

# Housekeeping

- This DAWG meeting builds off the Energy Commission's effort to update travel models for the California Energy Demand Forecast.
- Presentation materials and agenda are posted on the DAWG website. Links are in the chat. This meeting is not recorded.
- Please post questions or comments in the chat or save them for the end of each presentation. Use the "raise hand" feature to ask questions.
- Please email questions or comments to [Elena.Giyenko@energy.ca.gov](mailto:Elena.Giyenko@energy.ca.gov)

# Overview of California Travel Choice: Miles and Energy

Demand Analysis Working Group Meeting

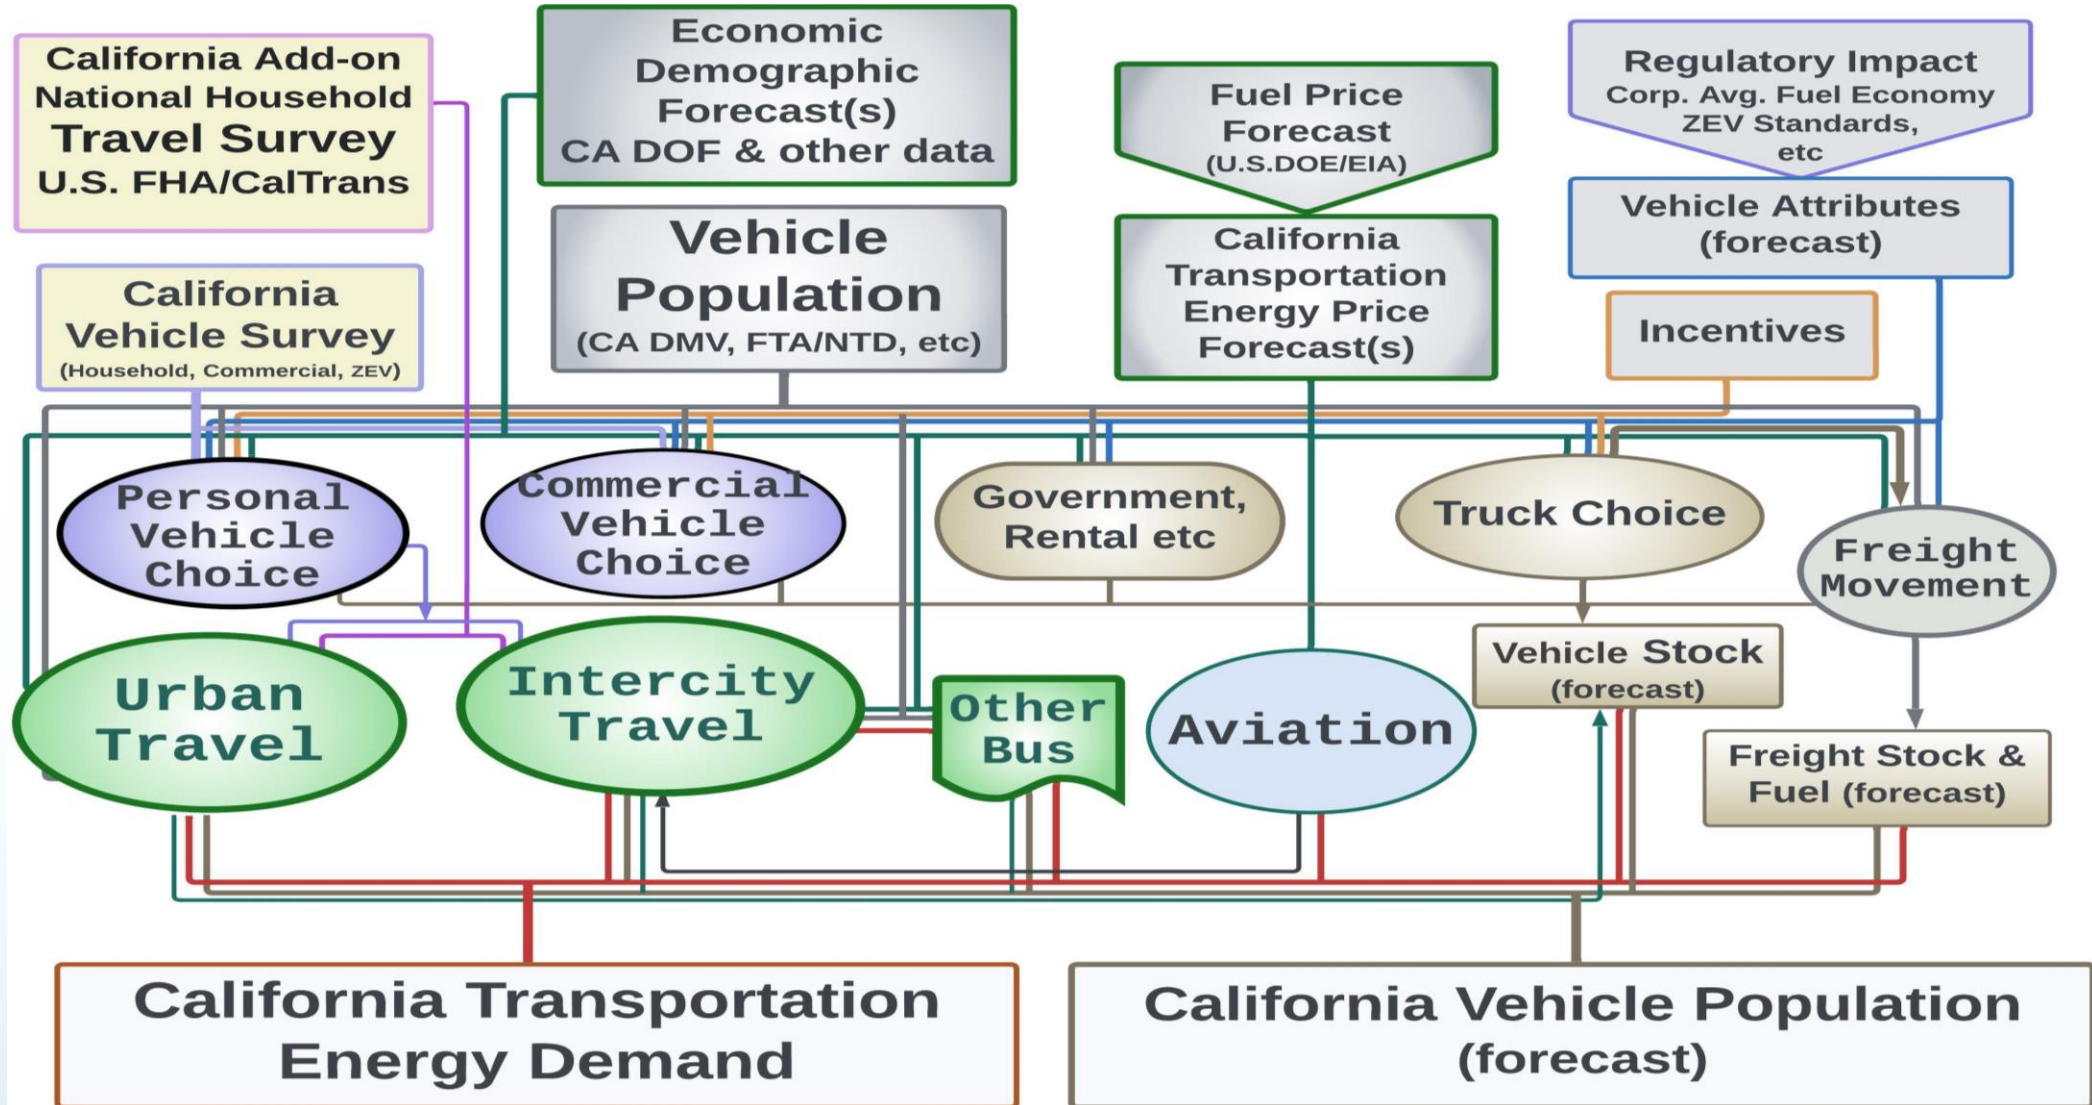

Elena Giyenko

July 31, 2023

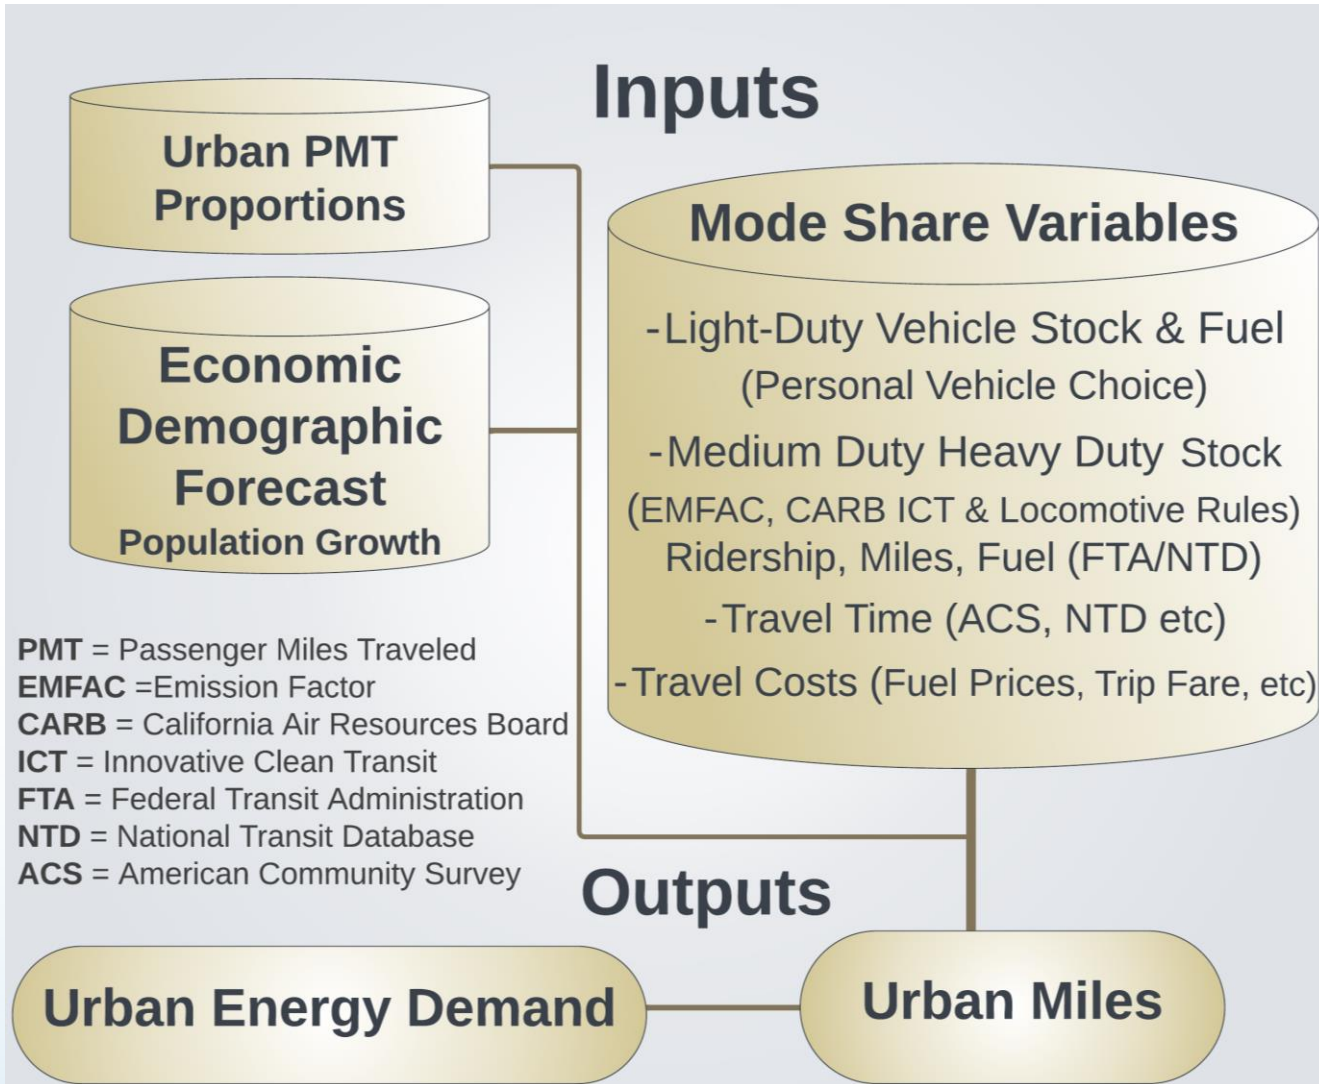

# Travel Choice Models in the Context of California Transportation Energy Demand

# Urban Travel Model

## California Miles & Energy Demand Trips < 50 miles

### American Community Survey 2021

- 94.2% live in urban areas
- 72.1% solo drive to work
- 21.4% worked from home

