	Salida Union School District	7/8/2015	10/21/2016	FPCR Complete	\$2,054,469	\$2,054,469.00	Install energy efficiency measures and photovoltaic installations at multiple District facilities	Project Complete. Funds expended is the final disbursed amount.
002-15-ECG	Montague Elementary School District	8/12/2015	8/25/2016	FPCR Complete	\$419,520	\$419,520.00	Install energy efficiency measures and renewal energy measures at District facilities.	Project Complete. Funds expended is the final disbursed amount.
003-15-ECG	Durham Unified School District	9/9/2015	6/30/2017	FPCR Complete	\$2,000,000	\$1,282,606.67	Install a total of 575.1 kW PV.	Project Complete. Funds expended is the final disbursed amount.
004-15-ECG	Vista del Mar Union School District	10/14/2015	-	-	\$0	\$0.00	Install a 55 kWdc PV.	Cancelled
005-15-ECG	Oroville Union High School District	12/9/2015	6/30/2017	FPCR Complete	\$2,800,000	\$2,800,000.00	Install 839 kW roof and parking structure mounted PV system.	Project Complete. Funds expended is the final disbursed amount.
006-15-ECG	Soledad Unified School District	3/9/2016	3/27/2017	FPCR Complete	\$2,000,000	\$1,851,350.96	Install a total of 463 kW PV.	Project Complete. Funds expended is the final disbursed amount.
007-15-ECG	Benicia Unified School District	5/17/2016	4/24/2018	FPCR Complete	\$3,000,000	\$3,000,000.00	Install a 721.35 kWdc PV	Project Complete. Funds expended is the final disbursed amount.
001-16-ECG	Woodlake Unified School District	7/13/2016	8/16/2017	11/16/2018*	\$1,000,000	\$1,000,000.00	Install a 324.4 kWdc PV	Project Complete. Funds expended is the final disbursed amount.
002-16-ECG	Waterford Unified School District	11/9/2016	6/30/2018	9/30/2019	\$708,227	\$550,541.00	Install exterior and interior lighting including controls at two schools.	Project Complete. Funds expended is the final disbursed amount.
003-16-ECG	Berryessa Union School District	4/12/2017	8/31/2018	FPCR Complete	\$911,000	\$848,134.00	Install more efficient interior lights, exterior lights and lighting controls.	Project Complete. Funds expended is the final disbursed amount.
004-16-ECG	Princeton Joint Unified School District	6/14/2017	-	-	\$0	\$0.00	Install a 110.55 kWdc PV.	Cancelled
001-17-ECG	Soledad Unified School District	10/11/2017	6/20/2018	9/20/2019	\$3,000,000	\$3,000,000.00	Install a 675 kWdc PV.	Project Complete. Funds expended is the final disbursed amount.
002-17-ECG	Alpaugh Unified School District	1/17/2018	3/1/2020	6/1/2021	\$2,100,000	\$1,751,910.00	Install a 410.4 kWdc PV.	Project Complete. Funds expended is the final disbursed amount.
003-17-ECG	Sequoia Union High School District	1/17/2018	3/1/2020	6/1/2021	\$2,200,000	\$2,200,000.00	Install a 777.0 kWdc PV.	Project Complete. Funds expended is the final disbursed amount.
004-17-ECG	Merced Community College District	2/21/2018	-	-	\$1,627,600	\$1,489,094.00	Install a 525.0 kWdc PV.	Implementation
001-19-ECG	Eureka City Schools	12/11/2019			\$463,733	\$0.00	Install a 132 kWdc PV	Implementation
002-19-ECG	Southern Humboldt Unified School District	12/11/2019			\$1,048,320	\$0.00	install a 279 kWdc PV	Implementation
003-19-ECG	Cutten Elementary School District	12/11/2019			\$182,560	\$0.00	install a 52 kWdc PV	Implementation
004-19-ECG	Classic Academy High School	12/11/2019			\$585,565	\$181,031.00	install a 170 kWdc PV	Implementation

Loan Number	Local Education Agency or Community College District Name	Business Meeting Approval Date	Project Completion Date (Completed Projects only)	Final Project Competition Report (FPCR) Due Date* (Completed Projects only)	Approved Loan Amount	Funds Expended**	Project Summary	Status/Comments
005-19-ECG	Mattole Unified School District	12/11/2019			\$44,800	\$0.00	install a 12.8 kWdc PV	Implementation
006-19-ECG	Palm Springs Unified School District	12/11/2019			\$1,643,480	\$0.00	install a 495 kWdc PV	Implementation
007-19-ECG	Parlier Unified School District	12/11/2019			\$2,750,331	\$2,064,000.00	install a 898.5 kWdc PV and indoor and outdoor LED lightiing retrofit	Implementation
<b>TOTAL</b>	<b>44</b>		34		<b>\$64,557,530</b>	<b>\$56,161,738.55</b>		
\$0.00						\$47,925,162.55		

\* Final Project Completion Report due but not received.

\*\*Amounts in bold are the final loan funds disbursed for completed projects.

