The California Energy Commission (CEC) will host the 2023 Clean Energy Hall of Fame Awards (HOF Awards), an annual event recognizing six leaders advancing California’s clean energy goals. The HOF Awards honor individuals making exceptional contributions to help California achieve a 100 percent clean energy future for all.

CEC Chair David Hochschild will facilitate the event and a quorum of CEC Commissioners may participate, but no votes will be taken. The public is invited to attend and participate in the event consistent with the direction provided below.

Agenda

Commissioners and other special guests will join to provide remarks during the awards ceremony and congratulate the winners. The CEC will also showcase video footage of the incredible work contributed by each winner. The six winners have an opportunity to address the audience and share their experience. The CEC will also recognize the Selection Committee of this year's awards cohort.

Background

The HOF Awards is an annual event designed to honor the leadership and outstanding achievements of Californians who help advance the state's clean energy goals. The awards aim to motivate and inspire all stakeholders to continue to lead California to a 100 percent clean energy future by 2045. As California Governor Gavin Newsom said, "We will never waver on achieving the nation's most ambitious clean energy goals." The HOF Awards winners are helping the state achieve these goals.
