**Subject: RIDGECREST SOLAR POWER PROJECT, DATA ADEQUACY RECOMMENDATION (09-AFC-9)**

On September 1, 2009, the California Energy Commission received an Application for Certification (AFC) from Solar Millennium LLC for the Ridgecrest Solar Power Project. The proposed project is a concentrated solar powered, electric generating facility. The process for electric power generation would be to utilize parabolic trough, solar collectors to concentrate solar energy onto heat collection elements that contain a fluid, known as "heat transfer fluid" (HTF). After being heated in the solar troughs, the HTF is run through a heat exchanger where it converts water into steam. In the next stage, the steam is converted into electricity utilizing a Rankine-cycle reheat, steam turbine, electric generator. The project would have a nominal electrical output of 250 megawatts (MW).

The project is proposed to be developed on a 3,920-acre site, administered by the Bureau of Land Management (BLM). The project site is located in northeastern Kern County, along U.S Highway 395, just west of the China Lake Boulevard exit. The site is approximately four miles southwest of Ridgecrest, California. The community of Ridgecrest is at the southwestern boundary of the China Lake Naval Air Weapons Station (NAWS).

During the October 7, 2009 Business Meeting, the Commission adopted staff's recommendation and found the AFC to be data inadequate in ten areas: Air Quality, Biological Resources, Cultural Resources, Land Use, Project Overview, Socioeconomics, Soils, Transmission System Design, Water Resources and Worker Safety. The applicant subsequently filed a supplemental AFC. Staff has completed its data adequacy review of the supplemental AFC and has determined that it does meet all the requirements listed in Title 20, section 1704, and Division 2, Chapter 5, Appendix B of the California Code of Regulations for the 12-month process. Therefore, staff recommends that the Energy Commission accept the AFC as data adequate.

Attached is a summary table and data adequacy worksheets for all technical disciplines. At the Energy Commission's November 18, 2009 Business Meeting, I will recommend that the Commission accept the AFC as data adequate. If you have any questions, please contact Eric Solorio, staff's Project Manager, at (916) 651-0966.
