California Schools Healthy Air, Plumbing, and Efficiency Plumbing Program

Noncompliant Plumbing Fixtures and Appliances WorksheetsAugust 2021

- 1. Automatic Ice Maker
- 2. Clothes Washer
- 3. Commercial Dishwasher
- 4. Interior Faucet
- 5. Showerhead
- 6. Toilet
- 7. Urinal

These worksheets are made available to help program participants gather the information needed to complete an application for the California Schools Healthy Air, Plumbing, and Efficiency (CalSHAPE) Plumbing Program, which includes documentation of existing noncompliant plumbing fixtures and appliances, proposed replacement water-conserving plumbing fixtures and appliances, and replacement costs. The worksheets are intended to be used for optional gathering purposes only so completion does not constitute a CalSHAPE Plumbing Program application. To comply with grant requirements and be eligible for funding, participants must submit a CalSHAPE Plumbing Program application electronically by entering the required information through the CalSHAPE Online System as set forth in the most recent CalSHAPE Plumbing Program Guidelines.

These worksheets were designed and offered with a technician in mind that may not always have an electronic device to use when recording data. These worksheets can be printed out and then written on in the field. The information can later be typed into the required CalSHAPE Plumbing Program application submitted electronically to the CalSHAPE Online System.

The CalSHAPE Plumbing Program Guidelines, these worksheets, and other program requirements such as a data reporting and processes are subject to change by the California Energy Commission. It is the participant's responsibility to ensure it is using the most recent version of these worksheets and otherwise complying with the current requirements of the CalSHAPE Plumbing Program.