**Summary:**

<b>Total Number of Loans</b>	<b>42</b>
<b>Number of Loans Approved</b>	<b>44</b>
<b>Loans cancelled</b>	<b>2</b>
<b>Number of Loans in Implementation</b>	<b>8</b>
<b>Number of Completed Projects/Loans</b>	<b>34</b>
<b>Number of Projects/Loans with FPCR</b>	<b>29</b>

<b>Total Funds Approved</b>	<b>\$64,557,530.00</b>
<b>Total Funds Expended</b>	<b>\$56,161,738.55</b>
<b>Remaining Funds for Projects in Implementation</b>	<b>\$5,118,040.00</b>
<b>Funds from Projects Completed under Budget</b>	<b>\$3,435,437.45</b>
<b>Total Funds for Completed Loans</b>	<b>\$52,427,613.55</b>

FPCR	<b>\$43,925,162.55</b>
no FPCR	<b>\$4,550,541.00</b>
const.	<b>\$3,734,125.00</b>

## Glossary—List of Acronyms/Definitions

---

Acronym/Term	Definition
2013 Guidelines	The Proposition 39: California Clean Energy Jobs Act - 2013 Program Implementation Guidelines
2016 Guidelines	The Proposition 39: California Clean Energy Jobs Act - 2016 Program Implementation Guidelines
ADA	Average daily attendance - The average number of students per school day. Average Daily Attendance- total days of student attendance divided by the total days of instruction
Btu	British thermal unit - The quantity of heat required to raise the temperature of one pound of water by one degree Fahrenheit.
CalEnviroScreen 3.0	The California Communities Environmental Health Screening Tool.
California Clean Energy Jobs Act	Also known as Proposition 39, it allocates revenue to local educational agencies to support energy efficiency and renewable energy projects.
CCD	Community college district - A type of special district with administrative and fiscal independence created to oversee public community colleges.
CDE	California Department of Education - The department responsible for overseeing the state's public school system and enforcing education law and regulation.
CEC	California Energy Commission, formally the Resources Conservation and Development Commission.
CO <sub>2</sub>	Carbon dioxide - A heavy, odorless, incombustible gas.
COB	Citizens Oversight Board - The board created in PRC Section 26210 that provides accountability, independent audits, and public disclosure of all Proposition 39 program funding.
COE	County Office of Education - The agency serving as an intermediary between the California Department of Education and local school districts.

<b>Acronym/Term</b>	<b>Definition</b>
ECAA-Ed	Energy Conservation Assistance Act-Education Subaccount - A revolving loan program funded by the Clean Energy Job Creation Fund.
EEP	Energy expenditure plan - The request by an LEA for Proposition 39 funding. The energy expenditure plan is submitted to the CEC and includes technical description and specifications for proposed eligible energy measures.
Energy Measure	An installation or modification in a school site that improves energy efficiency or expands clean energy generation.
EUI	Energy-use intensity - The amount of energy used in a building relative to the size of the building, based on kBtu of energy per square foot of conditioned space.
EVSE	Electric vehicle supply equipment – The charging equipment for electric vehicles.
FRPM	Free and reduced-priced meals - Meal discounts made available to students from households that meet total household income parameters.
HVAC	Heating, ventilation, and air conditioning - The technology of indoor environmental comfort.
JPA	Joint power authorities - Two or more public agencies jointly exercising powers, limited by the combined territorial jurisdictions of the individual agencies.
K-12	Kindergarten through 12th grade - The sum of primary and secondary publicly supported education.
kBtu	KiloBtu-1,000 British thermal units.
kW	Kilowatt-1,000 watts.
kWh	Kilowatt-hour - Energy unit used in measuring electrical power, the work done by 1 kilowatt acting for one hour.
LEA	Local educational agency - A county office of education, school district, charter school, or state special school.
MWh	Megawatt-hour - Energy unit used in measuring electrical power, the work done by 1 megawatt acting for one hour.
PV	Photovoltaic - A technology designed to convert sunlight to electricity using semiconducting materials.

<b>Acronym/Term</b>	<b>Definition</b>
SB	An acronym for Senate Bill – Legislation originating in the California State Senate.
School Bus Type A	A school bus made of a bus body constructed upon a cutaway front-section vehicle with a left driver's door, designed to carry 10 or more people.
School Bus Type C	A school bus often called a "conventional" bus, the body is installed upon a flat-back cowl chassis with gross vehicle weight rating of more than 10,000 pounds, designed for carrying more than 10 persons. All of the engine is in front of the windshield and the entrance door is behind the front wheels.
School Bus Type D	A "transit-style" school bus, with a body installed upon a chassis, with the engine mounted in the front, mid-ship, or rear with a gross vehicle weight rating of more than 10,000 pounds, and designed for carrying more than 10 persons. The engine is often behind the windshield and beside the driver's seat (referred to as forward-engine or "FE"), or it may be at the rear of the bus, behind the rear wheels (rear-engine or "RE"). The entrance door is ahead of the front wheels.
SIR	Savings-to-investment ratio - The SIR is the ratio of the present value savings to the present value costs of an energy efficiency measure or alternative energy generation.
Vehicle-to grid(V2G) enabled electric school buses	Bi-directional charging via use of a type 1 combined charging system.
ZEV	Zero emissions vehicle – A vehicle that emits no exhaust gas from the onboard source of power.
