

# BUILD

Building Initiative for Low-Emissions Development Program

## Technical Assistance

Through the BUILD Program, building owners, developers, architects, design engineers, and contractors for new all-electric affordable housing have access to no-cost technical assistance from BUILD’s team of experts.

The BUILD Technical Assistance team has deep experience with all-electric building systems, and we are here to help!

### We provide:

-  Incentive layering consultation
-  Guidance on all-electric best practices across building systems
-  Preparation for the new era of all-electric buildings
-  Project specific assistance
-  Operations and maintenance training on all-electric systems
-  Post-occupancy systems support

### Get Started Today

To request Technical Assistance (TA), submit a [Technical Assistance Application](#)

To view full details on program requirements and eligibility, review the [BUILD Program Guidelines](#)

## Some areas where we can help include

### Equipment Selection

- Heating and cooling equipment selection and options analysis
- High performance and low-energy ventilation systems
- Energy storage systems, solar PV, and virtual net energy metering assistance

### Operations and Maintenance

- Efficient operations and maintenance of all-electric systems
- Occupant comfort, health, and safety impacts of energy systems

### Design Advice

- Heat pump water heating system best practices
- Building envelope performance improvement

### Overall Guidance

- Advising at all stages of all-electric housing from design through permitting, construction, commissioning, and operations
- Layering of incentives between multiple new construction programs