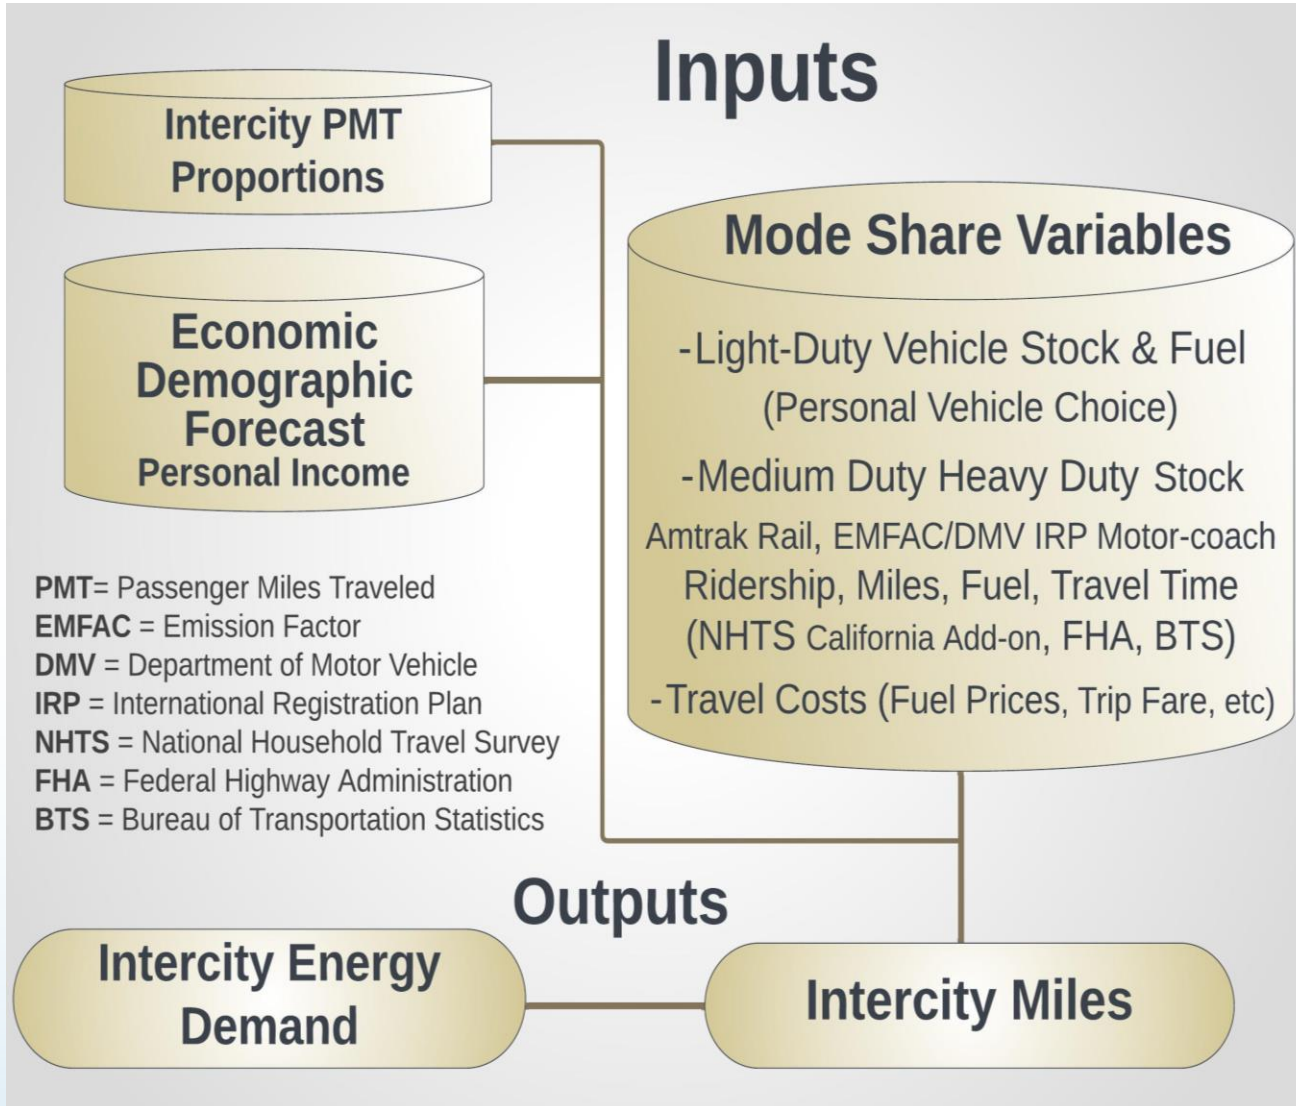

### Journey to Work (one way)

**Drive Alone: 27.6 minutes**  
**Public Transit: 51.4 minutes**

# Intercity Travel Model

California Miles & Energy Demand  
Trips > 50 miles

Significant differences from Urban  
due to distinct factors & sensitivities

- Auto
- Motorcoach
- Amtrak Rail
- Air Travel

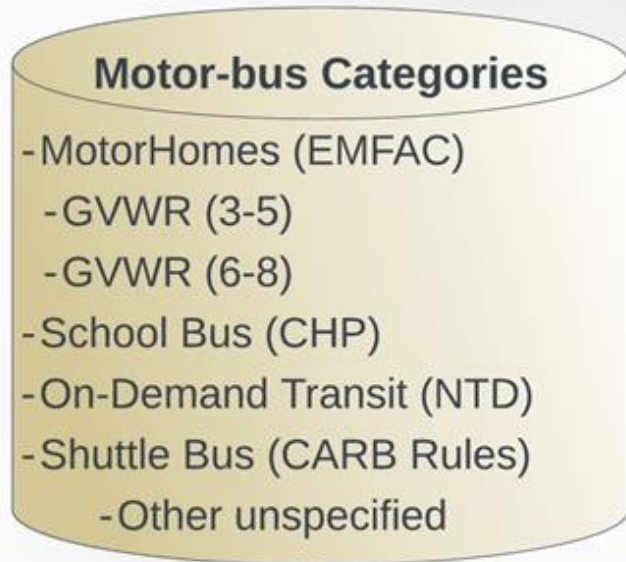

Unique Challenges

- Data Availability & Complexities
- Time-Consuming Modeling

# OtherBus Model

## Inputs

## Output

**OtherBus Energy Demand**

EMFAC = Emission Factor  
CHP = California Highway Patrol  
VMT = Vehicle Miles Traveled  
GVWR = Gross Vehicle Weight Rating  
NTD = National Transit Database  
CARB = California Air Resources Board

Motorbus categories **not** covered in Urban and Intercity

- Motorhomes
- School buses
- Shuttlebuses
- On-demand transit
- Other unspecified

OtherBus does **not** generate vehicle miles, but miles can be mapped to EMFAC.

# Improving and Expanding

## Existing Core Categories

Light-Duty Vehicles: Personal, Commercial, Government, Rental, NEV

Medium- and Heavy-Duty Vehicles: Urban/Intercity Bus, OtherBus

Rail: Amtrak, Commuter, Light, Heavy, Hybrid, Trolleys, Cable Cars

Aviation

## New Additions

Microtransit

CMS (TNC & CAV)

eVTOL

Marine

**NEV** = Neighborhood Electric Vehicles

**CMS** = Clean Miles Standard

**TNC** = Transportation Network Company

**CAV** = Connected Autonomous Vehicle

**eVTOL** = Electric Vertical Take Off and Landing
